# EDITORS' REPORT FOR 1990-91

This is the third and final report of the Washington State University editorship. We began receiving manuscripts in July 1988. During the period July 1988-September 1991, we received 253 new manuscripts. Of these, 80 have been published or accepted for publication. Thirty-one manuscripts are either in the active revise and resubmit category or are currently under review. Six manuscripts were withdrawn. This gives an acceptance rate of 37% on new manuscripts completing the review process over the past three years. This is similar to the 39% rate recorded over 1985-88. The *WJAE* has continued to grow during the past three years. The 253 new manuscripts received during our editorship compares to 244 received during the preceding three years for a net increase of 4%.

The *WJAE* remains a popular publication outlet for applied economists outside the western region of the United States and Canada. During the past three years, 39.4% of the new submissions have come from locations in Canada and the United States east of the Manitoba-to-Texas boundary of the WAEA. Another 4% have come from countries other than Canada and the U.S. Of the total submissions, 10.8% have come from Canada.

Some 71% of first-round reviews on manuscripts over the past three years have been completed within three months and 95% within four months.

Several innovations and policy changes occurred during the past three years. The Association passed a new policy requiring documentation of estimation procedures and potential disclosure of data used in *WJAE* articles effective January 1988. On the whole, the data and estimation disclosure requirement has worked well. All but three authors submitting articles during the past three years have consented to it. Of those three submissions, two were withdrawn and one was eventually accepted as the result of a compromise that permitted a third party to provide aggregated statistical results from the utilized confidential government data set. These aggregated results were considered an adequate substitute for the raw data which legally could

not be made available. It is possible, of course, that some authors have not submitted articles to the *WJAE* because of the data disclosure requirement. Any such effect, however, has not precluded the *Journal* from receiving an increasing number of submissions. In 1989, the data and estimation policy was revised to require authors to make data available at cost upon request for "five years" instead of "a reasonable period of time."

With the initiation of the WAEA Annual Meeting *Proceedings* in 1989, the *WJAE* began considering for publication only those annual meeting invited papers which were submitted by the authors through regular channels. This policy treated invited papers the same as selected papers and is consistent with the *Journal's* policy of publishing only reviewed articles. For the WAEA invited papers sessions for 1989 and 1990, 11 invited papers were submitted for review, four were published or accepted for publication, and two are in the active revise and resubmit category. This gives an acceptance rate of 44% to date for those invited papers which have completed the review process under this policy. In July 1991 the Association modified this policy slightly. Invited papers must still be submitted and undergo review, but reviewers are to be informed of the objective which the invited paper presenter was asked to pursue in the paper.

Beginning with our editorship, the previously separated positions of Associate Editor and Technical Editor were integrated into a single position. Diane Marsh has provided exemplary service in meeting the multifaceted requirements of this new position. Much of the smooth running of the *Journal* during the past three years can be credited to Diane's professionalism and dedication.

Beginning with the July 1989 issue, all *WJAE* authors have been asked to sign a copyright release agreement modeled after the *AJAE* form. This form replaced the implicit release of copyright formerly assumed. The formal copyright release policy has worked smoothly with all authors routinely signing the release upon request. Also in July 1989 the *Journal* initiated a new editorial statement formally

encouraging submission of comments on *WJAE* articles. Three comments have been submitted since the initiation of the policy.

We appreciate the consistent professional services of Allen Press in Lawrence, Kansas, which has served as our publisher during the past three years. Maurice Baker, Secretary-Treasurer of the Association, has capably handled the financial side of the *Journal's* operations and maintained the *Journal's* mailing list. We express our gratitude to the Washington State University College of Agriculture and Home Economics and to the Department of Agricultural Economics which underwrote one-half of the direct costs of the editorial office during the past three years. We express our special appreciation for the services of the *Journal* referees and the Editorial Council. Without the willing voluntary services of ref-

erees, our professional journals could not exist. The names of those individuals who served as referees during 1990-91 are listed following this report. *WJAE* Editorial Council members who have provided policy advice over the past three years are listed on the inside front cover of this issue.

Finally, we extend our best wishes for success to the incoming editors of the *Journal*, Myles J. Watts of Montana State University and Jeffrey T. LaFrance of the University of Arizona. We have found the past three years of this editorship both professionally rewarding and personally gratifying. We believe that the new editors will find it so as well. We are confident that authors, reviewers, and other members of the profession will extend to them the same courtesies, professional expertise, and general support which have been offered to us.

# WJAE Key Words Index

## Volumes 1-16, 1977-1991

NOTE: This is the first key words index published for the *WJAE*. Authors have been assigning key words to *WJAE* articles since 1986 (volume 11, number 1). Author-assigned key words were used as the basis for this index for the 1986-1991 volumes. Some modifications were made to condense the total number of key words and to merge categories which were very similar. We assigned key words to articles published in volumes 1-10, 1977-1985.

Whether assigned by authors or by editors, key words are necessarily somewhat arbitrary and noncomprehensive. It is hoped, nonetheless, that this key words index will make access to the 15 years accumulated store of *WJAE* articles both more convenient and more frequent.

Douglas L. Young, Co-Editor  
 Diane M. Marsh, Associate Editor  
 December 1991

Key Word(s)	Year/Volume No.: Page Nos.; Authors; Short Title	Key Word(s)	Year/Volume No.: Page Nos.; Authors; Short Title

## Guidelines for Submitting Manuscripts

To aid in reviewing manuscripts and for efficient publication of the *Journal*, contributors are requested to use the following guidelines in preparing manuscripts for submission to the *WJAE*.

1. *Cover letter.* In a cover letter accompanying the manuscript, the author must indicate (a) why the manuscript would interest *WJAE* readers; (b) whether the material in the manuscript (or modification thereof) has been published, is being published, or has been submitted for publication elsewhere; (c) that the material in the manuscript, to the best of the author's knowledge, does not infringe upon other published material protected by copyright; and (d) that the author has read and agrees to the policy outlined in the next paragraph.
2. *Data access and estimation procedures.* Authors should report, describe, and/or reference the complete estimation process undertaken to derive the results presented in the manuscript. This should include data documentation as well as model specifications estimated but not reported in the manuscript. Authors are expected to make data used available at cost upon request for five years.
3. *Typing.* Manuscripts should be typed on good quality 8½-by-11-inch paper, with margins of at least one inch on all sides. Double space all material throughout the paper, including the abstract, acknowledgments, footnotes, references, and tables. Type only on one side of the paper. **Do not submit ditto or thermofax reproductions.**
4. *Style.* Use a consistent style throughout the document. The *WJAE* currently accepts the style format in *The Chicago Manual of Style* by the University of Chicago Press as the standard for the *Journal*.
5. *Title page.* Provide a separate title page that includes the title of the manuscript and author name(s) and title(s), placing institutional affiliation(s) and acknowledgments of colleague reviews and institutional support as an unnumbered footnote at the bottom of the page. Place the manuscript title at the top of the first page of the text. **Do not place the name(s) of the author(s) on the first page of the text.**
6. *Abstract.* On a separate page, include an abstract not to exceed 100 words followed by no more than eight key words, listed in alphabetical order.
7. *Footnotes.* Number footnotes consecutively through the manuscript. Type the content of the footnotes on separate pages placed immediately after the main text.
8. *Tables.* Prepare tables in the form desired and place each table on a separate page at the end of the text, immediately following the last footnote page. Begin each table's title at the left margin above the table's body using the following format:  
Table 1. Regression Results  
Table titles and headings should have the first letter of all words capitalized except conjunctions, prepositions, and articles. Review of tables for accuracy is the author's responsibility.
9. *References.* Citations may appear parenthetically or as part of the text. Use parentheses instead of brackets within the text to identify references. Identify citations by reference to the author's last name. Do not specify the year of the reference unless there is more than one reference with the same author. List all references cited in the text in alphabetical order of the author's last name on separate pages after the text, immediately following the last table page. Do not number references.
10. *Figures.* Submit final drafts of camera-ready copies of figures, charts, and graphs drawn in a professional manner. Immediately following the last reference page, place each figure on a separate sheet of heavy white paper or acetate sheet using black india ink for photographic reproduction, or submit a black-and-white glossy photograph. Typescript is not acceptable. Begin the figure's title at the left margin below the figure using the following format:  
Figure 1. A Supply Curve  
Review of figures for accuracy is the author's responsibility.
11. *Mathematical formulation.* Use Arabic numbers enclosed in parentheses and placed flush left on the first line of the equation for displayed equations. Number equations consecutively throughout the manuscript. Indent the equation proper after the equation number. Punctuate all mathematical material. To eliminate confusion between symbols, use proper and distinctive fonts in the manuscript and make notes in the left-hand margin spelling out the Greek name of symbols that may be difficult to interpret. Include a list of symbols used in the manuscript on a separate sheet of paper.
12. *Publication costs.* Publication costs for the *WJAE* are largely financed by page charges levied on authors of manuscripts accepted for publication. Hence, authors submitting manuscripts are expected to assume obligation for payment of page charges at the time their manuscripts are published. Page charges currently are \$70 per printed page. Additional information on page charge policies can be obtained from the editors.
13. *Four copies.* Send four good quality copies to the editors at the following address:

Professors Myles J. Watts and Jeffrey T. LaFrance, Co-Editors  
*Western Journal of Agricultural Economics*  
Department of Agricultural Economics and Economics  
Montana State University  
Bozeman MT 59717-0292

Receipt of manuscripts will be acknowledged by return mail. For additional details regarding editorial procedures and policies and the proper preparation of manuscripts for the *Journal*, please refer to the "Guidelines for *Western Journal of Agricultural Economics* Authors" in the December 1991 issue of the *Journal*.

### Membership and Journal Subscription

WAEA calendar-year membership dues are: \$20 for regular members in the U.S., Canada, and Mexico; \$10 for senior (retired) and junior (student) members in the U.S., Canada, and Mexico; \$24 for regular members overseas; \$14 for senior (retired) and junior (student) members overseas. Lifetime membership is available for those who are at least 55 years of age. All members receive this *Journal*.

Library and other institutional subscription prices are: \$40 in the U.S., Canada, and Mexico; \$44 in all other countries.

Applications for membership, payments of dues, subscription charges, changes in address, and other inquiries should be addressed to Maurice Baker, Secretary-Treasurer, WAEA, Department of Agricultural Economics, University of Nebraska, Lincoln, NE 68583-0922.
