Contributors to this publication were Susan A. Libbin, H. Christine Collins, Mary Darhanian, and Floyd D. Gaibler. Principal coordinators were Robert L. Tontz, Thomas A. Warden, and Thomasine McCall, World Analysis Branch, International Economics Division, Economics, Statistics, and Cooperatives Service, Washington, D.C. 20250.

DIGEST

U.S. Agricultural Exports Total \$32 Billion In Fiscal Year 1979 (see p. 4). New volume and value records were established for farm product exports during fiscal year 1979, despite transportation problems. Volume of principal commodities exceeded 137 million tons, up 4 percent from a year earlier. Value climbed 17 percent to almost \$32 billion. The fiscal year agricultural trade surplus advanced to \$15.8 billion.

U.S. Agricultural Imports Hit Record \$16 Billion In Fiscal Year 1979 (see p. 37). U.S. agricultural imports reached a record of \$16 billion in fiscal year 1979, 16 percent higher than last year. There were value gains in all major noncompetitive products, except cocoa powder, and in all competitive items, except poultry and sugar.

Ocean Freight Rates For Major Agricultural Exports (see p. 61). Increased export demand for grain and higher bunker fuel costs caused ocean freight rates to escalate sharply in the second quarter of 1979. Rates are expected to continue upward in the fourth quarter and well into next year. Ocean vessel availability is believed to be adequate for transporting grain at the present time.

Selected Prices Of International Significance (see p. 66). Agricultural export and import prices in September were mixed, with wheat prices up and corn and soybean prices registering somewhat lower. Fiscal year 1979 export prices gained more than imports.

Agricultural Exports To 50 Major Countries, 1973-78 (see p. 72). Nine countries imported over \$1 billion in U.S. farm products last year, compared with six in 1977. Over 90 percent of all U.S. agricultural exports went to 50 countries.

U.S. AGRICULTURAL EXPORTS TOTAL \$32 BILLION IN FISCAL YEAR 1979

U.S. farm product exports totaled a recordbreaking \$32 billion in the fiscal year ending September 30, 1979, up 17 percent from their previous high of \$27.3 billion in 1977/78. Value records were established for several leading commodities including corn, soybeans, sunflower seeds, soybean meal, cotton, tobacco, animal products, fruits, and vegetables. Price increases accounted for about three-fourths of the increase in U.S. agricultural exports between fiscal year 1978 and fiscal year 1979.

Agricultural export volume, totaling over 137 million tons, also set a new record. Aggregate tonnage for principal farm product shipments abroad was up nearly 4 percent from last year's rate, despite transportation difficulties. A lengthy strike by employees of a major midwestern rail line, abandonment of service on parts of another railway system in the Montana-Iowa region, and the 82-day grain handlers' strike at Duluth-Superior clogged transportation networks. Diverted traffic flows further strained congested barge routes on rivers north of St. Louis.

The agricultural trade surplus widened further in fiscal year 1979, while continuing its upward trend. Farm product exports exceeded imports by \$15.8 billion, compared with \$13.4 billion during fiscal year 1978. U.S. agricultural exports have exceeded imports by an average of \$1.4 billion in recent months.

Agricultural exports to most foreign countries were higher this past year than in previous years. Demand for farm products increased fastest in Asian countries, especially in the People's Republic of China, Taiwan, Korea, and Pakistan. Eastern European and Latin American demand also escalated rapidly.

Eight countries imported more than \$1 billion in U.S. agricultural products in fiscal year 1979, up from six countries last year. Four other countries imported more than \$900 million of U.S. agricultural products versus only three in 1977/78.

Corn was again the largest single foreign exchange earner among U.S. agricultural exports in 1978/79, exceeding soybeans and wheat by a wide margin. Corn export tonnage experienced a 10-percent gain over fiscal year 1978, while higher prices raised value by 18 percent to \$6 billion. Rapid demand growth in Asian and Eastern European countries, combined with continued large purchases by the U.S.S.R., more than offset reduced shipments to Western Europe, Mexico, and Africa (table 6). Fiscal year 1979 exports were equivalent to 30 percent of the 1978 U.S. corn crop, about the same proportion as a year earlier, but well above the 27-percent share of 2 years ago.

Export volume for soybeans, the second-ranked foreign exchange earner behind corn, moved up less than 3 percent from year-earlier rates. However, higher prices raised value by almost 15 percent to \$5.4 billion. Foreign demand shifted toward Asian countries and the U.S.S.R., while exports to the European Community (EC) receded (table 7). Tugboat operator strikes in Holland, and anticipation of a better Brazilian crop yield affected fourth quarter sales to EC countries. Soybean oil cake and meal exports established a 5.9-million ton record, valued at just under \$1.4 billion. Soybean product exports during fiscal year 1979 were equivalent to 55 percent of the U.S. output.

Wheat exports in fiscal year 1979 slipped below the 31.8 million tons shipped during 1977/78, but value jumped 18 percent because of higher prices. Demand sources shifted to East Asian countries, Mexico, and the U.S.S.R., and away from the EC, South America, Iran, and North Africa (table 8). Transportation delays, especially the 12-week strike at Duluth-Superior and the tugboat operators' strike in Rotterdam during September, reduced export performance significantly. Fiscal year 1979 exports were equivalent to 64 percent of U.S. wheat production, up from a 57-percent share the previous year.

Table 1--Agricultural, nonagricultural, and total trade balance

Item	October-September		September

1/ PRELIMINARY

U.S. AGRICULTURAL IMPORTS HIT RECORD \$16 BILLION IN FISCAL YEAR 1979

U.S. agricultural imports totaled \$16 billion in fiscal year 1979, 16 percent higher than last year. There were value gains in all major noncompetitive products, except cocoa powder, and in all competitive items, except poultry and sugar.

Noncompetitive product imports totaled \$7 billion, 8 percent above a year ago. Green coffee--accounting for over half of all noncompetitive imports--rose only 5 percent in value, but about 25 percent in volume due to lower prices earlier in the year. Unit import prices of green coffee fell from \$1.65 per pound in fiscal year 1978 to \$1.39 per pound in fiscal year 1979. However, since April, green coffee import prices have risen, climbing to the year's high of \$1.65 per pound in September--its highest monthly level this fiscal year. Traditionally, the United States imports green coffee from over 30 countries, but in fiscal year 1979, four countries--Colombia, Brazil, Mexico, and Indonesia--supplied half of the U.S. total. All major suppliers except Peru, the Dominican Republic, and Uganda increased their export quantities.

Rising prices caused some of the value gains experienced for such noncompetitive imports as bananas, cocoa beans, and rubber. There were also value increases for soluble coffee, chocolate preparations, cocoa butter, tea, and spices. Value declines occurred for cocoa powder and roasted coffee because their unit import prices fell.

Competitive product imports totaled over \$9 billion in fiscal year 1979, 25 percent above last year's level. Meat and meat product imports contributed to most of this \$1.8 billion gain (fresh and frozen beef and veal comprised over two-thirds of all meat imports). Fresh and frozen beef and veal imports rose nearly 80 percent in value, as a result of reduced production and rising prices, while unit import prices rose over 50 percent. Import quantities increased by 16 percent. Australia supplied nearly half of all beef and veal imports, and New Zealand supplied one-fifth.

Other major competitive imports that increased in value were live animals, dairy products, hides and skins, fruits, vegetables, nuts, vegetable oils, tobacco, wine, and malt beverages. Live animal imports rose 13 percent, with gains occurring mainly in dutiable cattle (mostly from Canada and Mexico) and horses. Dairy product imports gained one-fifth, while hides and skins jumped by nearly one-third.

Fruit and fruit preparation imports totaled \$647 million, a 37-percent increase, mainly in concentrated orange juice from Brazil. U.S. production continued low due to the winter freeze in 1977. Other gains occurred mostly in apple juice, canned pineapple, and frozen strawberries.

Imports of vegetables and vegetable preparations, at \$778 million, were only slightly higher in fiscal year 1979 as fresh tomatoes--the major vegetable import--declined. Tomatoes accounted for about 20 percent of all vegetable imports in 1979.

Vegetable oil imports reached \$607 million, about one-third higher than last year. Coconut oil--accounting for nearly 60 percent of all vegetable oil imports--rose considerably in value due to a 60-percent rise in unit import prices. The quantity of imported coconut oil declined slightly. Value of palm oil imports remained nearly the same, but declined about 23 percent in volume as the price rose by 26 percent.

Wine imports experienced a value gain of 22 percent and malt beverages rose by 44 percent, partly due to higher prices. Tobacco imports gained about 8 percent in value and volume.

Sugar imports totaled \$852 million, 3 percent less than last year's. Reduced import fees in April and anticipated fee increases for July resulted in high imports in May and June. Effective September 1, 1979, import fees were reduced by 1 cent per pound to 2.36 cents for raw and 2.88 cents for refined sugar.

Traditionally, the United States imports sugar from over 35 countries, but in fiscal year 1979, 6 countries supplied nearly two-thirds of the total. Brazil shipped 23 percent; the Dominican Republic, 17 percent; the Philippines, 11 percent; Argentina, 5 percent; Peru, 4 percent; and Guatemala, 3 percent. Substantial declines occurred in sugar imports from the Philippines and Australia, while sugar imports increased from most other major suppliers in fiscal year 1979. The Philippines--the leading supplier--provided 20 percent of all sugar imports and Australia provided 10 percent in fiscal year 1978. Brazil supplied 15 percent of all sugar imported in fiscal year 1978, but its trade rose by half in fiscal year 1979.

1/ PRELIMINARY

OCEAN FREIGHT RATES FOR MAJOR AGRICULTURAL EXPORTS

by
Mary Darhanian and Floyd D. Gaibler 1/

Transportation of heavy grains and soybeans by ocean vessels has remained very active since early 1978 because of the high demand for U.S. grain. Grain inspections for export totaled nearly 83 million metric tons during January-September, slightly ahead of last year's record pace.

Exports of wheat, feedgrains, and soybeans for 1978/79 totaled 111 million metric tons. Exports of these commodities during the 1979/80 season are projected to increase to 130 million metric tons, thus insuring a continued strong demand for ocean vessels.

Ocean freight rate activity for heavy grains during 1979 has been well above 1978 levels. Grain export volume, which picked up briskly in late 1977, prompted high rates during the first two quarters of 1978. Rates fell during the third quarter (the traditional summer slump) but regained momentum in the final quarter (table 17).

Rates from the Great Lakes and St. Lawrence River ports picked up in the first quarter of 1979, with the opening of the navigation season. Increased bunker fuel costs were primarily responsible for the sharp rise in freight rates during the second quarter. Many charter rates began including an escalation clause for bunker fuel costs, as a result of the tremendous rise in world oil prices.

Ocean freight rates began to decline in the third quarter, reflecting the normal slowdown in July and August. However, rates remained firm from some port areas, particularly the Pacific Coast. Increased activity in September strengthened rates. Thus, with the prospects for record grain exports and speculation of future price increases for energy, ocean freight rates for transporting heavy grains will likely continue an upward trend in the fourth quarter and well into next year.

The United States and the Soviet Union recently reached an agreement to increase freight rates on U.S. grain shipped to the U.S.S.R. in American flag vessels. A flexible structure, tied to an agreed rate index formula, will be implemented instead of a fixed rate of \$18.25 per ton. The rate paid for U.S. flag vessels would be \$27.46 per ton based on the U.S. Gulf to Antwerp-Rotterdam-Amsterdam rate and the index. The new rate becomes effective January 1, 1980. However, because many U.S. tanker vessels are on long-term charter to oil companies, and dry bulk carriers are transporting P.L.-480 grain, grain products, and military cargo, it is unlikely that a larger share of U.S. grain will be shipped in American flagships.

Thus far this year, U.S.-flag vessels have shipped only 3 percent of the grain exported to the Soviet Union. The Soviets transported 22 percent, while third-flag carriers accounted for the bulk of the shipments. U.S.-flag vessels have the option to transport up to 33 percent of the grain cargo to Soviet ports under the terms of the U.S.-U.S.S.R. Maritime Agreement of 1972.

1/ Statistical assistant and agricultural economist, respectively, Transportation Section, National Economics Division, Economics, Statistics, and Cooperatives Service, U.S. Department of Agriculture.

Soviet chartering of ocean vessels has been active and has contributed to the strength of the dry cargo charter market throughout this year. It now appears that they have made most of their long-term shipping arrangements for the coming year.

The Canadian and U.S. governments have granted a 3-day extension of the St. Lawrence Seaway shipping season which was scheduled to end on December 15. Various farm groups and port authorities urged the extension because of the record fall corn and soybean harvests, high foreign grain demand, and the 11-week old labor strike which idled grain elevators at Duluth-Superior.

Nonetheless, extending the closing date will require the U.S. and Canadian governments to pay for icebreaking and pilot services. Also, icebreaking could disrupt some Canadian power plant operations resulting in a loss of generated power. Accident risks for ocean vessels could rise dramatically, causing shipments to incur additional expenses. Finally, any extended use of the seaway is almost entirely dependent on favorable weather.

There appears to be a sufficient supply of ocean vessel capacity to meet world trade demands for heavy grains. However, the availability of ships to meet export demand at peak periods will influence the level of ocean freight rates.

The inventory of the world merchant fleet continues to grow in both numbers and size, with bulk carriers and tankers experiencing the largest growth. Total deadweight tonnage of bulk carriers was 179 million tons in 1977, compared with only 13 million tons in 1960 and 77 million tons in 1970 (table 18). Tanker capacity, some of which is used to transport heavy grains, increased almost 456 percent from 63 to 350 million deadweight tons. Freighters experienced a 57-percent growth over the 18-year period. The average size of bulk carriers and tankers increased more than threefold from 1960 to 1977. Average size of freighters increased only 14 percent for the same time period.

Freighters and bulk carriers in the privately owned merchant fleet of the United States have experienced a continuous decline in total numbers and deadweight tonnage since the late sixties, although bulk carrier numbers and capacity increased in 1978. Nonetheless, their average size has increased and freighters have experienced a 56-percent growth. U.S. bulk carriers' average capacity, although up 110 percent, remains well below that of the world merchant fleet.

Privately owned U.S. tankers experienced a steady decline in numbers and little change in deadweight tonnage until 1973. Tanker numbers since then have risen 17 percent, with tanker capacity increasing more than 80 percent. Average capacity increased from 34,100 tons in 1973 to 52,400 tons in 1979. Average U.S. tanker capacity--as with freighters and bulk carriers--is below that of the total world merchant fleet.

SELECTED PRICES OF INTERNATIONAL SIGNIFICANCE

U.S. export and import prices remained mixed throughout September, as wheat prices continued to strengthen and prices for corn and soybeans slackened.

Continued increases in U.S. Hard Winter wheat prices (to \$4.86 a bushel) resulted from 1979/80's outlook for reduced world wheat production. Most of the price climb can be attributed to the demand for U.S. Hard Winter wheat. The U.S. export price for Dark Northern Spring wheat rose less than that of Hard Winter. Canada's wheat crop is expected to be down 17 percent from last year's and the Soviet grain crop is now smaller than originally forecast.

The Gulf ports price for corn declined slightly to \$3.06 a bushel in September. In spite of a record U.S. corn harvest, strong export demand has kept prices from falling further. The large U.S. soybean crop caused the Gulf ports price for soybeans to tumble to \$7.49 a bushel.

The Bangkok price for rice continues to strengthen, and has reached \$360 a ton. Most of the decline in this year's rice production occurred in India. Burma, Indonesia, and Japan are also expecting slight declines.

The Osaka price for U.S. cotton strengthened to 74 cents a pound, as China has been steadily purchasing cotton, despite the influence of a larger U.S. cotton crop.

Beef prices rebounded to \$1.31 a pound in September. The import price reflects the rise in domestic prices that resulted from the downturn in U.S. cattle placements in feedlots.

The New York price for coffee rose to \$2.09 a pound, largely because of producing countries' attempts to hold back new crop supplies in order to keep prices steady. Roasters occasionally buoyed prices by making sizeable purchases, especially during the month of September.

The Caribbean price for sugar rose sharply, while the New York spot price remained steady at 16 cents per pound. Recent strength in sugar prices has come from the hope that the U.S. Congress would pass price support legislation for domestic sugar, which would also clear the way for an International Sugar Agreement. Damage by Hurricane David in the Dominican Republic (one of our major suppliers) buoyed Caribbean raw sugar prices.

The New York cocoa beans futures market strengthened slightly to \$1.41 a pound. Ghana, a major supplier, continued to have political problems, which included abolition of the Ghana cocoa marketing board in favor of a council.

Crude rubber prices rebounded to 65 cents a pound in September. Wheat, corn, soybeans, cotton, beef, coffee, and rubber are all priced higher than they were a year ago.

Fiscal Year 1979 Export Prices Higher Than a Year Ago

Strong export demand resulted in U.S. export prices averaging 11 percent above 1977/78. Wheat, feedgrains, soybeans, soybean products, cotton, tobacco, tallow, and whole cattle hides were all priced higher in 1978/79 (table 20). Milled rice and nonfat dried milk were the only products experiencing price declines. Fiscal year 1979's wheat export unit value reached \$150 a ton, 20 percent higher than a year ago. The reduced 1978/79 U.S. wheat crop, together with larger U.S. export commitments, helped boost prices.

The U.S. export unit value for corn rose 9 percent to \$115 a ton, while the soybean price rose 11 percent to \$279 a ton. The U.S. export price for cotton reached \$1.42 per kilogram. Third-quarter price movements were largely a continuation of the developments that occurred earlier in the year.

Fiscal year 1979 U.S. import prices rose 7 percent from a year ago. Fiscal year 1979 import prices for coffee averaged 15 percent lower than they were in 1978, because of larger supplies. Sugar prices remained steady despite larger available stocks. Beef and coconut oil were the largest price gainers in fiscal year 1979.

Third-quarter U.S. agricultural import prices averaged 17 percent higher than those a year earlier. Imported coffee and sugar prices recovered from the slump that had occurred earlier in the year. Summer-quarter imported beef prices were higher than they were a year ago, although they declined somewhat from the spring quarter. Terms of trade indexes indicate U.S. export prices rose faster than import prices in 1979.

				100.4		99.4			103.4

1/ UNIT VALUES WERE COMPUTED FROM THE VALUE AND QUANTITY FIGURES PUBLISHED IN FOREIGN AGRICULTURAL TRADE OF THE UNITED STATES.

AGRICULTURAL EXPORTS TO 50 MAJOR COUNTRIES, 1973-78

The value of U.S. farm product exports totaled a record \$29.4 billion in calendar year 1978, 67 percent above 1973's \$17.6 billion and 24 percent above 1977's \$23.6 billion. In 1978, 9 countries took over \$1 billion in U.S. agricultural commodities versus only 6 countries in 1977. Japan continued to be the largest market by a wide margin.

Over 90 percent of all agricultural exports from the United States went to 50 countries. The value series for 17 principal commodity groups, and tonnages for 10 leading export items are presented for 1973-78 (tables 22 and 23). Also, a 2-year value series of total agricultural exports to more than 150 countries appears.

Large amounts of agricultural exports are transshipped through Canada and the Netherlands. Therefore, data showing adjusted U.S. exports by destination are shown in table 24. Regionally, Asia has taken a larger proportion of U.S. farm products while the share to Western Europe has declined.

Growth in U.S. exports between 1973 and 1978 was greatest for feedgrains, oilseeds, cotton, tobacco, fruits, tree nuts, vegetables, hides, tallow, meat, vegetable oils, and rice. Export values expanded faster than tonnages due to the rapid increase in prices.
