STATISTICS OF FARMER COOPERATIVES 1968-69

FCS RESEARCH REPORT 10 - FARMER COOPERATIVE SERVICE
U.S. DEPARTMENT OF AGRICULTURE

Gen. E. S. Hall

CHICAGO, ILL.

FARMER COOPERATIVE SERVICE
U.S. DEPARTMENT OF AGRICULTURE
WASHINGTON, D.C. 20250

Farmer Cooperative Service strengthens the economic position of farmers and other rural people by improving organization, development, management, and operation of their cooperatives. It works directly with cooperative leaders and Federal and State agencies on cooperative problems. It publishes research results and educational materials and issues the *News for Farmer Cooperatives*.

The Service helps (1) farmers and other rural residents get better prices for products they sell and obtain supplies and services at lower cost; (2) rural residents use cooperatives to develop and make effective use of their resources; (3) cooperatives improve their services and operate more efficiently; (4) members, directors, employees, and the public to better understand how cooperatives work and benefit their members and their communities; and (5) encourage international cooperative programs.

Acknowledgment is made to Jane H. Click and Elizabeth J. Simmons, Cooperative Appraisal Division, for their substantial contribution in the analysis of material necessary for preparation of this report.

Highlights

The 1968-69 survey of marketing, farm supply, and related service cooperatives showed a continuing upward trend in total business volume but a decrease in number of memberships and organizations between July 1, 1968, and June 30, 1969.

Total gross business volume (including intercooperative business) handled by these cooperatives amounted to \$22.7 billion. This was an increase of 1.5 percent from the \$22.4 billion reported in the previous fiscal year.

Total net business, after adjusting the gross figure for business done between cooperatives, amounted to \$17.4 billion. This was an increase of 2.1 percent from the \$17 billion net in 1967-68.

The total number of farmer cooperatives decreased from 7,940 in 1967-68 to 7,747 in 1968-69, a net decrease of 193 associations. The decline largely reflects a continuing reorganization trend involving merger, consolidation, and acquisition.

Cooperative memberships totaled 6,364,000 in 1968-69, a decrease of 1.3 percent from 6,445,000 memberships reported for 1967-68. The drop continues the long-term trend of declining cooperative memberships due to the decreasing number of farmers in the United States.

The gross value of farm products marketed by cooperatives amounted to \$16.8 billion in 1968-69, an increase of 1.3 percent from the total gross volume of \$16.6 billion in 1967-68. The net value of these farm products, after eliminating duplication resulting from intercooperative business, amounted to \$13.4 billion. This represented an increase of 1.9 percent from the \$13.2 billion marketing net in the previous year.

The gross value of farm supplies handled by farmer cooperatives amounted to \$5.6 billion in 1968-69, compared with \$5.5 billion in the previous year—an increase of 1.6 percent. The net value of these supplies, after intercooperative business was eliminated, amounted to \$3.6 billion, 2.3 percent above the \$3.5 billion in 1967-68.

Receipts for services related to marketing farm products and handling farm supplies amounted to \$351 million, an increase of 11.0 percent over the 1967-68 receipts of \$316 million.

In net value of combined marketing, farm supply, and related service volume, California continued in first place with \$2 billion—11 percent of total net business; Minnesota remained in second place with \$1.2 billion—7 percent of the total; and Iowa ranked third with more than \$1.1 billion—6 percent of the total.

STATISTICS OF FARMER COOPERATIVES, 1968-69

By Richard M. Ackley
Cooperative Appraisal Division

operative business) and net (excludes intercooperative business) dollar volumes of cooperatives are shown.

This report provides information on the number, membership, and business volume of farmer cooperatives classified by geographic location and by commodity and functional type. Both gross (includes interco-

Classification of cooperatives is discussed in the appendix, and an appendix table presents statistics for certain farmer cooperatives not included in the annual survey.¹

Cooperatives and Memberships

The survey for 1968-69 included a total of 7,747 marketing, farm supply, and related service² cooperatives, compared with 7,940 in 1967-68. Memberships in these cooperatives totaled 6,363,555, compared with 6,445,410 in the previous survey.

Number of Cooperatives

The 7,747 marketing, farm supply, and related service cooperatives in the 1968-69 survey represented a decrease of 193 associations, or 2.4 percent, from the previous year. Much of the decrease was due to a continuing reorganization trend involving merger, consolidation, and acquisition.

Table 1 and figure 1 show that 4,773 of the cooperatives primarily marketed farm products, 2,793 handled farm production supplies, and 181 were related service cooperatives.

Comparison of 1968-69 with 1967-68 shows that marketing cooperatives decreased from 62.1 to 61.6 percent of the total number of cooperatives; farm supply cooperatives increased from 35.7 to 36.1 percent of the total; and related service cooperatives increased to 2.3 percent of the total.

The percentage changes in table 1 are due to some extent to the reclassification of cooperatives because of changes in the function from which they derive the major portion of their dollar volume. The primary examples are marketing cooperatives whose major business became the sale of farm supplies, or farm supply cooperatives in which marketing took a dominant role.

In table 2 cooperatives are classified according to the business activity that consistently accounted for the largest percentage of their dollar business volume. (See the appendix for a further discussion of the classification system.)

¹For information on cooperative numbers, memberships, and business volumes prior to 1950-51, see Statistics of Farmer Cooperatives, 1962-63, Farmer Cooperative Serv. Gen. Rpt. 128, appendix tables 5, 6, and 7.

²Related services include trucking, storage, grinding, drying, and similar services affecting the form, quality, or location of farm products and supplies handled by cooperatives. They do *not* include credit, electrical, or telephone services; dairy herd improvement; artificial breeding; or other types of services not directly related to marketing or purchasing activities.

¹ For years prior to 1950-51, see appendix table 5, FCS General Report 128.² Preliminary.**Fig. 1 NUMBER OF COOPERATIVES, 1968-69**

Minnesota, with 950 cooperatives, continued to lead in the total number of cooperatives. Wisconsin was second with 557, and Texas third with 513.

Number of Memberships

Memberships in marketing, farm supply, and related service cooperatives totaled 6,363,555 in 1968-69, a decrease of 1.3 percent from the 6,445,410 memberships reported for the previous year (table 3). The long-term trend has been one of decline, reflecting the decreasing number of farmers in the United States. Many farmers were members of more than one cooperative and were counted two or more times in the annual survey; therefore, the total membership figure of 6,363,555 contains duplication that cannot be eliminated with current reporting methods.

Membership figures often vary widely from year to year for cooperatives participating in price stabilization programs—particularly for cooperatives handling cotton, peanuts, and tobacco.

Classification of members is also affected by the diversity of services offered by cooperatives. For

example, a member may use a cooperative to market only one of the farm products handled by the cooperative, or a member may use a cooperative classified in the marketing group only for purchasing one or more types of production supplies. The member's business with the cooperative may not, therefore, be in the group that represents the cooperative's major business volume (which determines how the cooperative is classified in this report). His membership, however, will be included arbitrarily in that classification.

Minnesota continued to lead in total number of memberships with 559,465 (table 2). Iowa was second with 429,890, and Indiana was third with 428,095.

Table 4 shows the memberships in local and regional cooperatives classified by major business activity. Of the 7,747 cooperatives included in the 1968-69 survey, 7,069—or 91 percent—were local cooperatives. These local cooperatives had 4,132,510 memberships, or 65 percent of the total. Regional cooperatives represented 9 percent of the total and accounted for 35 percent of the memberships.

See next page for footnote references.

Footnotes to table 2.

¹ Preliminary data covering operations of cooperatives whose fiscal years ended during the period July 1, 1968, to June 30, 1969, with limited exceptions.

² Cooperatives performing specific services on a commodity are included. Incorporated local associations of a federation that performs the actual marketing or processing are counted.

³ Includes soybean marketing and processing.

⁴ Includes members (those entitled to vote for directors) but does not include nonvoting patrons. (There is some duplication in these membership figures because many farmers belong to more than one cooperative.)

⁵ Includes independent local cooperatives, federations, and centralized cooperatives.

⁶ The cooperative with which this membership is affiliated has been counted in the State in which the cooperative maintains its headquarters. (Foreign members of U.S.-headquartered livestock cooperative are located in Canada.)

⁷ Includes cooperatives temporarily inactive because of crop failures or other reasons or cooperatives in which all memberships are allocated to other States.

⁸ Membership of nut cooperatives which market peanuts fluctuates from year to year and is affected by the extent to which producers participate in price-stabilization programs.

⁹ Includes sugar, sugarcane, sugarbeets, honey, maple syrup, molasses, and sorghum.

¹⁰ Includes forest products, fur pelts, hay, hops, nursery stock, tung oil, coffee, and other farm products not separately classified.

¹¹ Member-patrons. Number fluctuates considerably from year to year due to participation in price-stabilization programs.

¹² No individual memberships.

¹³ Includes a statewide federation of county wool pools. Payment is made by the federation to the pool manager who is responsible for payment to the individual wool growers.

¹⁴ Cooperatives providing services related to marketing or purchasing activities.

Total oll types	7, 069	91.2	678	8.8	4,132,510	64.9	2,231,045	35.1

¹ Preliminary.

² Membership figures vary considerably from year to year due to cooperative participation in price stabilization programs, particularly in cattan, peanuts, and tobacco. They are also affected by the number of reported members who may not be active patrons in a specific year.

³ Includes bargaining cooperatives.

⁴ Includes saybeon marketing and processing.

Business Volume

In 1968-69, the total gross business volume of 7,747 marketing, farm supply, and related service cooperatives amounted to \$22.7 billion (table 5). This was an increase of 1.5 percent from the \$22.4 billion gross reported in 1967-68.

The total net business volume of farmer cooperatives amounted to \$17.4 billion in 1968-69. Included

in this amount were \$13.4 billion for farm products marketed, \$3.6 billion for farm supplies purchased, and \$0.4 billion for services performed (fig. 2). The total net figure of \$17.4 billion, which excludes intercooperative business (the difference between gross and net business volumes), represented an increase of 2.1 percent from the \$17.0 billion net of the previous year. Intercooperative business amounted to \$5.4 billion in 1968-69.

Table 5.--Estimated gross and net value of business of marketing, farm supply, and related service cooperatives, and percentage of total, 1950-51 to 1968-69

¹ Far years prior to 1950-51, see appendix table 7, FCS General Report 128. Data for prior years are not entirely comparable due to revisions in statistical procedures in 1950-51.

² Services related to marketing or supply purchasing but not included in the volumes reported for these activities.

³ Preliminary.

Fig. 2

COOPERATIVE BUSINESS VOLUME, 1968-69

Gross and net volumes of business for marketing, purchasing, and related service activities are shown in table 5 for each survey year, beginning with 1950-51. The 1968-69 totals exceeded totals reported in any previous survey.

Gross volume of farm products marketed by cooperatives increased from \$16.6 billion in 1967-68 to \$16.8 billion in 1968-69, an increase of 1.3 percent. The net volume of farm products marketed amounted to \$13.4 billion in 1968-69 and accounted for 77.3 percent of the total net volume of cooperatives. The net marketing volume for 1968-69 represented an increase of 1.9 percent from the \$13.2 billion net for the previous year. This gain resulted primarily from increases in the dollar volumes reported for dairy products and for cotton and cotton products.

Figure 3 illustrates the leading products marketed by cooperatives based on net marketing business volume. Dairy products led with 34.5 percent of total net marketing volume, followed by grain and livestock.

In 1968-69, the gross volume of all farm supplies handled by cooperatives amounted to \$5.6 billion, a 1.6-percent increase from the \$5.5 billion gross in 1967-68. The net farm supply volume of \$3.6 billion accounted for 20.7 percent of the total net business volume in 1968-69—a 2.3-percent increase from the \$3.5 billion supply net in 1967-68. Increases in net volume of miscellaneous products, sprays and dusts, and petroleum products handled largely accounted for this rise.

As shown in figure 4, leading farm supplies handled by cooperatives in terms of net business volume were feed, with 32.2 percent of the total, followed by petroleum and fertilizer.

Receipts for services performed by all types of cooperatives amounted to \$351 million in 1968-69, a 11.0-percent increase from the 1967-68 service receipts of \$316 million. Service receipts represented 2.0 percent of total net business volume in 1968-69.

Table 6.--Number of cooperatives handling specified items and estimated business volume, by products marketed, supplies purchased, and services provided, and percentage of total, 1968-69¹

¹ Preliminary.

² Number of cooperatives handling each commodity group is computed as a percentage of the total number of 7,747 cooperatives listed.

³ Includes coffee, forest products, fur pelts, hoy, hops, seed marketed for growers, nursery stock, tung oil, and other form products not separately classified.

⁴ Because many cooperatives do more than one type of business, these totals are less than the number that would be obtained by adding the number of cooperatives handling individual items or performing individual services.

⁵ Includes plant equipment, automotive supplies, hardware, chicks, and other supplies not separately classified.

⁶ Charges for services related to marketing or purchasing but not included in the volume reported for these activities.

An estimated 69.7 percent of the 7,747 cooperatives in the survey, or 5,400 cooperatives, marketed farm products in 1968-69 (table 6). These included 4,711 cooperatives that primarily marketed farm products; 675 cooperatives that primarily handled farm supplies; and 14 related service cooperatives whose major services were trucking, storage, or other activities related to marketing farm products or purchasing farm supplies. Sixty-two marketing cooperatives that were either newly organized or temporarily inactive were not included.

In 1968-69, farm supplies were handled by 6,273 cooperatives, 81.0 percent of the total number of cooperatives in the survey. Included were 2,790 cooperatives that primarily handled farm supplies and 3,413 marketing and 70 related service cooperatives that handled farm supplies as a sideline activity. Three farm supply cooperatives that were either newly organized or temporarily inactive were not included.

In 1968-69, 5,345 cooperatives of all types, or 69.0 percent of the total, performed one or more services related to farm product marketing or farm supply purchasing. These included 167 cooperatives primarily performing service activities such as trucking, storage, drying, and similar services; 1,648 farm supply cooperatives; and 3,530 marketing cooperatives (including cotton ginning, livestock trucking, and rice- and fruit-drying cooperatives). Fourteen related service cooperatives that were either newly organized or temporarily inactive were not included.

The survey showed that 71.5 percent of all marketing cooperatives handled one or more types of farm supplies in 1968-69, and 74.0 percent provided specialized related services such as cotton ginning and livestock trucking, or general related services such as storage, grinding, and drying. Of the farm supply cooperatives, 24.2 percent marketed farm products, and 59.0 percent performed related services for their

Fig. 3 **RELATIVE IMPORTANCE OF MAJOR FARM PRODUCTS MARKETING BY COOPERATIVES, 1968-69**

BASED ON NET MARKETING BUSINESS OF \$13.4 BILLION.

Fig. 4 RELATIVE IMPORTANCE OF MAJOR FARM SUPPLIES HANDLED BY COOPERATIVES, 1968-69

BASED ON NET FARM SUPPLY BUSINESS OF \$3.6 BILLION.

patrons. An estimated 7.7 percent of the related service cooperatives marketed farm products, and 38.7 percent handled farm supplies in 1968-69.

Local and Regional Cooperatives

Table 7 shows the estimated volumes of specified commodities marketed by regional and local cooperatives. Local cooperatives accounted for \$5.2 billion of the net volume of farm products marketed in 1968-69, or 38.6 percent of the total. Regional cooperatives accounted for \$8.2 billion of the net marketing volume, or 61.4 percent of the total.

Local cooperatives accounted for a major portion of the total net marketing volume for the following commodities: Grain, soybeans, and soybean products,

87.3 percent; and miscellaneous farm products, 89.4 percent.

Of the total gross marketing volume, \$3.3 billion, or 19.8 percent, represents the volume of marketing business between cooperatives.

The estimated gross and net volumes of farm supplies handled by local and regional cooperatives are shown in table 8. Local cooperatives accounted for \$2.7 billion, or 74.6 percent, of the total net supply volume. Regional cooperatives accounted for \$916 million, or 25.4 percent, of the total.

The difference between the total net and gross volumes indicates that intercooperative farm supply business amounted to \$2.0 billion, or 36.0 percent of total gross supply volume.

Local cooperatives accounted for 74.5 percent of total service receipts, or \$261 million, and regional cooperatives for 25.5 percent, or \$89 million.

Geographic Areas

The estimated volume of farm products marketed and farm supplies purchased by cooperatives in 1968-69 is shown by States and geographic regions in table 9. The East North Central and West North Central Regions combined accounted for 45 percent of the total net volume of farm products marketed, and for 54 percent of supplies purchased.

The West North Central Region, with related service receipts of almost \$95 million, ranked first among all regions. This represented 27 percent of the total volume of service receipts reported by cooperatives.

In net value of combined marketing, farm supply, and related service volume, California continued in first place with \$2.0 billion, or 11 percent of the total; Minnesota remained in second place with almost \$1.2 billion, or 7 percent of the total; and Iowa ranked third with more than \$1.1 billion, or 6 percent of the total.

See next page for footnote references.

Footnotes to table 9.

¹ The volume of products marketed is allocated to the State in which they originate and the volume of farm supplies is allocated to the State in which they are sold.

² Includes independent local cooperatives, federations, and centralized cooperatives.

³ Preliminary data covering operations of cooperatives whose fiscal years ended during the period July 1, 1968, through June 30, 1969, with limited exceptions.

⁴ The total number of cooperatives handling each commodity within a State may include only cooperatives headquartered in the State, only cooperatives headquartered in other States, or a combination of both. Number of cooperatives handling a commodity includes those performing specific services on the commodity, such as cotton ginning cooperatives, live-stock trucking cooperatives, and rice- and fruit-drying cooperatives. (Income for these specific services is included with service receipts.)

⁵ Includes the value of commodities marketed by cooperatives under price-support programs in 1968-69. Cooperative business volume is influenced by the extent to which patrons participate in these programs.

⁶ Included in the combined total dollar volume of all farm products marketed, farm supplies handled, and related services provided, in order not to reveal separate volume data for an individual association.

⁷ Includes value of marketing commodities imported or farm supplies exported.

⁸ Less than \$500.

⁹ Dollar volume for commodity allocated to States of origin.

¹⁰ Includes the volume of a statewide federation of county wool pools which is responsible for selling all wool in the pools. Payment is made by the federation to the pool manager who is responsible for payments to the individual wool growers.

¹¹ The volume of a Hawaiian sugar cooperative headquartered in California is included in the dollar volume of California.

¹² Includes forest products, fur pelts, hay, hops, nursery stock, tung oil, coffee, and other farm products not separately classified.

¹³ Includes plant equipment, outmotive supplies, hardware, chicks, and other supplies not separately classified.

¹⁴ These combined gross and net totals will not, in all cases, equal the sum of individual commodity totals or the sum of the totals for marketing, farm supplies, and related services, since some of the individual and group totals have been adjusted in order not to reveal volume data for individual associations.

¹⁵ Receipts for services related to marketing and purchasing activities, but not included in the volumes reported for these activities.

¹⁶ Because many cooperatives do more than one type of business, these totals are less than the number that would be obtained by adding the number of cooperatives marketing individual products, handling individual supplies, or providing individual services.

Appendix

The following discussion of the methods used in classifying cooperatives for the annual survey should create a better understanding of the types of cooperatives covered in these statistics.

Classification of Cooperatives

The 1968-69 survey discussed in this report included only marketing, farm supply, and related service cooperatives (appendix table 1). It did not include rural electric associations, production credit associations, rural credit unions, other types of credit cooperatives, or production cooperatives, such as dairy herd improvement associations and dairy cattle artificial breeding associations.

Marketing cooperatives in this report included those associations whose primary business was marketing farm products for their patrons—that is, more than 50 percent of their total dollar volume was derived from the sale of farm products.

Marketing cooperatives were further classified according to which major commodity of 13 classifications was predominant (in terms of dollar volume) in each association's business. Farm supply cooperatives were those whose farm supply business accounted for more than 50 percent of their total dollar volume. The major functions of related service cooperatives were trucking, storing, drying, or similar services related to marketing or farm supply activities.

Many cooperatives handle more than one commodity and provide both marketing and farm supply facilities, as well as facilities and equipment for performing related services such as storing, drying, and trucking. Such associations were classified according to the predominant commodity or function as indicated by their business volumes.

Cooperatives were also classified according to organizational structures:

Local Association

A local association provides cooperative services in a local area or community, a county, or even several counties. Individual farmers are the members of these local cooperatives. Local associations usually perform a limited number of the first steps involved in marketing. In the case of farm supply associations, practically all sales are at the retail level. Local associations may or may not be affiliated with other cooperatives.

Regional Association

A regional cooperative serves a district consisting of a number of counties, or, in some cases, a number of States. Types of associations classified as regional for purposes of this report are as follows:

1. All federated cooperatives. These are cooperative organizations whose membership is composed of two or more local associations organized to market farm products or purchase production supplies for their patrons. Individual farmers are not members of strictly federated associations, but are members of the local associations that comprise the federation. Regional federations may be members of other federated associations.

2. Centralized associations usually serving a multi-county area. A regional centralized association is structurally like a small-scale local association in that individual farmers make up the membership. In a strictly centralized regional cooperative, there are no autonomous local associations.

3. Cooperatives with large volumes that are neither strictly federated nor strictly centralized, as their

Appendix table 1.--Major types, number, and memberships of farmer cooperatives, by specified years

Type	Year or period	Associations	Estimated memberships or participants
----- Number -----			
Marketing and farm supply:			
Marketing ¹	1968-69	² 4,773	3,141,245
Farm supply ¹	1968-69	³ 2,793	3,189,460
Miscellaneous services ^{1,4}	1968-69	181	32,850
Service:			
Federal land bank associations ⁶	June 30, 1970	628	⁷ 369,279
Production credit associations ⁶	June 30, 1970	446	526,654
Banks for cooperatives ⁶	June 30, 1970	13	⁸ 3,556,000
Rural credit unions ⁹	Jan. 1, 1970	790	275,000
Rural electric cooperatives ¹⁰	Jan. 1, 1970	¹¹ 901	¹² 5,738,961
Rural telephone cooperatives ¹⁰	Jan. 1, 1970	231	¹² 579,241
Farmers' mutual fire insurance companies ⁹	Jan. 1, 1970	1,225	2,750,000
Production:			
Mutual irrigation companies ⁹	Jan. 1, 1970	7,500	161,000
Dairy herd improvement associations ¹³	Jan. 1, 1970	1,267	59,629
Dairy cattle artificial breeding associations ¹³	1969	21	¹⁴ 242,100

¹ Farmer Cooperative Service, USDA.

² When associations marketing farm products but principally engaged in providing some other services are included, the total is 5,400.

³ When associations purchasing farm supplies but principally engaged in providing some other services are included, the total is 6,273.

⁴ Includes general trucking, storage, grinding, locker plant, and other services.

⁵ When associations providing miscellaneous services but principally engaged in marketing or farm supply activities are included, the total is 5,345.

⁶ Farm Credit Administration.

⁷ Represents the number of Federal Land Bank loans outstanding as of June 30, 1970.

⁸ Estimated 2,879 cooperative associations were borrowers from Banks for Cooperatives.

⁹ Farmer Cooperative Service, USDA estimates.

¹⁰ Rural Electrification Administration, USDA.

¹¹ Includes associations that are REA repaid borrowers.

¹² Includes only memberships of associations financed by REA.

¹³ Dairy Cattle Research Branch, Agricultural Research Service, USDA.

¹⁴ Number of herds serviced by cooperatives.

members include both local cooperatives and individual farmers.

4. Some associations with small business volumes that market farm products for, or sell production supplies to, both local associations and individual producers, or do business in more than one State.

5. Bargaining associations. These associations derive all or a major portion of their business volume from negotiating with distributors, processors, and other buyers and sellers over price, quantities, grade, terms of sale, and other factors involved in marketing farm products or purchasing farm supplies. While the primary function of such an association is to bring buyers

and sellers together to contract for the sale of members' products or to purchase members' supplies, many bargaining associations now perform additional functions. For example, dairy bargaining associations at one time generally performed only price negotiation. Now, however, many of these associations perform additional functions, such as physically handling a portion of the milk and making spot sales for their patrons. Bargaining associations, like other dairy marketing cooperatives, represent their members at Federal or State milk order hearings.

Readers who wish to make comparisons from year to year in specific commodity groups should keep in mind the differences in classification between State

and national data. For example, State agencies frequently publish directories that include credit, electric, and other types of service cooperatives not directly related to marketing farm products or purchasing production supplies.

Cooperatives may operate in a specific State for a considerable period of time before they are included in the national survey. This may be due to one of the following reasons: (1) Farmer Cooperative Service may not learn of the existence of the cooperative immediately, or (2) the cooperative may not have completed and returned the initial questionnaire sent to it by Farmer Cooperative Service.

For inclusion in the annual survey, a cooperative is defined as one which meets the following requirements:

(1) Farmers or agricultural producers hold the controlling interest in the cooperative; (2) no member of the cooperative is allowed more than one vote because of the amount of stock or membership capital he owns therein, *or* the cooperative does not pay dividends on stock or membership capital in excess of 8 percent a year; and (3) the cooperative does not deal in products of nonmembers in an amount greater in value than it handles for its members.

For many years, the national survey has been classifying cooperatives according to the predominant commodity in each cooperative's business volume. If a cooperative consistently indicates that it is handling a larger volume of a commodity than the one it was originally organized to handle and which provided the basis for its initial classification in the national survey, this cooperative is reclassified into the commodity group currently representing the predominant product in its business volume. This practice differs from that followed in many State surveys in which cooperatives are classified according to the commodity groups they were originally organized to handle.

The 1950-51 survey was the first annual survey in which cooperatives furnished data by individual commodities handled and services performed.³ Regional cooperatives were asked to furnish information on memberships and business volumes for the individual States they served in 1950-51. For the first time, it was possible to discontinue the former practice of crediting all memberships and business to the State in which each regional association maintained its headquarters. This was the beginning of more realistic figures for States in geographic areas where regional cooperatives were of major importance in cooperative activities.

³ A detailed discussion of the revisions initiated in statistical methods in 1950-51 was given in *Statistics of Farmers' Marketing, Purchasing, and Service Cooperatives, 1950-51*, U.S. Dept. Agr., Farm Credit Admin., Misc. Rpt. 169, pp. 1-3.
