Supplemental Material for:

Luther, Z.R., Swinton, S.M., & Van Deynze, B. “What drives voluntary adoption of farming practices that can abate nutrient pollution?”
Journal of Soil and Water Conservation (published online in 2020)

Uploaded August 2020

This is the supplemental material accompanies article “What drives voluntary adoption of farming practices that can abate nutrient pollution?” It contains six tables describing unweighted results from ordered probit analyses that sought to assess the determinants of farmers’ adoption decisions of conservation and precision agriculture practices using mail survey data from a sample of corn and soybean farmers in the U.S. Eastern Corn Belt. The tables are numbered A5 to A10, with numbers corresponding to the associated tables in the main article.

Results from unweighted ordered probit models

Table A5:
Attitudinal determinants of adoption of conservation practice and applicative precision technologies (unweighted ordered probit regression).

Variables	Cover Cropping	VR – Nitrogen	VR – P/K	VR – Seeding
Income	-0.186 (0.133)	-0.0725 (0.133)	-0.203 (0.135)	-0.164 (0.138)
Environmental	0.708*** (0.145)	-0.0370 (0.143)	-0.112 (0.146)	-0.116 (0.147)
Social status	-0.317 (0.220)	0.152 (0.220)	0.366 (0.223)	0.303 (0.228)
Pseudo R-squared	0.0879	0.0341	0.0602	0.101

Significance (t -test probability > 0): ***1%; **5%; *10%.
Standard errors in parentheses

Table A6:
Attitudinal determinants of adoption for temporal, non-spatial precision technologies and diagnostic precision technologies (unweighted ordered probit regression).

Variables	PSNT	Aerial Scouting	Soil Nutrient Mapping	Yield Mapping
Income	-0.155 (0.137)	-0.129 (0.137)	-0.351** (0.146)	-0.136 (0.140)
Environmental	0.172 (0.147)	-0.0589 (0.148)	-0.223 (0.158)	-0.143 (0.153)
Social status	0.172 (0.227)	0.397* (0.227)	0.655*** (0.241)	0.363 (0.234)
Pseudo R-squared	0.0741	0.116	0.0825	0.163

Significance (t -test probability > 0): ***1%; **5%; *10%.
Standard errors in parentheses

Table A7:
Determinants of adoption of conservation practice and applicative precision technologies (unweighted ordered probit regression).
