FARMING SYSTEMS RESEARCH PAPER SERIES

Kansas State University's Farming Systems Research (FSR) Paper Series is supported by the U.S. Agency for International Development Title XII Program Support Grant. The goal of the Program Support Grant is to increase the University's ability to implement Title XII agricultural and nutritional development assistance programs in developing countries. This paper series is maintained by the FSR Program Associates -- a multidisciplinary team of professors who are aiming their activities at applied research on farming from a systems perspective.

The purpose of the FSR Paper Series is to disseminate information on FSR. Publication categories include updated bibliographies from KSU's FSR data base; proceedings from KSU's FSR Systems Symposium; selected papers presented in KSU's FSR Seminar Series; and selected papers prepared by KSU's Program Associates.

Copies of these papers may be obtained from the Distribution Center, Umberger Hall, Kansas State University, Manhattan, Kansas 66506. There will be a charge for selected papers and multiple copies to help defray the cost of printing.

Vernon C. Larson
Director
International Agricultural Programs

NOTICE OF NON-DISCRIMINATION

Kansas State University is committed to a policy of non-discrimination on the basis of race, sex, national origin, handicap, or other non-merit reasons, in admissions, educational programs or activities, and employment, all as required by applicable laws and regulations. Responsibility for coordination of compliance efforts and receipt of inquiries, including those concerning Title IX of the Education Amendments of 1972 and Section 504 of the Rehabilitation Act of 1973, has been delegated to Jane D. Rowlett, Ph.D., Director, Affirmative Action Office, 214 Anderson Hall, Kansas State University, Manhattan, KS 66506 (913-532-6220).

FARMING SYSTEMS RESEARCH AND THE KSU COLLECTION

Kansas State University is one of the increasing number of institutions involved in farming systems research (FSR). The Library has organized a collection of materials available to persons interested in the subject.

The Technical Advisory Committee's Review Team of Farming Systems Research has defined a farming system as:

"a complicated, interwoven mesh of soils, plants, animals, implements, workers, other inputs and environmental influences with the strands held and manipulated by a person called the farmer who, given his preferences and aspirations, attempts to produce output from the inputs and technology available to him. It is the farmer's unique understanding of his immediate environment, both natural and socio-economic, that results in his farming system."

It goes on to describe FSR as:

"research (including training) which: (1) is conducted with a recognition of and focusing towards the interdependencies and inter-relationships that exist among elements of the farm system, and between these elements and the farm environment; and (2) is aimed at enhancing the efficacy of farming systems through the better focusing of agricultural research so as to facilitate the generation and testing of improved technology."

"The major activities involved in FSR are:

- (a) The collection and analysis of base data;
- (b) The study of existing farming systems;
- (c) The design of new farming systems;
- (d) Farm systems experimentation; and
- (e) The evaluation and monitoring of new farming systems."¹

SUPPLEMENT ONE ...

lists FSR vertical file material and selected publications with Library of Congress classification numbers donated by Peter E. Hildebrand, from his collection at the University of Florida, Gainesville. These items can be found within KSU's Farrell Library. The vertical file material includes unpublished papers, drafts, house organs and other non-conventional, or fugitive literature. Keyword, title, and primary author indices are provided. The standard for keywording is an "enhanced" CAB Thesaurus.

¹Farming Systems Research at the International Agricultural Research Centers, Washington, World Bank for TAC Secretariat/FAO, 1978, page 8.

Over eight hundred new items have been added. Duplicate citations (listed in the previous FSR Bibliography, No. 4, Revised) amount to less than five per cent of the new supplement. They have been retained in order to maintain the integrity of the Hildebrand Collection. The original classification scheme developed and assigned by Peter Hildebrand, has been placed at the end of the keyword section. This will allow searching from an additional subject perspective.

A simple innovation in the elements of the bibliographic record will contribute to the retrievability of unpublished papers as well as promote direct contact between researchers. Unpublished papers are identified by an asterik (*) following the date of publication. Information is given, where possible, to denote the author's institutional affiliation. This will facilitate a type of networking between researchers, thus making librarians' traditional documentation activities more effective. Inclusion of an author address, or institutional affiliation, in the cited record turns the bibliography into a directory, thereby allowing direct communication between researchers.

Materials cited in this bibliography may be obtained in the following manner:

For KSU Library card holders,

--by coming to the Resources on Developing Countries Department, Room 314, Farrell Library, and checking out the material from the librarian;

For all other United States' requestors,

--through Interlibrary Loan service, according to Interlibrary Loan and KSU guidelines;

For persons outside the United States, and without Interlibrary Loan services,

--by mail (requests will be filled subject to copyright status and length of item). Send your inquiry to, Resources on Developing Countries, Farrell Library, Kansas State University, Manhattan, Kansas 66506 U.S.A..

We welcome suggestions and donations of new materials for the Farming Systems Collection.

SUBJECT HEADINGS AND TABLE OF CONTENTS

- I. FARMING SYSTEMS: DESCRIPTIVE (General and Inclusive)
 - A. Cropping Patterns
 - 1. Polyculture
 - 2. Double or triple crops
 - 3. Fallowing and cover cropping, tillage systems
 - 4. Crop rotations
 - 5. Shifting cultivation
 - 6. Plantations and agro-silviculture
 - B. Animal Systems
 - C. Mixed Systems (animals and plants)
 - D. Aquaculture and Agriculture
- II. PHYSICAL AND BIOLOGICAL FACTORS
 - A. Physical Factors
 - 1. Land, soils and fertilizer
 - 2. Agroclimatology
 - 3. Water and water management
 - B. Biological Factors
 - 1. Crops
 - 2. Crop protection
 - a. Weeds
 - b. Animal kingdom
 - c. Fungi and bacteria
 - 3. Animals
 - a. Animal parasites
- III. HUMAN ELEMENT: EXOGENOUS FACTORS
 - A. Social Organization and Community Structure
 - B. Physical Environment (built environment)
 - C. Community Norms and Beliefs
 - D. Population, Nutrition and Health
 - E. External Institutions
 - 1. Infrastructure, support systems
 - a. Input
 - aa. Input distribution
 - bb. Extension
 - cc. Credit
 - b. Output
 - aa. Marketing
 - bb. Post harvest storage
 - cc. Processing
 - 2. Policies and structural reform programs
 - F. Technological and Mechanical Factors
 - 1. Mechanization (animal traction falls in Mixed Systems)
 - 2. Energy
 - 3. Technology transfer
 - 4. Appropriate technology
 - 5. Recommended technology

SUBJECT HEADINGS AND TABLE OF CONTENTS (con't)

IV. HUMAN ELEMENT: ENDOGENOUS FACTORS (Household)

- A. Goals and Risks
- B. Economic Inputs
 - 1. Land
 - 2. Labor management
 - 3. Capital, finance
- C. Economic Output
 - 1. Income
 - 2. Food

V. FARMING SYSTEMS RESEARCH METHODOLOGY

- A. Survey Techniques (descriptive and diagnostic methods)
- B. Design of Improved Technology
- C. Testing
- D. FSR Methodology Extension and Transfer
- E. Systems Analysis

VI. INSTITUTIONAL FACTORS IN IMPLEMENTATION OF FARMING SYSTEMS RESEARCH

FARMING SYSTEMS RESEARCH BIBLIOGRAPHY:
