Abstracts of Ph. D. Theses	35
Abstracts of M. Sc. Theses	45

FOREWORD

It is most gratifying that the previous issues of the Journal have received wide recognition and aroused renewed interest and hopes among agricultural economists. Volley of letters received in this regard from the professionals speak volume about the urgency of such an effort and the proven ability in very short time of the Association to meet the aspirations. As one can see through the issues, the Journal is improving both in quantity and quality. It is pledged that the Journal will soon emerge as one of the leading publications in India in agricultural economic research. The Journal intends to add a section on "Communication" in its subsequent issues. Your valuable suggestions and help in working of the Association and improving the quality of its publications are welcome.
