LAND SETTLEMENT

A List of References

Compiled by Annie M. Hannay

This bibliography contains selected references on land settlement for the years 1938-1943 and a part of 1944. It partially supplements the Bibliography on Land Settlement and the Bibliography on Land Utilization, issued by the United States Department of Agriculture in 1934 and 1938, as Miscellaneous Publication No. 172 and No. 284, respectively. It includes references on land tenure and utilization, irrigation, and reclamation but does not treat these subjects exhaustively.

English version, p. 30-33, with title: The Line Village in the United States.
The writer describes the three types of settlement: The village form, the single farmsteads, and the line village. The line village is one formed by the laying out of farms so that the length is greater than the width and the families locating their homes at the same end of these ribbonlike farms, giving the appearance of a long single-streeted village. The advantages of these various types of settlement are noted.

The authors point out that isolation means high per capita costs for schools, roads, telephones, and other public services, and that the "price of being isolated from neighbors and community centers consists of many other costs, both public and private." The cost of transportation for the county nurse, the county agent, and for the rural mail carrier become excessive, and the settler himself is put to many inconveniences.

Sixteen thousand acres of virgin land were divided into 20-to 40-acre plots and developed by men on relief. In Oct. 1934 the first thirteen families were moved in. By Spring of 1938 there were 417 families established. They had to have farm experience. The men could not be over 50. Both husband and wife had to pass physical examinations. Prices vary for the houses according to the size. A year's probation contract was given first, then a 40-year mortgage at 6 percent.

PUERTO RICO

529. BIG SETTLEMENT project for Puerto Rico. U. S. Dept. Com. Foreign Com. Weekly 6(7): 27. Feb. 14, 1942. 157.54 F763
Suggests that Puerto Rico may be the scene of the largest land-utilization and resettlement program ever contemplated in the Western Hemisphere. The project would establish 300 model settlements through the islands, each having a complete community center. The program is designed to resettle 150,000 families on farms which would be sold to individuals on a 1-year loan basis.

On the plan for redistribution of corporate land holdings of over five hundred acres in Puerto Rico and the problems before Governor Rexford Guy Tugwell. The land law sets up an 8-man Land Authority "to acquire land by expropriation and resell it to landless farmers in 10-to-100-acre plots, to be paid for in forty years, and to create what are called 'proportional-profit farms' of 100 to 500 acres or even larger, to be operated by individual lessees for from 5 to 15 per cent of the net profit - the rest of the profit to be distributed among the laboring families established on the property, proportionately to their earned wages."

541. BALBO, ITALO. La colonizzazione in Libia. I Georgofili 5 (ser. 6): 165-186. Apr.-June 1939. 507 F51
The possibilities of Libya are said to lie in agriculture alone and all other economic possibilities are complementary to this. The area suited to agriculture, however, is limited, since climatic and atmospheric conditions are favorable only in certain parts of the country. Among the matters taken up are the history and various phases of Italian colonization in Libya, and the problems faced and methods used by the Italian Government in its program, including credit and reclamation.

557. APROVECHAMIENTO de las tierras de la ley 12.355. Soc. Rural Argentina. An. 76: 1015-1020. Dec. 1942. 9 Sol
Brings out the importance of diversified production in Mendoza Province and the establishment of family farms. Such family farms should have Government aid, according to the writer, who states that the lands acquired under the provisions of Law No. 12,355 could be used for such settlements. He also points out what needs to be done to these long abandoned lands before they can be broken up into holdings.
558. ARGENTINE colonization plan. Pan Amer. Union. Bul. 71: 289. Mar. 1937. 150.9 M76
Describes a settlement plan of the National Mortgage Bank which is controlled by the Argentine Government. "This plan includes a careful study of the possibilities of each piece of property from the point of view of the settler as well as the land's economic potentialities. The

size of the lot to be sold to a settler will depend on the productivity of the land and the number of working members of the settler's families. The prospective settlers must be farmers by occupation, be of good moral character, and have enough capital to pay for the first expenses. After a 5-year period of provisional occupation of the land during which the settler pays 3 percent interest and 4 percent to a special purchase fund, the sale takes place. Ten percent of the price of the property must be paid then, the remainder to be paid in annual instalments during 46 years and 328 days. The bank will supervise the farming of each piece of property sold to settlers."

Statement prepared by Peter Malloch.

On possibilities of expansion of the industry as a post-war plan for soldier settlement. The Association recommends "that no large scheme of soldier settlement in the industry be undertaken, but, in its place, there should be planned some modified scheme of extension of existing areas for settlers' sons who are in service, and assistance granted to others to purchase existing vineyards of men who are over age to effectively work their properties and desire to sell. Further...that, to this end, sales of properties, especially to aliens, should be discontinued now, and properties for sale held for returned soldiers."

English summary.
The "Barão de Antonina," a model land settlement nucleus in São Paulo near the Paraná boundary, was begun in 1930. This experiment is based on a population composed of more than half Brazilian colonists together with farmers of 16 other races. The first colonists were taken from the unemployed of the city of São Paulo. The colonists of these 17 races learn much from each other and the Brazilians are beginning, as a result, to eat more beans, bread (even rye) and vegetables. The architecture of the houses also shows both foreign and Brazilian influence. The colonists have done well financially.
The Government of the State of São Paulo sells lots to the colonists on ten-year terms.

751. GRAHAM, ELIZABETH. Land settlement for veterans. Free Amer. 7(4): 6-7. Winter 1943. 280.8 F872

The program is to be administered under the Canadian Minister of Resources, who will retain title to the land until obligations are discharged, and who is empowered to decline purchase or sale of land under specified conditions and to determine whether applicants are suitable or not. Veterans' obligations are based on two-thirds the cost of the land plus ten percent of these costs. A ten percent down payment is required. Part-time as well as full-time farms may be acquired. It is estimated that some 70,000 Canadian farms are now operated by men over 65 years of age without sons and many of these will come upon the market and be available for settlement.

The New Zealand rehabilitation program is similar to the Canadian and preparations are under way for obtaining land for subdivision. Land for this program is to be purchased on the basis of its productive value.

Both programs are planned to avoid the mistakes made in settlement after the last war and are similar to the successful programs of Norway, Sweden, Denmark, and Finland. Factors in this success are a method of acquiring land that will protect settler and public from those trying to obtain improper prices, a method of financing that does not overload the settler with debt but which requires his participation, and the assistance of Government agencies.

Provisions of the Ley General sobre Terrenos Baldíos (Law of Public Lands) of Jan. 13, 1939 set forth the requirements for securing an

allotment of not more than 30 hectares by Costa Ricans. Public land may be rented to Costa Ricans or to aliens who have lived in the country for at least 10 years.

A law of Aug. 25, 1933 created the agricultural colony of Toro Amarillo. Of 2000 hectares which were provided for the colony only 115 acres were under cultivation in 1936 and "at present there are only about 120 colonists." Various reasons are given for the lack of success of the colony.

A more successful colony is that of El Salvador founded in 1938.

In the San Carlos basin "squatters have drifted in chiefly from Nicaragua, and are living at a subsistence level on lands to which they have no title. Little has been done to disturb them."

An executive order of June 16, 1937 provides the machinery for bringing about the consolidation of scattered holdings which was authorized by the Umlegungsgesetz of June 26, 1936. The power to determine what land shall be transferred from one owner to another is vested in the Minister of Agriculture and is to be delegated by him to various regional and local officials. Owners of scattered holdings are to be compensated with contiguous property of a value equivalent to that which they have given up. Such redistribution of property is to be made with a view to more economic utilization of the land and increased production.

This is an account of a day-by-day investigation covering the period from Apr. 1, 1936 to Mar. 31, 1937, made by the author of conditions on newly established farms in two Mecklenburg villages. The National Socialist settlement policy as based on the law of July 14, 1933 is outlined and its practical application in the settlements of Faulenrost and Krummsee is studied. Among the topics discussed are the distribution of the land and the installation of the new settlers, the houses and farm buildings, farm equipment and livestock, standards of living, and income and expenditure.

Bibliographical footnotes.

This is a study of peasant land ownership as established by the German land inheritance law, and of the relation of the legal rights of the peasant to those of the people as a whole. The author points out that in the case of the law in question emphasis should be placed not so much on the inheritance concept as on the holding or farm itself. The Erbhofeigentum is shown to be a trust property. Without wishing to underestimate the hereditary aspects of the Reichserbhofgesetz, the author feels that the key to the law lies in the new peasant idea of property based on kinship. The author claims to have studied only a few of the most characteristic problems connected with the hereditary freehold. These include the hereditary freehold as a special trust property and as an organism and its external and internal operations.

Summaries in German, English, French, and Spanish.
The first article contains an account of the progress made in the redistribution and consolidation of scattered parcels of land in southern Germany and the improvement of conditions by laying out new field paths so as to provide for a more economic use of the land. The process involves a study of the inheritance customs of the different districts, as well as of various rights and duties dependent upon the prevalence of scattered fields belonging to one farm. Illustrated by maps and tables. The second article is a statistically illustrated account of the redistribution and consolidation of small holdings in the Rhine Province and of the land reclamation and improvement that have accompanied the operation.

1022. STEWART, J. H. The new land settlement. Country Life [London] 82(2134): 595-597. Dec. 11, 1937. 80 C83
Describes the work of the Land Settlement Association in transferring unemployed industrial workers from the Special Areas in the north to small-holding estates in the south. The method used is as follows: "First, the families are carefully chosen... Second, the selected families are carefully trained... Third, each holding is fully equipped with the necessary capital... Fourth, a system of cooperative marketing, covering both sales and purchases, is compulsory throughout all settlements. Lastly, each estate has a central farm, which provides for the small-holders a wide variety of services."
The plans of buildings and lay-out of the settlements are discussed.

Internal land settlement is defined as both a human and a land problem the object of which is to establish or to reestablish a closer relationship between men and the land on social, demographic, political, and economic grounds. It presupposes men who need and want the land on the one hand and cultivable land on the other.
The author discusses these conditions in connection with northern, central, and southern Italy. He shows the development in the conception of improvement or "bonifica integrale" to include the greater significance of "bonifica integrale," and the addition of the social aim to that of mere improvement of the land for the purpose of increased production. Land tenure is discussed with the small independent family farm as the prevailing form and alongside of that various forms of tenancy. The work of the Opera Nazionale per i Combattenti in connection with land settlement and that of the consortia of land owners are briefly explained, and the aims of the settlement of Ethiopia are outlined.

1128. ALANIS PATINO, EMILIO. La economía ejidal de Morelos. Mex. Depto. Autónomo de Prensa y Publicidad. Agricultura 2: 75-84. Sept./Oct. 1939. 8 Ag823

Traces the development of the economy of Morelos from the period prior to 1910 to the establishment of the ejido system. Rice culture has been developed through the extension of credit, and cane cultivation and the recent installation of a sugar mill have given a new impetus to the ejido. The latter, in addition to helping out the ejidatorios, provides work for the landless peasants. It is pointed out that although the total agricultural production was less in 1934 than in 1910, it was more equitably distributed among the actual producers. The problems connected with the ejidal type of collectivization are discussed.

The writer considers that the policy of the present Government of deeding to individuals the parcels of land they hold under the ejido system is only the beginning of a solution to the agricultural problem, since the problem is one of production rather than division. He feels that the small holding is not a desideratum, that private initiative

should be given a chance in agriculture, that holders of the ejido property should be granted right to sell, mortgage, and transfer in any way this property, and that since those who do not wish to farm have no reason to keep the property the Government has given them, it had better be transferred to those who will use it.

Account of the drainage and settlement work in Holland, which started in 1919 and had for its object the formation of four new Polder over a total area of about 220,000 hectares. The enclosure of the Zuider Zee is said to have for its purpose the formation of a fresh water inland sea, better drainage possibilities for the country around the Zuider Zee, the lessening of maintenance costs for waterworks around the Zuider Zee, security against floods, and opportunity for safe and swift communication between the provinces of North Holland and Friesland. The partial drainage of the Zuider Zee had for its aim the increase of working room and the obtaining of land for agriculture and gardening. The progress made and methods used in the laying out of the new land and the houses built are discussed.

1198. TAYLOR, C. B. An experiment in land settlement. Trop. Agr. [Trinidad] 20: 71-73. Apr. 1943. 26 T754
Account of the settlement of Daudawa in Nigeria. To become a settler an entrance fee of 30 shillings is required. If of suitable character the settler is given a cleared 15-acre holding, a compound consisting of two round houses and a cattle pen, four cattle, and a plough. He must repay the value of the cattle and implements and a 5 percent annual interest on outstanding balances as an insurance against cattle losses. He has security of tenure for life, if satisfactory. Crops are sold to the fund and supplies of various kinds issued. A specimen balance sheet shows the position at the end of one season's operation of farmers set up in April, 1942.
The scheme is believed to be economically sound.

The "Own homes movement" is a project to provide small detached dwellings and small holdings for rural population so as to ensure a subsistence and full-time occupation to the farmer and his family. Lands have been redistributed through parcellation and new, uncultivated areas made available for ownership, and leaseholds converted into freeholds. Emphasis is given to construction of better dwellings. The Swedish law permits of expropriation of lands by the State when needed. A State supported own-homes loan movement begun in 1905 has aided persons of limited means by low interest rates and long-term payments. Reorganization of the system, particularly changes in the loan system will be effective July 1940, making for greater centralization of control and administration. Different funds are to be used for building loans and for land acquisition loans.

A study of the origin of the German peasant settlements in Volhynia and their development before and after the World War. It is the story of an independent colonization movement without State control in which the settlers cleared the land of their own initiative and established colonies of Germans with an agrarian constitution that featured the long-lease system. The settlements were destroyed by the World War and the peasants were forced to retire into the interior of Russia. The author describes their return to find a heavy loss of property and aliens settled on their land, and their laborious reconstruction of the destroyed homesteads. Present economic conditions are analyzed, and the necessity of curbing the tendency to subdivide the farms is stressed.

Administration and operation of the Technical Institute set up in Venezuela to promote systematic immigration and land settlement.
1352. TIERRAS para los campesinos venezolanos. Pan Amer. Union. Bol. 77: 357. June 1943. 150.9 M76B
States that the Venezuelan Minister of Agriculture and Stock has asked the cooperation of regional governments and given instructions to all its officials in the interior of the country, to help insolvent peasants with the legal requirements related to the free adjudication of lands. The Minister has also appointed engineers and surveyors to measure off and parcel out the public lands requested jointly by groups of poor farmers in various parts of the country. As a result of these measures titles were recently given on 36 parcels of public lands with an area of 454 hectares.
1353. U. S. SOIL CONSERVATION SERVICE. MISSION TO VENEZUELA. Land conditions in Venezuela and their relations to agriculture and human welfare. 154 p., processed. Washington, 1943. 1.96 A96L22
Members of the Mission were H. H. Bennett, D. S. Hubbell, W. X. Hull, and J. E. Caudle.
"The various major land types, the principal soils, and the climate are discussed, and their relation to agricultural operations is briefly explained. Special emphasis is devoted to such problems as soil depletion by erosion, the effects of overgrazing and continuous cropping, practical soil and water conservation, irrigation, resettlement, conditions of vegetation, and human circumstances."

First part of a 3-part report covering the activities of the Instituto Técnico de Inmigración y Colonización of Venezuela during the year 1939, the first year of its operation, and outlining its program for 1940. It contains information on immigration supported by tables and graphs and maps, and an account of the land settlement policy of the Institute and its operation in different parts of the country. An account is given of the two colonies of Chirgua and Mendoza which were already in existence when the Institute was created. Suggestions are made for improvements in the immigration and naturalization laws with special reference to land settlement.

1355. VENEZUELA; plans for post-war agriculture. So. Amer. Jour. 133: 189. Apr. 3, 1943. 280.8 S086

The Venezuelan National Colonization and Immigration Institute has made extensive plans for the establishment of large agricultural colonies after the war. Pertinent information is being collected.

1356. VENEZUELA establishes agricultural colonies. U. S. Off. Foreign Agr. Relat. Agr. in the Americas 2: 238. Dec. 1942. 1 F752A

An agreement signed by representatives of the Venezuelan Government and the principal oil companies operating in Venezuela provides for the establishment of agricultural colonies to be occupied by discharged employees of the oil companies and to be located in two zones set aside by the Venezuelan Government. One of the zones is situated in the State of Monagas, to the west of the Caripito oil camp; the second is in the State of Zulia.

The plots of ground allocated to the settlers will vary from 10 to 15 hectares. Full title to the land may be obtained at the end of a 3-year trial period.

WEST INDIES

1357. A SOCIAL programme for the British West Indies. Internatl. Labour Rev. 41: 517-528. May 1940. 283.8 In8

The establishment of a plan for settling people on the land as smallholders is included in the recommendations, p. 521-522.

1358. STOCKDALE, SIR FRANK. Development and welfare in the West Indies, 1940 and 1942. Report. Gt. Brit. Colonial Off., Colonial, No. 184, 93 p. London, H. M. Stationery Off., 1943. 280.14 G79

The creation of small holdings in the British West Indies is shown to have been a costly and on the whole disappointing experiment. Except in the case of the Leeward Islands and the Barbados settlement in St. Lucia the holdings have been sold on an unrestricted freehold basis which leaves them liable to subdivision on the death of the owner. Long-term leases have been recommended as preferable.

1359. WAKEFIELD, A. J. Report on agricultural development in the Bahamas. 55 p. Nassau, Nassau Guardian, 1942. 31.7 W13

Proposals for land settlement include choice of land, size of holding, lay-out of settlement, development prior to settlement, selection of settlers, first operations, program of work, and right of occupancy.

YUGOSLAVIA

1360. FRANGES, OTTO VON. Die sozialökonomische struktur der jugoslawischen landwirtschaft. 288 p. Berlin, Weidmannsche Verlagsbuchhandlung, 1937. 281.177 F85

Describes the zadruga which is the assemblage under one roof of a number of families descended from a common male ancestor. Outside of the zadruga all children are heirs of their parents on an equal footing. This has led to increasing parcellation of the land.

A historical survey is made of land settlement, the different types of settlement and their buildings in various sections of the country.

1361. KIRCHNER, B. Zersplitterter bodenbesitz in Jugoslawien. Südost-Echo 10(3): 8. Jan. 19, 1940. 280.8 Su2
Indicates the extent of splitting up of land into small holdings in Yugoslavia and the steps which should be taken to remedy the situation. Suggests the growing of crops requiring intensive labor and increased cattle-raising.

The first part of the document
 discusses the general principles
 of the system and the
 various methods of
 application. It is
 divided into several
 sections, each dealing
 with a different aspect
 of the subject. The
 first section is
 devoted to the
 history of the
 system, and the
 second to the
 theory of its
 operation. The
 third section
 describes the
 practical details
 of the system, and
 the fourth to the
 results of its
 application. The
 fifth section
 contains a list of
 references, and the
 sixth a list of
 names. The
 seventh section
 contains a list of
 abbreviations, and
 the eighth a list
 of symbols. The
 ninth section
 contains a list of

 twelfth a list of
 appendices. The
 thirteenth section
 contains a list of
 indexes, and the
 fourteenth a list
 of errata. The
 fifteenth section
 contains a list of
 corrections, and
 the sixteenth a
 list of additions.
 The seventeenth
 section contains a
 list of changes, and
 the eighteenth a
 list of deletions.
 The nineteenth
 section contains a
 list of insertions,
 and the twentieth
 a list of
 modifications.
