¹Commodities ready for sale to ultimate consumer.

²Fresh and dried.

³Consumer size packages, Dec. 1977 = 100.

⁴Commodities requiring further processing to become finished goods.

⁵For use in food manufacturing.

⁶Products entering market for the first time which have not been manufactured at that point.

⁷Includes all processed food (except soft drinks, alcoholic beverages, and manufactured animal feeds) plus eggs and fresh and dried fruits and vegetables.

n.a. = not available.

¹Quantity in pounds, retail weight unless otherwise shown. Data on calendar year basis except for dried fruits, fresh citrus fruits, peanuts, and rice which are on a crop-year basis.

²Preliminary

³Commercial production for sale as fresh produce.

⁴Including fresh equivalent of processed.

⁵White, whole wheat, and semolina flour including use in bakery products.

Note: Historical consumption and supply-utilization data for food may be found in *Food Consumption, Prices, and Expenditures*. Statistical Bulletin 656. USDA.

Market Basket of Farm Foods

¹Market basket statistics are based on the weighing structure of the Consumer Price Index for all urban consumers, (CPI-U). Retail costs are based on indexes of retail prices for domestically produced farm foods from the CPI-U published monthly by the Bureau of Labor Statistics. The farm value is the payment to farmers for quantity of farm product equivalent

to retail unit, less allowance for byproduct. Farm values are based on prices at first point of sale and may include marketing charges such as grading and packing for some commodities. The farm-retail spread, the difference between the retail price and the farm value, represents charges for assembling, processing, transporting, and distributing these foods.
