WHEAT AND WHEAT PRODUCTS, RYE AND RYE PRODUCTS - ANALYSIS OF
FOREIGN TRADE OF THE UNITED STATES, 1790 - 1929

Wheat, including flour, in terms of grain

Wheat and flour together comprise the second most important agricultural export of the United States, being exceeded only by the value of cotton. During 1925-1929, the quantity sent to foreign countries had an average value of \$275,052,000 which was nearly 6 per cent of all exports and 14 per cent of all agricultural exports. Recent years have been marked by increasing competition from Canada, Argentina and Australia. When Russia will again resume her pre-war position as an exporter of wheat and become a formidable competitor is still undetermined.

With the exception of 1836-37, exports from the United States have exceeded imports every year in history. A succession of short crops for several preceding years made it necessary for us to import 2,389,000 bushels more wheat in 1836-37 than we exported. For more than sixty years after the establishment of the national government, most of the wheat was produced east of the Mississippi. Production rose rapidly but most of the increase was consumed at home by a growing population and exports were comparatively small ranging between 1,000,000 bushels and 26,000,000 bushels annually. One of the obstacles to our export trade had been the English Corn Laws under which wheat and flour paid heavy import duties. After the repeal of these laws in 1846 there was a better foreign demand for American grain and this fact together with the rapid advancement in rail construction and the remarkable development of the great wheat areas west of the Mississippi resulted in larger exports of wheat and flour. With the outbreak of the Civil War southern markets were closed to northern wheat, creating a large surplus which was thus thrown into foreign channels and increased our exports enormously.

A decline followed the close of the Civil War, another great surplus producing period 1880-1903 was followed by a decade of falling exports until 1914-15 when, stimulated by the Great War and resulting high prices net exports surpassed all previous records reaching 335,162,000 bushels. Average net exports of wheat including flour during the last five years, 1925-1929 amounted to 177,247,000 bushels, an increase of 71,783,000 bushels or 68 per cent over the 1910-1914 average and comparing favorably with the record years 1893-1902. (See Fig. 1) The opening of the new wheat land west of the Missouri river and the use of the tractor and combine harvester have contributed to the maintenance of the position of the United States as a wheat exporter.

The United Kingdom is the leading market for American wheat and flour, a position she has held since 1859-60. Much of it is shipped directly to British ports but a large portion also goes out by way of Canada.

1.

Our first complete record of any imports was in 1823-24 when we received less than 2,000 bushels of wheat including flour from foreign countries. It was not until 1916-17 that imports exceeded 12,000,000 bushels. While the last few years show a gradual decline from the high point of 1920-21 when we imported nearly 57,682,000 bushels we still import approximately 10 times as much as we did before the War. Most of our imports come from Canada, nearly all of which is received in the form of grain, to be ground in bond to produce flour for export. Because of its high quality and protein content, millers in the United States use this hard Canadian grain to mix with our softer wheats in order to produce the "strong" flour which is desired for modern baking methods.

Reexports which were first reported in 1836-37 are comparatively small, much of the time running less than 1,000,000 bushels. In only four years, 1853, 1854, 1867 and 1896, have reexports exceeded 2,000,000 bushels.

Wheat

Prior to 1846-47 exports of wheat had never amounted to as much as 2,000,000 bushels annually and were only a small part of the total exports of wheat including flour, and in 4 of those years, 1835-1838 had been more than offset by imports. The years which follow show considerable fluctuation but a very decided increase in exports of wheat grain and during the last five years at least 67 per cent of the total exports of wheat including flour has gone out in the form of wheat. Average net exports of wheat during 1925-1929 amounted to 118,479,000 bushels or more than double the pre-war average. Between 80 per cent and 90 per cent finds its way to European markets either direct or by way of Canada. The average export value of wheat reached the lowest point in 1894-95 when it averaged 58 cents per bushel and reached the peak in 1919-20 when it amounted to \$2.50 per bushel. Since 1920-21, the average export value has ranged between \$1.11 and \$1.57 per bushel. These figures do not take into account variations in the value of the dollar.

Wheat flour

Just before the Civil War when exports of wheat began to climb another interesting change was taking place. Various European countries had been giving protection to their milling interests with the result that American flour which had constituted over 90 per cent of our exports went for the most part to the West Indies and South America. Exports of wheat exceeded those of flour for the first time in 1860-61 and since then the proportion exported as flour has rarely been over 45 per cent. During the years that flour represented the bulk of the export trade, actual quantities were relatively small and prior to 1878-79 had never exceeded 4,900,000 barrels. The introduction of new rolling processes about this time gave a new impetus to the milling industry and in consequence there was an increase in exports of flour. The decline which set in about 1904-05 lasted until the outbreak of the World War when exports rapidly advanced and reached their highest point in 1918-19 with an export of more than 24,182,000 barrels.

For the most part increases in exports of flour have coincided with increases in exports of wheat, the only year showing a reverse situation being in 1917-18 when wheat exports reached a very low level, amounting to only a little over 34,119,000 bushels while the amount of flour sent to foreign countries was nearly 21,980,000 bushels. Conservation of ocean tonnage was then imperative and favored the shipping of flour. Average net exports of flour during 1925-29 amounted to 12,504,000 barrels as against an average of 10,551,000 barrels during the five years immediately preceding the war. Flour shows a scattered distribution. During the last few years European countries have taken between 33 and 45 per cent of our total exports; Cuba and the other West Indies at least 15 per cent and the major portion of the remainder has gone to China and the Philippines.

Bread and biscuit

Net exports of bread and biscuit show little variation but with a general downward trend during the later post-war years. Most of the exports go to Canada, Mexico, the West Indies and South American countries.

Macaroni, vermicelli and all similar preparations

United States imports of macaroni increased greatly and almost continuously up until the outbreak of the World War, most of the imports coming from Italy. With the opening of hostilities, Italian imports of durum wheat which at that time came mostly from Russia were almost entirely cut off so that Italian exports of wheat pastes were greatly reduced. During this period the macaroni industry in the United States was greatly expanded and succeeded not only in supplying domestic demands but to a large extent supplanted Italy in the markets of North American countries and to some extent in the United Kingdom. As yet Italy has not been able to recover much of this loss and our exports continue to increase. During the last five years average exports have exceeded our imports by 4,397,000 pounds.

Bran and middlings

One of the important by-products of wheat is bran and middlings but exports are comparatively unimportant and even before the World War, were more than offset by imports which come mostly from Canada. Average net imports during 1925-1929 amounted to 245,000 long tons or more than 4 times the net imports in 1913-14.

Rye and rye flour

In comparison with wheat, United States production of rye is small but a large percentage of the crop is exported. In recent years from 1/4 to 1/2 of the total production has been sent to foreign countries. Formerly Russia, Germany, Hungary and the Netherlands, supplied the major portion of the rye entering into the channels of world trade but the World War cut off these supplies thus stimulating production in this country, Canada and Argentina. United States production has continued at a high level and

European importing countries still furnish favorable markets for our surplus. While a part of this grain leaves the country through our Atlantic coast ports, a very large volume of United States rye finds its way to foreign markets through Montreal and Canadian seaboard ports.

In the early days of the republic, rye enjoyed considerable favor as a bread grain, many of the settlers from Germany and Sweden preferring it to wheat. Domestic consumption kept pace with production leaving little for export but with the improvement in their economic status, people began to show a decided preference for bread made from wheat flour. Prior to 1873-74 exports of rye had never reached 1,000,000 bushels and with few exceptions were comparatively unimportant until the outbreak of the World War. The peak of the export trade was reached in 1922-23 when net exports of rye including flour amounted to 51,564,000 bushels. During the last 5 years, net exports have averaged 24,083,000 bushels or more than 27 times the average net exports immediately preceding the war. (See Fig. 2)

Exports of rye flour are very small, most of the shipments going out in the form of grain. Imports of both rye and rye flour are of minor importance. In 1896-97 rye had an average export value of 43 cents per bushel, the lowest on record and was highest in 1920-21 when it averaged \$2.03 per bushel.

Shipments of wheat and wheat products to
Alaska, Hawaii and Porto Rico

Annual purchases of wheat including flour by our outlying possessions of Alaska, Hawaii and Porto Rico remain fairly stationary, amounting to between 2,000,000 bushels and 3,000,000 bushels more than half of it going to Porto Rico. Hawaii takes small quantities of wheat grain but with this exception practically all of the shipments go out as flour.

EXPLANATION OF TERMS

DOMESTIC EXPORTS - Goods produced or manufactured in this country from either domestic or imported raw materials and which are shipped to foreign countries. The kind, quantity and value of exported merchandise are ascertained from the shipper's export declarations filed by the exporters with the collector of customs at the port of exportation.

Include exports to the Philippine Islands and Virgin Islands of the United States. Since 1902, exclude shipments from continental United States to Alaska, Hawaii and Porto Rico.

1790 - 1802 - Includes reexports or exports of foreign merchandise.

IMPORTS, GENERAL - Embrace articles entered at the customhouses for immediate consumption and imported articles entered for warehouse. Include imports from the Philippine Islands and Virgin Islands of the United States. Since 1902, exclude shipments to the United States from Alaska, Hawaii and Porto Rico.

THE IMPORTATION OF CANADIAN WHEAT FOR

MILLING IN BOND AND EXPORT - There are two separate and distinct provisions in the Tariff Act of 1922 under which foreign wheat may be imported for milling in bond and export. One of these provisions is known as the drawback provision; the other provision is commonly referred to as the milling provision so far as it relates to the milling of wheat in bond for export. Both provisions are general provisions of law that have been in effect for many years. It is under these provisions that imported wheat is manufactured or processed in the United States without paying the regular import duty. However, this concession is conditioned upon the requirement that the manufactured product must be exported from the United States. The application of these provisions has been the subject of much confusion and misunderstanding, and it may therefore be well to examine each of these provisions in some detail.

DRAWBACK PROVISION

The so-called drawback provision will be found in Section 313 of the Tariff Act of 1922. Under the terms of this provision the full amount of the duty fixed by law (42 cents a bushel at the present time) is paid by the importer when the wheat is imported into this country. A refund of 99 per cent of the duty so paid is secured by the miller upon the exportation of the flour or other by-products made from the imported wheat. As above pointed out, the drawback provision is a general provision of law that has been in force for many years; it applies not only to wheat and wheat flour but to all manufactures made from imported products. The drawback clause first appeared in the Tariff Act of July 4, 1789, the first tariff law passed by Congress under the Constitution. As re-enacted in the tariff law of 1922, however, this provision contains a special proviso to the effect that no drawback shall be allowed unless at least 30 per cent of the domestic wheat shall be mixed with the imported wheat.

The drawback of the duty paid on imported wheat cannot be obtained until after the flour made from such wheat has been exported from the United States and is shown to have actually arrived in the foreign country of destination. American millers are not availing themselves very extensively of the drawback proviso and the amount of wheat on which a drawback has been allowed is therefore relatively small in comparison with the wheat imported for milling in bond and export under the milling provision, as indicated in the following statement.

THE MILLING PROVISION

The milling provision, like the drawback clause, is a general provision of law and relates to the manufacture of imported goods in a bonded manufacturing warehouse. This provision is similar to that contained in laws enacted in prior years, and in the Tariff Act of 1922 will be found in Section 311. Under the terms of this section, a flour mill or part of a mill is technically placed under bond, in accordance with regulations prescribed by the United States Treasury Department. No duty is paid on the wheat imported under this provision, but the law, as enacted in the Tariff Law of 1922, makes it imperative that all of the flour made from such imported wheat must be exported from the United States. The millfeeds and other by-products may be entered for consumption in this country upon the payment of the regular duty, which at the present time is $7\frac{1}{2}$ per cent ad valorem.

IMPORTS FOR CONSUMPTION - Embrace articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. The statement of general imports and the statement of imports entered for consumption for any period will always differ to the extent that the value of entries for warehouse for the period differs from the value of withdrawals from warehouse for consumption. The term "entry for consumption" is the technical name of the import entry made at the customhouse and implies that the goods have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterward exported. Imports for consumption were first reported in 1867 and published in 1868.

KIND, QUANTITY AND VALUE OF IMPORTS - The kind, quantity and value of imported merchandise are ascertained from the entry filed by the importer at the customhouse.

The value of imported merchandise as shown in the statistical tables is the foreign value or the export value, whichever is higher; that is, the market value or the price at which the merchandise, at the time of exportation to the United States is offered for sale in the principal markets of the country from which exported, including the cost of containers or coverings and all expenses incident to placing the merchandise in condition ready for shipment to the United States.

REEXPORTS OR EXPORTS OF FOREIGN MERCHANDISE - Goods which have been imported into this country either for reexport or consumption and are afterward exported having undergone no change in form or condition or enhancement in value by application of labor in the United States.

1790 - 1802 - Combined with domestic exports.

NET EXPORTS - Domestic exports and reexports minus imports.

NET IMPORTS - Imports minus domestic exports and reexports.

AVERAGE EXPORT VALUE PER UNIT - These have been computed by dividing the total export value each year by the total quantity and are not to be regarded as a quotation of prices.

The value upon which a given average in this table was based is composed of items which represent shipments possibly of different grades of the articles mentioned from different parts of the United States and at different seasons of the year. The actual value of any one shipment included in this total is its value at the time and place of exportation.

Weights and measures--

1 bushel of wheat	60 pounds
1 bushel of rye	56 pounds
1 barrel of wheat or rye flour	196 pounds
1 long ton	2,240 pounds
1 cwt	112 pounds

Wheat flour has been converted to terms of grain on the following basis:

1790-1879 - 1 barrel - the product of 5 bushels of grain
1880-1908 - 1 barrel - " " " 4.75 " " "
1909-1917 - 1 barrel - " " " 4.7 " " "
1918-1919 - 1 barrel - " " " 4.5 " " "
1920- - 1 barrel - " " " 4.6 " " "
1921-1929 - 1 barrel - " " " 4.7 " " "

Bread and biscuit - When the quantity has been stated in kegs and boxes in the original returns, they have been converted to barrels on the basis of 3 kegs or 4 boxes to 1 barrel and $3\frac{1}{2}$ kegs and boxes combined to 1 barrel.

YEARS - The years end as follows: September 30, 1790 - 1842; nine months, October 1, 1842 - June 30, 1843; June 30, 1844-1929.

LEADERS - Indicate no information exists but do not necessarily signify that there were no figures for that period as they may have been included with "all other " or with the "unenumerated".

NONCONTIGUOUS TERRITORY - In the statistics of Foreign commerce of the United States, the Philippine Islands and Virgin Islands of the United States are treated as foreign countries.

The statistics of foreign commerce include the trade of the customs districts of Alaska, Hawaii and Porto Rico with foreign countries but since 1902 do not include the trade of these territories with the United States.

In 1903, the trade with Alaska, Hawaii and Porto Rico was for the first time fully and definitely recorded (see Commerce and Navigation of the United States, 1903, Vol. 1, page 31). Therefore separate tables have been compiled showing shipments from the United States to Alaska, Hawaii and Porto Rico, 1903 - 1929,

The collection of statistics of trade with all noncontiguous territory was authorized by an act of Congress, April 29, 1902.

WHEAT AND WHEAT FLOUR: NET EXPORTS OR IMPORTS OF THE UNITED STATES, 1850-1929

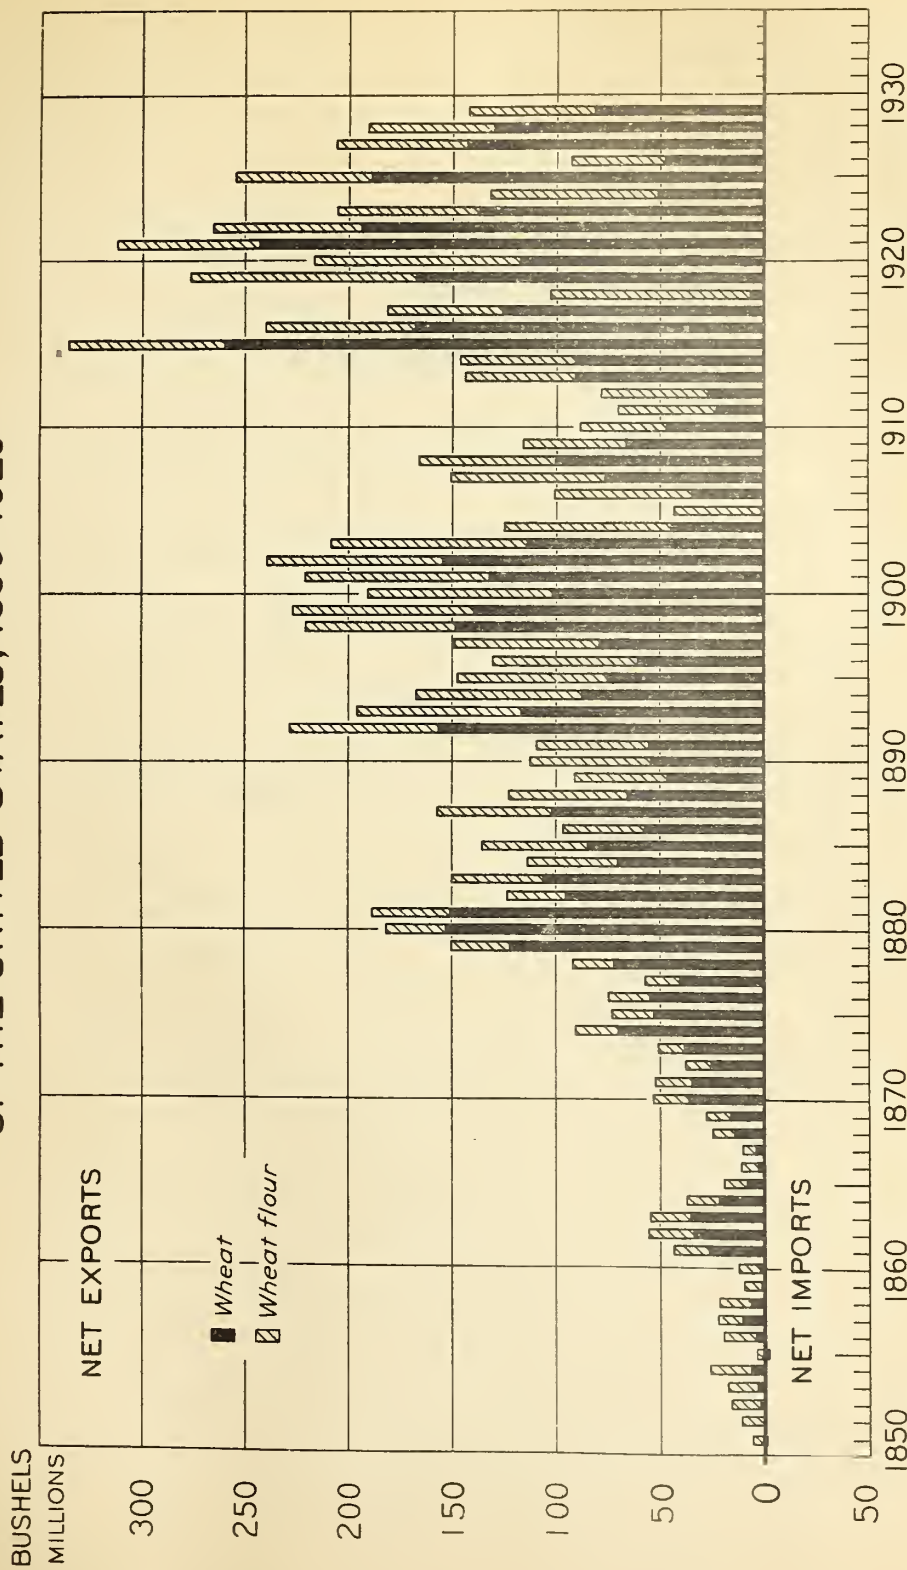

FIGURE 1. - NET EXPORTS OF WHEAT INCLUDING FLOUR SHOW A GREAT SURPLUS-PRODUCING PERIOD FROM 1880-1903, WHICH WAS FOLLOWED BY A DECADE OF FALLING EXPORTS. DURING THE LAST FIVE YEARS EXPORTS HAVE ABOUT EQUALED THOSE FOR THE PEAK YEARS AT THE CLOSE OF THE LAST CENTURY. PRIOR TO 1861, FLOUR CONSTITUTED AT LEAST 90 PER CENT OF THE TOTAL EXPORTS BUT SINCE THEN THE PROPORTION GOING OUT AS FLOUR HAS GRADUALLY DECREASED AND AT PRESENT SELDOM EXCEEDS ONE-THIRD OF THE TOTAL EXPORTS

RYE AND RYE FLOUR: NET EXPORTS OR IMPORTS OF THE UNITED STATES, 1870-1929

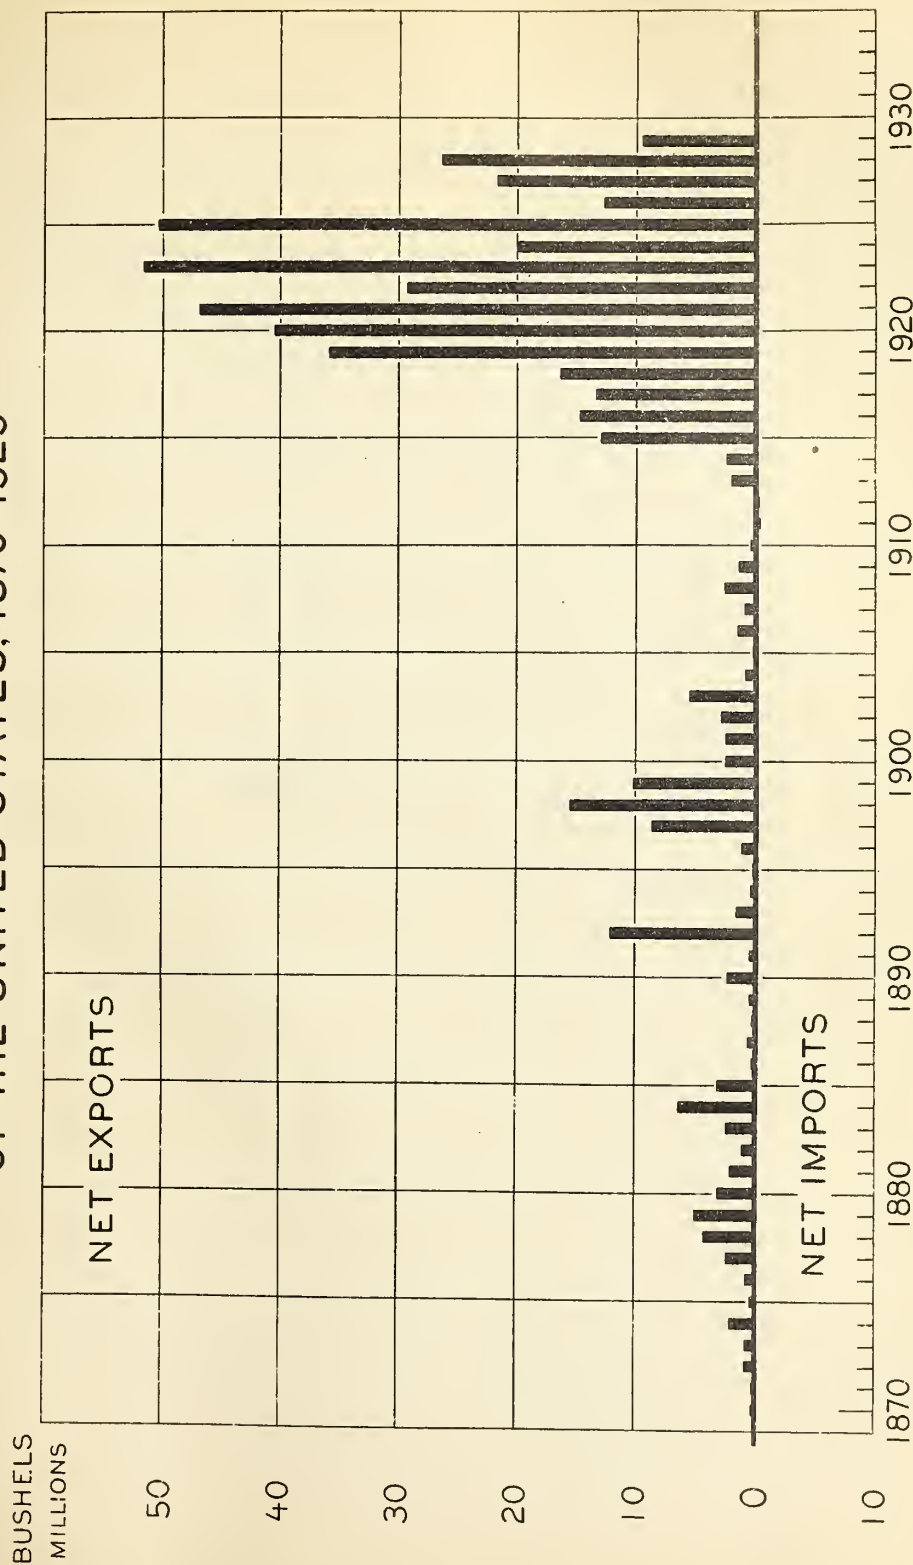

FIGURE 2. - PRIOR TO 1915 NET EXPORTS OF RYE INCLUDING RYE FLOUR WERE COMPARATIVELY UNIMPORTANT BUT GREW RAPIDLY DURING THE WORLD WAR AND THE YEARS IMMEDIATELY FOLLOWING. RECENT YEARS SHOW A DECLINE FROM THE RECORD FIGURES OF 1919-1925

Table 1. - WHEAT GRAIN: Foreign trade of the United States, 1790 - 1929 - Continued.

Division of Statistical and Historical Research.

Compiled from American State Papers 1790-1820; Commerce and Navigation of the United States 1821-1917; Foreign Commerce and Navigation of the United States 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-1926; January and June issues 1927-1929 and official records of the Bureau of Foreign and Domestic Commerce.

Domestic exports include reexports 1790-1802. Imports not reported prior to 1824. General imports 1824-1929. No reexports reported prior to 1837.

One bushel of wheat weighs 60 pounds.

- 1/ Value not reported.
- 2/ Combined with the value of wheat flour.
- 3/ Includes wheat imported for milling in bond and export. See table 2.
- 4/ Net imports.
- 5/ Imports from December 1, 1846-June 30, 1847, includes barley, rye and oats.
- 6/ Estimated. Imports as shown in the original returns were as follows: dutiable 188,212 bushels, valued at \$313,727; free valued at \$3,584,082; dutiable through New Orleans, Paso del Norte and Puget Sound 4,848 bushels, valued at \$7,221. Based on \$1.67 per bushel, the average import value of dutiable wheat, the quantity of free wheat is estimated as 2,146,157 bushels making a total of 2,339,217 bushels.

Table 2. - WHEAT FLOUR: Foreign trade of the United States, 1790 - 1929, Continued.

Division of Statistical and Historical Research.

Compiled from American State Papers 1790-1820; Commerce and Navigation of the United States 1821-1917; Foreign Commerce and Navigation of the United States 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-1926; January and June issues 1927-1929 and official records of the Bureau of Foreign and Domestic Commerce.

Domestic exports include reexports, 1790-1802. Imports not reported prior to 1824. General imports 1824-1929. No reexports reported prior to 1837.

- 1/ Includes flour milled in bond from imported wheat. See table 2.
- 2/ Value not reported.
- 3/ Includes the value of wheat. The figures are taken from Pitkin's Statistics of the United States, edition of 1835, pages 96 and 97.
- 4/ Estimated. Imports as given in the original returns were as follows: dutiable valued at \$1,158; free 585,247 barrels valued at \$3,008,175. Based on \$5.14, the average import value per barrel of free flour, the quantity of dutiable flour was estimated at 225 barrels making a total of 585,472 barrels.
- 5/ Estimated. Imports as given in the original returns were as follows: dutiable valued at \$1,222; free 912,896 barrels valued at \$3,055,690. Based on \$3.35, the average import value per barrel of free flour, the quantity of dutiable flour was estimated at 365 barrels, making a total of 913,261 barrels.
- 6/ Estimated. Imports as given in the original returns were as follows: dutiable valued at \$9,630; free valued at \$2,970,348 and dutiable through New Orleans and San Francisco 68,143 barrels valued at \$315,211. The average import value of dutiable and free flour was estimated at \$7.72 per barrel on the following basis, the average export value for 1865, \$10.41 and for 1864, \$7.19, gives a difference of \$3.22. The average import value for 1864, \$4.50 plus \$3.22 equals \$7.72. Based on \$7.72, the average estimated import value per barrel, the quantity of dutiable wheat was estimated as 1,247 barrels and free 384,760 barrels making a total of 454,150 barrels.
- 7/ Estimated. Imports as given in the original returns were as follows: dutiable 25,232 barrels valued at \$207,554; free valued at \$4,498,824; and dutiable through New Orleans, Paso del Norte and Puget Sound 2,308 barrels valued at \$23,997. Based on \$8.23, the average import value per barrel of dutiable flour, the quantity of free flour was estimated as 546,637 barrels making a total of 574,177 barrels.

Table 4. - WHEAT INCLUDING FLOUR IN TERMS OF GRAIN: Foreign
trade of the United States, 1790 -1929 - Continued.

Division of Statistical and Historical Research.

Compiled from American State Papers, 1790-1820; Commerce and Navigation of the United States 1821-1917; Foreign Commerce and Navigation of the United States 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-26; January and June issues 1927-29 and official records of the Bureau of Foreign and Domestic Commerce.

Wheat flour has been converted to terms of grain on the following basis:

1790-1879	- 1 barrel	- the product of 5 bushels of grain.
1880-1908	- 1 barrel	- " " " 4.75 " " "
1909-1917	- 1 barrel	- " " " 4.7 " " "
1918-1919	- 1 barrel	- " " " 4.5 " " "
1920-	- 1 barrel	- " " " 4.6 " " "
1921-1929	- 1 barrel	- " " " 4.7 " " "

- 1/ Includes flour milled from imported wheat. See table 2.
- 2/ Value not reported.
- 3/ From Pitkin's Statistics of the United States, edition of 1835, pages 96 and 97.
- 4/ Net imports.
- 5/ Imports of wheat from Dec. 1, 1846 - June 30, 1847 includes barley, rye and oats.
- 6/ Imports of flour estimated. Imports of flour as shown in the original returns were as follows: dutiable valued at \$1,158; free 585,247 barrels valued at \$3,008,175. Based on \$5.14, the average import value per barrel of free flour, the quantity of dutiable flour was estimated at 225 barrels making a total of 585,472 barrels.
- 7/ Imports of flour estimated. Imports of flour as shown in the original returns were as follows: dutiable valued at \$1,222; free 912,896 barrels valued at \$3,055,690. Based on \$3.35, the average import value per barrel of free flour, the quantity of dutiable flour was estimated at 365 barrels, making a total of 913,261 barrels.
- 8/ Imports of flour estimated. Imports of flour as shown in the original returns were as follows: dutiable valued at \$9,630; free valued at \$2,970,348 and dutiable through New Orleans, and San Francisco 68,143 barrels valued at \$315,211. The average import value of dutiable and free flour was estimated at 7.72 per barrel on the following basis, the average export value for 1865, \$10.41 and for 1864, \$7.19 gives a difference of \$3.22. The average import value for 1864, \$4.50 plus \$3.22 equals \$7.72. Based on \$7.72, the average estimated import value per barrel, the quantity of dutiable wheat was estimated at 1,247 barrels and free 384,760 barrels making a total of 454,150 barrels.

Cont.

Table 4. - WHEAT INCLUDING FLOUR IN TERMS OF GRAIN: Foreign
trade of the United States, 1790 - 1929 - Continued.

9/ Imports of wheat and flour estimated. Imports of wheat as shown in the original returns were as follows: dutiable 188,212 bushels, valued at \$313,727; free valued at \$3,584,082; dutiable through New Orleans, Paso del Norte and Puget Sound 4,848 bushels, valued at \$7,221. Based on \$1.67 per bushel, the average import value of dutiable wheat, the quantity of free wheat is estimated as 2,146,157 bushels making a total of 2,339,217 bushels.

Imports of flour as shown in the original returns were as follows: dutiable 25,232 barrels valued at \$207,554; free valued at \$4,498,824; and dutiable through New Orleans, Paso del Norte and Puget Sound 2,308 barrels valued at \$23,997. Based on \$8.23, the average import value per barrel of dutiable flour, the quantity of free flour was estimated as 546,637 barrels making a total of 574,177 barrels.

Table 5. - BREAD AND BISCUIT: Foreign trade of the
United States, 1790 - 1929 - Continued.

Division of Statistical and Historical Research.

Compiled from American State Papers 1790-1820; Commerce and Navigation of the United States 1821-1917; Foreign Commerce and Navigation of the United States 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-1926; January and June issues 1927-1929 and official records of the Bureau of Foreign and Domestic Commerce.

Domestic exports include reexports 1790-1802. For 1790-1854 the quantity is stated in "barrels" and "kegs" in the original returns; 1855-1861 in "barrels", "kegs and boxes" combined; 1862 in "barrels" and "kegs"; 1863 in "barrels", "kegs" and "boxes"; 1864-1865 in "boxes" and "kegs". No imports reported prior to 1869. General imports, 1869-1883 and 1912-1929, imports for consumption 1884-1911. No reexports reported in value prior to 1912 or in quantity prior to 1919.

Bread and biscuit. - When the quantity has been stated in kegs and boxes in the original returns, they have been converted to barrels on the basis of 3 kegs or 4 boxes to 1 barrel and $3\frac{1}{2}$ kegs and boxes combined to 1 barrel.

- 1/ Value not reported.
- 2/ Reported in value only.
- 3/ Biscuits, wafers, cakes, etc. Excludes "bread, yeast leavened" for which no quantity was reported.
- 4/ Includes "biscuit, wafers, cakes, etc." and "bread, yeast leavened".

Table 8. - BRAN, SHORTS, MIDDINGS, ETC.: Foreign trade of
the United States, 1790 - 1929 - Continued

Division of Statistical and Historical Research.

Compiled from American State Papers 1790-1820; Commerce and Navigation of the United States 1821-1917; Foreign Commerce and Navigation of the United States 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-1926; January and June issues 1927-1929 and official records of the Bureau of Foreign and Domestic Commerce.

Domestic exports include reexports, 1790-1802. No exports reported prior to 1892. Exports from 1792-1865 stated as "bran and shorts" in the original returns; 1869-1883 as "mill feed"; 1883-1912 as "bran, middlings and mill feed"; 1913-1927 as "bran and middlings". See separate table for "mill feeds". Exports not reported in quantity, 1869-1880 and 1882. No imports reported in value prior to 1869 or in quantity prior to 1914. Imports for consumption 1869-1922: general imports 1923-1929. For 1869 stated as "bran"; 1870-Oct. 3, 1913 as "bran and middlings"; Oct. 4, 1913 - Sept. 21, 1922 as "bran, wheat"; Sept. 22, 1922-1927 as "bran, shorts and other by-product feeds". No reexports reported.

One long ton equals 2240 pounds.

- 1/ Not reported in value.
- 2/ quantity not reported.
- 3/ Net imports.
- 4/ Does not include quantity imported from July 1-Oct. 3, 1913 which was reported in value only.
- 5/ Sept. 22, 1922-June 30, 1923.
- 6/ Not separately reported. Included with "other feed, mixed and prepared including screenings".

Division of Statistical and Historical Research.

Compiled from American State papers 1790-1820; Commerce and Navigation of the United States 1821-1917; Foreign Commerce and Navigation of the United States 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-1926; January and June issues 1927-1929 and official records of the Bureau of Foreign and Domestic Commerce.

Domestic exports include reexports, 1790-1802. Exports not separately reported but combined with the value of rye, oats and other small grain and pulse, 1821-1863. Imports not reported prior to 1843. General imports 1843-1909; imports for consumption 1910-1929. Reexports not reported prior to 1867.

1/ Value not reported.

2/ Combined with the value of rye, oats and other small grain and pulse.

3/ Net imports.

4/ Imports of rye as shown in the original returns are as follows: dutiable 576 bushels valued at \$1,059 and free valued at \$354,910. Based on the average import value of dutiable rye which equals \$1,839 per busnel, the quantity of free rye was estimated at 192,991 bushels making a total of 193,567 bushels.

Table 14. - RYE FLOUR: Foreign trade of the United States, 1790 - 1929 - Continued

Division of Statistical and Historical Research.

Compiled from American State Papers, 1790-1820; Commerce and Navigation of the United States, 1821-1917; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June issues 1919-1926; January and June issues, 1927-1929 and official records of the Bureau of Foreign and Domestic Commerce.

Domestic exports include reexports, 1790-1802. Imports not reported prior to 1850. General imports 1850-1871; imports for consumption, 1872-1929. In the original returns imports of rye flour were reported in hundred-weight (112 lbs.) from 1850-1887 and in pounds from 1888-1929. Converted to barrels on the basis that 1 barrel = 196 pounds. Reexports not reported except for 1866-1870. Net exports same as domestic exports 1790-1850. One bushel of rye flour equals 50 pounds, 1 barrel equals 196 pounds; 1 cwt. equals 112 pounds.

- 1/ Value not reported.
- 2/ Imports of rye flour as shown in the original returns are as follows: imports of dutiable flour 101 barrels valued at \$419 and free valued at \$55. Based on the average import value of dutiable rye flour which equals \$4.149 per barrel, the quantity of free rye flour was estimated at 13 barrels making a total of 114 barrels.
- 3/ Includes reexports amounting to 309 cwt. valued at \$937.
- 4/ Includes reexports amounting to 3,341 cwt. valued at \$12,826.
- 5/ Includes reexports amounting to 200 cwt. valued at \$1,683.
- 6/ Includes reexports amounting to 50 barrels, valued at \$200.
- 7/ Includes reexports amounting to 50 barrels, valued at \$325.
- 8/ Less than $\frac{1}{2}$ barrel.

Table 15. - Rye including flour in Terms of Grain: Foreign trade of the United States, 1790-1929 , Continued.

Division of Statistical and Historical Research. Compiled from American State Papers, 1790 - 1820: Commerce and Navigation of the United States, 1821-1917: Foreign Commerce and Navigation of the United States 1918; Monthly Summary of Foreign Commerce of the United States, June issues. 1919-1926, January and June issues 1927-1929 and official records of the Bureau of Foreign and Domestic Commerce.

Domestic exports include reexports, 1790-1802.

Domestic exports of rye not reported 1821-1863.

Imports of rye not reported prior to 1843 and rye flour prior to 1850. Rye, general imports 1843-1909 and imports for consumption 1910-1929. Rye flour, general imports 1850-1871 and imports for consumption, 1872-1929. In the original returns imports of rye flour were reported in cwt. (112 lbs.) from 1850-1887 and in pounds from 1888-1929. Converted to barrels on the basis that 1 barrel weighs 196 lbs.

Re-exports of rye not reported prior to 1867. No re-exports of rye flour, except for 1866-1870.

Net exports same as domestic exports, 1790-1842.

One bushel of rye flour equals 50 pounds. 1 bushel of rye equals 56 pounds. 1 barrel of rye flour is the product of 6 bushels of rye.

- 1/ Value of rye combined with the value of "Rye, oats and other small grain and pulse".
- 2/ Net imports.
- 3/ Imports of rye as shown in the original returns are as follows: Dutiable amounted to 576 bushels valued at \$1,059 and free valued at \$354,910. Based on the average import value of dutiable rye which equals \$1.839 per bushel, the quantity of rye imported free of duty was estimated as 192,991 bushels making a total of 193,567 bushels.
Imports of rye flour as shown in the original returns are as follows; Dutiable amounted to 101 barrels valued at \$419 and free valued at \$55. Based on the average import value of dutiable rye flour which equals \$4.149 per barrel, the quantity of rye flour imported free of duty was estimated as 13 barrels making a total of 114 barrels.
