## **JARE Editor's Report**

### **December 2003**

During our three-year tenure from April 1, 2000 to April 1, 2003, 329 manuscripts were submitted. Of the total, 14 were forwarded to us from Scott Shonkwiler, previous editor of *JARE*. During our tenure, 102 manuscripts were accepted for publication, yielding a cumulative acceptance rate of 31.4%. For calendar year 2003, we began publishing three issues instead of two, which resulted in slightly more articles being published during calendar year 2003 than in the previous two years.

Just under half of the submissions (46.5%) came from corresponding authors residing in the West. Other domestic submissions were distributed as follows: Northeast (12.5%), South (15.8%), and the Midwest (16.1%). An additional 3% of the submissions originated in Canada, 2.7% from Europe, and 1.5% from Asia. The remaining manuscripts were submitted by authors residing in Australia, Israel, and Africa.

For two years, referees have been paid U.S.\$50 for on-time first reviews. Any review returned within six weeks of the initial request was considered "on time." Payment for on-time reviews has tended to shorten the time to completion of reviews (see table below). However, the novelty of payments may be wearing off in the sense that the proportion of referees responding on time in our last year as editors (2002–03) has declined relative to the first year payments were offered. Nevertheless, payment for first reviews seems to have had a demonstrable effect on the time to completion of first reviews.

#### **Referee Statistics, Completion of First Reviews**

Item	2000–01	2001–02	2002–03
Mean number of days to completion	45.0	32.7	36.8
Median number of days to completion	42.0	34.0	38.5
Standard deviation (days)	31.0	24.0	22.0
Cumulative % completed in 42 days or fewer	43%	73%	64%
Cumulative % completed in 49 days or fewer	59%	79%	76%

Our technical editor, Judith Harrison, has done a superb job of editing manuscripts. Judy's work improves manuscripts in so many ways that typical readers are likely not to appreciate unless they have been the beneficiaries of Judy's assiduous attention to content, style, and aesthetics.

Our new publisher, Sheridan Press, has done an excellent job this calendar year of handling our camera-ready galleys.

We also want to thank all those who supported the *Journal* during our tenure. To the editorial assistants—Ricardo Cavazos Cepeda, Haimanti Bhattacharya, and Afsana Karim—we owe thanks for a careful job of handling the *Journal's* correspondence. We are indebted to our past Secretary/Treasurer E. Bruce Godfrey, and our current Secretary/Treasurer Dawn Thilmany, for their service in handling all the financial aspects of the *Journal*. The members of our Editorial Council deserve our sincere thanks for their selfless efforts. Finally, we owe our referees genuine thanks for providing public goods even when the private cost is high.

Respectfully submitted,

Gary Thompson, Editor

Satheesh Aradhyula, George Frisvold, and Russell Tronstad, Co-editors

## WAEA 2002 Award Winners

### Outstanding Master's Thesis

HIROMI OUCHI, "Japanese Consumer Preferences for Biotechnology and Food Safety with Implications for Trade," Washington State University.

JILL J. MCCLUSKEY, Advisor

The objective of this thesis is to develop an understanding of Japanese consumer preferences for biotechnology and food safety and to assess the implications of GM labeling policy for trade. This objective is accomplished with three related articles: an analysis of GM labeling policy and the implications for U.S.-Japanese trade, an empirical study of Japanese consumer preferences and willingness to accept GM food products, and an empirical study of consumer response to the discovery of bovine spongiform encephalopathy (BSE) in Japan. Specifically, the effect of biotechnology and food safety policy on U.S.-Japanese trade is first analyzed. Next, using data from a consumer survey conducted in Japan in June 2001 as part of this thesis project, factors that affect the willingness to accept GM food at a Seikyou in Japan are analyzed, and an estimate is made of the mean discount necessary for Japanese consumers in the study sample to choose the GM product. Finally, this analysis estimates the mean premium that Japanese consumers are willing to pay for beef labeled as "BSE-tested," as well as factors affecting the consumers' choices. Data were collected in a consumer survey conducted in Japan during December 2001 as part of this thesis project. Based on the findings of this research, there is an opportunity to market food segregated from GM product and BSE-tested beef in Japan. For those firms wanting to market either GM foods or beef in Japan, it is necessary to convince Japanese consumers of the safety of their products through consumer education campaigns and credible risk communication.

### Outstanding Extension Program

RICHARD CARKNER (Washington State University), JOHN HEWLETT (University of Wyoming), LORNE OWEN (British Columbia, Canada), HOWARD ROSENBERG (University of California-Berkeley), TRENT TEEGERSTROM (University of Arizona), JEFFREY TRANEL (Colorado State University), and RANDY WEIGEL (University of Wyoming), "Ag Help Wanted."

The title of the book at the core of this project is *Ag Help Wanted: Guidelines for Managing Agricultural Labor*. This is a new educational guidebook designed to assist every person who currently manages or expects to manage human resources on farms, ranches, nurseries, dairies, and other agricultural operations. It presents principles, practical examples, regulatory considerations, and leads to more references that all help equip managers to make choices which are reasonable, legal, and ultimately effective for both their businesses and the people they employ. The book can be used as a source of ideas for improving management policies or practices, an occasional reference in coping with problems that arise, or a base for systematic study of human resource management in agriculture. For order information and links to supplementary material online, including selected pages in sites of regulatory agencies and service organizations, visit [www.AgHelpWanted.org](http://www.AgHelpWanted.org).

### Outstanding Published Research

RULON D. POPE (Brigham Young University) and RICHARD E. JUST (University of Maryland). "Random Profits and Duality." *American Journal of Agricultural Economics* 84,1 (2002): 1–7.

Dual production specifications derived under certainty are typically randomized for econometric purposes with ad hoc error specifications. This article shows that such approaches can cause integrability conditions to fail. In particular, if errors in input demands represent errors in optimization that affect output, then typical dual approaches do not yield congruent supplies and demands.

### **JARE Published Research Award**

IDDO KAN, KURT A. SCHWABE, and KEITH C. KNAPP (University of California-Riverside). "Micro-economics of Irrigation with Saline Water." *Journal of Agricultural and Resource Economics* 27,1 (July 2002): 16–39.

Water management and reuse at the field level are analyzed under saline, limited drainage conditions. A function relating crop yield and deep percolation flows to applied water and salinity concentration is developed. This function fits simulated data well and is tractable for theoretical and empirical analysis of irrigation economics. With a single irrigation source, irrigation water for cotton and tomatoes at first increases and then decreases with salt concentration. Drain-water reuse is found to be an efficient strategy in events of high surface-water prices and costly solutions to drainage-related environmental problems. However, blending freshwater and drainage appears plausible only under surface water scarcity.

### **Distinguished Scholar of the WAEA**

*This award is the highest recognition for individuals making an enduring contribution in their career to agricultural, resource, and/or environmental economics in the Western states and provinces and the WAEA.*

#### **HAROLD O. CARTER**

Harold O. Carter is Professor Emeritus of the Department of Agricultural and Resource Economics, University of California, Davis, where he has been a member of the faculty since 1958. Born in Michigan, Carter received B.S. and M.S. degrees from Michigan State University and his Ph.D. at Iowa State University.

Carter has achieved wide recognition for his research and policy analysis on an array of important agricultural social and environmental issues and problems. In the 1960s, he made important contributions on risk and variability, economies of farm size, and production function methodology. In 1969–70, Carter served as Senior Staff Economist on the President's Council of Economic Advisors. He served as Department Chair from 1970–76 and 1987–89. In 1973–74, Carter chaired a UC task force on world hunger which culminated in the publication "The Hungry World: A Challenge to Agriculture," receiving a 1975 AAEA research award. From 1980–83, Carter served as Co-Director of a UC/Egypt economic development project. In 1985, he was appointed the first Director of the University of California Agricultural Issues Center where he served for 11 years. The AIC has made major contributions to the public understanding of timely and critical policy issues.

Carter has received (with co-authors) AAEA Outstanding Research awards in 1963, 1967, 1971, 1975, and 1989, and the Best Journal Article award in 1968. He was elected an AAEA Fellow in 1980. His WAEA Association awards include Outstanding Research in 1962, 1969, and 1971; and Outstanding Extension Program in 1975. Carter served as President of the WAEA in 1975–76. He has been a visiting scholar at Harvard University; Agricultural College of Sweden; University of Naples, Italy; International Institute of Applied Systems Analysis, Laxenberg, Austria; Stanford University; and University of Sydney, Australia.

#### **KENNETH L. CASAVANT**

Kenneth L. Casavant is Professor in the Department of Agricultural and Resource Economics, Washington State University, where he has been a member of the faculty since 1969, except when he has served as Visiting Professor at University of Alaska, North Dakota State University, and University of New England, Armidale, Australia, and as member of the Pacific Northwest Power Planning Council. He received his Ph.D. from Washington State University and both his B.S. and M.S. from North Dakota State University.

Casavant has published two textbooks on economics of management in agriculture and has 14 chapters in other books and monographs. A nationally known transportation economist, he has published over 100 articles and given over 300 presentations, including testifying before state legislatures, regulatory bodies, and U.S. Congress, leading to public debate and understanding by all sectors of the economy of the crisis of freight mobility. He was chosen to speak at the last three

national agricultural transportation summits, hosted by USDA and the USDOT. This prominence has brought in over \$5 million of grants and contracts to his personal research program and over a million dollars to multi-discipline research teams on which he served as member.

Ken's personal pride is in the numerous teaching awards he has received over the years, including being a Fellow of the National Association of Colleges and Teachers of Agriculture (NACTA) and winning their NACTA Western Regional Outstanding Teacher Award. He was the recipient of an Outstanding Teacher Award from the American Association of Agricultural Economics; he was recognized as "Featured Teacher" of his college four times; and he won the R.M. Wade Award, the highest honor in his college. He was also selected as Washington State University's Faculty Member of the year, largely based on his exceptional teaching performance. His scholarly work in teaching pedagogy (six articles) included Colleague Aided Evaluation (CAE), a technique now used in various forms in many departments.

Casavant has provided service by serving as Vice President and President of the WAEA, being appointed by the Governor to the Pacific Northwest Power Planning Council—the body charged with balancing the needs of the power industry and those endangered species, regions, and Tribes impacted by the operation of the Columbia/Snake River Power System, and has served on four National Academy of Sciences panels. At Washington State University he has served as Vice Provost of Academic Affairs, Vice Provost of Research, and currently serves as Faculty Athletic Representative for the President to the NCAA, where he recently served as President of the Pac-10 Conference. He has served as the President of the Faculty Senate, President of the Pullman Chamber of Commerce, and a member of the Pullman City Council.

Ken has consulted widely on transportation economics and policy, including for USDA, USDOT, USAID, Canada Grains Council, Interstate Commerce Commission, U.S. Army Corps of Engineers (in all, over 60 domestic contracts plus traveling for others in 10 countries).

#### **DOUGLAS L. YOUNG**

Douglas L. Young received his Ph.D. from Oregon State University in 1976, and has worked since in the Department of Agricultural Economics at Washington State University (WSU), reaching the rank of Professor in 1986. Young made early contributions on the use of risk preferences and risk perceptions of agricultural producers. Most of Young's career, however, has been devoted to providing high-quality economics on multidisciplinary research projects. His commitment to this research has led to an exceptionally high level of trust and regard for Young by his biological and physical science colleagues. Dr. Young's cooperative contributions to multidisciplinary grants have generated well over \$20 million to his institution.

Young is the author of 61 journal articles, 21 book chapters, and 260 other items. He has received research and outreach awards from the Soil and Water Conservation Society and the American Society of Agronomy, and the outstanding journal article award in the *Journal of Agricultural and Applied Economics*. Young has served on a National Academy of Sciences committee, on USDA's Resources Conservation Act Advisory Committee, as an invited witness before the U.S. Congress, and on the Washington State Advisory Committee of the Natural Resources Conservation Service. He has been a visiting scholar at North Carolina State University and in British Columbia, and has served on departmental review teams at Georgia, Nevada, and Idaho. Young has been a featured speaker in Canada, Denmark, and France.

Douglas Young is a highly ranked undergraduate and graduate teacher and has twice been recognized as an R.M. Wade Featured Teacher, an award for the top five teachers among 12 agricultural college departments. Young has served as major professor for 15 Ph.D. and 22 M.A. students, many of whom have gone on to distinguished careers.

Some have described Young as the "perennial departmental good citizen," serving on many demanding committees. Young has also been a very supportive WAEA member, serving terms as editor of the *Western Journal of Agricultural Economics* and as President of the Association.

### **Outstanding Undergraduate Instructor**

#### **Less than 10 years:**

W. MARSHALL FRASIER, Colorado State University

## **Outstanding Undergraduate Instructor**

### **More than 10 years:**

ROBERT O. BURTON, Kansas State University

## **Outstanding Seniors**

- JESSICA KREBS, University of Idaho
- JARED LATHROP, Eastern Oregon University
- BRANDON LEISTER, Arizona State University
- GIBSON NENE, University of Nebraska
- WILLIAM (BILL) GARY ROSE, Utah State University
- DEREK SHREINER, Arizona State University
- LYNN SIMMONS, Oregon State University

**Minutes of 2003  
WAEA Joint Executive Committee and  
Executive Council Meeting  
Adam's Mark Hotel, Denver, Colorado  
July 12, 2003**

**Call to Order and Introductions**

Chair, Ray Huffaker, called the meeting to order at 3:00 p.m. The participants in attendance were as follows:

<b>Name</b>	<b>Title</b>	<b>University/Affiliation</b>
Steve Blank	Past President, 2001–02*	University of California-Davis
Ray Huffaker	President, 2002–03*	Washington State University
Ted Schroeder	President-Elect, 2004–05*	Kansas State University
E. Bruce Godfrey	President, 2003–04*	Utah State University
Dana Hoag	Vice President, 2003–04*	Colorado State University
Dawn Thilmany	Secretary-Treasurer*	Colorado State University
Gary Thompson	Outgoing <i>JARE</i> Editor*	University of Arizona
James Mintert	Director, 2001–03*	Kansas State University
DeeVon Bailey	Incoming <i>JARE</i> Editor*	Utah State University
Larry Van Tassell	Director, 2002–04*	University of Idaho
Tom Marsh	Director, 2002–04*	Kansas State University
Gary Brester	Vice President, 2002–03*	Montana State University
Eric Schuck	Council	Colorado State University
Cheryl DeVuyst	Council	North Dakota State University
Phil Wandschneider	Council	Washington State University
Ruby Ward	Council	Utah State University

\**Executive Committee Member*

**Reports**

Ray Huffaker opened the meeting by passing out the agenda to all in attendance.

Dawn Thilmany referred to the minutes of the 2002 Council/Executive Meeting. The minutes were accepted unanimously by voice vote.

Dawn Thilmany handed out a Membership Report with membership detailed by year and by state, with *JARE* subscription numbers. Dawn noted that the membership decrease between 2002 and 2003 is due to two factors. First, 40–50 additional memberships are expected before the end of the year. Also, Steve Blank purchased complimentary memberships for a large block of UC-Davis graduate students in 2002, and no similar membership drive took place in 2003.

The Finance Report was presented by Dawn Thilmany. It was noted that WAEA's net worth has stabilized after increasing for several years, due to new expenditures resulting from recent Executive Council initiatives. The only other issue of concern is how to handle past-due *JARE* page charges, and those authors who are difficult to find and invoice. Specifically, how long should those accounts payable be held before they are considered bad debt? Discussion about a potential policy for page charges followed. *JARE* editor Gary Thompson

stated it was important to maintain open communication between the Secretary-Treasurer and the Editor's office, to assure the Editor's office is aware of past-due accounts. Steve Blank moved to make it a policy for the institution of origin (where the author is located at time of publication) to be the secondary claim for author(s)' page charges if they become delinquent. Bruce Godfrey seconded. The motion passed unanimously by voice vote.

Larry Van Tassell moved to accept the membership and financial reports. Bruce Godfrey seconded. The motion passed unanimously by voice vote.

Eric Schuck presented the Teller's Report. A total of 130 ballots were received for election of officers and directors, representing about 20% of the membership. Ballots were accepted via e-mail again this year, but few members (only three) chose to use that option. The results of the voting were: President-Elect, Ted Schroeder; Vice President, Dana Hoag; and Directors (2003–05), Penelope Diebel and Paul Patterson. Eric Schuck also reported that several nominations were entered on the ballots. Gary Brester moved to accept the Teller's Report. Phil Wandschneider seconded. The motion passed unanimously.

Gary Brester gave the Selected Papers Report. He reported that there were 78 submissions, with 72 acceptances for the program. With two papers withdrawn, 70 papers were scheduled to be presented in 19 WAEA meeting sessions. Gary noted his appreciation to the anonymous reviewers who assisted with the process.

This year, Ray Huffaker managed and coordinated the WAEA awards. He stated that this project was successful because of the tireless efforts of the following subcommittee chairs:

- ▶ Eric Schuck (Colorado State University) for Outstanding Undergraduate Instructor, less than 10 years;
- ▶ William Amspacher (Cal Poly San Luis Obispo) for Outstanding Undergraduate Instructor, more than 10 years;
- ▶ Mike Boland (Kansas State University) for Outstanding Extension Program;
- ▶ Cheryl DeVuyst (North Dakota State University) for Outstanding Master's Thesis;
- ▶ Jay Noel (Cal Poly San Luis Obispo) for Outstanding Published Research Award;
- ▶ Gary Thompson (University of Arizona) led the *JARE* Editorial Board in selecting the outstanding *JARE* article for 2002.

There were 15 theses submitted for consideration, but only two complete teaching award packets for those with under 10 years of experience. Given these low numbers, Steve Blank moved that the Executive Council members be charged with nominating at least one person from their respective institutions each year for an award. Bruce Godfrey seconded. Discussion followed. The motion passed unanimously by voice vote.

Steve Blank presented a report on the initial year of the Distinguished Scholar award. Discussion on how to promote and structure the awards followed. Steve Blank moved that no more than five scholars be recognized each year. Phil Wandschneider seconded. DeeVon Bailey suggested a friendly amendment that up to 10 scholars be accepted in just 2004. After Steve Blank accepted the friendly amendment for consideration, Phil Wandschneider seconded the amendment. The amended motion passed unanimously by voice vote.

With respect to the Distinguished Scholar award, Dana Hoag moved to change the 20-year WAEA membership requirement to 20 years of significant contribution to WAEA. Steve Blank seconded. The motion passed unanimously by voice vote.

Dana Hoag presented a *Western Economics Forum* report. WAEA is approaching the timeline originally approved by the Council with respect to the initial publication of the *Forum*. Larry Van Tassell moved to continue indefinitely with the *Forum* in its current format, with

an editorial policy to be determined at the 2004 Council meeting. Bruce Godfrey seconded. The motion passed unanimously by voice vote.

Gary Thompson presented the *JARE* Editor's Report. He emphasized the diversity of submissions by geography and success of the reviewer payments. His recent proposal to Blackwell Press for them to assume publication of the *Journal* received an initial no, but opened the door for further justification if we can show more revenue potential. As this is the second negative response to publishing from a major distributor, after Oxford, Gary solicited ideas on how to be more successful with increasing the distribution of *JARE*. Discussion followed about the perceived need for a bigger publisher. Ray Huffaker proposed that Gary continue in discussion with Blackwell. DeeVon Bailey presented the report from the new Editor's office at Utah State University. The incoming editors' visit to Arizona was very useful in making a smooth transition. Gary Thompson moved to give a bonus to the technical editor again this year. Bruce Godfrey seconded. The motion passed unanimously by voice vote.

Ray Huffaker noted his sincere appreciation to the outgoing editor, Gary Thompson, and his editorial team. Gary Brester also shared feedback about the positive perception of the *JARE* in recent years.

Bruce Godfrey reported that past *JARE* issues will be available online by mid-fall. He will lead WAEA's efforts to promote the CD to former subscribers and members as a way to raise awareness about this new resource and to recoup some of the costs of developing the electronic version.

The 2004 WAEA meetings will be held in Hawaii, but there is no clear host institution. Bruce Godfrey will organize some logistics of the meeting through Utah State University's conference services.

Dana Hoag proposed meeting jointly with the WEAI in San Francisco in 2005, and independently in 2006 at a place to be determined. Eric Schuck seconded. The motion passed unanimously.

Ray Huffaker discussed the future of the Secretary-Treasurer position. Ray would like to consider offering some salary support for that position. Bruce Godfrey alternatively proposed splitting the position into two different offices. Ruby Ward moved to grant a committee, appointed by Bruce Godfrey, power to offer a stipend of up to \$5,000 and the ability to split the position, if necessary. Eric Schuck seconded. The motion passed unanimously by voice vote.

No further items of business were raised. Ray Huffaker adjourned the meeting at 5:20 p.m.

Respectfully submitted,

Dawn D. Thilmany  
Secretary-Treasurer

## **JARE Author Index**

### **Volumes 26–28, 2001–2003**

NOTE: The author index for volumes 1–16 (1977–1991) appears in the *Western Journal of Agricultural Economics* 16,2(December 1991):468–476; for volumes 17–19 (1992–1994), it appears in the *Journal of Agricultural and Resource Economics (JARE)* 19,2(December 1994):452–453; for volumes 20–22 (1995–1997), it appears in the *JARE* 22,2(December 1997):411–412; and for volumes 23–25 (1998–2000), it appears in the *JARE* 25,2 (December 2000):740–742.
