BIBLIOGRAPHY ON THE MARKETING OF AGRICULTURAL PRODUCTS¹

Compiled by EMILY L. DAY, KATHARINE JACOBS, and MARGARET T. OLCOTT,
Library, Bureau of Agricultural Economics, under the direction of MARY G.
LACY, *Librarian*

INTRODUCTION

This bibliography was designed to include the more important references to publications in English on methods of marketing agricultural products and discussions of the principles upon which methods of marketing should be based. All cost-of-marketing studies which were found were included, but except for these no attempt has been made to cover the field of statistics. Nor has any attempt been made to cover the subject of exchanges exhaustively. One or two citations on this subject have been included under "General marketing," a few others have been entered under the commodity headings such as "Cotton" or "Grain."

Periodical articles have not been included as a class because the *Agricultural Index* makes such articles fully available. Exception has been made, however, in the case of the periodicals whose titles follow: *Annals of the American Academy of Political and Social Science*, *American Economic Review*, *Journal of Farm Economics*, *International Review of Agricultural Economics*, *State Horticultural Society reports*, *Maryland Agricultural Society reports*, certain issues of the *Iowa Journal of History and Politics*, and the monthly publications of some of the State departments of agriculture.

Many States have marketing bureaus or divisions of marketing under the State departments of agriculture. No attempt has been made to include the reports of these bureaus or divisions, although they may contain items of local interest.

The material has been arranged under commodity wherever possible. As a result of this arrangement the person interested in cooperation, storage, or transportation will have to examine these headings under each commodity listed in the table of contents as well as under Part I, "General marketing," in order to find all references to these subjects. General works on marketing are listed only under Part I, "General marketing," although they frequently contain chapters on special commodities.

AMERICAN COMMISSION TO INVESTIGATE AND STUDY AGRICULTURAL CREDIT AND COOPERATION. Agricultural cooperation and rural credit in Europe. U. S., 63d Cong., 1st sess., Senate Doc. 214, 1913-14, 3 pts.

This Commission was divided into four sections, on finance, production, distribution, and the organization of rural life. The Commission held hearings in each European country on various forms of agricultural cooperation, and visited representative cooperative societies, many of which were organized for marketing farm products.

Pt. 1 contains the evidence gathered in Europe arranged by countries.

Pt. 2 is an annotated bibliography on credit and agricultural cooperation, arranged by countries. Many of the entries cite reports and statements contained in pt. 1.

Pt. 3, entitled American Evidence, contains a brief statement regarding cooperation and rural credit in each state in the United States and in each province in Canada.

The reports of the state delegates have not been listed separately as they contain in brief the information published in the commission's report.
