THE CARTAGENA PROTOCOL ON BIOSAFETY OBLIGATIONS AND IMPLEMENTATION

Xueman Wang Secretariat of the Convention on Biological Diversity

The Cartagena Protocol on Biosafety Obligations and Implementation

Xueman Wang

Secretariat of the Convention on Biological Diversity

 Negotiation of the Biosafety Protocol (from 1996 to 2000)

• Adoption: 29 January 2000

• Entry into force: 11 September 2003

• 113 Parties (as of 20 Feb.05)

Biosafety Protocol

The Protocol – a multilateral binding instrument specifically dealing with LMOs

A balanced approach toward Biotech

Embrace Benefits Ensure adequate safety

Reconcile trade and development interests in biotech

• Objective:

Protection of biodiversity and human health

• Focus:

Transboundary movements of LMOs (trade)

The Protocol Architecture

Objective

Precautionary Approach

• AIA Procedure

Procedure for FFP Risk Assessment

Risk Managemen Handling transport packaging Identification

documentation for shipment

SUPPORTING MECHANISMS

BCH, Capacity Building, Compliance, Liability

Decision-making on LMO import

Import Decision

Risk Assessment

Precaution

Socio-Economic Considerations

3

Risk Assessment

- Risk assessment basis for decision-making
 Obligations for risk assessment prior to decisions on import
- How to conduct
 - In a scientifically sound manner
- Who to conduct
 - Party of Import, (cost may be undertaken by exporters)
 - or Party of export

Precautionary Approach

Lack of scientific certainty due to insufficient relevant scientific information and knowledge regarding the extent of the potential adverse affects of a LMO on the conservation and sustainable use of biological diversity in the Party of import, taking also into account risks to human health, shall not prevent that Party from taking a decision, as appropriate, with regard to the import of the LMO in question in order to avoid or minimize such potential adverse effects.

Socio-Economic considerations

- To take into account socioeconomic considerations arising from the impact of LMOs on the conservation and sustainable use of biodiversity, especially with regard to the value of biodiversity to indigenous and local community
- To be consistent with Parties' international obligations

The Protocol:

- Ensure importing Parties to make informed decisions
- Provide a science-based approach for decision making
- Allow importing Parties to exercise precautionary approach and take into account "socio-economic considerations"

Consistent with Parties' other international obligations

Identification Scheme

Documents accompanying shipment of LMOs

- Identification of agricultural LMO commodities
 - "May contain"
 - Use commercial invoice/existing system (interim arrangement)

Working Group to examine:

- Format and information of documentation
- Thresholds for adventitious LMOs
- Detection techniques

Relationship between Protocol and WTO

- Mutual supportiveness
- Not to imply a change in the rights and obligations of a Party under any existing international agreements
- Not to intend to subordinate the Protocol to other international agreements

Mutually Supportive to Achieve Sustainable Development

Protocol's Supporting Mechanisms

- Information exchange Biosafety Clearing-House
- Capacity Building
- Compliance Committee (15 persons acting in an individual capacity)
- Liability and redress for damage resulting from transboundary movements of LMOs

Significance of the Protocol

- Establish a global regulatory framework on LMOs
- Institutionalize information sharing
- Ensure a transparent and informed decision- making
- Provide capacity building to developing countries

National Implementation (1)

Challenges:

- Translate Protocol's requirements into domestic measures
- Take a balanced approach toward development, biosafety and trade

Food Security

Trade

Domestic Biosafety Regulations/Measures

Biotech Development

Ethics Politics

National Implementation (2)

UNEP-GEF project to develop national biosafety frameworks to implement Protocol

- Participation:
 - More than 120 developing countries
- Funding:
 - More than US\$ 56 million

National Biosafety Framework

Main components:

- Policy on Biosafety
- A regulatory regime for Biosafety
- A system to handle notifications or request for authorizations
- Enforcement and monitoring for environmental effects
- Public information and participation
