ECONOMIC QUESTIONS OF MAIN AGRICULTURAL BRANCHES
(Studies)

Budapest
1975

INTRODUCTION

The PRESENT NUMBER OF THE BULLETIN—SERIES of our Institute deals with state and economic analysis of main branches of agriculture. Of course, publications selected from the collection of two years may not offer a perfect illustration of the research work done by the Institute within this area. However, they can demonstrate trends and main results of research activity.

It is to be mentioned that abridged studies presented here generally have the character of a fact-finding study and undertake an economic evaluation and a summing-up of experience. In the livestock sector economic aspects at farm level are dominating allowing a double approach to the issue. Publications referring to economic aspects at both branch and farm level are connected with the research program of the institute for the plan period of 1971—1975.

Budapest, March, 1975.
