AGRICULTURAL TRADE OF THE WESTERN HEMISPHERE

A STATISTICAL REVIEW

Major Standard International Trade Classification (SITC) groupings are used to report U.S. agricultural trade with countries and regions of the Western Hemisphere, 1962-70; and trade of Western Hemisphere countries with the world, 1962-68 or 1962-69. Trade of Canada, Argentina, Brazil, Chile, Colombia, Mexico, Peru, and Venezuela is shown by principal trading partners as well as by major SITC groups and leading commodities, 1965-69.

KEY WORDS: United States, Canada, Latin America, Agricultural trade.

EXPLANATORY NOTES

Primary source materials for data used in this publication were: U.S. Bureau of the Census foreign trade reports, Food and Agriculture Organization Trade Yearbooks, United Nations trade runs, and official country trade books.

Items included in agricultural trade--food, beverages, and agricultural raw materials--are classified by major Standard International Trade Classification (SITC) groups as follows:

<u>SITC Code</u>	<u>Food and Live Animals</u>
00	Live animals
01	Meat and meat preparations
02	Dairy products and eggs
04	Cereals and cereal preparations
05	Fruits and vegetables
06	Sugar, sugar preparations, and honey
07	Coffee, cocoa, tea, and spices
08	Animal feed
09	Miscellaneous food preparations
	<u>Beverages</u>
11	Alcoholic and non-alcoholic
	<u>Agricultural Raw Materials</u>
121	Tobacco, unmanufactured
21	Hides and skins, undressed
22	Oilseeds
231.1	Natural rubber
261-265	Natural fibers
29	Crude materials, n.e.s.
4	Animal and vegetable oils and fats

Values are in U.S. dollars. Values given in original data in other than U.S. dollars were converted to dollars at the rates given in International Financial Statistics.

-- indicates zero.

n.a. indicates "not available."

n.e.s indicates "not elsewhere specified."

FOREWORD

This publication provides, for the first time, a historical series showing U.S. agricultural trade with countries and regions of the Western Hemisphere by major Standard International Trade Classification (SITC); trade of Western Hemisphere countries by major SITC groups, and trade of leading Western Hemisphere countries by destination and origin as well as by principal commodities (SITC groups). Data for U.S. trade with countries of the Western Hemisphere are for 1962-70; data for countries of the Western Hemisphere are for 1962-68 or 1962-69; and data for Canada, Argentina, Brazil, Chile, Colombia, Mexico, Peru, and Venezuela are for 1965-69.

U.S. data in this publication should be valuable in analyzing trends in U.S.-Western Hemisphere agricultural trade and help provide a more complete review of agricultural relations between the United States and these countries. Data may also be utilized in competition, market development, and projection studies.

Country trade data show trends in total agricultural exports and imports. Analysis of data by major SITC groups indicates shifts in trade of commodity groups. Changes may have resulted from changes in prices of commodities traded, domestic and foreign demand, government policies, and such.

Trade tables 77-92 for Canada, Argentina, Brazil, Chile, Colombia, Mexico, Peru, and Venezuela show exports and imports of major commodities and leading trading partners. Although statistics are for a short time period, some trends in trade of commodities and trading partners are evident.

Some difficulty was encountered in resolving contradictions and reconciling data given in national and international sources. Agricultural statistics published in country trade books, United Nations trade runs, and Food and Agriculture Organization (FAO) Trade Yearbooks may differ, especially for codes 05, 08, 09, 261-265, and 4. For example, FAO data do not include trade in wool tops and the U.N. trade runs do not include fish oil. Some country trade books which are coded according to SITC put various 05 items in the 09 category and vice versa. In some cases, fishmeal is included in one country under 08 (animal feed) and in another under 27 (crude fertilizer). An attempt has been made to group data for Chile and Peru according to the SITC commodity code, although the original data were not reported in this form. In some cases, footnotes have been added to indicate differences due in part to definitions of coverage.

Regular import data for Mexico do not include imports from free trade zones. For certain items, principally cattle, coffee, and cotton, regular export data include values administratively determined by Mexican custom officials. Since this results in undervaluation, the Bank of Mexico has assigned these exports more realistic values. Mexican trade data herein have been adjusted to include imports from free trade zones and revalued exports.

Data in this report were initiated and prepared in the Statistical Section, Western Hemisphere Branch, Foreign Regional Analysis Division, under the direction of Gae A. Bennett. Members of the staff who contributed to this project were Anna P. Dilkes, Rena E. Perley, and Betty J. Thomas.

William R. Gasser, Chief

1968.																		
1969.																		

1/ Less than \$50,000.

2/ Caribbean excludes Montserrat, St. Kitts-Nevis-Anguilla, Dominica, St. Lucia, and St. Vincent; South America excludes French Guiana; Latin America excludes previously mentioned dependencies; and Western Hemisphere excludes previously mentioned dependencies and Greenland.

Note: In some instances data differ from trade book data, due partly to definitions of coverage.

Sources: FAO Trade Yearbooks; U.N. Yearbooks of International Trade Statistics; Yudelman, Montague, Agricultural Development and Economic Integration in Latin America, George Allen and Unwin, Ltd., London, 1970; U.N. trade runs; and various country trade books.

1/ Certain export commodities, principally bovine cattle, coffee, and cotton, are assigned administratively determined values by the Mexican customs. This results in undervaluation. The values of these exports are adjusted to f.o.b. transaction values by the Bank of Mexico. These adjusted values are included in SITC groups and totals. Imports into the Free Zones are included.

2/ Less than \$50,000.

1/ Exports include revaluations for certain commodities. Some export commodities, principally bovina cattle, coffee, and cotton, are assigned administratively determined values by the Mexican customs. This results in undervaluation. The value of these commodities are adjusted to f.o.b. transaction values by the Bank of Mexico. These adjusted values are included in this table in the major SITC codes, SITC subgroups and totals. These adjusted values have all been added to exports to the United States, since the major share of these products are exported to the United States. Exports to the United States also include some commodities, such as cotton, which are transhipped to other countries.

2/ Less than \$500.

3/ Mostly for transshipment to other countries.
