Food Assistance and Nutrition Research Program

Final report: Fiscal 2002 Activities

Mission: Research for a Healthy, Well-Nourished America

**Food Assistance &
Nutrition Research Program**

Food Assistance & Nutrition Research Program

Mission: Research for a Healthy, Well-Nourished America

Program at a Glance

USDA's Economic Research Service (ERS) has responsibility for conducting studies and evaluations of the Nation's domestic food and nutrition assistance programs, including the Food Stamp Program (FSP), the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), and the Child Nutrition Programs. ERS established the Food Assistance and Nutrition Research Program (FANRP) to carry out this responsibility. FANRP's research on these programs is designed to meet the critical information needs of the program managers, policy officials, the research community, and the public at large.

In developing research priorities, FANRP works closely with USDA's Food and Nutrition Service (FNS), the agency responsible for administering the Department's food assistance and nutrition programs. FANRP also seeks input from a broad constituency of policy officials, researchers, practitioners, advocates, industry groups, and service providers. In conjunction with these activities, FANRP sponsors an annual roundtable discussion to identify crucial research and information needs that would support food assistance and nutrition

programs and to ensure the policy- and program-relevance of the annual research agenda. Perennial program themes are diet and nutritional outcomes, food-program targeting and delivery, and program dynamics and administration.

FANRP projects utilize the capabilities of both external researchers and ERS staff. FANRP funds a portfolio of extramural projects through competitive contracts and through a tightly run peer review process for awarding competitive grants and cooperative agreements. Peer reviewers include experts from academia, government, and the private sector. FANRP projects benefit from the involvement of ERS researchers and ERS's long and distinguished history of conducting rigorous, objective, and policy-relevant research. FANRP also sponsors a Small Grants Program to stimulate new research and to broaden the participation of social and nutrition science scholars in food assistance and nutrition policy issues. Research results are widely disseminated in accordance with FANRP principles. This report provides a brief summary and overview of FANRP.

Research Mission and Goals

Food assistance and nutrition programs receive substantial funds and affect the daily lives of millions of Americans. In fiscal 2002, monthly participation in the FSP averaged 19.1 million Americans, at an annual cost of approximately \$20.6 billion. On average, WIC served 7.5 million women, infants, and children each month, at an annual cost of \$4.3 billion. On a typical school day, some 8.1 million children participated in the School Breakfast Program and 27.9 million children participated in the National School Lunch Program, which altogether cost \$8.3 billion in fiscal 2002. Given the importance of the food and nutrition assistance programs, FANRP research must be of the highest integrity. Accordingly, one of FANRP's founding principles is to provide scientifically rigorous studies and evaluations with verifiable and unbiased results.

FANRP is building on ERS's strong foundation of solid, objective, and timely research. ERS has a long, rich history of analyzing food assistance and nutrition programs and the economics of food choice, nutrition intake, and diet quality. An annotated bibliography, *Two Decades of Excellence*, compiles 20 years of ERS research accomplishments in the areas of food assistance, poverty and well-being, food choices, and nutrition. FANRP research benefits from that tradition, and from the expertise and contributions of ERS staff to current FANRP projects.

"A Healthy, Well-Nourished America" is our research mission. Our goal is a high-quality, multidisciplinary program that focuses on today's problems while addressing tomorrow's issues.

Program Principles

The program principles behind FANRP ensure the reliability and usefulness of the research.

- Research that meets the needs of all stakeholders—program participants, USDA, Congress, and the public
- Scientifically rigorous studies and evaluations with verifiable and unbiased results
- Integrated, comprehensive program that conducts research in the broader context of the current and future economic and social environments
- Rigorous internal and external review of research results
- Broad array of public and private entities directly involved in the research, evaluation, and review efforts
- Public availability of data
- Integration of ERS staff expertise in the development, implementation, and accomplishment of research projects
- Wide distribution of research findings
- Development and maintenance of continuous data sets

Program Highlights, Fiscal 1998-2002

Congressionally Mandated Studies. FANRP has conducted six mandated studies:

- Fruit and Vegetable Pilot Program Evaluation
- Infant Formula Prices and Availability
- Plate Waste in School Nutrition Programs
- WIC Cost-Containment Practices
- State Use of Funds To Increase Work Slots for Food Stamp Recipients
- Study of Meal Reimbursement Changes for Family Daycare Homes

Fiscal 2002 Priority Research Areas and New Projects. FANRP responds to immediate and long-term research needs through its annual identification of priority research areas. In fiscal 2002, FANRP's topics included (see table 1 for additional details):

- *Program Design and Operations.* This research area has projects that examine new operational procedures, administrative costs, and participation. Two projects look at coordination of services for food assistance program participants, while two other projects consider options and waivers in the FSP and innovative practices in WIC. The relationship between participants and administrative costs is examined by another project.
- *Food Program Access and Caseload Dynamics.* Projects in this area examine conditions and policies that affect client access to and participation in food assistance programs. This area includes a major project on Food Stamp Program participation by the elderly. Other projects examine food adequacy among current and former welfare recipients in South Carolina; continued support for the Devolution and Urban Change project; and a survey of clients of the emergency food assistance system.
- *Food Security.* Projects in this area consider food security as an outcome measure or as a factor that affects other important outcomes. Research in this area examines the State-level factors that affect food security; developing a food security survey for children and youths; and the relationship between food security and behavior and health of kindergarten and first-grade children.
- *Program Integrity and Effectiveness.* This research area has projects that examine program eligibility criteria, the receipt of program benefits by ineligible households, administrative efficiencies, and various dimensions and measures of program performance. One major project designs a study of USDA school meal programs that jointly examines meal costs and nutrition. Other projects examine the Summer Food Service Program (SFSP); WIC cost-containment practices; modeling WIC eligibility and participation; and evaluating school meal performance.
- *Obesity.* Projects in this area examine the causes and consequences of overweight and obesity, conditions that affect many clients of food assistance programs. Research topics in this area examine U.S. trends in associations of eating patterns and Body Mass Index; the development of eating patterns and obesity in black girls; nutrition-related risk factors for chronic disease among female minority Food Stamp Program participants; and a workshop on obesity involving leading health economists.
- *Behavioral Nutrition.* This growing research area considers the economics of food choices, social marketing and other behavioral factors that influence nutrition intakes. One project in this area examines two types of potential errors in a child's self-reported dietary intake. Smaller projects consider such topics as assessing food taxes that are intended to promote healthful eating habits, and modeling household demand for fruits and vegetables and for beverages
- *Nutrition, Health Outcomes, and Dietary Behavior.* Projects in this area examine the eating patterns and diet quality of young adults; how restrictions on competitive food sales in schools affect the dietary patterns of middle-school students; development of a children's nutrition-behavior questionnaire; international anthropometric references for school-aged children; the statistical distributions of usual intakes of nutrients; and a workshop on nutrition education programs that target low-income families.
- *Research Outreach.* FANRP continued its support of its Small Grants Program with the participation of five administering institutions, each of which specializes in different aspects of food assistance programs or population subgroups. Details of this major program are provided later in this section. Other projects in this research area support the Food and Nutrition Information Center and the Food and Nutrition Summer Institute.

➤ *Enhanced Food Assistance Research Data.* FANRP makes this area a research priority each year because data sustain the program's research on food assistance programs and the environment in which they operate. Projects in this area include support for the Early Childhood Longitudinal Studies, the Panel Study of Income Dynamics, the National Health and Nutrition Examination Survey, and the Food Security Supplement of the Current Population Survey.

Research Projects, Fiscal 1998-2002. FANRP developed a multifaceted research plan to increase understanding of the FSP. Because the economy experiences slow growth or recessions as part of its business cycle, FANRP research examines the role of the macroeconomy in the FSP caseload and contrasts it with the role of welfare reforms in the 1990s. Examining interactions between the FSP and other welfare programs is a cross-program theme of the research agenda. Other projects examine the effects on FSP clients of administrative changes in welfare offices, the well-being of households that leave the FSP, and the contrast between FSP participants and eligible nonparticipants. FANRP research addresses the two food stamp target groups most adversely affected by welfare reform: able-bodied adults without dependents (ABAWDs) and legal immigrants. To explore how the FSP might better serve the working poor, FANRP examines conditions of low-income working families and their program participation rates, and connections between the program's rules and administration and the circumstances of the working poor. Other research examines administrative costs, including a project on trends in the cost of certification of households' eligibility for the FSP and a project on the impact of FSP options and waivers on program operations, cost, and participation. Another project tests which of three service models can most cost-effectively increase the FSP participation of the eligible elderly, a group that has relatively low participation rates.

FANRP also conducts research on other USDA food assistance and nutrition programs. Projects that examine the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) include one that assesses WIC cost-containment strategies adopted by State WIC offices, a second that examines innovative practices in WIC, and another that considers infant formula prices and availability in connection with WIC and its infant formula rebate program. FANRP funded a research design study for a project to jointly examine meal costs and nutrition in USDA school meals programs. Another design study resulted in a fielded project

that examines the Summer Food Service Program's sponsor and site characteristics, and the comparative characteristics of participants and eligible nonparticipants. Other research assesses the prevalence of direct certification in the National School Lunch Program and its effects on certification, participation, and verification error rates.

FANRP collaborates with FNS to shed light on the policy-relevant issues of waste, fraud, and abuse in food assistance and nutrition programs. One study funded by FANRP updates the food stamp trafficking study conducted several years ago by FNS, while another study focuses on computer matching to detect fraud in the FSP. Another study evaluates available tools that States could use to prevent fraud and abuse by WIC clients and staff.

Behavioral choices, socioeconomic conditions, and governmental programs are important factors that influence nutrition and health. FANRP research examines the effects of such factors as breastfeeding consultations and education on breastfeeding choices and duration, infant health, and infant medical costs. The impact of breastfeeding on optimal growth rates is also being examined. Another study examines the effects of eating patterns, away-from-home eating, and food assistance and nutrition programs on the diets of low-income children and teens. FANRP research considers the roles of demographics, incomes, food prices, nutrition knowledge, and consumer information in influencing diet quality. FANRP work on dietary behavior includes the high costs of poor eating patterns, the contrast between food consumption and dietary recommendations, the impact on diet of food assistance programs, and the nutrient content of away-from-home foods. FANRP initiated a set of studies on childhood obesity—a national problem that has increased substantially—to examine the determinants of overweight and obesity among low-income children. Other research examines factors affecting the nutrient intake of the elderly, and constructs food cost indexes for low-income households and the general population. FANRP research investigates the long-term effects of assistance programs by funding a comprehensive assessment of existing findings on the dietary and health outcomes of food program participation.

In the early 1990s, researchers in government and academia collaborated in developing measures of the prevalence and severity of household food insecurity. FANRP continues to fund annual monitoring of food insecurity

at the national and State levels, and initiated new research projects in the area of food insecurity and hunger. These projects include examination of the relationships among food security, childhood behavior problems, health, and educational achievement. Another topic is the factors that influence food insecurity among female-headed households, and the impacts of food insecurity on the physical and emotional well-being of children in these households.

Other research examines how food insecurity relates to program participation and obesity. FANRP also sponsored a conference to identify instruments that can facilitate community food security analysis at the local level. Another project identifies the service areas, characteristics, and operations of food banks, food pantries, and emergency kitchens and obtains national estimates of the total number of recipients served and the quantities and types of foods.

FANRP funding has enhanced food assistance data collection in several nationwide surveys, including the Continuing Survey of Food Intakes by Individuals, the National Health and Nutrition Examination Survey, the Panel Study of Income Dynamics, the Current Population Survey, and the Early Childhood Longitudinal Studies.

Small Grants Program. FANRP initiated a Small Grants Program in fiscal 1998 that pursues five themes through programs at the following academic institutions and affiliated research institutes:

- Interactions between food assistance and other welfare programs, and linkages between the macroeconomy and food assistance. *The Joint Center for Poverty Research at the University of Chicago and Northwestern University.*
- Effects of food assistance on well-being and food security. *The Institute for Research on Poverty at the University of Wisconsin.*
- The relationship between family poverty and food assistance programs among Native Americans. *The American Indian Studies Program at the University of Arizona.*
- The relationship between food assistance and rural people, families, and communities in the South. *The Southern Rural Development Center at Mississippi State and Alcorn State Universities.*
- The impact of food assistance programs on nutritional risk indicators (clinical, anthropometric, biochemical, and dietary), food purchasing practices, and food insecurity. *The Department of Nutrition at the University of California at Davis.*

Fiscal 2002 Program Themes and Funded Projects

The following is an abbreviated list of projects funded under FANRP in fiscal 2002 (see table 1 for more detailed information):

Program Design and Operations

- Trends in Food Stamp Program Certification Costs, 1989-2001
- An Assessment of the Impact of Medicaid Managed Care on WIC Program Coordination with Primary Care Services
- WIC Innovative Practices Study
- Implementation of Options and Waivers to Increase Access to the Food Stamp Program

- Promoting the Food Stamp Program and Work through Coordinated Economic Relief Centers (CERCs)

Food Program Access and Caseload Dynamics

- Welfare Transitions and Food Sufficiency: Evidence from South Carolina
- Evaluation of Three Models Designed to Increase Participation of Eligible Elderly in the Food Stamp Program
- Devolution and Urban Change
- A Study of the U.S. Emergency Food Assistance System: Provider and Recipient Characteristics
- Food Stamp Program Elderly Demonstration

- Program Access and Declining Food Stamp Participation
- Forces Impacting Social and Economic Well-Being in the Rural South

Food Security

- Food Security, Behavior Problems and Health among Kindergarten and First-Grade Children
- State Predictors of Household Food Security
- Explaining High Levels of Food Insecurity and Hunger in the Pacific Northwest
- Developing a Food Security Survey Module for Use with Children and Youths

Program Integrity and Effectiveness

- Integrated Study of School Meal Costs and Outcomes: A Design, Cost, and Feasibility Plan
- Modeling WIC Eligibility and Participation of Infants and Children
- Summer Food Service Program Study
- WIC Cost Containment Practices and Their Impacts
- Research Design Considerations for Integrating Cost Data with Customer Information in an Evaluation of School Meal Performance

Obesity

- U.S. Trends in Associations of Eating Patterns With BMI Throughout the Lifecycle
- Development of Eating Patterns and Obesity in Black Girls
- The Growth of Obesity and Health Economic Research
- Longitudinal Modeling of the Effects of Dietary Intakes on Body Composition and Risk Factors for Coronary Disease in the Women's Health Trial: Feasibility Study in Minority Populations

Behavioral Nutrition

- Understanding the Errors in Children's Dietary Recalls
- Demand Projections Segmented by Income for the Highly Competitive Non-Alcoholic Beverage Complex

- Analyzing the Welfare and Nutritional Effects of Food Taxes Intended to Promote Healthful Eating Habits
- Household Demand for Fruits and Vegetables: An Analysis of Homescan Data
- Impacts of Shifts in Food Demand on the Farm Sector
- Supermarket Characteristics and Operating Costs in Low-Income Areas

Nutrition, Health Outcomes, and Dietary Behavior

- Eating Patterns and Diet Quality In Young Adults
- Evaluation of Policy Change on Middle-School Student Lunch Consumption
- Design Considerations for Developing Effective Wording and Format Options for a Children's Nutrition Behavior Questionnaire
- Post-Conference Workshop on Evaluation of Nutrition Education with Low-Income Families
- Assessing the Feasibility of International Anthropometric References for School-aged Preadolescents
- Nutrition and Health Outcomes of USDA Food and Nutrition Assistance Programs

Research Outreach

- Small Grants Program:
 - ✓ Southern Rural Development Center, Mississippi State University
Retail Globalization and Food Access in the South
Food Assistance and Working Poor Families in the Rural South
Assessing the Prevalence of Childhood Obesity Among Limited-Resource Latino and Non-Latino Families in Virginia
The Incidence of Overweight and Obesity in Southern Adolescents
Contextual Determinants of Food Security in Minority Neighborhoods
 - ✓ The American Indian Studies Program (AISP), University of Arizona
Mahnomen Project
Nutritional Balance Through Traditional Ojibwa Foods
The Impact of Food Assistance Programs on the Tohono O'odham Food System: An Analysis and Recommendations

- ✓ Institute for Research on Poverty, University of Wisconsin
The Impact of the WIC Program on Pregnancy, Infant and Child Outcomes
An Individual-Level Analysis of Food Stamp Dynamics
Exploring the Effects of the National School Lunch Program on Child Obesity and Development Using the Early Childhood Longitudinal Study
The Role of Food Assistance and Employment in Helping Food Insecure Families Avoid Hunger
- ✓ Joint Center for Poverty Research, University of Chicago and Northwestern University
The Interaction Between Food Stamps and Welfare Programs: An Empirical Model of Program Dynamics in the Cleveland Metropolitan Area, 1992–2002
Dietary Intake and Food Security Among Migrant Farm Workers in Pennsylvania
Welfare Reform and Long-term Stability in Food Security Among Children of Immigrants
The Relationship Between Food Assistance, the Value of Food Acquired, and Household Food Security

- ✓ Department of Nutrition, University of California at Davis
Household Food Insecurity, Food Assistance Program Participation, and the Use of Preventative Medical Care
The Food Insecurity–Obesity Paradox in Women Use of a “Contract of Change” and Biochemical Markers to Evaluate the Effectiveness of Nutrition Education to Increase Fruit and Vegetable Consumption in Low-Income Women
Food and Nutrition Information Center (FNIC)
Food and Nutrition Summer Institute

Enhanced Food Assistance Research Data

- Panel Study of Income Dynamics
- Early Childhood Longitudinal Study—Birth Cohort (ECLS-B)
- Early Childhood Longitudinal Study—Kindergarten Cohort (ECLS-K)
- Current Population Survey (CPS) Food Security Supplement
- National Health and Nutrition Examination Survey 1999–2004, Food Security Questions
- Household Food Purchases Survey
- Committee on National Statistics

Fiscal 2001 Program Themes and Funded Projects

The following is an abbreviated list of projects funded under FANRP in fiscal 2001 (see table 2 for more detailed information):

Workforce Attachment, Income Volatility, and Administrative Costs

- Maternal Employment and Children’s Nutrition Outcomes
- Food Stamp Program Entry and Exit: Economic and Policy Influences on Participation Decisions
- Understanding Program Participation Decisions of the Working Poor
- Employment Factors Influencing Food Stamp Program Participation Among the Working Poor
- The Effect of EITC on Food Stamp Program Participation Among the Working Poor
- Food Stamp Certification Periods and Payment Accuracy: State Experience During 1996–2000
- Labor Market Participation and Government Assistance Program Participation

- Dynamics of Food Stamp Program Participation in Maryland
- An Analysis of Poverty Dynamics and Food Security
- Best Practices Roundtable on Addressing the Needs of Low-Income Working Families

Food Program Access, Caseload Decline, and Welfare Reform

- The Complementary Roles of Public and Private Assistance
- Program Access and Declining Food Stamp Program Participation
- A Study of the U.S. Emergency Food Assistance System, Provider and Recipient Characteristics
- Food Stamp Program Elderly Demonstration
- The Impacts of Welfare Reform and the Macroeconomy on Food Stamp Caseloads and Expenditures
- The Effect of Provider Instability on Cross-Sectional Estimates of the Demand for Emergency Food

- Panel Cointegration Estimation of Food Stamp Program Caseloads
- Devolution and Urban Change

Program Integrity and Effectiveness

- Evaluating the Impact of School Breakfast and Lunch
- Effects of WIC and Food Stamp Program Participation on Child Outcomes
- Evaluating Changes in WIC Participant Food Purchasing as a Result of WIC Nutrition Education
- Summer Food Service Program Study
- WIC Cost Containment Practices and Their Impacts
- Measuring the Extent of Food Stamp Trafficking Using EBT Data
- Research Design Considerations for Integrating Cost Data with Customer Information in an Evaluation of School Meal Performance
- Dietary Risk in the WIC Program: A Scientific Assessment
- Journal of Nutrition Education Special Issue for the Elderly
- WIC Eligibility Expert Review Panel Study

Nutrition and Health Outcomes and Dietary Behavior

- The Associations Among Food Assistance Program Participation, Food Security, and Child and Maternal Health Disparities
- Development of Eating Patterns and Dietary Behaviors that Predict Child Obesity
- Assessing the Nutrient Intakes of High-Needs Subgroups Using the Dietary Reference Intakes
- The Ecological Predictors and Developmental Outcomes of Persistent Childhood Obesity
- Lifestyle Mediators of Diet Quality
- Impact of Food Sufficiency on Food Choices of Low Income Children
- Dietary Patterns and Nutritional Adequacy: Does Variety Matter?
- Diet Quality and Its Relationship to Obesity in Rural Alabama African American Children
- Research on Breast-fed Infants' Growth

Research Outreach

- Small Grants Program:
 - ✓ Southern Rural Development Center, Mississippi State University
Contextual Determinants of Food Security in Minority Neighborhoods
Assessing the Relationship Between Food Insecurity Events and Food Assistance Programs in Two Different Public Housing Communities
Private Food Assistance in the Deep South: Agency Profiles and Directors' Perceptions of Needs and Opportunities under Charitable Choice
The Arkansas Child and Adult Care Food Program: A Study of Factors Associated with Program Participation
Food Stamp Receipt by Families with Noncitizen Householders in Rural Texas Counties
Community Capacity and Food Insecurity in the Era of Welfare Reform
Food Insecurity and Hunger among Home Bound Older Adults in the Rural South
 - ✓ The American Indian Studies Program (AISP), University of Arizona
Nutrition Assessment for Keweenaw Bay Ojibwa
The Impact of Food Assistance Programs on the Tohono O'odham Food System: An Analysis and Recommendations
How Have Welfare Reforms affected Access to Food Assistance Programs among Young Families and Families Dependent on Seasonal Employment at Northern Cheyenne?
 - ✓ Institute for Research on Poverty, University of Wisconsin
Food Stamp and Program Participation of Refugees and Immigrants: Measurement Error Correction for Immigrant Status
Does Household Food Insecurity Affect Cognitive and Social Development of Kindergartners?
The Dynamics of Prenatal WIC Participation
 - ✓ Joint Center for Poverty Research, University of Chicago and Northwestern University
Estimating the Life Course Probabilities and Patterns of Food Stamp Use Among American Adults
The Allocation of Nutrition within Poor American Families
Making Ends Meet: An Examination of TANF and Former TANF Food Pantry Users in Virginia
Determinants of Spatial Variation in Food Stamp Program Participation Dynamics

- ✓ Department of Nutrition, University of California at Davis
Hunger, Food Insecurity and Child Obesity
The Impact of Home Delivered Meals on the Nutritional Status and Food Security of Elderly Persons in New York State
Development of a Diet Quality Index for Preschool Children and its Application in Examining Dietary Trends in the U.S.
- Food and Nutrition Information Center
- Interpretation and Use of Dietary Reference Intakes
- Conference on Income Volatility and Implications for Food Assistance
- Food and Nutrition Summer Institute

Enhanced Food Assistance Research Data

- Panel Study of Income Dynamics
- Early Childhood Longitudinal Survey—Birth Cohort 2000 (ECLS-B)
- Early Childhood Longitudinal Survey—Kindergarten Cohort (ECLS-K)
- Current Population Survey (CPS) Food Security Supplement, April 2001
- National Health and Nutrition Examination Survey 1999-2004, Food Security Questions
- Household Food Purchases Survey
- Infant Formula Retail Prices Data

Fiscal 2000 Program Themes and Funded Projects

- Committee on National Statistics

The following is an abbreviated list of projects funded under FANRP in fiscal 2000 (see table 3 for more detailed information):

Food Program Access and Client Well-Being

- Longitudinal Analysis of the Earnings and Food Stamp Participation of the Working Poor
- Social Marketing Study to Increase Food Stamp Participation Among the Elderly
- Food Insecurity in the Second Generation
- Effects of Food Security on Pregnancy Outcomes
- Feasibility and Accuracy of Record Linkage to Estimate Multiple Program Participation
- Basic Needs, Tough Choices: The Impact of Housing Costs on Food Consumption
- Factors Associated with Iron Status Among WIC Infants in Rural West Virginia
- A Study of the U.S. Emergency Food Assistance System: Provider and Recipient Characteristics
- Community Food Security Assessment Tool Kit Field Test
- National Health and Nutrition Examination Survey 1999-2004, Food Security Questions

- Labor Market Participation and Government Assistance Program Participation

Food Stamp Program Caseload Decline

- Program Access and Declining Food Stamp Program Participation
- Time Series Analysis of Food Stamp Program Caseloads
- The Impacts of Welfare Reform and the Macroeconomy on Food Stamp Caseloads and Expenditures
- Studies of Households Who Leave the Food Stamp Program: Iowa
- Supporting Families After Welfare Reform: Access to Medicaid, the Food Stamp Program (FSP), and the State Children's Health Insurance Program (SCHIP)
- Devolution and Urban Change

Child Nutrition

- Parental Time, Role Strains, Coping, and Children's Diet and Nutrition
- Parenting Practices and Obesity in Low-Income African-American Preschoolers
- Direct Certification and its Impact on Errors in the National School Lunch Program Study
- Research on Breast-fed Infants' Growth

- The Implementation of the National School Lunch Program Application and Verifications Pilot Projects
- CACFP Administrative Cost Reimbursement Study
- WIC Eligibility Expert Review Panel Study

Nutrition and Health Outcomes and Dietary Behavior

- Longitudinal Modeling of the Effects of Dietary Intakes on Body Composition and Risk Factors for Coronary Disease in the Women’s Health Trial: Feasibility Study in Minority Populations
- Diet Patterns, Nutrients, and Development of Adolescent Obesity
- Eating Patterns, Diet Quality, and Obesity
- Conference on Interventions to Prevent Low Birth Weights
- Nutrition and Health Outcomes of USDA Food and Nutrition Assistance Programs
- Food Demands and Nutrient Availability of Low-Income Households
- An Evaluation of USDA’s Healthy Eating Index
- Demand System Analysis for Households Segmented by Family Structure and Income

Research Outreach

- Small Grants Program:
 - ✓ Southern Rural Development Center, Mississippi State University
 - Assessing Food Security and Related Welfare Reform Outcomes in Two Southern States*
 - A Structural Model of the Relationships of Food Insecurity to Disease Risk and Outcomes Among Adults from NHANES III*
 - Food Stamp Dynamics Across Rural and Urban Landscapes in the Era of Welfare Reform*
 - Measuring Food Insecurity and Hunger and Its Effect on Health Among Participants in the Expanded Food and Nutrition Program (EFNEP) in Tennessee*
 - ✓ The American Indian Studies Program (AISP), University of Arizona

The Impact of Food Assistance Programs on the Tohono O’odham Food System: An Analysis and Recommendations
The Effects of Food Assistance on Nutrition and Food Security Among the Northern Cheyenne

- ✓ Institute for Research on Poverty, University of Wisconsin
 - How Should We Measure Hunger?*
 - Measuring the Impact of WIC Participation on the Initiation and Duration of Breastfeeding*
 - Moderating the Effects of Food Insecurity on Child Outcomes: The Role of Food Assistance Programs*
- ✓ Joint Center for Poverty Research, University of Chicago and Northwestern University
 - The Influence of Food Stamp Program Participation on Adult Health: Estimates from the NLSY79*
 - Interactions of Food Stamps and Housing Assistance*
 - Economic Evaluation of the Expanded Food and Nutrition Program (EFNEP) in New York State*
- ✓ Department of Nutrition, University of California at Davis
 - The Effects of Food Stamp and WIC Programs on Food and Nutrient Intakes*
 - Evaluation of the “Spend Less, Eat Well, Feel Better” Project*
 - Validation of Food Security Instruments in Hispanic Households*

- Food and Nutrition Information Center
- Food and Nutrition Summer Institute

Enhanced Food Assistance Research Data

- Data Development Initiatives for Research on Food Assistance and Nutrition Programs
- Panel Study of Income Dynamics
- Early Childhood Longitudinal Survey—Birth Cohort 2000 (ECLS-B)
- Early Childhood Longitudinal Survey—Kindergarten Cohort (ECLS-K)
- Current Population Survey (CPS) Food Security Supplement, September 2000
- National Food Price Data System
- Committee on National Statistics

Fiscal 1999 Program Themes and Funded Projects

The following is an abbreviated list of projects funded under FANRP in fiscal 1999 (see table 4 for more detailed information):

Food Stamp Program Caseload Decline

- Program Access and Declining Food Stamp Program Participation
- What Explains Changes in Food Stamp Program Caseloads?
- The Effects of Welfare Implementation on Food Stamp Caseloads
- Causes and Consequences of Food Insecurity After Welfare Reform
- Devolution and Urban Change

Better Serving the Working Poor

- Improving Access to Food Stamps for Low-Income Working Households
- Restructuring Food Stamps to Help Working Families
- Program Integrity and Improved Service to the Working Poor Under Alternative Reporting Plans

Nutrition and Health Outcomes and Dietary Behavior

- Understanding Child Nutrition in the Year 2000: Dynamic Shifts and Their Determinants
- Obesity in Low-Income Mothers and Children
- Factors Affecting Childhood Obesity Among Low-Income Households
- The Determinants of Overweight and Obesity Among Low-Income Children
- Economic Benefits of Breastfeeding Promotion: A Controlled Clinical Trial
- Food Security and Health Outcomes in the California Health Interview Survey
- Evaluating the Impact of School Breakfast on Learning: Design and Feasibility

Food Security Measurement and Research

- Hunger: Its Risk and Impact in Poor, Female-Headed Households With Children
- Food Security Measurement Research

- Community Food Security Assessment Conference
- Community Food Security Assessment Tool Kit

Program Integrity and Effectiveness

- WIC Cost-Containment Study
- Identify and Evaluate Methods to Prevent Fraud and Abuse Among Staff and Participants in WIC
- Summer Feeding Integrity Study: A Design, Cost, and Feasibility Plan

Research Outreach

- Small Grants Program:
 - ✓ Southern Rural Development Center, Mississippi State University
Food Stamp Program Caseload Declines: An Indirect Effect of Welfare Reform? A Comparison of Demographic Variables, Food/Nutrient Intakes, Level of Food Security, and Food/Nutrient Changes Among Food Stamp Recipients and Nonrecipients in South Carolina, Tennessee, and Virginia

The Effect of Acculturation and Food Assistance Programs on Diet, Nutritional Status and Food Security Among the U.S. Hispanic Population

- Food and Nutrition Information Center: Research Information Dissemination
- Improving Measurement of Health and Nutrition Outcomes
- Rural Dimensions of Welfare Reform Conference
- Committee on National Statistics
- Food and Nutrition Summer Institute

Enhanced Food Assistance Research Data

- National Food Price Data System Enhancement
- Panel Study of Income Dynamics
- Early Childhood Longitudinal Study—Birth Cohort 2000 (ECLS-B)
- Measuring Food Security: April 1999 Current Population Survey Food Security Supplement
- National Health and Nutrition Examination Survey

Fiscal 1998 Program Themes and Funded Projects

The following is an abbreviated list of projects funded under FANRP in fiscal 1998 (see table 5 for more detailed information).

Welfare Reform

- Family Child Care Homes Legislative Changes Study
- Report to Congress on State Use of Funds To Increase Work Slots for Food Stamp Recipients
- Report to Congress on Use of Food Stamps To Purchase Dietary Supplements
- Expanded Study of Welfare Reform on Immigrants
- Food Program Targeting and Delivery
- Temporary Assistance for Needy Families (TANF)-Leavers' Use of Food Stamps
- Studies of Households Who Leave the Food Stamp Program
- A Study of U.S. Emergency Food Assistance System: Provider and Recipient Characteristics
- Study of Re-engineering the Welfare System

- Research Linking Food Assistance Programs, Agriculture, Rural Areas, and the Economy
- Simplified Food Stamp Program Technical Assistance

Food Security

- Measuring Food Security: August 1998 Current Population Survey Supplement
- Early Childhood Longitudinal Study—Kindergarten Cohort (ECLS-K)
- Panel Study of Income Dynamics
- Research To Strengthen and Improve Measures of Food Security

Nutrition and Health

- Early Childhood Longitudinal Study—Birth Cohort 2000 (ECLS-B)
- Dietary and Nutrition Outcomes (Nutrition Risk Follow-up)

Extramural Research Program, Fiscal 2002

To meet the programmatic needs of the Department and to promote research from a broad arena, FANRP uses a variety of funding mechanisms. Contracts are used when a very specific product is required, such as compliance with a Congressional mandate. When the intent is to stimulate new and innovative research or to undertake projects conducted jointly with ERS researchers, cooperative agreements and grants are used. The competitive portion of the extramural research program is announced publicly and awarded through the use of peer review panels.

Four contracts were awarded in fiscal 2002 in the areas of Food Stamp Program participation by the elderly; a design, cost and feasibility plan for an integrated study of school meal costs and outcomes; improved design of children’s nutrition behavior questionnaires; and evaluation of pilot projects that provide to displaced workers an integration of services including food assistance. In addition, one data purchase and enhancements to seven existing contracts were conducted. Funding for contracts totaled \$2.18 million.

The Competitive Grants and Cooperative Agreements Program is announced broadly, with program announcements mailed out to universities, nonprofit and for-profit organizations, and State and local governments. The announcement was posted on the Internet through the ERS website. Funding for eight cooperative agreements totaled \$1.51 million in fiscal 2002. In addition, a total of \$1.02 million funded four grants. The acceptance rate for proposals of cooperative agreements and grants was roughly 1 in 5, or in dollars terms roughly \$1 in \$7. Cooperative agreements and grants were awarded to conduct research on such topics as innovative practices in WIC; trends in certification costs in the Food Stamp Program; the link between food insecurity and children’s behavior and health; an evaluation of policy change on middle-school student lunch consumption; and links between eating patterns and obesity.

Share of Extramural Awards by Type, Fiscal 2002

In addition, 14 cooperative agreements and grants totaling \$886,000 were awarded to fill special research needs of the ongoing internal research program. The largest award, in the amount of \$495,092, was awarded to Manpower Demonstration Research Corporation in continued support of its Development and Urban Change project. Other awards support research on such topics as evaluation of nutrition education with low-income families; WIC eligibility; consumer food choices; and development of a food security survey for children and youths.

The Small Grants Program funds grant competitions at five diverse institutions. Each institution focuses on a particular facet of food assistance, such as diet and health outcomes, relationships to poverty and well-being, rural issues, and special at-risk population groups. Funding for small grants totaled \$899,000 in fiscal 2002.

Interagency agreements are used to enhance food assistance data development through cost-sharing partnerships and to fund cooperative interagency research on

program interactions and policy issues. These interagency projects include funding for additional data collection in the National Health and Nutrition Examination Survey (NHANES), the Panel Study of Income Dynamics (PSID), and the Early Childhood

Longitudinal Studies, as well as the food security module of the Current Population Survey (CPS). Funding for interagency agreements totaled \$2.03 million in fiscal 2002.

FANRP, Today and Tomorrow

FANRP addresses the research needs of the Nation's food assistance and nutrition programs. Its research analyzes the benefits of improved diets and food choices, the factors that influence diet and nutrition, and the outcomes of policies and programs aimed at improving the nutrition, well-being, and food security of Americans. These programs include the Food Stamp Program, WIC, and Child Nutrition Programs.

FANRP will continue to conduct and disseminate policy-relevant and programmatic research that informs

decisionmakers and the public. FANRP will continue to integrate intramural research with the extramural program, enhancing its capacity to address policy and research needs of USDA's food assistance and nutrition programs in a timely, objective, and cost-effective manner. To identify and prioritize research needs and policy issues, FANRP will continue to seek input from key constituencies such as policy officials, program and research leaders, and the Food and Nutrition Service.

Food Assistance and Nutrition Research Program Publications, Fiscal 2002

The following is a list of publications completed by the Food Assistance and Nutrition Research Program during fiscal 2002. The vehicles for most of these publications are the Food and Nutrition Research Report (FANRR) series and the E-FAN series. FANRR publications are a Departmental series and are typically available in both hard copy and electronic forms. E-FAN publications are available strictly in electronic form and are a component of the ERS effort to serve the public with e-government technologies and the ERS website. Both series showcase the outcomes of FANRP research, whether the findings are obtained by ERS staff, by non-ERS authors under a FANRP contract or grant, or by non-ERS authors working jointly with ERS authors.

Bell, L., Pachikara, S., Schreiber Williams, S., and Gabor, V. *Re-Engineering the Welfare System—A Study of Administrative Changes to the Food Stamp Program: Final Report*, FANRR-17. USDA, ERS. June 2002.

Table 1—FANRP Extramural Research Studies: Fiscal 2002

Research Projects/Awards	Objective	Estimated Cost
Program Design and Operations		
Trends in Food Stamp Program Certification Costs, 1989-2001 Abt Associates	To examine the trends and composition of Food Stamp Program administrative costs, focusing on certification costs, the largest component, and the relationship between the number of participants and administrative cost per participant.	\$245,143
An Assessment of the Impact of Medicaid Managed Care on WIC Program Coordination with Primary Care Services Health Systems Research	To identify and examine State-level efforts to support coordination between WIC programs and primary care services that are provided through Medicaid managed care models.	\$291,052
WIC Innovative Practices Study Mathematica Policy Research	To examine and present detailed information on a range of innovations and promising programs in WIC practices.	\$149,747
Implementation of Options and Waivers to Increase Access to the Food Stamp Program Mathematica Policy Research	To examine how new options and waivers designed to increase access to the Food Stamp Program are being implemented and to assess their effects on program operations, cost, and participation. The study will include in-depth interviews in four case studies at local welfare offices.	\$248,229
Promoting the Food Stamp Program and Work through Coordinated Economic Relief Centers (CERCs) Mathematica Policy Research	To conduct a process evaluation of a comprehensive service integration approach for supporting displaced workers and other families seeking work. The study will evaluate pilot projects in Virginia known as Coordinated Economic Relief Centers (CERCs), with special emphasis on the provision of food assistance.	\$149,992
Food Program Access and Caseload Dynamics		
Welfare Transitions and Food Sufficiency: Evidence from South Carolina The George Washington University	To examine food adequacy and other basic measures of well-being among current and former welfare recipients in South Carolina's Family Independence (FI) program. The study will also examine patterns of Food Stamp Program use and other types of in-kind assistance for these groups and the role that non-cash assistance plays in maintaining families' well-being as they transition off of welfare.	\$149,994
Evaluation of Three Models Designed to Increase Participation of Eligible Elderly in the Food Stamp Program Mathematica Policy Research	To test which of three models in six demonstration sites can most cost-effectively increase participation of the eligible elderly in the Food Stamp Program (FSP). The three models involve simplification of the FSP application, assistance in completion of the FSP application, or the option of receiving FSP benefits in the form of a package of commodities.	\$1,050,000

Table 1—FANRP Extramural Research Studies: Fiscal 2002—continued

Research Projects/Awards	Objective	Estimated Cost
Devolution and Urban Change Manpower Demonstration Research Corporation	To provide support for continued incorporation of a Food Stamp Program component into a major analysis by Manpower Demonstration Research Corporation of the effects of welfare reform on the economic and social well-being of low-income families in four urban areas.	\$495,092
A Study of the U.S. Emergency Food Assistance System: Provider and Recipient Characteristics Mathematica Policy Research	To identify the characteristics, operating structure, and service areas of food banks, food pantries, and emergency kitchens and to provide national estimates of the total number of recipients served and the total quantity and type of food by source. Additional funding was provided to support the sample administration for the study's client survey.	\$60,345
Food Stamp Program Elderly Demonstration Mathematica Policy Research	To develop an evaluation plan for a set of Food Stamp Program demonstrations that are aimed at increasing participation among the eligible elderly. Additional funding was provided to support the organizational meeting with State sites.	\$3,785
Program Access and Declining Food Stamp Participation Abt Associates	To examine Food Stamp Program access and participation issues. Additional funding was provided to add a publicly available interim report.	\$60,000
Forces Impacting Social and Economic Well-Being in the Rural South Southern Rural Development Center, Mississippi State University	To provide additional support of analysis conducted in tandem with the project "Program Access and Declining Food Stamp Participation." This work focuses on the rural South, examining how households in the region decide to participate in the Food Stamp Program.	\$40,000
Food Security		
Food Security, Behavior Problems and Health among Kindergarten and First-Grade Children Boston Medical Center	To examine the relationships among food security, childhood behavior problems, health, and educational achievement using data from the kindergarten and first grade children in the Early Childhood Longitudinal Survey, Kindergarten Cohort (ECLS-K). The ECLS-K is a unique source of data of a nationally representative sample of approximately 21,000 young children, with survey participation by their families, teachers, and schools.	\$214,768
State Predictors of Household Food Security University of Wisconsin	To investigate the relationship between household and community food security by analyzing inter-state variations in USDA measures of food insecurity. The analysis will use data from the 1998-2000 Current Population Survey- Food Security Supplements together with State employment, food assistance, and food cost data.	\$100,000

Table 1—FANRP Extramural Research Studies: Fiscal 2002—continued

Research Projects/Awards	Objective	Estimated Cost
Explaining High Levels of Food Insecurity and Hunger in the Pacific Northwest Oregon State University	To examine the effects of unemployment, seasonality of employment, housing costs, and migration patterns on food insecurity and hunger in Oregon and Washington where levels of food insecurity and hunger exceed the national average.	\$29,975
Developing a Food Security Survey Module for Use with Children and Youths The University of Southern Mississippi	To develop a child/youth version of USDA’s food security survey module that is appropriate for use in either interviewer-administered or self-administered surveys of children between 10 and 16 years of age.	\$24,500
Program Integrity and Effectiveness		
Integrated Study of School Meal Costs and Outcomes: A Design, Cost, and Feasibility Plan Abt Associates	To design a study of USDA school meal programs that jointly examines meal costs and nutrition. The design study will develop, test, and cost out study procedures and analyze designs.	\$560,592
Modeling WIC Eligibility and Participation of Infants and Children University of Wisconsin–Madison	To revise methods of using survey data to estimate WIC eligibility and participation patterns, focusing on such patterns for infants less than one year of age, and to examine outcomes for WIC infants and children.	\$27,273
Summer Food Service Program Study Mathematica Policy Research	To conduct the first nationally representative study in 15 years of the Summer Food Service Program. Additional funding was provided to integrate site and sponsor data with an electronic database and GIS coding.	\$126,279
WIC Cost Containment Practices and Their Impacts Abt Associates	Report to Congress on the effects of cost containment practices by States such as limiting brand-named products in the WIC food package. Additional funding was provided to produce a stand-alone Executive Summary.	\$12,179
Research Design Considerations for Integrating Cost Data with Customer Information in an Evaluation of School Meal Performance Abt Associates	To examine the study design considerations in an evaluation of the performance of the National School Lunch Program and the School breakfast Program. Additional funding was provided in support of the expert workshop.	\$6,993

Table 1—FANRP Extramural Research Studies: Fiscal 2002—continued

Research Projects/Awards	Objective	Estimated Cost
Obesity		
U.S. Trends in Associations of Eating Patterns with BMI throughout the Lifecycle Tufts University	To examine trends in associations between eating patterns and obesity and the relative strength of the associations for different age groups. The study will provide insight into lifecycle changes in eating patterns, changes in the relationships between eating patterns and Body Mass Index measures across age groups, and the changes' potential contribution to the U.S. obesity epidemic.	\$228,250
Development of Eating Patterns and Obesity in Black Girls University of California–Berkeley	To develop obesity prevention strategies targeting adolescent black girls, this study will evaluate the role of dietary patterns as a mediator of the relationship between socio-environmental factors and obesity using the National Heart, Lung, and Blood Institute's Growth and Health Study (NGHS), the largest longitudinal study of black adolescent females.	\$399,943
The Growth of Obesity and Health Economic Research University of Chicago	To organize a workshop involving leading health economists on the economics of obesity.	\$15,000
Longitudinal Modeling of the Effects of Dietary Intakes on Body Composition and Risk Factors for Coronary Disease in the Women's Health Trial: Feasibility Study in Minority Populations University of Houston	To develop dynamic models to explain selected nutrition-related risk factors for chronic disease among participants in a 12-month randomized trial of a low-fat diet. Additional funding was provided to extend the analysis to a second data set composed of Food Stamp Program participants.	\$34,400
Behavioral Nutrition		
Understanding the Errors in Children's Dietary Recalls Medical College of Georgia Research Institute	To examine two issues that pertain to a child's self-reported dietary intake, this study will examine the extent to which children confuse items consumed on a different days and the similarity between accuracy at the nutrient level and the food item level.	\$180,000
Demand Projections Segmented by Income for the Highly Competitive Non-Alcoholic Beverage Complex The Texas Agricultural Experiment Station, Texas A&M University	To obtain better insight into the link between soft drink consumption, obesity and calcium deficiency, this study will examine consumer demand for nonalcoholic beverages in lower and higher income households.	\$25,000

Table 1—FANRP Extramural Research Studies: Fiscal 2002—continued

Research Projects/Awards	Objective	Estimated Cost
Analyzing the Welfare and Nutritional Effects of Food Taxes Intended to Promote Healthful Eating Habits University of California–Berkeley	To estimate the effects of proposed health-promoting food taxes and subsidies, this study will estimate the relationships between purchases of beverages and dairy products and the prices households pay to purchase them.	\$25,000
Household Demand for Fruits and Vegetables: An Analysis of Homescan Data University of Tennessee	To evaluate the effectiveness of promoting the consumption of fruits and vegetables through price subsidies or other economic incentives, this study will estimate household demands for fruits and vegetables.	\$25,000
Impacts of Shifts in Food Demand on the Farm Sector North Carolina Agricultural Research Service, North Carolina State University	To estimate the impacts on retail and farm prices of changes in income and other factors affecting consumer demand in a framework that accounts for the diversity of products as well as the diversity of household budgets.	\$25,000
Supermarket Characteristics and Operating Costs in Low-Income Areas University of Minnesota	To examine the characteristics and operating costs of supermarkets in low-income areas in comparison with those in higher-income areas including estimating the empirical relationship between store characteristics and operating costs.	\$40,000
Nutrition, Health Outcomes, and Dietary Behavior		
Eating Patterns and Diet Quality in Young Adults Baylor University	To identify eating pattern typologies that are associated with diet quality in young adults, and link these typologies to socioeconomic, demographic, and lifestyle characteristics. The study will also examine the association among eating patterns, overall diet quality, and obesity	\$150,000
Evaluation of Policy Change on Middle School Student Lunch Consumption Baylor University	To compare dietary patterns of middle school students before and after a new policy to enforce restrictions on competitive food sales in schools. The study will use point of sale data and self-reported lunch food records from middle schools in Pasadena, Texas to test whether daily purchases of fruits and vegetables increase after the policy change; whether purchases of high-fat and high-sugar foods decrease; and whether student consumption of fat and total energy decrease.	\$179,396
Design Considerations for Developing Effective Wording and Format Options for a Children’s Nutrition Behavior Questionnaire ORC/Macro International	To improve understanding of the options for wording and modes of administration of future Early Childhood Longitudinal Survey—Kindergarten Cohort (ECLS-K) questions about children’s food purchasing and consumption.	\$74,990.

Table 1—FANRP Extramural Research Studies: Fiscal 2002—continued

Research Projects/Awards	Objective	Estimated Cost
Post-Conference Workshop on Evaluation of Nutrition Education with Low-Income Families Society for Nutrition Education	To sponsor a workshop of nutrition education programs that target low-income families to promote development of strengthened evaluation and to encourage joint evaluation efforts by directors of nutrition education programs.	\$30,000
Assessing the Feasibility of International Anthropometric References for School-aged Preadolescents United Nations University Centre	To provide support for assessing the desirability and feasibility of developing international anthropometric references for school-aged preadolescents that would prescribe optimal growth in children rather than describe how they actually grow under current conditions.	\$50,000
Nutrition and Health Outcomes of USDA Food and Nutrition Assistance Programs Abt Associates	To improve and expand understanding of the effects of USDA’s food and nutrition assistance programs on food consumption, nutrient availability and intakes, dietary quality, nutritional status, and health outcomes. Additional funding was provided to expand tabular analysis to include distributions of usual intake of nutrients.	\$61,932
Research Outreach		
Small Grants Program	To stimulate new and innovative research on food assistance programs and to broaden the participation of social science scholars in food assistance research. Five academic institutions and affiliated research institutes partnered with ERS in 1998 to administer the Small Grants Program. Each institution focuses on a particular facet of food assistance, such as diet and health outcomes, relationships to poverty and well-being, rural issues, and special at-risk population groups. The five institutions and areas of focus are:	
	<ul style="list-style-type: none"> • <i>The Joint Center for Poverty Research, University of Chicago and Northwestern University</i> funded proposals on interactions between food assistance and other welfare programs, and linkages between the macroeconomy and food assistance. (\$179,999) • <i>The Southern Rural Development Center at Mississippi State University</i> supports food assistance research on rural people, families, and communities in the South. The Center also initiated a dialogue among scholars through the establishment of a Rural South Food Assistance Research Task Force, with the purpose of further articulating research priorities on food-assistance-related issues. (\$180,000) • <i>The University of Arizona, American Indian Studies Program</i> is working with scholars at tribal colleges and elsewhere to support research addressing the unique issues and problems of Native Americans with respect to food assistance. (\$179,718) 	

Table 1—FANRP Extramural Research Studies: Fiscal 2002—continued

Research Projects/Awards	Objective	Estimated Cost
Food and Nutrition Information Center (FNIC) National Agricultural Library	<ul style="list-style-type: none"> <i>The University of California at Davis, Department of Nutrition</i> has awarded small grants for research on the impact of food assistance programs on nutritional risk indicators (anthropometric, biochemical, clinical, and dietary), food purchasing practices, and food insecurity. This program seeks to encourage examinations of multiple indicators of nutrition impact, and interdisciplinary approaches integrating epidemiology, economics, or anthropology with nutrition. (\$179,215) <i>The Institute for Research on Poverty at the University of Wisconsin</i> awarded research grants that address the effects of food assistance on individual and family well-being and food security. (\$180,000) <p>To provide support to the National Agricultural Library (NAL) in systematically storing and disseminating information on USDA's food assistance programs, nutrition education, and related nutrition issues; and hosting a website and list server.</p>	\$202,000
Food and Nutrition Summer Institute Agricultural Research Service, USDA	To help sponsor the Food and Nutrition Summer Institute, which has the objectives of positioning the nutrition programs of historically black colleges and universities to meet research and education challenges, and of creating a stronger voice and action for nutrition education, research, and policy within the African-American community.	\$20,000
Enhanced Food Assistance Research Data		
Panel Study of Income Dynamics National Science Foundation	To sustain and improve the collection of food assistance data in the Panel Study of Income Dynamics (PSID). The PSID collects longitudinal data on family composition, income, use of public assistance, food security, and factors associated with family self-sufficiency.	\$200,000
Early Childhood Longitudinal Study— Birth Cohort (ECLS-B) Department of Education	To include USDA's food security module and other items in the Early Childhood Longitudinal Survey—Birth Cohort, sponsored by the National Center for Educational Statistics, U.S. Department of Education. The survey was pre-tested for 9-month-old children, gathering infant height and weight data as well as responses to questions on food security, infant feeding practices, and participation in food assistance programs.	\$552,000
Early Childhood Longitudinal Study— Kindergarten Cohort (ECLS-K) Department of Education	To include USDA's food security module and other items in the Early Childhood Longitudinal Survey-Kindergarten Cohort (ECLS-K), sponsored by the National Center for Educational Statistics, U.S. Department of Education. The project will provide descriptive data on children's status at entry into school, children's transition into school, participation in the School Breakfast and National School Lunch Programs, and children's progress through fifth grade—including data that allow for the examination of the relationship between food security/hunger, cognitive development, and school performance.	\$448,000

Table 1—FANRP Extramural Research Studies: Fiscal 2002—continued

Research Projects/Awards	Objective	Estimated Cost
Current Population Survey (CPS) Food Security Supplement U.S. Bureau of the Census	To develop annual estimates of the prevalence of food security in the United States and to provide data for analysis of the determinants of and changes in the level of food security.	\$450,000
National Health and Nutrition Examination Survey 1999-2004, Food Security Questions Department of Health and Human Services	To support inclusion of a battery of food security questions in individual interviews of the National Health and Nutrition Examination Survey.	\$129,416
Household Food Purchases Survey Information Resources, Inc.	To fund the purchase of detailed information on weekly household food purchases over the course of an entire year based on a nationally representative sample of households.	\$10,000
Committee on National Statistics National Science Foundation	To provide core funding for the Committee on National Statistics for such activities as a review of the 2000 Census, poverty estimates for small areas, measuring the effects of social welfare reform, cost-of-living indexes, performance measures for public health programs, the use of statistical formulas in legislation for fund allocation, confidentiality and data access, and other issues.	\$26,200

Table 2—FANRP Extramural Research Studies: Fiscal 2001

Research Projects/Awards	Objective	Estimated Cost
Workforce Attachment, Income Volatility, and Administrative Costs		
Maternal Employment and Children's Nutrition Outcomes Abt Associates	To explore the implications of mothers' employment status for children's nutrition outcomes including participation in various food and nutrition assistance programs, food-and nutrient-based measures of dietary intake, food security, and obesity.	\$206,904
Food Stamp Program Entry and Exit: Economic and Policy Influences on Participation Decisions Mathematica Policy Research	To examine how changes in economic conditions and welfare policies affect entry into and exit from the Food Stamp Program for the aggregate caseload and various subgroups.	\$200,341
Understanding Program Participation Decisions of the Working Poor The University of Chicago	To examine why some poor working families with children do not participate in the Food Stamp Program even when eligible to do so, exploring the use of linked administrative data for monitoring nonparticipation.	\$98,452
Employment Factors Influencing Food Stamp Program Participation Among the Working Poor The Urban Institute	To describe employment characteristics of working food stamp recipients and estimate the effects of these characteristics on Food Stamp Program participation decision in the pre- and post-welfare reform periods.	\$149,995
The Effect of EITC on Food Stamp Program Participation Among the Working Poor The Urban Institute	To examine trends and seasonality in the receipt of Earned Income Tax Credits (EITC) and food stamp benefits among the working poor, to determine whether some of the unexplained portion of receipt, and to determine whether seasonal variation in FSP participation across States is related to Federal and or State EITC receipt.	\$139,849
Food Stamp Certification Periods and Payment Accuracy: State Experience During 1996-2000 Abt Associates	To determine the extent to which State-level payment error rates in the Food Program are due to inaccuracy of initial certifications as opposed to inaccurate payment levels for ongoing cases. The relationship between shortened certification periods, payment accuracy, FSP participation, and administrative costs will be examined through case studies in three States.	\$159,463
Labor Market Participation and Government Assistance Program Participation The George Washington University	To provide a comprehensive descriptive analysis of labor force participation of households with income under the food stamp threshold and of the jobs that food stamp recipients are likely to enter. The project will bring together data on the characteristics of low-skilled workers and low-wage jobs. An amendment supports an expanded analysis of CPS data	\$5,000

Table 2—FANRP Extramural Research Studies: Fiscal 2001—continued

Research Projects/Awards	Objective	Estimated Cost
Dynamics of Food Stamp Program Participation in Maryland Jacob France Institute, University of Baltimore	To study program entry and exit dynamics across geographic locations within Maryland and across different types of program participants using longitudinal Food Stamp Program administrative data	\$12,000
An Analysis of Poverty Dynamics and Food Security The George Washington University	To examine the dynamics of income and food security and to break down the sources of income dynamics into those associated with demographic changes, wage changes, and employment changes.	\$30,000
Best Practices Roundtable on Addressing the Needs of Low-Income Working Families Department of Health and Human Services	To support the first stage of an interagency effort for improving access to work support mechanisms, including food stamps, for low-income families. A series of roundtables will help identify State and local strategies for future demonstration and evaluation	\$25,000
Food Program Access, Caseload Decline, and Welfare Reform		
The Complementary Roles of Public and Private Assistance University of Kansas Medical Center	To examine the interactions of the receipts of private and public assistance by low-income families in the Kansas City metropolitan area, using trends to compare the individual characteristics associated with different patterns of use	\$110,000
Program Access and Declining Food Stamp Program Participation Abt Associates	To examine how households decide to participate in the Food Stamp Program. An amendment to an existing contract was made to support additional data collection efforts.	\$311,214
A Study of the U.S. Emergency Food Assistance System: Provider and Recipient Characteristics Mathematica Policy Research	To identify the characteristics, operating structure, and service areas of food banks, food pantries, and emergency kitchens and to provide national estimates of the total number of recipients served and the total quantity and type of food by source. An amendment to an existing contract was made to support additional data collection	\$98,022
Food Stamp Program Elderly Demonstration Mathematica Policy Research	To develop a plan for evaluating a set of demonstrations, funded by the Food and Nutrition Service, that are aimed at increasing food stamp participation among the eligible elderly. The plan will address implementation issues and effects on participation, administrative costs, client and stakeholder satisfaction, and household food stamp benefit levels.	\$198,816
The Impacts of Welfare Reform and the on Food Stamp Caseloads and Expenditures University of Oregon	To examine the effects on food stamp caseloads and expenditures of local labor differences in State welfare policies. An amendment to this project examines consumption stabilization and smoothing associated with food stamp benefits.	\$39,393

Table 2—FANRP Extramural Research Studies: Fiscal 2001—continued

Research Projects/Awards	Objective	Estimated Cost
The Effect of Provider Instability on Cross-Sectional Estimates of the Demand for Emergency Food University of Kansas Medical Center	To describe longitudinal patterns of service delivery by emergency food providers in the Kansas City area and produce an estimate of the bias incurred when cross-sectional data are used to estimate trends in the demand for emergency food.	\$17,966
Panel Cointegration Estimation of Food Stamp Program Caseloads Nova Scotia Agricultural College	To use advanced cointegration modeling techniques to assess the relationships among the macroeconomy and welfare reform on food stamp caseloads.	\$25,000
Devolution and Urban Change Department of Health and Human Services	To provide support for continued incorporation of a Food Stamp Program component into a major analysis by Manpower Demonstration Research Corporation of the effects of welfare reform on the economic and social well-being of low-income families in four urban areas.	\$250,000
Program Integrity and Effectiveness		
Evaluating the Impact of School Breakfast and Lunch RAND	To investigate effects of the School Breakfast Program and National School Lunch Program on participants' food security and nutrition outcomes using both clinical and interview data.	\$150,000
Effects of WIC and Food Stamp Program Participation on Child Outcomes The University of Chicago	To examine the individual effects of WIC and Food Stamp Program participation as well as their combined multiple participation effects on a wide range of child health and well-being outcomes using a longitudinal database linking several administrative datasets in Illinois.	\$134,949
Evaluating Changes in WIC Participant Food Purchasing as a Result of WIC Nutrition Education Health Systems Research	To use point-of-purchase data from grocery stores in Washington State together with WIC administrative records to examine changes in WIC participant shopping behavior (for WIC foods) after the implementation of local nutrition education interventions designed to change purchasing behaviors (for WIC foods).	\$260,187
Summer Food Service Program Study Mathematica Policy Research	To conduct the first nationally representative study in 15 years of the Summer Food Service Program. The study will obtain detailed information at the State, sponsor, and site levels on program operations and administration and on meal characteristics.	\$2,207,501
WIC Cost Containment Practices and Their Impacts (<i>Congressionally mandated</i>) Abt Associates	Report to Congress on the effects of cost containment practices by States such as limiting brand-named products in the WIC food package. An option was exercised to conduct the analysis and develop a mandated Report to Congress.	\$376,936

Table 2—FANRP Extramural Research Studies: Fiscal 2001—continued

Research Projects/Awards	Objective	Estimated Cost
Measuring the Extent of Food Stamp Trafficking Using EBT Data ORC/Macro International	To gather information and solicit expert opinion regarding options that can be used by USDA to better monitor, investigate, measure, and annually report on the extent of food stamp trafficking using Electronic Benefit Transfer data.	\$89,542
Research Design Considerations for Intergrating Cost Data with Customer Information in an Evaluation of School Meal Performance Abt Associates	To examine the study design considerations, with respect to complexity, feasibility, and cost, of integrating cost data with measures of customer behavior and satisfaction in an evaluation of the performance of the National School Lunch Program and the	\$55,496
Dietary Risk in the WIC Program: A Scientific Assessment National Academy of Sciences	To review the scientific basis for methods currently employed in the dietary risk assessment of individuals for eligibility to participation in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). The study will also evaluate, to the extent possible, other methods proposed to assess inadequate diets, including food consumption behavior patterns that may be of use in predicting inadequate and inappropriate diets	\$240,840
Journal of Nutrition Education Special Issue for the Elderly Society for Nutrition Education	To support dissemination of FANRP intramural and extramural research on the elderly, the factors that influence their diets, and the role that USDA food assistance and nutrition programs can play in maintaining or improving the nutrition and health status of the elderly.	\$14,000
WIC Eligibility Expert Review Panel Study Food and Nutrition Service, USDA	To provide support for a National Academy of Sciences committee to review methods and procedures for estimating annually the number of people eligible for the Special Supplement Nutrition Program for Women, Infants, and Children (WIC), and to identify ways to improve WIC eligibility and participation estimates. Phase Two will assess procedural improvements for estimates of eligible infants and children, develop procedures for estimates of eligible women, and consider issues related to participation levels.	\$350,000
Nutrition, Health Outcomes, and Dietary Behavior		
The Associations Among Food Assistance Program Participation, Food Security, and Child and Maternal Health Disparities Boston Medical Center	To examine children 3 years old and younger for associations among food assistance program participation, food security, and health outcomes using multistate, multiyear clinical pediatric data.	\$108,981

Table 2—FANRP Extramural Research Studies: Fiscal 2001—continued

Research Projects/Awards	Objective	Estimated Cost
Development of Eating Patterns and Dietary Behaviors that Predict Child Obesity The Mary Imogene Bassett Hospital	To evaluate the extent to which specific factors such as eating patterns and certain parent characteristic behaviors are prospectively related to the incidence, remission, and/or persistence of child obesity.	\$306,641
Assessing the Nutrient Intakes of High-Needs Subgroups Using the Dietary Reference Intakes Mathematica Policy Research	To use the Dietary Reference Intakes for a comprehensive assessment of the nutrient adequacy of the diets of high-needs subgroups: teenage females, elderly people, overweight and obese children and adults, individuals living in food-insecure households, low-income individuals, and individuals participating in food and nutrition assistance programs.	\$247,976
The Ecological Predictors and Development Outcomes of Persistent Childhood Obesity University of Missouri	To identify the school, family, parent, and child predictors of persistent childhood obesity and to assess the health, social, emotional, and academic outcomes of persistent childhood obesity.	\$181,485
Lifestyle Mediators of Diet Quality University of North Carolina School of Public Health and School of Medicine	To explain differences in diet quality and diet-related health outcomes by developing a set of consumer lifestyle patterns that reflect combination of food consumption and other lifestyle behaviors, such as the use of dietary supplements, among adult Americans.	\$199,994
Impact of Food Sufficiency on Food Choices of Low Income Children University of Tennessee	To examine the relationships of food sufficiency, diet quality, and food consumption patterns among children 2- to 8-years-old in low income households, using eating pattern typologies identified by cluster analysis, and to explore the impact of coping strategies on adequacy, diversity and dietary patterns.	\$48,581
Dietary Patterns and Nutritional Adequacy: Does Variety Matter? Cancer Research Center of Hawaii	To determine if a measure of dietary variety increases the ability of currently used dietary quality indexes to predict nutrient adequacy and body mass index.	\$200,000
Diet Quality and Its Relationship to Obesity in Rural Alabama African American Children Auburn University	To examine various aspects of diet quality, eating patterns, physical activity, and various other activities related to lifestyle in 9- to 11-year olds in 4 rural counties in Alabama to identify diet and lifestyle characteristics that increase the risk of developing obesity.	\$149,670
Research on Breast-fed Infants' Growth World Health Organization	To conduct research on optimal growth rates for breastfed infants. WIC program clinicians require appropriate infant growth charts to determine when, and if, breastfeeding should be supplemented with formula to support weight gain. Current infant growth charts are based predominately on formula-fed infants and, hence, may suggest faster weight gains than optimal, leading to unnecessary formula supplementation. With funding from the Centers for Disease Control and Prevention, an amendment to the grant supports the costs of hosting a meeting of the Steering Committee for the Multicentre Growth Reference Study.	\$25,000

Table 2—FANRP Extramural Research Studies: Fiscal 2001—continued

Research Projects/Awards	Objective	Estimated Cost
Research Outreach		
Small Grant Program	<p>To stimulate new and innovative research on food assistance programs and to broaden the participation of social science scholars in food assistance research. Five academic institutions and affiliated research institutes partnered with ERS in 1998 to administer the Small Grants Program. Each institution focuses on a particular facet of food assistance, such as diet and health outcomes, relationships to poverty and well-being, rural issues, and special at-risk population groups. The five institutions and areas of focus are:</p> <ul style="list-style-type: none"> • <i>The Joint Center for Poverty Research, University of Chicago and Northwestern University</i> funded proposals on interactions between food assistance and other welfare programs, and linkages between the macroeconomy and food assistance. (\$160,000) • <i>The Southern Rural Development Center at Mississippi State University</i> supports food assistance research on rural people, families, and communities in the South. The Center also initiated a dialogue among scholars through the establishment of a Rural South Food Assistance Research Task Force, with the purpose of further articulating research priorities on food-assistance-related issues. (\$160,000) • <i>The University of Arizona, American Indian Studies Program</i> is working with scholars at tribal colleges and elsewhere to support research addressing the unique issues and problems of Native Americans with respect to food assistance. (\$178,796) • <i>The University of California at Davis, Department of Nutrition</i> has awarded small grants for research on the impact of food assistance programs on nutritional risk indicators (anthropometric, biochemical, clinical, and dietary), food purchasing practices, and food insecurity. This program seeks to encourage examinations of multiple indicators of nutrition impact, and interdisciplinary approaches integrating epidemiology, economics, or anthropology with nutrition. (\$159,144) • <i>The Institute for Research on Poverty at the University of Wisconsin</i> awarded research grants that address the effects of food assistance on individual and family well-being and food security. (\$160,000) 	\$817,940
Food and Nutrition Information Center (FNIC) National Agricultural Library	<p>To provide support to the National Agricultural Library (NAL) in systematically storing and disseminating information on USDA’s food assistance programs, nutrition education, and related nutrition issues; and hosting a website and list server.</p>	\$202,000

Table 2—FANRP Extramural Research Studies: Fiscal 2001—continued

Research Projects/Awards	Objective	Estimated Cost
Interpretation and Use of Dietary Reference Intakes Department of Health and Human Services	To promote understanding of the proper methods for assessing health- and nutrition-related outcomes for food assistance programs. ERS will support NAS research on how the newly developed Dietary Reference Intakes (DRIs) should be incorporated into program design and evaluations. This phase of the project focuses on the appropriate uses of the DRIs for dietary planning for groups, households, individuals, and meals.	\$261,008
Conference on Income Volatility and Implications for Food Assistance Institute for Research on Poverty, University of Wisconsin-Madison	To sponsor a conference on issues related to income volatility in determining movement in and out of food assistance program eligibility compliance with eligibility criteria over time, and various costs associated with eligibility criteria.	\$123,600
Food and Nutrition Summer Institute Agricultural Research Service, USDA	To help sponsor the Food and Nutrition Summer Institute, which has the objectives of positioning the nutrition programs of historically black colleges and universities to meet research and education challenges, and of creating a stronger voice and action for nutrition education, research, and policy within the African-American community.	\$20,000
Enhanced Food Assistance Research Data		
Panel Study of Income Dynamics National Science Foundation	To sustain and improve the collection of food assistance data in the Panel Study of Income Dynamics (PSID). The PSID collects longitudinal data on family composition, income, use of public assistance, food security, and factors associated with family self-sufficiency	\$200,000
Early Childhood Longitudinal Study—Birth Cohort 2000 (ECLS-B) Department of Education	To include USDA’s food security module and other items in the Early Childhood Longitudinal Survey—Birth Cohort, sponsored by the National Center for Educational Statistics, U.S. Department of Education. The survey was pre-tested for 9-month-old children, gathering infant height and weight data as well as responses to questions on food security, infant feeding practices, and participation in food assistance programs.	\$230,000
Early Childhood Longitudinal Study—Kindergarten Cohort (ECLS-K) Department of Education	To include USDA’s food security module and other items in the Early Childhood Longitudinal Survey-Kindergarten Cohort (ECLS-K), sponsored by the National Center for Educational Statistics, U.S. Department of Education. The project will provide descriptive data on children’s status at entry into school, children’s transition into school, participation in the School Breakfast and National School Lunch Programs, and children’s progress through fifth grade—including data that allow for the examination of the relationship between food security/hunger, cognitive development, and school performance.	\$360,000

Table 2—FANRP Extramural Research Studies: Fiscal 2001—continued

Research Projects/Awards	Objective	Estimated Cost
Current Population Survey (CPS) Food Security Supplement, April 2001 U.S. Bureau of the Census	To develop annual estimates of the prevalence of food security in the United States and to provide data for analysis of the determinants of and changes in the level of food security.	\$420,000
National Health and Nutrition Examination Survey 1999-2004, Food Security Questions Department of Health and Human Services	To support inclusion of a battery of food security questions in individual interviews of the National Health and Nutrition Examination Survey	\$120,578
Household Food Purchases Survey Information Resources, Inc.	To fund the purchase of detailed information on weekly household food purchases over the course of an entire year based on a nationally representative sample of households.	\$72,700
Infant Formula Retail Prices Data Information Resources, Inc.	To fund the purchase of data on infant formula prices and sales in supermarkets in 64 local market areas throughout the United States for use in a Report to Congress.	\$12,156
Committee on National Statistics National Science Foundation	To provide core funding for the Committee on National Statistics for such activities as a review of the 2000 Census, poverty estimates for small areas, measuring the effects of social welfare reform, cost-of-living indexes, performance health measures for public programs, the use of statistical formulas in legislation for fund allocation, access, confidentiality and data and other issues.	\$26,200

Table 3—FANRP Extramural Research Studies: Fiscal 2000

Research Projects/Awards	Objective	Estimated Cost
Food Program Access and Client Well-Being		
Longitudinal Analysis of the Earnings and Food Stamp Participation of the Working Poor The Lewin Group	To examine how the long-term earnings patterns of the working poor who are eligible or food stamps are related to their participation in the Food Stamp Program. The project will conduct an extensive analysis of linked files from the 1992-96 Survey of Income and Program Participation and Social Security Administration earnings histories.	\$169,489
Social Marketing Study to Increase Food Stamp Participation Among the Elderly Health Systems Research	To utilize social marketing research methods for the development of a food stamp outreach program tailored to the elderly. After conducting 15 focus groups drawn from three ethnic groups, the project will construct an outreach marketing plan and a set of outreach materials.	\$159,927
Food Insecurity in the Second Generation National Bureau of Economic Research	To examine food insecurity in the immigrant population and the effects of socioeconomic characteristics, networks in ethnic enclaves, Food Stamp Program participation, and welfare reform on differences in food insecurity between immigrant and other households.	\$150,000
Effects of Food Security on Pregnancy Outcomes Carolina Population Center, University of North Carolina at Chapel Hill	To add a food security research component to the large, ongoing Epidemiology of Exertion, Stress and Preterm Delivery Study (PIN-III). The project will examine the relationships between food insecurity and maternal nutritional indicators, poor birth outcomes, and social and environmental factors.	\$250,000
Feasibility and Accuracy of Record Linkage to Estimate Multiple Program Participation Abt Associates	To identify the feasibility of linking the administrative data files from food stamps, WIC, and child nutrition programs to facilitate analysis of multiple program participation and to improve program operations in such areas as one-stop shopping, adjunctive eligibility determination, program integrity, and administrative and client burden.	\$354,927
Basic Needs, Tough Choices: The Impact of Housing Costs on Food Consumption Johns Hopkins University	To examine how housing affordability in local market affects food expenditures and food security for low-income households. Food Stamp Program regulations adjust benefits for excess housing costs, but low-income households face tradeoffs between housing, which accounts for the largest share of their budgets, and food consumption.	\$100,318
Factors Associated with Iron Status Among WIC Infants in Rural West Virginia University of West Virginia	To collect primary data on WIC infants and toddlers, ages 6 to 24 months, in West Virginia counties that are known to have high rates of iron-deficiency anemia, to identify dietary factors that are associated with poor iron status, and to provide data that can be used to design and implement effective nutrition education and intervention programs.	\$135,004

Table 3—FANRP Extramural Research Studies: Fiscal 2000—continued

Research Projects/Awards	Objective	Estimated Cost
A Study of the U.S. Emergency Food Assistance System: Provider and Recipient Characteristics Mathematica Policy Research	To identify the characteristics, operating structure, and service areas of food banks, food pantries, and emergency kitchens and to provide national estimates of the total number of recipients served and the total quantity and type of food by source. A modification to the existing contract was made to increase the coverage of the provider survey to include agencies that distribute The Emergency Food Assistance Program (TEFAP) foods as a secondary function.	\$99,208
A Study of the U.S. Emergency Food Assistance System: Provider and Recipient Characteristics Mathematica Policy Research	To identify the characteristics, operating structure, and service areas of food banks, food pantries, and emergency kitchens and to provide national estimates of the total number of recipients served and the total quantity and type of food by source. An option to the contract was exercised to survey clients on their characteristics, participation in other food assistance programs, and reasons for obtaining emergency food instead of or in addition to obtaining food through USDA programs.	\$1,577,357
Community Food Security Assessment Tool Kit Field Test Agricultural Research Service, USDA	To develop a set of standardized instruments for the measurement and assessment of community food security at the local level. This project provides support to ARS's Delta NIRI for a field test of a community food security assessment tool kit in Drew County, Arkansas.	\$35,000
Labor Market Participation and Government Assistance Program Participation The George Washington University	To provide a comprehensive descriptive analysis on laborforce participation of households with income under the foodstamp threshold and on the jobs that food stamp recipients are likely to enter. The project on will bring together datathe characteristics of low-skilled workers and low-wage jobs.	\$12,100
Food Stamp Program Caseload Decline		
Program Access and Declining Food Stamp Program Participation Abt Associates	To examine how households decide to participate in the Food Stamp Program. An option to an existing contract was exercised to examine the relative influence of local office practices, stigma, and other factors in the decision of eligible households that choose not to apply for or participate in the Food Stamp Program.	\$623,794
Time Series Analysis of Food Stamp Program Caseloads Nova Scotia Agricultural College	To evaluate the time series properties of Food Stamp Program caseloads from the late 1970's to 1999. This study focuses on testing for structural shifts over this time period, by estimating a cointegrated long-run relationship and error correction specification within the framework of structural change.	\$20,000

Table 3—FANRP Extramural Research Studies: Fiscal 2000—continued

Research Projects/Awards	Objective	Estimated Cost
<p>The Impacts of Welfare Reform and the Macroeconomy on Food Stamp Caseloads and Expenditures University of Oregon</p>	<p>To examine the effects on food stamp caseloads and expenditures of local labor market conditions and differences in State welfare policies. An amendment to this project examines the effects of macroeconomic conditions and welfare reform on State poverty rates and the links between food stamp caseloads and poverty rates.</p>	\$15,000
<p>Studies of Households Who Leave the Food Stamp Program: Iowa Iowa State University</p>	<p>To determine the status of households and individuals who leave the Food Stamp Program, focusing on individuals' ability to obtain employment, the support provided by their earnings and other income sources, and support provided by public and/or private programs. An amendment was made to examine statistical design issues.</p>	\$100,000
<p>Supporting Families After Welfare Reform: Access to Medicaid, the Food Stamp Program (FSP), and the State Children's Health Insurance Program (SCHIP) Department of Health and Human Services</p>	<p>To help States and large counties solve problems eligibility processes that make it difficult for low-income families to access and retain program benefits. An interagency transfer was made to the Administration Children and Families (HHS) to provide support for a Food Stamp Program component in a study that addresses Medicaid and Temporary Assistance for Needy Families (TANF).</p>	\$203,591
<p>Devolution and Urban Change Department of Health and Human Services</p>	<p>To provide support for continued incorporation of a Food Stamp Program component into a major analysis by Manpower Demonstration Research Corporation of the effects of welfare reform on the economic and social well-being of low-income families in four urban areas.</p>	\$250,000
Child Nutrition		
<p>Parental Time, Role Strains, Coping, and Children's Diet and Nutrition Texas A&M University</p>	<p>To study the effects of time use, time constraints, work demands, role strains, and coping mechanisms on children's diets and obesity risk. A survey of 300 households households, with single parents oversampled, will provide detailed information for the analysis.</p>	\$251,707
<p>Parenting Practices and Obesity in Low-Income African-American Preschoolers University of Chicago and Children's Hospital Medical Center (Cincinnati)</p>	<p>To refine and administer the Preschooler Feeding Questionnaire (PFQ), which is designed to identify specific parenting practices associated with preschool children becoming overweight. The target population of the refined PFQ is low-income African-American mothers, whose 2- to 5-year-old children are at high risk for becoming overweight.</p>	\$260,000
<p>Direct Certification and its Impact on Errors in the National School Lunch Program Mathematica Policy Research</p>	<p>To assess the prevalence of direct certification in the National School Lunch Program (NSLP) and its effects on certification, participation, and verification error rates. A nationally representative sample of School Food Authorities will be surveyed to gather information from NSLP applications for free and reduced-price meals and from State and local welfare offices.</p>	\$779,364

Table 3—FANRP Extramural Research Studies: Fiscal 2000—continued

Research Projects/Awards	Objective	Estimated Cost
Research on Breast-fed Infants' Growth World Health Organization and University of California—Davis	To conduct research on optimal growth rates for breast-fed infants that will help to determine when, and if, breastfeeding should be supplemented with formula to support weight gain. The grant was amended to include a cross-sectional component to measure children ages 18-71 months for reliable estimates of growth through the end of the 5th year of life.	\$124,997
The Implementation of the National School Lunch Program Application and Verifications Pilot Projects Food and Nutrition Service, USDA	To provide support for the initial phase of setup and evaluation for the National School Lunch Program (NSLP) pilot demonstration sites for the Food and Nutrition Service's study of alternative NSLP application and verification procedures.	\$35,000
CACFP Administrative Cost Reimbursement Study Resource Network International	To examine USDA's reimbursement of administrative costs incurred by sponsors of family child care homes that participate in the Child and Adult Care Food Program (CACFP). The project will examine the sponsors' budgets and reimbursements, investigate benchmarks for wages and other costs, and review alternative reimbursement systems.	\$554,909
WIC Eligibility Expert Review Panel Study Food and Nutrition Service, USDA	To provide support for a National Academy of Sciences committee to review methods and procedures for estimating annually the number of people eligible for the Special Supplement Nutrition Program for Women, Infants, and Children (WIC), and to identify ways to improve WIC eligibility and participation estimates.	\$250,000
Nutrition, Health Outcomes, and Dietary Behavior		
Longitudinal Modeling of the Effects of Dietary Intakes on Body Composition and Risk Factors for Coronary Disease in the Women's Health Trial: Feasibility Study in Minority Populations University of Houston	To develop dynamic models to explain selected nutrition-related risk factors for chronic disease among participants in a 12-month randomized trial of a low-fat diet. Results will provide insights into factors influencing success in changing dietary behavior, and the effects of dietary intakes on body composition and other physiological measures of nutritional status.	\$121,000
Diet Patterns, Nutrients and Development of Adolescent Obesity Channing Laboratory, Brigham and Women's Hospital	To analyze 1996-2000 data from a longitudinal survey containing annual assessments of diet, activity, weight control practices, and height and weight of adolescents. The project will describe dietary patterns, diet quality, and obesity development.	\$150,000
Eating Patterns, Diet Quality, and Obesity Baylor College of Medicine	To identify eating patterns associated with diet quality and obesity in children and young adults from a biracial population, using the Bogalusa Heart Study database. The project will also identify strategies for changing eating patterns and improving diet quality.	\$220,000

Table 3—FANRP Extramural Research Studies: Fiscal 2000—continued

Research Projects/Awards	Objective	Estimated Cost
<p>Conference on Interventions to Prevent Low Birth Weights Agricultural Research Service, USDA</p>	<p>To provide support for an international research conference on interventions to prevent low birth weights. Research on USDA’s Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) has demonstrated its importance and cost effectiveness in successfully reducing low birth weight outcomes.</p>	\$30,000
<p>Nutrition and Health Outcomes of USDA Food and Nutrition Assistance Programs Abt Associates</p>	<p>To improve and expand understanding of the effects of USDA’s food and nutrition assistance programs. An option was exercised to analyze NHANES III data to investigate a variety of nutrition- and health-related measures for several groups of people: Food Stamp Program participants and nonparticipants; WIC participants and nonparticipants; school-aged children; and elderly persons.</p>	\$209,090
<p>Food Demands and Nutrient Availability of Low-Income Households University of Nevada-Reno</p>	<p>To estimate the effect of Food Stamp Program (FSP) benefits on households’ food expenditures and nutrient availability using 1997-98 data from the National Food Stamp Program Survey. Studies that documented positive effects of food stamp benefits on food expenditure and nutrient availability have become dated.</p>	\$10,000
<p>An Evaluation of the USDA’s Healthy Eating Index Syracuse University</p>	<p>To examine whether the predictive performance of the Healthy Eating Index (HEI) could be improved by modifying its construction. Two recent studies have shown that the HEI does moderately well in predicting cardiovascular disease but not cancer or overall mortality.</p>	\$35,000
<p>Demand System Analysis for Households Segmented by Family Structure and Income Texas A&M University</p>	<p>To estimate theoretically consistent price and income elasticities for food and nonfood commodities for households distinguished by income and family structure. The resulting elasticities will be incorporated into ERS’s economy-wide modeling of welfare reform.</p>	\$20,000
Research Outreach		
Small Grants Program	<p>To stimulate new and innovative research on food assistance programs and to broaden the participation of social science scholars in food assistance research. Five academic institutions and affiliated research institutes partnered with ERS in 1998 to administer the Small Grants Program. Each institution focuses on a particular facet of food assistance, such as diet and health outcomes, relationships to poverty and well-being, rural issues, and special at-risk population groups. The five institutions and areas of focus are:</p> <ul style="list-style-type: none"> <li data-bbox="800 1321 1835 1409">• <i>The Joint Center for Poverty Research, University of Chicago and Northwestern University</i> funded proposals on interactions between food assistance and other welfare programs, and linkages between the macroeconomy and food assistance. (\$169,999) 	\$819,999

Table 3—FANRP Extramural Research Studies: Fiscal 2000—continued

Research Projects/Awards	Objective	Estimated Cost
	<ul style="list-style-type: none"> • <i>The Southern Rural Development Center at Mississippi State University</i> supports food assistance research on rural people, families, and communities in the South. The Center also initiated a dialogue among scholars through the establishment of a Rural South Food Assistance Research Task Force, with the purpose of further articulating research priorities on food-assistance-related issues. (\$200,000) • <i>The University of Arizona, American Indian Studies Program</i> is working with scholars at tribal colleges and elsewhere to support research addressing the unique issues and problems of Native Americans with respect to food assistance. (\$150,000) • <i>The University of California at Davis, Department of Nutrition</i> has awarded small grants for research on the impact of food assistance programs on nutritional risk indicators (anthropometric, biochemical, clinical, and dietary), food purchasing practices, and food insecurity. This program seeks to encourage examinations of multiple indicators of nutrition impact, and interdisciplinary approaches integrating epidemiology, economics, or anthropology with nutrition. (\$150,000) • <i>The Institute for Research on Poverty at the University of Wisconsin</i> awarded research grants that address the effects of food assistance on individual and family well-being and food security. (\$150,000) 	
Food and Nutrition Summer Institute Agricultural Research Service, USDA	To help sponsor the Food and Nutrition Summer Institute, which has the objectives of positioning the nutrition programs of historically black colleges and universities to meet research and education challenges, and of creating a stronger voice and action for nutrition education, research, and policy within the African-American community.	\$20,000
Food and Nutrition Information Center National Agricultural Library	To provide support to the National Agricultural Library (NAL) in systematically storing and disseminating information on USDA's food assistance programs, nutrition education and related nutrition issues; and hosting a website and list server.	\$202,000
Enhanced Food Assistance Research Data		
Data Development Initiatives for Research on Food Assistance and Nutrition Programs Urban Institute, Health Systems Research, and Research Triangle Institute, Inc.	To explore possibilities for investments in new and improved data resources for research on Federal food assistance and nutrition programs. The project will identify and evaluate 10 feasible initiatives for investments in data resources, and then develop an implementation plan and cost estimates for three selected initiatives.	\$305,933

Table 3—FANRP Extramural Research Studies: Fiscal 2000—continued

Research Projects/Awards	Objective	Estimated Cost
Panel Study of Income Dynamics National Science Foundation	To sustain and improve the collection of food assistance data in the Panel Study of Income Dynamics (PSID). The PSID collects longitudinal data on family composition, income, use of public assistance, food security, and factors associated with family self-sufficiency.	\$200,000
Early Childhood Longitudinal Study— Birth Cohort 2000 (ECLS-B) Department of Education	To include USDA’s food security module and other items in the Early Childhood Longitudinal Survey—Birth Cohort, sponsored by the National Center for Educational Statistics, U.S. Department of Education. The survey was pre-tested for 9-month-old children, gathering infant height and weight data as well as responses to questions on food security, infant feeding practices, and participation in food assistance programs.	\$400,000
Early Childhood Longitudinal Study—Kindergarten Cohort (ECLS-K) Department of Education	To include USDA’s food security module and other items in the Early Childhood Longitudinal Survey-Kindergarten Cohort (ECLS-K), sponsored by the National Center for Educational Statistics, U.S. Department of Education. The project will provide descriptive data on children’s status at entry into school, children’s transition into school, participation in the School Breakfast and National School Lunch Programs, and children’s progress through fifth grade—including data that allow for the examination of the relationship between food security/hunger, cognitive development, and school performance.	\$250,000
Current Population Survey (CPS) Food Security Supplement, September 2000 U.S. Bureau of the Census	To develop annual estimates of the prevalence of food security in the United States and to provide data for analysis of the determinants of and changes in the level of food security	\$420,000
National Health and Nutrition Examination Survey 1999-2004, Food Security Questions Department of Health and Human Services	To support inclusion of a battery of food security questions in individual interviews of the National Health and Nutrition Examination Survey.	\$116,388
National Food Price Data System Food and Drug Administration	To provide support for the most recent national data on food prices, quantities, comparable volumes, dollar sales, and promotion information at the product group, class, brand, and item levels and information on promotional treatments.	\$82,000
Committee on National Statistics National Science Foundation	To provide core funding for the Committee on National Statistics for such activities as a review of the 2000 Census, poverty estimates for small areas, measuring the effects of social welfare reform, cost-of-living indexes, performance measures for public health programs, the use of statistical formulas in legislation for fund allocation, confidentiality and data access, and other issues.	\$26,200

Table 4—FANRP Extramural Research Studies: Fiscal 1999

Research Projects/Awards	Objective	Estimated Cost
Food Stamp Program Caseload Decline		
Program Access and Declining Food Stamp Program Participation Abt Associates	To examine how the decisions by clients to participate in the Food Stamp Program have been affected by changes, such as customer service at local welfare office and increases in stigma associated with welfare reform. Population groups of special interest include legal immigrants, ABAWDs, child-only cases, and households exiting TANF.	\$1,889,035
What Explains Changes in the Food Stamp Program Caseloads? Abt Associates	To estimate the impacts on Food Stamp Program caseloads of economic trends, demographic changes and welfare reform from the late 1970's to 1998. The study will use variation across time and States to disentangle the effects.	\$96,807
The Effects of Welfare Implementation on Food Stamp Caseloads Rockefeller Institute of Government	To examine local-level institutional changes in program delivery that may have contributed to caseload decline for the Food Stamp Program. The study focuses on such changes as the growing institutional separation between food stamp and cash welfare administrative systems and the increasing complexity of the programs.	\$200,079
Causes and Consequences of Food Insufficiency After Welfare Reform University of Michigan	To examine the experiences of single mothers and their children in the era since welfare reform. The study focuses on such outcomes as food insufficiency and maternal and child health, and relates them to maternal work histories and welfare and food stamp participation.	
Devolution and Urban Change Department of Health and Human Services	To incorporate a Food Stamp Program (FSP) component into a major analysis by Manpower Demonstration Research Corporation of the effects of welfare reform on the economic and social well-being of low-income families in four urban areas. The study will examine issues such as local office implementation of national FSP policies, how recipients fare, whether local institutions are affected by changes in welfare policies, and how changes are evidenced by indicators of well-being.	\$300,000
Better Serving the Working Poor		
Improving Access to Food Stamps for Low-Income Working Households Manpower Demonstration Research Corp.	To examine food stamp use among low-income working households, a group for which the number of eligible households substantially exceeds the number of participating households. Data will involve longitudinal information on food stamp benefits, food sufficiency, material hardship, and child well-being.	\$178,433
Restructuring Food Stamps To Help Working Families Urban Institute	Building on various analyses related to the New Federalism Project, this study will explore and propose options for restructuring the Food Stamp Program to supplement the incomes of working, low-income families.	\$50,000

Table 4—FANRP Extramural Research Studies: Fiscal 1999—continued

Research Projects/Awards	Objective	Estimated Cost
Program Integrity and Improved Service to the Working Poor Under Alternative Reporting Plans The SPHERE Institute	To compare retrospective monthly earnings reporting and prospective quarterly reporting to determine which best serves the working poor, yields administrative cost-savings, and preserves program integrity.	\$348,428
Nutrition, Health Outcomes, and Dietary Behavior		
Understanding Child Nutrition in the Year 2000: Dynamic Shifts and Their Determinants University of North Carolina at Chapel Hill	To examine factors that affect the quality of children’s diets, including snacking behaviors, away-from-home food intake behavior, the role of maternal labor force participation, and the influence of food and nutrition assistance programs.	\$200,000
Obesity in Low-Income Mothers and Children Children’s Hospital Medical Center (Cincinnati)	Using links between WIC data and birth certificate data on approximately 35,000 mother-child pairs, the study will examine factors that may influence the probability that by age 4 a WIC child with an obese mother will also be obese.	\$350,000
Factors Affecting Child Obesity Among Low-Income Households University of Georgia	Using data from USDA’s 1994-96 Continuing Survey of Food Intakes by Individuals (CSFII) and a statistical technique to correct for selectivity bias, the study is designed to ascertain if children from low-income households that participated in food assistance programs are at a greater risk of becoming obese than are their counterparts.	\$99,828
The Determinants of Overweight and Obesity Among Low-Income Children Boston University, Boston Medical Center	To examine the relationships between food insufficiency and obesity among low-income children. Using data from the National Health and Nutrition Examination Survey (NHANES III), the study will examine the impact of household food insufficiency status and other factors on the likelihood of being overweight for children whose families receive WIC or food stamps compared with children in nonrecipient households.	\$124,999
Economic Benefits of a Breastfeeding Promotion: Controlled Clinical Trial Albert Einstein College of Medicine	To evaluate the benefits of a breastfeeding promotion intervention campaign among low-income women. A randomized controlled clinical trial will examine the effects on breastfeeding prevalence and duration, infant health, and infant medical costs of providing the mother with personalized breastfeeding counseling.	\$399,700
Food Security and Health Outcomes in the California Health Interview Survey University of California—Los Angeles School of Public Health	To adapt the USDA Food Security Core Module for use with different ethnic populations participating in the California Health Interview Survey. The survey investigates the relationship of household-level food insecurity and hunger to self-reported health status, health services utilization, dietary quality, and preventative health behaviors.	\$100,000
Evaluating the Impact of School Breakfast on Learning: Design and Feasibility Mathematica Policy Research	To develop and evaluate alternative study designs of that would permit future evaluation of the impact school breakfast on learning and cognitive development. The research will identify the strengths and weaknesses of alternative designs and address such critical issues as controlling for confounding factors.	\$289,311

Table 4—FANRP Extramural Research Studies: Fiscal 1999—continued

Research Projects/Awards	Objective	Estimated Cost
Food Security		
Hunger: Its Risk and Impact in Poor Female-Headed Households With Children University of Massachusetts Medical School	To identify factors that predispose poor households to, or protect them from, food insecurity and hunger. The study will examine the impact of food insecurity/hunger on a variety of measures, such as food insecurity, physical and emotional health of mother and children, and children’s academic achievement.	\$250,000
Analysis of Data from the 1998 and 1999 Food Security Supplements to the Current Population Survey Food Security Measurement Research IQ Solutions	To analyze for the 1995-99 period the extent of food insecurity and hunger in the United States, using data collected in the Food Security Supplements to the Current Population Survey (CPS) conducted by the Census Bureau.	\$236,859
Community Food Security Assessment Conference USDA Graduate School	To contribute to the Department’s Community Food Security Initiative by supporting the development of a standardized community assessment toolkit and sponsoring a conference that gathered an interdisciplinary group of academics and community practitioners from across the country to help guide the development and implementation of the assessment toolkit.	\$127,032
Community Food Security Assessment Tool Kit IQ Solutions	To develop a set of standardized instruments for the measurement and assessment of community food security. The menu of instruments will be accompanied by implementation descriptions that will facilitate data collection and analysis at the local level.	\$149,570
Program Integrity and Effectiveness		
WIC Cost Containment Practices and Their Impacts <i>(Congressionally mandated)</i> Abt Associates	Report to Congress on the effects of cost containment practices by States such as limiting brand-named products in the WIC food package. The study will assess the effects of such practices on program participation, access to and availability of prescribed foods, voucher redemption rates, actual food selections by participants, participants on special diets or with specific food allergies, participant use of and satisfaction with prescribed foods, achievement of positive health outcomes, and program costs.	\$1,099,293
WIC Program Integrity Research ATMS/Abt Associates	To identify and evaluate the best tools for and abuse among WIC staff or participants. The study will review existing tools and data systems presently in use by some States for detecting fraud and abuse among WIC vendors. The project was identified by the National Association of WIC Directors as a high research priority.	\$225,550

Table 4—FANRP Extramural Research Studies: Fiscal 1999—continued

Research Projects/Award	Objective	Estimated Cost
Summer Feeding Integrity Study: A Design, Cost, and Feasibility Plan Mathematica Policy Research	To obtain a design, cost, and evaluation study that considers options for improving estimates of sponsor, site, and participant characteristics in the Summer Food Service Program. The study will consider alternative sampling frames, questionnaire design, modes for collecting information, time frames for data collection, and implications for implementation costs.	\$412,246
Research Outreach		
Small Grant Program	To stimulate new and innovative research on food assistance programs and to broaden the participation of social science scholars in food assistance research. Five academic institutions and affiliated research institutes partnered with ERS in 1998 to administer the Small Grants Program. Each institution focuses on a particular facet of food assistance, such as diet and health outcomes, relationships to poverty and well-being, rural issues, and special at-risk population groups. The five institutions and areas of focus are	\$750,000
	<ul style="list-style-type: none"> <li data-bbox="800 695 1719 816">• <i>The Joint Center for Poverty Research, University of Chicago and Northwestern University</i> funded proposals on interactions between food assistance and other welfare programs, and linkages between the macroeconomy and food assistance. (\$150,000) <li data-bbox="800 849 1728 1003">• <i>The Southern Rural Development Center at Mississippi State University</i> supports food assistance research on rural people, families, and communities in the South. The Center also initiated a dialogue among scholars through the establishment of a Rural South Food Assistance Research Task Force, with the purpose of further articulating research priorities on food-assistance-related issues. (\$150,000) <li data-bbox="800 1036 1787 1133">• <i>The University of Arizona, American Indian Studies Program</i> is working with scholars at tribal colleges and elsewhere to support research addressing the unique issues and problems of Native Americans with respect to food assistance. (\$150,000) <li data-bbox="800 1166 1808 1352">• <i>The University of California at Davis, Department of Nutrition</i> has awarded small grants for research on the impact of food assistance programs on nutritional risk indicators (anthropometric, biochemical, clinical, and dietary), food purchasing practices, and food insecurity. This program seeks to encourage examinations of multiple indicators of nutrition impact, and interdisciplinary approaches integrating epidemiology, economics, or anthropology with nutrition. (\$150,000) <li data-bbox="800 1385 1793 1474">• <i>The Institute for Research on Poverty at the University of Wisconsin</i> awarded research grants that address the effects of food assistance on individual and family well-being and food security. (\$150,000) 	

Table 4—FANRP Extramural Research Studies: Fiscal 1999—continued

Research Projects/Awards	Objective	Estimated Cost
Food and Nutrition Information Center (FNIC) National Agricultural Library	To provide support to the National Agricultural Library (NAL) in systematically storing and disseminating information on USDA’s food assistance programs, nutrition education, and related nutrition issues; and hosting a website and list server.	\$200,000
Interpretation and Use of Dietary Reference Intakes Department of Health and Human Services	To promote understanding of the proper methods for assessing health- and nutrition-related outcomes for food assistance programs. ERS will support NAS research on how the newly developed Dietary Intake References should be incorporated into program design and evaluations.	\$100,000
Rural Dimensions of Welfare Reform Conference Joint Center for Poverty Research, University of Chicago and Northwestern University	To assemble experts who will present research papers on poverty, welfare and food assistance that have a rural or rural/urban comparative dimension, reflecting the fact that most poor and welfare-recipient families live outside of central cities and that substantial minorities live outside of metropolitan areas altogether.	\$100,000
Committee on National Statistics National Science Foundation	To provide funding for the Committee on National Statistics for such activities as a review of the 2000 Census, poverty estimates for small areas, measuring the effects of social welfare reform, cost-of-living indexes, performance measures for public health programs, the use of statistical formulas in legislation for fund allocation, confidentiality and data access, and other issues.	\$26,200
Food and Nutrition Summer Institute Agricultural Research Service	To help sponsor the Food and Nutrition Summer Institute, which has the objectives of positioning the nutrition programs of historically black colleges and universities to meet research and education challenges, and of creating a stronger voice and action for nutrition education, research, and policy within the African-American community.	\$20,000
Enhanced Food Assistance Research Data		
National Food Price Data System Enhancement Food and Drug Administration	To expand a national database of food prices, quantities, and comparable volumes and dollars sales at the product group, class, brand, and item levels to include information on which items received various types of local promotional treatments.	\$6,000
Panel Study of Income Dynamics National Science Foundation	To sustain and improve the collection of food assistance data in the Panel Study of Income Dynamics (PSID). The PSID collects longitudinal data on family composition, income, use of public assistance, food security, and factors associated with family self-sufficiency.	\$104,500
Early Childhood Longitudinal Study—Birth Cohort 2000 (ECLS-B) Department of Education	To include USDA’s food security module and other items in the Early Childhood Longitudinal Survey—Birth Cohort, sponsored by the National Center for Educational Statistics, U.S. Department of Education. The survey was pre-tested for nine-month-old children, gathering infant height and weight data as well as responses to questions on food security, infant feeding practices, and participation in food assistance programs.	\$150,000

Table 4—FANRP Extramural Research Studies: Fiscal 1999—continued

Research Projects/Awards	Objective	Estimated Cost
Measuring Food Security: April 1999 Food Security Supplement to the Current Population Survey U.S. Bureau of the Census	To sustain annual collection of data on the prevalence of food security in the United States and to provide data for analysis of the determinants of, and changes in, the level of food security.	\$440,000
National Health and Nutrition Examination Survey Department of Health and Human Services	To improve the measurement of food security for individuals as part of the National Health and Nutrition Examination Survey (NHANES), which collects data on diet, food consumption, and health status.	\$125,000

Table 5—FANRP Extramural Research Studies: Fiscal 1998

Research Projects/Awards	Objective	Estimated Cost
Welfare Reform		
Family Child Care Homes Legislative Change Study (<i>Congressionally mandated</i>) Abt Associates	Report to Congress on the effects of the new tiered meal reimbursements for family-child care homes participating in the Child and Adult Care Food Program (CACFP) on sponsoring organizations, participating and dropout homes, and children.	\$1,959,007
Report to Congress on State Use of Funds To Increase Work Slots for Food Stamp Recipients (<i>Congressionally mandated</i>) Health System Research	Report to Congress on the implications of the increased size of the Food Stamp Employment and Training (E&T) Program on participants, especially on unemployed able-bodied adults without dependents (ABAWDs) and descriptions of how States use E&T funds and recent changes in participation.	\$291,609
Report to Congress on Use of Food Stamps To Purchase Dietary Supplements (<i>Congressionally mandated</i>) Life Sciences Research Organization	Report to Congress assessing the state of scientific knowledge regarding the potential knowledge regarding the potential value of vitamin and mineral supplements in filling nutrient gaps and the comparative impact of vitamin and mineral supplements, improved diets, and the intake of fortified foods on health status and health care costs.	\$120,250
Expanded Study of Welfare Reform on Immigrants Department of Health and Human Services	Determine the economic, social, nutritional, and health effects of changes in food stamp eligibility and other aspects of welfare reform on immigrants, their households, and communities. Interviews of households that were in the Urban Institute's National Survey of American Families will provide longitudinal information and a check on retrospective information on food stamp receipt, food security, and their relationship to economic, social, nutritional, and health outcomes.	\$300,000
Food Program Targeting and Delivery Mathematica Policy Research, University of Michigan, Urban Institute	To evaluate the success of USDA's food assistance programs at servicing needy, at-risk populations, including examination of food program gaps and overlays, characteristics of food assistance recipients after welfare reform, behavior of low-income households, and urban-rural delivery.	\$677,000
Temporary Assistance to Needy Families (TANF)—Leavers Use of Food Stamps Department of Health and Human Services	Determine the status of TANF recipients after they leave the TANF caseload, eligible families who are diverted before being enrolled in TANF, or eligible families who fail to enroll in TANF. The analysis will include former recipients/eligibles participating in the Food Stamp Program and the role that food stamps play in their overall wellbeing with particular focus on former recipients/eligibles that reside in nonmetropolitan areas. The analysis will address individuals' ability to obtain employment and the support provided by their earnings, public programs besides TANF and food stamps, and other programs.	\$250,000

Table 5—FANRP Extramural Research Studies: Fiscal 1998—continued

Research Projects/Awards	Objective	Estimated Cost
Studies of Households Who Leave the Food Stamp Program Abt Associates, Mathematica Policy Research, Iowa State University, and South Carolina Social Services	Determine the status of households and individuals who leave the Food Stamp Program. Of particular interest are able-bodied adults between the ages of 18 and 50 without dependents, (ABAWDs) because the Food Stamp Program changes were the strictest for this group. The analysis will focus on individuals' ability to ability to obtain employment, the support provided by their earnings and other income sources, and support provided by public and/or private programs.	\$1,488,074
A Study of U.S. Emergency Food Assistance System: Provider and Recipient Characteristics Mathematica Policy Research	To develop an understanding, through a nationally representative sample, of the characteristics, operating structure, and service areas of food banks, food pantries, and emergency kitchens and to provide national estimates of the total number of recipients served and the total quantity and type of food by source. This study provides policymakers a better understanding of the resource base of food banks, food pantries, and emergency kitchens and the capacity of these providers to manage current and future changes in food demand and food resources.	\$1,493,061
Study of Re-engineering the Welfare System Health System Research	To study the extent and nature of States' welfare administrative re-engineering efforts as they affect the Food Stamp Program administrative processes. These include changes associated with welfare reform that affect either the interaction between food stamp applicants and caseworkers or the efficiency or the integrity of the program. The focus of the study will be on those parts of the States' administrative practices that are innovations to or departures from prior practices.	\$362,443
Research Linking Food Assistance Programs, Agriculture, Rural Areas, and the Economy Iowa State University, University of Oregon, and Mathematica Policy Research	To examine the linkages between food assistance programs and the general economy. In particular, to examine the characteristics of the welfare assistance packages being developed at the State level and assess the impact they may have on Federal food assistance program participation rates and expenditures.	\$672,399
Simplified Food Stamp Program Technical Assistance Mathematica Policy Research	To conduct microsimulations and related analyses of alternative State-level changes to program options in the Simplified Food Stamp Program. To evaluate the potential effects on program eligibility, participation, benefit levels, and costs.	\$88,389
Food Security		
Measuring Food Security: August 1998 Current Population Survey Supplement Census Bureau	To develop annual estimates of the prevalence of food security in the United States and to provide data for analysis of the determinants of and changes in the level of food security.	\$440,000

Table 5—FANRP Extramural Research Studies: Fiscal 1998—continued

Research Projects/Awards	Objective	Estimated Cost
Early Childhood Longitudinal Study—Kindergarten Cohort (ECLS-K) Department of Education	To include USDA’s food security module and other items in the Early Childhood Longitudinal Survey-Kindergarten Cohort (ECLS-K), sponsored by the National Center for Educational Statistics, U.S. Department of Education. The project will provide descriptive data on children’s status at entry into school, children’s transition into school, participation in the School Breakfast and National School Lunch Programs, and children’s progress through fifth grade—including data that allow for the examination of the relationship between food security/hunger, cognitive development and school performance.	\$500,000
Panel Study of Income Dynamics (PSID) National Academy of Sciences	To improve the collection of longitudinal data on family composition, income, use of public assistance, food security, and factors associated with family self-sufficiency on the Panel Study of Income Dynamics (PSID). To develop and modify survey questions to improve estimates of food expenditures, participation in food assistance programs, expenditures on major consumer goods and services, nutritional behavior, and the calculation of food stamp eligibility.	\$444,830
Research To Strengthen and Improve Measures of Food Security Iowa State University	To improve the measurement of food security and hunger at the household level by: (1) assessing changes in food security prevalence over time; (2) investigating alternative approaches for measuring food security items and classifying households into food security categories; and (3) developing and field-testing a set of questions for future modifications of the food security scale.	\$200,000
Nutrition and Health		
Early Childhood Longitudinal Study—Birth Cohort 2000 (ECLS-B) Department of Education	To support enhanced data collection necessary to examine the link between WIC participation in infancy and childhood to cognitive development, obesity, and food security by adding a bank of questions to the Early Childhood Longitudinal Study—Birth Cohort (ECLS-BC), conducted by the National Center for Educational Statistics (NCES), U.S. Department of Education. Added questions include information on WIC and other food assistance program participation, infant feeding practices, health care, height, weight, and related information.	\$200,000
Dietary and Nutrition Outcomes Harvard School of Public Health and Research Triangle Institute	To develop and evaluate dietary assessment tools for young children that can be used in WIC program centers, recognizing that adaptations may be needed for culturally diverse populations. The tools will serve several functions, including screening for dietary patterns that do not meet Federal dietary recommendations, facilitating the triage of patients for services, and serving as the basis for general nutrition education.	\$989,149
Research To Assess Links Between Diet Quality and Health Harvard School of Public Health	To analyze and improve our understanding of the relationship between diet quality and health status over time and to determine whether overall measures of diet quality such as the USDA Healthy Eating Index (HEI) predict the occurrence of adverse health outcomes (such as cardiovascular disease, cancer, or death).	\$100,000

Table 5—FANRP Extramural Research Studies: Fiscal 1998—continued

Research Projects/Awards	Objective	Estimated Cost
<p>Development and Evaluation of the Nutritional Anthropometric Assessment Software in WIC Clinics (Epi Info 2000/Nustat Module) Department of Health and Human Services</p>	<p>To support further development, pilot testing, and evaluation of the nutritional anthropometric software, NUSTAT, for implementation in clinic operations of the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). The software improvements will enhance the ability of WIC clinicians to properly assess height-for-age, weight-for-age, and weight-for-height for program participants relative to national population standards.</p>	\$76,393
<p>Research on Breast-fed Infants' Growth World Health Organization</p>	<p>To conduct research on optimal growth rates for breastfed infants. WIC program clinicians require appropriate infant growth charts to determine when, and if, breastfeeding should be supplemented with formula to support weight gain. Current infant growth charts are based predominately on formula-fed infants and, hence, may suggest faster weight gains than optimal, leading to unnecessary formula supplementation.</p>	\$800,000
Program Integrity and Effectiveness		
<p>Assessment of Computer Matching in the Food Stamp Program Mathematica Policy Research</p>	<p>To examine how States are currently using or planning to use computer-matching strategies to reduce fraud and abuse in their food stamp and other assistance programs. By collecting and disseminating information on computer matching, this project will help States improve program integrity and support FNS oversight to ensure that States manage the FSP as efficiently as possible.</p>	\$342,269
<p>The Evaluation of Electronic Benefits Transfer (EBT) Customer Service Waivers on Recipients Abt Associates</p>	<p>To identify and estimate the occurrence of client service problems associated with EBT customer service waivers, and assess clients' response.</p>	\$647,255
<p>Nutrition and Health Outcomes of USDA Food and Nutrition Assistance Programs Abt Associates</p>	<p>To improve and expand understanding of the effects of USDA's food and nutrition assistance programs on food consumption, nutrient availability and intakes, dietary quality, nutritional status, and health outcomes.</p>	\$526,358
<p>WIC Supplemental Food Package Analysis Center for Nutrition Policy and Promotion, USDA</p>	<p>To review and assess how well the WIC food packages that are currently offered to pregnant and lactating women, infants, and children meet supplementation needs of the target populations.</p>	\$76,000

Table 5—FANRP Extramural Research Studies: Fiscal 1998—continued

Research Outreach		
Small Grant Program	<p>To stimulate new and innovative research on food assistance programs and to broaden the participation of social science scholars in food assistance research. Five academic institutions and affiliated research institutes partnered with ERS in 1998 to administer the Small Grants Program. Each institution focuses on a particular facet of food assistance, such as diet and health outcomes, relationships to poverty and well-being, rural issues, and special at-risk population groups. The five institutions and areas of focus are:</p> <ul style="list-style-type: none"> • <i>The Joint Center for Poverty Research, University of Chicago and Northwestern University</i> funded proposals on interactions between food assistance and other welfare programs, and linkages between the macroeconomy and food assistance. (\$262,740) • <i>The Southern Rural Development Center at Mississippi State University</i> to conduct food assistance research on rural people, families, and communities in the South. The Center also initiated a dialogue among scholars through the establishment of a Rural South Food Assistance Research Task Force, with the purpose of further articulating research priorities on food assistancerelated issues. (\$222,000) • <i>The University of Arizona, American Indian Studies Program</i> is working with scholars at tribal colleges and elsewhere to support research addressing the unique issues and problems of Native Americans with respect to food assistance.(\$246,224) • <i>The University of California at Davis, Department of Nutrition</i> has awarded small grants for research on the impact of food assistance programs on nutritional risk indicators (anthropometric, biochemical, clinical, and dietary), food purchasing practices, and food insecurity. This program seeks to encourage examinations of multiple indicators of nutrition impact, and interdisciplinary approaches integrating epidemiology, economics, or anthropology with nutrition. (\$225,024) • <i>The Institute for Research on Poverty at the University of Wisconsin</i> awarded research grants that address the effects of food assistance on individual and family well-being and food security. (\$234,834) 	\$1,190,851
Food and Nutrition Information Center (FNIC) National Agricultural Library	<p>To provide support to the National Agricultural Library (NAL) in systematically storing and disseminating information on USDA's food assistance programs, nutrition education and related nutrition issues; and hosting a website and list server.</p>	\$110,000

Table 5—FANRP Extramural Research Studies: Fiscal 1998—continued

Research Projects/Awards	Objective	Estimated Cost
Second National Conference on Food Security Measurement and Research IQ Solutions	To bring together experts on food security measurement—providing direction for future research needs and data collection, such as measurement of individual food security, and analyzing the refinement, validation, and use of the USDA/DHHS food security measurement scale.	\$100,000
Policy Research		
WIC General Analysis Project (GAP) Food and Nutrition Service, USDA	To conduct research and analysis of the WIC Program to support program and policy decisions, including research on (1) estimates of WIC eligibility, (2) changes in WIC participant characteristics over time, and (3) nutrient, health risk, and demographic characteristics of WIC participants and eligible nonparticipants.	\$560,000
Food Stamp Program (FSP) Microsimulation and Related Analyses Food and Nutrition Service, USDA	To provide the simulations and related technical expertise needed to estimate the impact of proposed changes to the FSP. Other objectives include: maintaining and improving microsimulation capabilities, preparing databases, and conducting supporting research.	\$778,628
Child Nutrition Analytic Projects (CNAP) Food and Nutrition Service, USDA	To conduct research and analysis of USDA’s child nutrition programs to support program and policy decisions, including research on (1) food and nutrient intake of school-age children, and (2) the contribution of child nutrition programs to food and nutrient intake.	\$460,000
The Extent of Trafficking in the Food Stamp Program After Welfare Reform Macro International	To update estimates of food stamp trafficking using current data and to provide longitudinal comparison of the prevalence of trafficking before and shortly after initial implementation of welfare reform.	\$199,921
Enhanced Data Development		
Continuing Survey of Food Intake by Individuals (CSFII) Agricultural Research Service, USDA	To improve estimates of low-income household food consumption in the United States by increasing the sample size of low-income individuals in the Continuing Survey of Food Intake by Individuals (CSFII) and developing and modifying survey questions related to food assistance programs.	\$1,250,000
National Health and Nutrition Examination Survey (NHANES IV) Department of Health and Human Service	To collect data on diet, food consumption, and health status as part of the National Health and Nutrition Examination Survey (NHANES) by developing and modifying survey questions to improve the measurement of the relationship between diet and health for low-income individuals.	\$100,000
National Food Price and Sales Information System Food and Drug Administration	To purchase the most recent national data on food prices, quantities, comparable volumes, dollar sales, and promotion information at the product group, class, brand, and item levels. The data system includes information on vitamin and mineral supplements.	\$235,000
