Public-Private Partnerships to Grow Organic

U.S. Foodmakers: Strategies to Expand Domestic Sourcing of Organic Supplies – USDA Ag Outlook Forum 2019

USE OF ORGANIC AT CLIF BAR & COMPANY

12 organic brands3 conventional

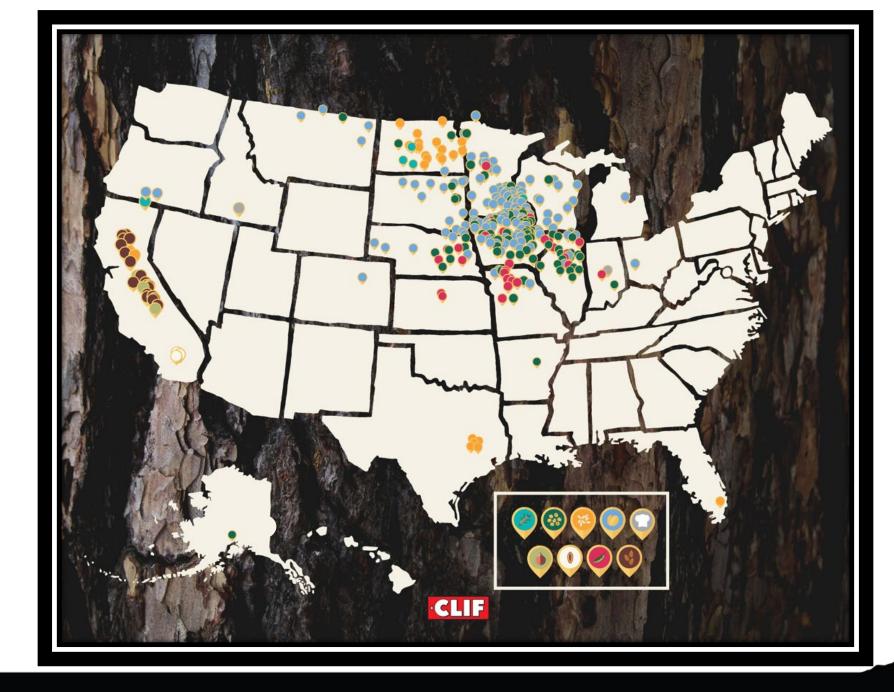

56 crop types >140 unique ingredients

76%

OF ALL INGREDIENTS we buy are organic

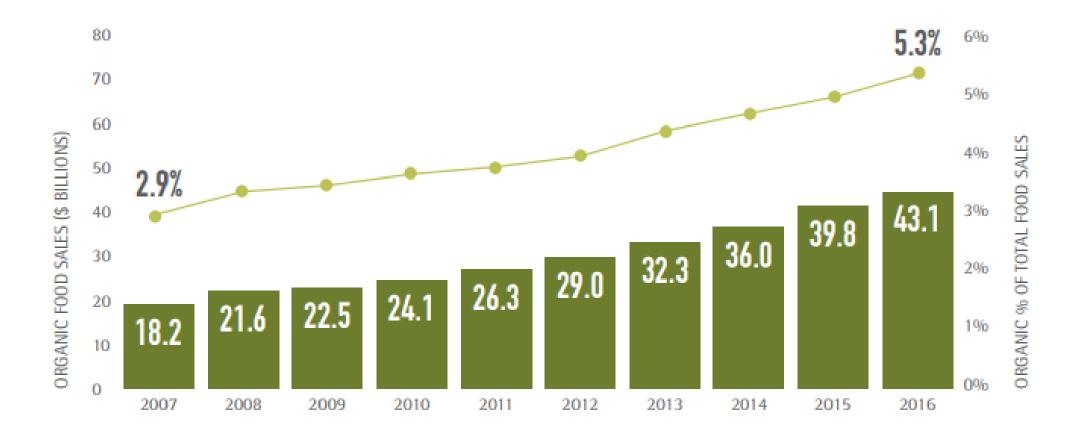

Exhibit 1: Organic food sales have steadily grown as a % of total food sales

Source: Organic Trade Association, 2017 Organic Industry Survey

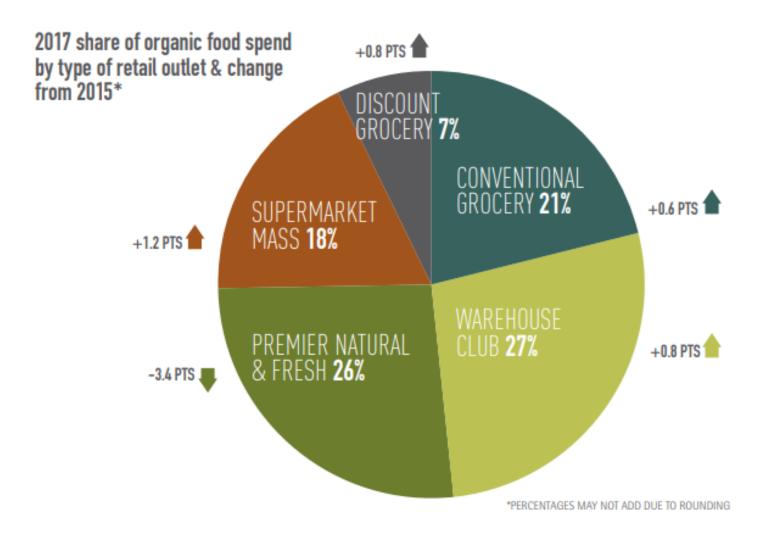

Exhibit 2: Organic spending is shifting away from premier and specialty stores toward the mainstream

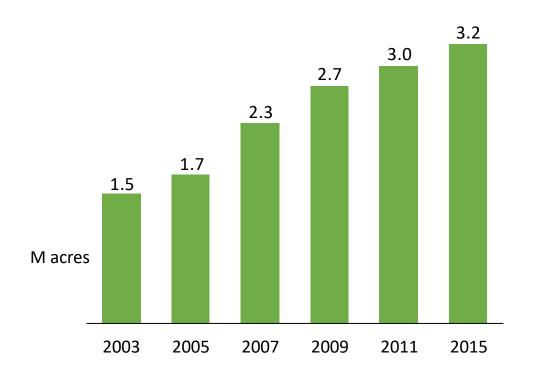

Source: Nielsen Answers On-Demand Syndicated Panel, 52 weeks ending 07/29/2017.

MARKET POTENTIAL FOR PRODUCERS

6.5% annual growth in organic cropland

Expected to accelerate

- Steady growth in consumer demand for organics
- Increased scrutiny of organic imports creating favorable conditions for domestic production
- Slump in conventional commodity prices creates incentive to transition

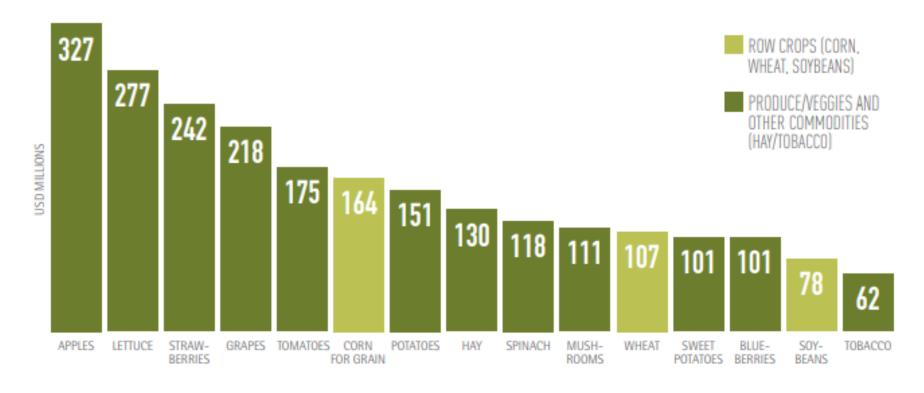

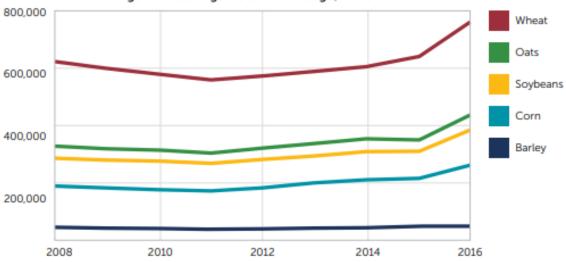

Exhibit 3: Corn, soybeans, and wheat comprise only 9% of organic crop sales

Source: USDA's 2016 Certified Organic Survey, NASS Highlights. Accessed 12/1/18 at https://www.nass.usda.gov/Publications/Highlights/2017/2016_ Certified_Organic_Survey_Highlights.pdf.

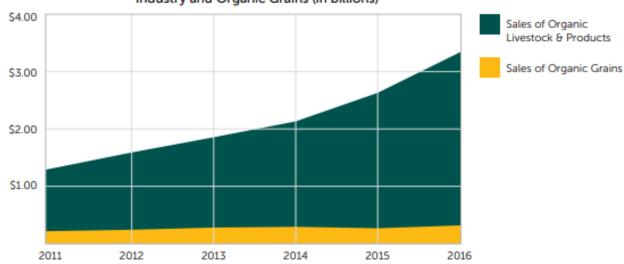

Figure 2: US Organic Grain Acreage, 2008-2016

Source: USDA NASS Quickstats Database.

Figure 3: Growth of Organic Livestock Products Industry and Organic Grains (in billions)

Sources: USDA NASS Quickstats Database

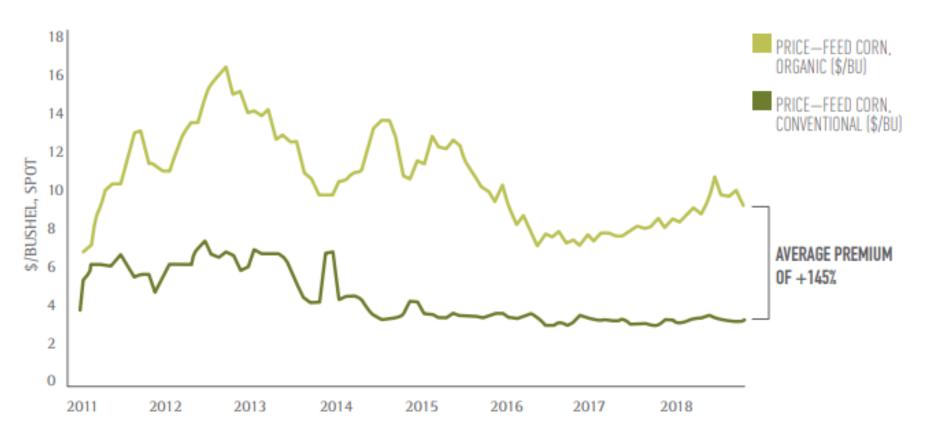

Exhibit 4: Organic corn shows persistent historical price premium over conventional alternative

Source: Organic prices from author correspondence with USDA AMS (Agricultural Marketing Service), midpoint of national range for organic feed corn. Conventional prices from USDA NASS (National Agricultural Statistics Survey), U.S. Total monthly price received.

CONSTRAINTS TO ORGANIC

Agronomics

30-40% yield gap between conventional and organic crops in our supply chain

organic extension agents in California (out of 288)

0.7% the share of USDA research funding earmarked for organic

A dozen organic plant breeders in the US (out of >1,000)

Economics

3 years to transition

3+ crop rotations – and hence more land – required

75% of transitioning farmers cite the cost of organic inputs as an obstacle

-45% drop in Mercaris Organic Grain Index* from 2013 to 2016

40:1 conventional to organic processing facilities in Illinois

Culture

83% percent of organic farmers in NYFC** survey who are first generation and thus lack direct access to land or know-how

1st ranking of "mentoring from experienced organic farmers" as a type of support for transition

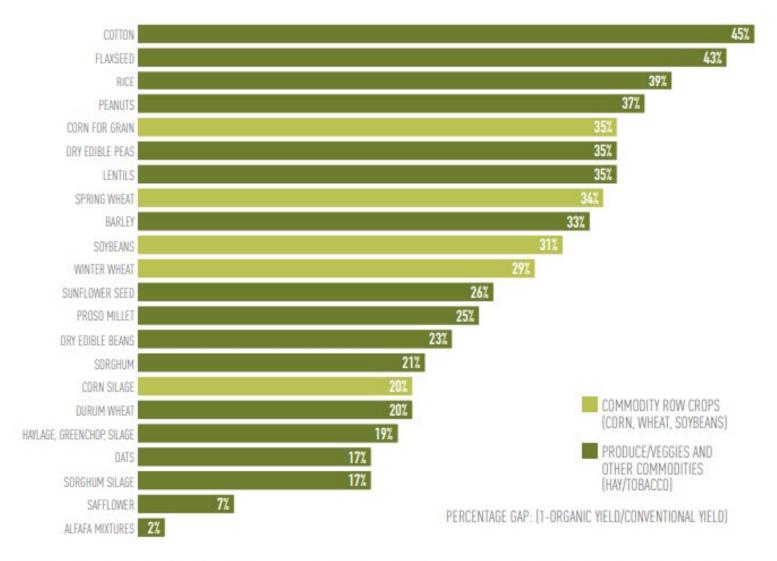

Exhibit 5: Average yields per acre for organic crops are substantially lower than conventional counterparts Source: Savage and Associates Consulting, independent analysis based on 2014 USDA Organic Survey data and USDA-NASS statistics.

E OF 18

THE VALLEY OF DEATH

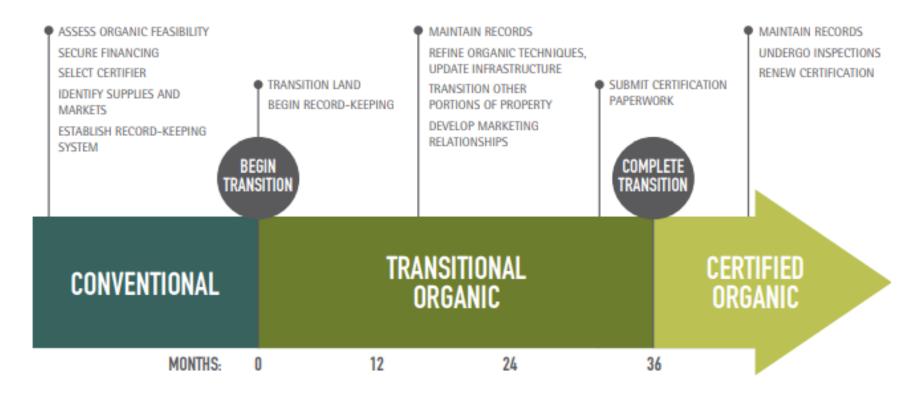

Exhibit 8: Organic transition is a complex, multi-step process

Source: Author analysis. More detail available at https://www.ams.usda.gov/services/organic-certification/becoming-certified. Adapted from MOSES Guidebook For Organic Certification.

SOLUTIONS

- Industry pre-competitive collaboration
 - OTA Organic Grain Council
 - Organic Agronomy Training Series
- Long Term Price Contracts
- Research and Technical Assistance to close yield gap
- Infrastructure and other investments

Organic Trade
Association:
ORGANIC GRAIN
COUNCIL

CLIF AG FUND

• **Technical assistance:** funding for variety trials, farmer field days, on-farm instruction, etc.

• **Innovation**: investments in the development and scale-up of input innovation

• Infrastructure: assessment & mapping of organic storage and processing capacity

 Demand creation: cost share and/or transition price premiums (with purchasing contracts)

POLICY

E 00 10
