A Brief History of Farmers Home Administration

UNITED STATES DEPARTMENT OF AGRICULTURE FARMERS HOME ADMINISTRATION

While continuing to serve rural America as the lender of opportunity during 1987, the Farmers Home Administration (FmHA) made a significant contribution toward reducing the Federal deficit, a major goal of this Administration. FmHA completed two loan sales to the private sector, resulting in a net gain to the Treasury of nearly \$3 billion. Loans sold were from the rural housing and community facilities portfolios, and were the first successful sales of Government assets under a pilot program initiated by Congress in 1986.

In its primary role of providing financial assistance to American farmers, FmHA made or guaranteed during 1987, over 51,000 loans totaling \$3 billion to farmers who could not otherwise obtain credit from commercial lenders. Demonstrating that "servicing" loans means helping borrowers, special servicing was extended in almost 80,000 instances, reaching nearly one of every three FmHA farm borrowers. This included 32,000 loans rescheduled or reamortized, 1,250 loans deferred, 29,500 loans subordinated to other lenders, and 17,000 loans refinanced at limited resource interest rates. Without this "last resort" assistance, few, if any, of those farmers could have continued in operation. Instead, more than 98 percent were able to stay in business in 1987.

FmHA's guaranteed farm loans made by other agriculture lenders totaled over \$1.6 billion, the highest amount guaranteed in the Agency's history. This follows the direction charted by the Administration and endorsed by Congress in the Food Security Act of 1985.

Also, during the year, the Agency made over 41,000 Single-Family Housing loans to low-income rural families for \$1.4 billion and more than 700 loans totaling \$555 million for rural rental housing. The Agency also made 1,215 loans and grants for \$544 million for water and sewer and other essential community facilities. As an important component of this Administration's rural development initiative, FmHA guaranteed 67 Business and Industry loans for \$95.7 million which created or saved more than 6,000 off-farm jobs in rural areas.

Farmers Home recently completed a nationwide automation project, linking all FmHA State, District, and County offices, as well as the National Office and the Finance Office in St. Louis, into a cohesive communications network. This will help us to serve our borrowers faster and more efficiently, and even more importantly, assist borrowers in making better financial farm management decisions.

At Farmers Home, we are committed to working with Congress to meet the growing needs of farmers and all rural Americans and do so in a prudent, and compassionate manner. I believe we have met this goal in 1987 and we will strive to do even better in 1988.

VANCE L. CLARK Administrator

Revised February 1988

The Agricultural Credit Act of 1987 [P.L. 100-233], signed into law by President Reagan on January 6, 1988, will have far-reaching impact on Farmers Home Administration programs. Regulations to implement the new law are scheduled to be published by June 1988. Changes required by the law will become effective during 1988 and will be covered in the next revision of the Brief History.

Farmers Home Administration (FmHA) is the credit agency for agriculture and rural development in the U.S. Department of Agriculture (USDA). In 1987, the agency marked its 52nd anniversary of providing financial and technical assistance in rural America. This service has been performed under the successive names of Resettlement Administration, Farm Security Administration, and Farmers Home Administration.

When it began in 1935, the agency's original function was to make loans and grants to Depressionstricken families and help them regain self-sufficiency in making their living on family farms. Throughout more than half-a-century of operation. FmHA has been concerned primarily with credit and counseling services that have supplemented resources of the private sector for building stronger family farms. In 1987, farm credit still accounted for almost one-half of all resources administered by FmHA.

During the last two decades, Congress created additional nonfarm programs to benefit families and communities in rural areas. These programs have helped to provide safe, modest housing; modern, sanitary water and sewer systems; essential community facilities; and job and economy-boosting business and industry in rural areas. These are reflected in the current mission statement which directs FmHA to "serve as a temporary source of supervised credit and technical support for rural Americans for improving their farming enterprises, housing conditions, community facilities, and other business endeavors until they are able to qualify for private sector resources."

FmHA has been a leading force in spreading the outreach of nongovernmental lending institutions into rural sectors that lacked access to such financial resources. In 1987 the agency completed a nationwide automation project which makes available the efficiency and convenience of computerized farm management and financial planning to all borrowers and applicants.

Over the years, FmHA has developed a credit system that reaches the county level. The agency has approximately 11,000 permanent full-time employees who serve rural America from 46 State offices, 267 district offices, and 1,934 county offices plus the National office in Washington, D.C. Service is provided in every rural county or parish in the 50 States, plus the Pacific Trust Territory, American Samoa, Guam, Puerto Rico, and the Virgin Islands. FmHA's network of offices enables it to maintain a close, one-on-one relationship with its borrowers.

Digitized by Google

FmHA's existing system of personal contact across the country has established it as a lead agency for rural development. Congress and the Administration continually recognize FmHA's long experience in serving rural communities and farm families and have over the years expanded old services and created new ones.

FmHA loans and grants supplement the amount of credit and capital directly available from commercial lenders in rural areas. In most programs, the agency makes loans to qualified applicants who can find no other sources of financing available on terms or conditions they can meet.

The money loaned by FmHA comes from collections on previous loans, or from private investors through sale of Government securities. In guaranteed loan making, funds are supplied directly to borrowers by commercial lenders, with FmHA minimizing the lender's risk.

Grants for rural water and waste disposal systems, farm labor housing, home repair for low-income elderly people, and "self-help" homebuilding by low-income families supplement the agency's rural lending program.

EARLY CREDIT HISTORY

On July 17, 1916, President Woodrow Wilson signed the Federal Farm Loan Act and marked the beginning of Federal involvement with agricultural credit. The Act created the Federal land banks and the joint stock land banks which were designed to provide farmers with a dependable source of longterm credit at low interest.

Emergency crop and seed loans were provided by Congress through the Secretary of Agriculture from 1918 through 1931. These "feed, seed, and fertilizer" loans were made to assist farmers in designated areas that had suffered unusual hardships, such as droughts and floods, and who could not obtain credit elsewhere. In 1931, these loans were available on a nationwide basis. They usually were limited to \$400, with the average loan being \$125.

The Reconstruction Finance <u>Corporation (RFC)</u> was established January 22, 1932, and began operation on February 2, 1932. It was charged with meeting emergency credit situations throughout the economy, helping maintain economic stability, and assisting in promoting maximum employment and production. It provided the funds to organize <u>12 Regional Agricultural</u> <u>Credit Corporations (RACC's)</u> through which operating loans were available to farmers, particularly ranchers, with no other sources of credit.

In the fall of 1932, when Franklin D. Roosevelt was elected President, the need for rural credit was one of the country's major problems. As in the rest of the country, rural banks were closing, farm prices were at an all-time low, unemployed city dwellers were going "back home" to the farms, and sources of credit had evaporated. Angry and threatening mobs of farmers at frequent tax and foreclosure sales were common occurrences.

When Roosevelt was inaugurated on March 4, 1933, he began to implement the Federal Government's attempts to provide agricultural assistance. On March 27, 1933, he issued an Executive Order to be effective May 27, establishing and consolidating within the Farm Credit System, all the functions, powers, and funds of existing Federal agricultural credit agencies.

These included the Federal land banks, Federal land bank associations, the joint stock land banks, the Federal intermediate credit banks, the 12 RACCs from the Reconstruction Finance Corporation, and the crop and seed loans from USDA. The Governor of the Farm Credit Administration could authorize larger loans under the Emergency Crop and Feed Loan program (as it was known in March 1933) to farmers in distressed areas as determined by the Secretary of Agriculture. The Farm Credit System also would include funds for the Secretary of Agriculture to invest in agricultural credit corporations and livestock loan companies, which Congress hoped farmers would use to support organizations that could discount notes with the Federal intermediate credit banks.

By May 12, 1933, Roosevelt had signed the Farm Credit Act of 1933, rounding out the permanent group of banks and associations that make up much of the same cooperative Farm Credit System of today. This act established the production credit corporations, one in each of the 12 Federal land bank districts, to organize, finance and supervise the authorized local production credit associations (PCA's). The Act also established 12 district banks for cooperatives, plus the Central Bank for Cooperatives in Washington, D.C.

On May 12, 1933, Roosevelt also signed the <u>Federal Emergency</u> <u>Relief Act</u>, which is considered the "unofficial" origin of FmHA because of its roots in the rural rehabilitation efforts authorized by the Act.

As a result of the Farm Credit Act, the PCA's assumed the functions of the 12 RACC's in 1933, and by the end of 1934, about 30 percent of their loans had been taken over. The RACC's continued for a time to finance some special loans the PCA's could not handle, and in 1943, loans were made for production of food and fibers needed for World War II.

The Rural Rehabilitation Division, functioning under the Federal Emergency Relief Administration was organized in April of 1934 by authority of the Federal Emergency Relief Act of 1933. However, the rural rehabilitation agency had no basic laws to govern its actions. It was headed by Rexford Tugwell, remembered for his unusual projects such as several low-rent "greentowns" on the far outskirts of a few cities, and government loan programs for smaller farmers -programs that typically involved getting the borrowers to agree to operate their farms under new farming plans drawn up by the county rural rehabilitation representative.

Rural rehabilitation corporations were established in about 40 States to make loans to destitute farm families to enable them to remain on the land, continue their farming operations, and reduce the number of people on the relief rolls.

This approach to farm lending was quite different from that of the Farm Credit System's "business" type loans that were dependent for their financing largely on the sale of their securities to investors without any government guarantee.

In those early days, the differences in philosophies of the two agricultural lending organizations were pronounced. At one point in the early 1930's it was suggested that the Rural Rehabilitation Division should be incorporated into the Farm Credit System. In the early 1940's there were suggestions that all or part of the Farm Credit System might be

Digitized by Google

-3-

taken over by the successor to the rural rehabilitation agency, the Farm Security Administration. In 1947, a bill was introduced in Congress which would have combined the Farm Security Administration and Farm Credit System into a new agricultural credit agency. This proposal died in the Senate. Eventually Congress enacted a law to govern the Farm Security Administration which placed some limits on its activities.

After the establishment of the Farmers Home Administration in 1946, much of the talk of merger and takeovers subsided, along with criticism from Congress and farm groups.

RESETTLEMENT ADMINISTRATION

The "official" lineage of FmHA goes back to April 30, 1935, when President Franklin D. Roosevelt signed Executive Order 7027, creating the Resettlement Administration as an independent agency. On June 19, 1935, the Administrator of the Federal Emergency Relief Administration ordered the depression-era programs and functions of the Rural Rehabilitation Division to be transferred to the new agency. On January 1, 1937, all powers and duties vested in the Resettlement Administration were formally assigned to the Secretary of Agriculture.

During its 2-year existence, the Resettlement Administration offered various approaches to solving the problems of poor people and poor land, the most popular of which was the supervised loan program. These loans were part of a Governmentwide effort to help needy rural people reestablish themselves on a self-supporting basis. The Resettlement Administration made more than 300,000 short-term loans, often supplemented by grants to low-income farm families. Each loan was based on a farm and home management plan worked out by county, farm, and home supervisors in cooperation with the borrowing family. The plans were designed to ensure the use of good farming practices and to fit the needs of the families taking part in the program.

By 1937, there was a growing conviction in USDA and in Congress that supervised credit as pioneered by the Resettlement Administration was the answer to a worsening national problem of hardship and failures among tenant farmers. The scope of loan assistance was broadened on July 22, 1937, with the passage of the Bankhead-Jones Farm Tenant Act which authorized tenant farmers to obtain loans to purchase farms of the their own. In 1937, 40 percent of U.S. farms were operated by tenants and sharecroppers who, because of their uncertain farming tenure, rarely made improvements in land or buildings, nor did their landlords.

The Resettlement Administration was given the responsibility for the new program of supervised farm ownership loans with 40-year terms for farmers who lacked other sources of credit for buying their own land and for farm and home improvement. County committees were set up to select borrowers and approve loans. The tenant purchase loans never reached a high level in the volume of dollars involved or families aided. The program, however, attracted a great deal of attention as it represented the realization of the American dream of people with almost no resources being able to become landowners.

Also enacted in 1937 was the <u>Water Facilities Act</u> to provide loans for individuals and association farm water systems in 17 Western States where drought and water shortage were familiar hardships. The Resettlement Administration shared servicing responsibilities of the program with the Soil Conservation Service and the Bureau of Agricultural Economics. This act was the forerunner of the rural water programs now administered by FmHA.

FARM SECURITY ADMINISTRATION

On September 1, 1937, the Farm Security Administration (FSA) was created as successor to the Resettlement Administration. All functions, funds, personnel, and properties were transferred to the new agency. Its primary responsibilities were to make farm rehabilitation and farm ownership loans to farmers unable to borrow from usual sources of credit.

For the ensuing 9 years, FSA carried on supervised credit programs with farm and home counseling by county office staff, including home economists. The success of a large percentage of these borrowers helped strengthen family farm agriculture and helped the Nation meet its awesome foodproducing challenges in World War II. By 1941, FSA had made more than 13,000 loans to tenant families for the purchase of farms.

FSA also carried on Resettlement-oriented projects to establish new farms and communities, services in group medical care, agricultural cooperatives, migratory labor camps, and other social and economic programs.

In 1942, FSA was given full responsibility for the water facilities program in the 17 Western States.

FARMERS HOME ADMINISTRATION

By 1946, it was generally conceded both in and out of Congress and within the agency itself that a restructuring of FSA was necessary. Some old Resettlement programs were no longer justified, others could be improved, and new programs would be needed in the period following World War II.

Accordingly, on August 14, 1946, Congress passed the Farmers Home Administration Act. This measure, which took effect in 1947, reconstituted FSA under the new name Farmers Home Administration.

The Farmers Home Administration consolidated programs of FSA and the Emergency Crop and Feed Loan program of the Farm Credit Administration.

The Farmers Home Administration Act also gave the agency new authority to insure loans made by banks, other agencies, and private individuals, as well as to make direct Government loans. The act brought an end to Rural Rehabilitation loans as federally administered programs. Over 3 million loans, totaling over \$1 billion, had been made since 1935 by the Resettlement and Farm Security Administrations.

In its first 3 years, the Farmers Home Administration confined its operations to development of supervised farm ownership and farm operating loan programs, and to water facilities projects in the 17 Western States.

The agency was commonly known as "FHA" until April of 1974 when USDA formally adopted "FmHA" as the agency's abbreviation. This was done to easily distinguish Farmers Home Administration from other agencies having the same initials, such as the Federal Housing Administration and Federal Highway Administration.

EXPANSION OF FmHA SERVICES

The first of many additions to FmHA's portfolio of services, all made available to rural people through the well-established system of FmHA county offices, came in 1949.

On April 19, 1949, the Regional Agricultural Credit Corporations were transferred to FmHA after lending a total of \$662 million. The 12 RACC's and their 21 branches were gradually consolidated into one Regional Agricultural Credit Corporation in Washington whose purpose was to handle other specialized lending programs.

The following are highlights of Congressional acts from 1949 through 1987 that have molded FmHA's wide variety of services.

<u>Title V of the Federal Housing</u> <u>Act of 1949</u> gave FmHA authority to make housing loans to farmers as a part of the national housing program. The major housing programs under this legislation are Section 502, single family housing; Section 504, single family housing repair and rehabilitation; and Section 515, rural rental housing.

The Disaster Loan Act of 1949 originated special emergency farm loans for recovery from losses inflicted by natural disaster.

The Water Facilities Act was amended in 1954 to apply nationwide, rather than limited to the 17 Western States, and to let farm area water systems take on nonfarm customers in rural communities.

Rural development was given Federal program status by USDA administrative action in 1955. FmHA's first involvement was a pilot program of loans to small farmers who could not qualify for regular FmHA loans.

In 1959, FmHA began to make loans to local organizations to cover the local share of the cost of small watershed projects under Public Law 566.

Major overhauling and expansion of FmHA authorities came with passage of the <u>Consolidated Farmers</u> <u>Home Administration Act of 1961.</u> (In 1972, this title was changed to the <u>Consolidated Farm and Rural</u> <u>Development Act</u>, often referred to as the "con act.") Its principal provisions were the following:

- Raised limits on farmer loans to \$60,000 for farm ownership, replacing a formula whereby each county's limit had been the average value of its family farms and from \$20,000 to \$35,000 for farm operating purposes.
- * Opened up the water system program to the general rural population, including incorporated towns of up to 2,500. The loan limit on a project (previously \$250,000) was raised to \$500,000 for a direct FmHA loan and to \$1 million for an insured loan.

Also in 1961, the <u>Federal</u> <u>Housing Act</u> was amended to make nonfarm rural residents eligible for FmHA's direct housing loans. This new jurisdiction in rural housing extended to towns of up to 2,500 population. Still more expansion of FmHA services came in 1962. The <u>Senior</u> <u>Citizens Housing Act</u> set up loans for low-rent apartment projects designed to meet the needs of people age 62 and over. This type housing was acutely lacking in rural communities.

Amendments to the Farmers Home Administration Act authorized loans for a shift in land use to outdoor recreational facilities built primarily to benefit rural people. The agency began to make loans to family farmers to set up farm-based recreation and other nonagricultural enterprises that would add to family income, and for association grazing ranges where family farmers and ranchers share the use of more grazing land for livestock production.

A pilot program for rural renewal, delegated to FmHA, launched experiments in several States to develop better community facilities, improve homesites and housing, and attract new industry to underdeveloped rural areas. Rural renewal was discontinued as an experimental program in 1969.

FmHA also was authorized in 1962 to make loans covering local project costs in areas designated for benefits of a resource, conservation, and development program which, like the small watershed program, is supervised by USDA's Soil Conservation Service.

The Economic Opportunity Act of 1964 established loans to low-income rural people for small farm improvements or nonfarm enterprises that would add to family income. FmHA performed the lending through its county offices with funds provided by the Office of Economic Opportunity until 1971. The agency made nearly 65,000 loans totaling \$109.3 million to individuals and 1,476 loans totaling \$21 million to cooperatives.

EXPANSION OF PROGRAMS TO PRESENT LEVELS

The expansion of old programs and enactment of new ones during the first 4 years of the 1960's raised FmHA's total loan and grant volume from the \$300 million level of fiscal year 1960 to \$750 million in fiscal year 1965.

In 1965, the water facilities loan program was transformed into a loan-and-grant program for both water and waste disposal systems. At the same time, rural towns up to 5,500 were made eligible to be included in FmHA-financed projects, and the limit on FmHA financing of a project was raised to \$4 million.

Rural housing was changed from a program of direct loans to one primarily of insured loans, and the population limit on towns served through FmHA was raised from 2,500 to 5,500. This opened the way for the greatly increased housing services for rural people.

In 1966, senior citizens and younger low-income families became eligible for FmHA rural housing loans or tenancy in rural rental housing.

In 1968, an overhauling of the Housing Act of 1949 established the interest-supplement housing loan program. It enabled some low-income families to pay as little as 1 percent interest and provided for subsidized loans to developers of low-priced rental housing for lowincome families and senior citizens. New programs also were enacted in 1968 for rural homesite development loans and for grants toward support of "self-help" homebuilding group projects. Grants of up to 90 percent, as well as loans, were

Digitized by Google

authorized for farm labor housing projects.

In 1968, Congress abolished a statutory annual ceiling of \$450 million on FmHA-insured loan authority for farm ownership and community facilities combined, and raised the national total authorization for water-waste disposal grants from \$50 million to \$100 million a year.

In 1970, legislation was passed to remove technical barriers to the use of investors' FmHAinsured funds, rather than direct appropriated funds, for loans to tax-exempt public bodies such as municipalities and public service districts. That year marked the beginning of a period of rapid growth and increased service to small towns.

The <u>Housing Act of 1970</u> raised the population limit to 10,000 for a rural community where FmHA housing loans may be made.

In farm credit programs, the agency took action in 1970 to increase its cooperation with other lenders in jointly serving farm borrowers, with FmHA taking a second lien when the same security is mortgaged both for the FmHA and other lenders' loans. In 1971, the limit on a farm ownership loan secured by a mortgage on real estate was raised from \$60,000 to \$100,000.

The <u>Rural Development Act of</u> <u>1972</u>, enacted August 20, 1972, gave <u>USDA</u> primary responsibility for Federal activities in support of rural development. It established the position of Assistant Secretary for Rural Development to coordinate this effort through the programs and expertise of FmHA, the Rural Electrification Administration (REA), and the Rural Development Service (RDS). In 1977, RDS was merged with FmHA, but in 1981 it again became a separate entity as the Office of Rural Development Policy (ORDP). In January 1986, ORDP was abolished and the rural development functions were assumed by the Under Secretary for Small Community and Rural Development. In 1987 the Under Secretary served as coodinator for renewed USDA rural development efforts.

In its other principal provisions affecting FmHA, the act--

- Authorized FmHA to guarantee loans made by commercial lenders for farming, housing, and rural business and industry, including enterprises in cities of up to 50,000 population.
- * Abolished the limit of \$4 million per project on FmHA financing of water and waste disposal systems, increased the national grant authorization for water and waste disposal to \$300 million a year, and raised the population limit on towns eligible for FmHA-financed systems to 10,000.
- Authorized FmHA loans for other kinds of essential community facilities such as fire departments, community halls, hospitals, nursing homes, and other related facilities.
- Authorized FmHA grants to improve rural industrial sites.
- * Authorized area assistance planning grants.
- * Authorized FmHA to make investor-funded insured loans for farm operating purposes, and raised the limit on farm operating loan from \$35,000 to \$50,000.

- * Authorized youth loans to rural young people under age 21 for farm or nonfarm incomeproducing enterprises supervised through schools or organizations, such as 4-H Club and Future Farmers of America programs.
- Set \$225,000 as the maximum permissible debt against farm property on which FmHA and a cooperating lender may simultaneously hold liens. This enabled FmHA to participate in larger loans up to its limit of \$100,000 to family farmers and ranchers.

The emergency loan program to help farmers recover from natural disaster underwent a short-lived expansion in 1972. An act of Congress, stimulated by the Hurricane Agnes disaster in Northeastern States, liberalized emergency loan terms nationwide and decreed nonrepayment of the first \$5,000 to cover actual loss. After the cost mounted to about \$550 million within a few months, the program was suspended and Congress in 1973 returned emergency loans to a fully repayable basis. Legislation in 1975 established separate categories of disaster emergency loans to cover losses and to finance resumption of farm production operations. Under the Small Business Development Act of 1980, FmHA was given authority to make unsubsidized emergency loans to farmers who are able to get credit The law from commercial lenders. limits loans to these creditworthy borrowers for actual loss only.

A special Emergency Livestock <u>Credit Act</u> for FmHA's guarantee of commercial lenders' loans to livestock and poultry producers in financial distress was enacted July 25, 1974. The program expired September 30, 1979. Under terms of the program, FmHA guaranteed a maximum \$350,000 worth of commercial credit for an eligible borrower. Loan guarantees totaling \$1.5 billion of principal outstanding were authorized. About \$1 billion of this credit was used by farmers and lenders.

Under amendment of the National Housing Act, passed in 1974, FmHA in 1976 introduced its housing loans into towns of 10,000 to 20,000 population outside Standard Metropolitan Statistical Areas (SMSA's)* and certified by the Secretaries of Agriculture and Housing and Urban Development (HUD) to be lacking in mortgage money from other sources. Later in 1976, Congress revised the criteria for serving the larger non-SMSA communities by specifying that consideration be based on shortage of mortgage loan funds for families of low and moderate income. Housing Act amendments of 1974 also authorized extension of FmHA housing loan services to U.S. island territories, including trust territories in the Pacific. (Service was initiated on Guam in 1976 and other islands in 1977.)

The guarantee of commercial lenders' housing loans to families of moderate income was implemented in January 1977 under authorities provided in the Housing and Rural Development Acts. However, under the Housing Act Amendments of 1977, guarantee of housing loans was limited of families with above moderate income. In 1977, FmHA also began making grants to senior citizens with very low income for repair of badly deficient houses, and implemented an authority under housing legislation of 1974 to provide rental assistance supplementing rent paid by low-

* Name changed to Metropolitan Statistical Areas (MSA's) in 1984. income tenants of FmHA-financed rental housing.

The Emergency Agricultural Credit Adjustment Act, enacted August 4, 1978, substantially changed the farm programs of FmHA and added a new program of economic emergency loans. The new program authorized FmHA to make or guarantee loans of up to \$400,000 to farmers or ranchers hard pressed by shortages of credit from regular sources or by a cost-price squeeze. The agency was authorized to carry a maximum of \$6 billion in economic emergency loans at any one time. The loans could be used to refinance certain outstanding debts. reorganize the farming operation, and pay other operating expenses. However, funds could not be used to expand farming operations. (See page 12 for extension and expiration of this program.)

The 1978 Agriculture Credit Act also made changes in existing programs --

- Expanded eligibility for farm loans to family corporations, cooperatives, and partnerships, as well as individuals.
- Increased loan limits to \$200,000 for insured and \$300,000 for guaranteed farm real estate loans and to \$100,000 for insured and \$200,000 for guaranteed farm operating loans.
- * The interest rate for farm ownership loans was changed to be based on the cost of borrowing to the Government. Special interest rates on ownership and operating loans were made available for limited-resource farmers.
- The maximum allowable grant for water and waste disposal

projects was increased from 50 percent to 75 percent.

 Revoked the requirement that the Department of Labor clear business and industrial loans of less than \$1 million and when employment is less than 50 people.

Powerplant and Industrial Fuel Use Act of 1978 (Section 601) provided energy impact assistance grants to rural communities which faced problems of rapid growth due to new coal and uranium mining. This was sometimes referred to as the boomtown program. Grants were available for planning as well as acquiring and developing sites for housing and public facilities.

Energy impacted areas were designated by State governors and approved by the U.S. Department of Energy. By the end of 1981, approximately 400 grants had been awarded to communities within the designated 24 States. The program has not been funded since 1981.

The <u>Rural Development Policy</u> <u>Act of 1980</u> gave USDA a leadership role in coordinating a nationwide rural development program. Among other provisions, it created the position of Under Secretary of Agriculture for Small Community and Rural Development and increased FmHA's annual authorization for Section 111 planning grants.

The planning grants under Section 111 had been authorized by the Rural Development Act of 1972. The grants were made to States, substate districts, local governments, and certain communitybased organizations to encourage and help meet the cost of comprehensive planning in rural areas. Grants were used for planning a wide variety of services including water, sewer, housing, energy, and economic development. Through its final year of funding, fiscal year 1981, the Federal Government made 605 grants for a total of \$19 million.

The Energy Security Act of 1980 was a \$20 billion comprehensive synthetic fuel measure designed to spur the production of 500,000 barrels of synfuels daily by 1987 and 2 million barrels by 1992. Small-scale projects (less than 1 million gallons per year) with a loan amount of less than \$1 million, and intermediate projects (over 1 million and less than 15 million gallons) became eligible for FmHA financing.

Although the 1978 Emergency Agricultural Credit Adjustment Act set May 15, 1980, as the expiration date for the <u>economic emergency loan</u> program, PL 96-220, enacted in March 1980, extended authority for the program until September 30, 1981. In 1983, the U.S. District Court in Washington, D.C., directed FmHA to reopen its economic emergency loan program for a limited time, from December 22 through September 30, 1984.

The Rural Housing Amendments of 1983, enacted on November 30, created changes in the single family and multifamily housing programs of FmHA. The new legislation directed FmHA to give more priority to serving very-low-income households and making its housing assistance more affordable to low-income persons in rural areas. The law required that FmHA revise its income definitions to be consistent with HUD's and to also accept any of the voluntary national model building codes and HUD minimum property standards, in addition to the FmHA construction standards.

Other provisions of the law:

- Permit FmHA to extend single family home mortgages from 33 years up to 38 years to persons whose incomes do not exceed 60 percent of the area's median income.
- * Authorize FmHA to make single family or multifamily housing loans for permanently sited mobile/manufactured housing units, including the lots on which they are located.
- Require not less than 40 percent of the homes financed nationally and 30 percent in each State under the section 502 (single family housing) program to be for very-lowincome families.
- Authorize up to \$10 million for innovative demonstrations of housing and building systems that may differ from FmHA minimum property standards, while still providing adequate housing for low-income borrowers.
- Establish a new program of housing preservation grants to eligible organizations and units of government to rehabilitate single and multifamily housing.

Regulations implementing part of these changes in the housing laws went into effect October 1, 1985.

The Emergency Agricultural Credit Act of 1984, enacted April 10, 1984, significantly changed FmHA's farm operating and emergency loan programs.

In the emergency loan program, for disasters occurring after May 30, 1983, farmers in counties bordering designated counties are eligible to apply for emergency loans and the application period is

Digitized by Google

-11-

extended from 6 months to 8 months. Collateral will be based on its value the day before the emergency designation was requested by the governor or its value 1 year before the request, whichever is higher.

In the operating loan program, loan limits on new loans were raised from \$100,000 to \$200,000 for insured loans and from \$200,000 to \$400,000 for guaranteed loans.

The maximum repayment period for rescheduled or consolidated emergency and operating loans increased from 7 to 15 years from the date of the original note. A loan which is rescheduled may be changed to a limited resource loan for a qualified borrower.

Other changes in the law include:

- * Interest rates on operating, farm ownership, or emergency loans that are deferred, consolidated, rescheduled, or reamortized are set at the original rate or the current rate, whichever is lower.
- * Requiring 20 percent of operating and farm ownership funds to be allotted to limited resource borrowers. States unable to meet the goal may use any remaining funds for regular operating loans.
- Prompt notification of borrowers of limited resource loans.
- * Prohibiting FmHA employees involved in the loan review process from buying land for 3 years whenever another person has applied for and been denied an FmHA loan to buy the same land.

 Permitting a study on the feasibility of a program for delinquent farm borrowers to repay their loans with earnings from timber production on land diverted from crops or pasture.

Quotas of lending to very-low and low-income families for homeownership were clarified under a supplemental appropriations bill signed July 2, 1984, and the "Housing and Community Development Technical Amendments Act of 1984," signed October 17, 1984. The housing legislation of 1983 had restricted FmHA to making at least 40 percent of such loans to people of very low income. However, so few people in that category could afford to buy homes, even with the maximum interest credit available, that service to low-income people was severely restricted. The revisions enacted in 1984 authorized the agency to lend 60 percent of its single-family housing funds to the low-income group and 40 percent to those of very low income, with each authority independent of the other.

Based on a four-person household with adjustments for family size, very low income is defined as not more than 50 percent of an area's median income. Low income is not more than 80 percent of the area's median income.

President Ronald Reagan announced a 1-year Farm Credit <u>Initiative</u> program on September 18, 1984. This debt-restructuring plan was designed to assist farmers who were good managers, but experiencing severe financial difficulty, to remain in business and develop sound financial footing. Major initiatives provided:

 A one-time, interest-free, debt set-aside of up to 25 percent or a maximum of \$200,000 (whichever was less), of a borrower's FmHA debt, provided the set-aside resulted in a positive cash flow.

2. An FmHA guarantee of 90 percent on loans made by other lenders to non-FmHA borrowers, provided the lenders agreed to write off at least 10 percent of their borrower's debt, up to the amount needed to achieve a positive cash flow.

Initiative one expired on September 30, 1985, but initiative two was continued.

On February 6, 1985, Agriculture Secretary John R. Block announced measures to assist financially troubled farmers. They included:

- An interest write-down option in addition to the existing principal write-down option for guaranteed loans.
- * An emergency credit assistance program for farmers whose banks have failed. For eligible operators, FmHA can provide a guarantee for new crop loans on a 1-year basis.

The Food Security Act of 1985, enacted December 23, 1985, made major changes in farm loan eligibility and provided additional protections for borrowers undergoing serious financial difficulty.

For farm operating and ownership loans, eligibility was extended to "joint operators," that is, two or more farmers working together and sharing land, labor, equipment, expenses, and income. Eligibility also was extended to include persons related by blood or marriage, as long as the ownership interest of each holder separately constitutes no more than a family farm, even though their collective interests are larger than a family farm.

Eligibility for emergency loans, however, was limited for the first time to family-size farms.

FmHA farm borrowers who are unable to continue their operations, could, under certain conditions, retain their dwelling and a reasonable amount of land or, under other authority, lease back their farm with an option to buy. Other key provisions of the 1985 Act included:

- A requirement that two of the three FmHA county committee members be elected by farmers in the community instead of being appointed.
- * An interest rate reduction plan in which FmHA would match, up to 2 percentage points, the reduction in interest by the lender on a guaranteed loan, making a reduction of 4 percentage points possible. FmHA then gives its matching share to the lender.
- * A conservation easement program under which a farmer unable to make loan payments to FmHA could, under certain circumstances, sell an easement on wetland, upland, or highly erodible land for conservation purposes for 50 years in exchange for a reduction of the FmHA debt equal to the value of the land in the easement.
- * A provision to allow farm borrowers, under certain circumstances, to reamortize a distressed loan with the use of future revenue from softwood timber crops produced on marginal farmland.

-13-

To further extend the Agency's ability to assist eligible farmers in need of credit, FmHA in 1986 created "Operation Assist." Under this program, if a county office exhausted its direct operating loan funds, the County Supervisor would personally escort a qualified farmer to a bank or other lending institution to seek a guaranteed loan. About 550 loans for \$43 million were handled in this manner in 1986 and 1,530 loans for \$127 million in 1987.

In 1987, FmHA completed an historic sale of Government assets. Based on requirements of the <u>Omnibus</u> <u>Budget Reconciliation Act of 1986</u> and the <u>Continuing Resolution of</u> 1987, Farmers Home sold portions of its rural housing and community programs loan portfolios to the public. The loans were sold on a nonrecourse, taxable basis.

From the sale of single family housing loans, Farmers Home received \$1.75 billion plus Subordinate Certificates amounting to \$593 million which were to be sold later. Water and waste disposal and community facility loans generated \$1.08 billion in cash for the agency.

Before completing the community program loan sale, Farmers Home offered to sell the loans back to borrowers under the Discount Purchase Program. The agency received \$52.8 million in cash under this program.

AN UNDUPLICATED RURAL RESOURCE

FmHA programs operate as a supplement to credit made available by private lenders, not in competition with them, and as a helping hand to the capable and industrious family or community whose progress is blocked by lack of credit resources. A family in need of farm financing, or a loan for an adequate home, may be of modest circumstances and lack credentials for conventional credit. A rural locality may be without a local lending institution, financial needs of the area may exceed the capacity of institutions that are there, or a rural community may not be able to qualify for financing through the conventional bond market.

In circumstances such as these, resources brought within reach through FmHA help to make up for shortages in local and private resources. FmHA lends money raised throughout the Nation from investors in Government securities and also guarantees loans made by city banks and other commercial lenders. In doing so, FmHA relays into the rural United States a flow of outside capital needed for farm, home, community, and rural economic development.

Historically, the availability of credit through FmHA, when none other was to be found, has enabled hundreds of thousands of farm families to keep their foothold on the land, rather than abandon farming.

Through the years, FmHA has enabled 1.5 million poorly housed rural families to move into adequate homes. The agency is currently helping approximately 13,700 borrowers obtain modernized central water and sewer systems.

The "supervised loan" principal adopted by the agency in its earliest years is still necessary to help borrowers achieve the purposes of their loans and to pay back what they have borrowed. Loan losses written off during the 52 years of the agency amount to 1.3 percent of principal advanced.

SOURCES OF INSURED LOAN FUNDS

FmHA loans classified as "insured" are made from three revolving loan funds. The oldest is the Agricultural Credit Insurance Fund (ACIF), established when FmHA began to make insured loans in the 1940's, and now the fund from which all farmer-program loans are made. The Rural Housing Insurance Fund (RHIF) was established with inauguration of insured rural housing loans in 1965. The Rural Development Insurance Fund (RDIF), established under the Rural Development Act of 1972, took over from ACIF the agency's lending for water, sewer, and other community facilities, and for business and industrial development.

The revolving funds are replenished by the incoming flow of loan repayments, plus the sale of Certificates of Beneficial Ownership to the Federal Financing Bank.

Prior to 1974, investors received actual notes or other security instruments FmHA had taken from borrowers. The investor supplied to FmHA an amount equal to principal owed on the note and the agency guaranteed repayment of the investments with interest. As borrowers repaid loans, payments were made to investors and the value of the investment was reduced. Until 1970, with FmHA program levels requiring less than \$1 billion a year of note marketing, sales were conducted directly from FmHA. From 1970 through 1973, as marketing requirements rose to more than \$2 billion a year, the agency increased sales by marketing large blocks of notes to security dealers, who in turn sold them to trust funds and other large investors.

In 1974, FmHA discontinued the marketing of actual notes and introduced a new investment security instrument, the Certificate of Beneficial Ownership (CBO). CBO's are issued against pools of loan notes and signify that investors will share in interest earnings. Since 1977, FmHA has placed CBO's only with the Federal Financing Bank, an institution closely related to the Department of Treasury, and has sold no CBO's to the public.

SUMMARY BY PROGRAM AREA

From the beginning of the Resettlement Administration in 1935 until the end of fiscal year 1987, a total of \$146,722,983,388 was advanced or obligated in more than 9.9 million loans and grants made through FmHA and its predecessor agencies.

Program by program, the alltime totals as of September 30, 1987, are shown on page 23. The unpaid principal owed to FmHA on all FmHA loans as of September 30, 1987, totaled \$64,892,062,000, including guaranteed loans.

The annual volume of programs, making FmHA the largest Federal loan agency dealing directly with borrowers, reflects the emphasis during the 1960's and 1970's on resources for development or revival of the whole rural community. Money spent annually on programs increased from \$300 million to \$1.6 billion during the 1960's. Since then, the following annual levels have been recorded (in thousands):

FY	1970		1,639,749
FY	1971		2,414,316
FY	1972		2,789,806
FY	1973		3,754,934
FY	1974		3,601,475
FY	1975		5,486,089
*FY	1976		7,190,920
FY	1977		7,255,534

FY	1986	 7,001,008
FY	1987	 5,781,145

*Includes Transition Quarter

The downward dip between fiscal years 1973 and 1974 was attributed to an exceptionally great outlay for farm emergency loans in 1973 and a January-June moratorium on new subsidized housing that decreased the backlog of loan applications for fiscal year 1974. The high volumes from 1978 through 1981 included record levels for farm emergency, housing, community facility, and business and industrial programs.

Following are summaries of current FmHA services.

FARMER PROGRAMS

FmHA helps finance farmers who generally cannot get credit they need from other lenders at reasonable rates and terms. Figures indicate FmHA held 7 percent of the total outstanding farm debt in 1978. The amount has steadily increased and stood at 15.9 percent at the end of 1987.

The average size of farm loans made by FmHA in fiscal year 1987 ranged from \$44,589 for an emergency loan to \$151,800 for a guaranteed farm ownership loan. The overall average was \$59,360. The averages by types of loans are the following: direct farm ownership, \$83,704; guaranteed farm ownership, \$151,810; direct operating, \$40,450; guaranteed operating, \$91,136; and emergency, \$44,589. Interest rates for guaranteed loans are negotiated between lender and borrower. The interest rate for insured loans is

set periodically by the Secretary of Agriculture, based on the cost of Government borrowing.

Farm ownership loans, insured or guaranteed, enable family-size farmers lacking other sources of credit to buy, improve, or refinance farm real estate. Family-size farms operated by individuals, partnerships, cooperatives, or corporations can be considered for eligibility. Loan limits are \$200,000 for insured loans and \$300,000 for guaranteed loans. Farm ownership loans may be repaid in up to 40 years. Insured loan borrowers must refinance through conventional lenders when financially able, thereby "graduating" from FmHA credit. Loans are secured by mortgages on the farm real estate.

Farm operating loans, insured or guaranteed, are usually secured by chattel mortgages on crops, livestock, machinery, or other elements of production. Family farmers and ranchers lacking other sources of production financing may be eligible. The limit is \$200,000 for insured loans and \$400,000 for guaranteed loans. Terms for operating loans usually range from 1 to 7 years, according to loan purposes, with a maximum repayment period of 15 years for consolidated or rescheduled loans. A loan which is rescheduled may be changed to a limited resource loan for a qualified borrower.

Limited resource insured farm ownership and operating loans are made to owner-operators or tenantoperators who, because of lack of experience, equipment, capital, land, adequate financing, or due to underdeveloped farms, low net income, and inadequate cash flow, need a lower interest rate to service their debts and have a reasonable chance of success. Disaster Emergency (EM) loans help farmers recover from actual production and physical losses inflicted by natural disasters such as drought, floods, and hail-storms.

To be eligible for an emergency loan, the county in which the farm is located must have been declared an emergency or major disaster area by the President, or determined to be a natural disaster area by the Secretary of Agriculture, or in some cases, by the FmHA Administrator. The FmHA Administrator can make the determination for severe physical loss loans only. Farmers in counties contiguous to a designated county may also quality for EM loan assistance.

To qualify, applicants must be <u>unable</u> to obtain suitable credit elsewhere.

Other farmer programs include insured or guaranteed loans for improvement of soil and water resources, and insured loans to Indian tribal organizations to buy privately owned land located within reservation boundaries.

HOUSING PROGRAMS

Housing credit was scarce in rural America until the late 1960's, and the consequences were visible throughout the Nation's towns and countryside. With 27 percent of the national population, rural America had 47 percent of the Nation's substandard housing. This meant that the ratio of bad housing to the number of families was twice as great in rural communities as in the cities.

A large-scale attack on rural housing blight was mounted by FmHA in 1965. Insured loan service comparable to Federal urban housing credit was made available to rural people of low or moderate income. Over 1.1 million new or modernized family-owned homes and about 365,000 new apartment units have been built in rural communities. About onethird of the apartment projects fill the need of elderly people for lowcost rental housing.

Since 1949, FmHA has provided over \$50 billion for housing. During fiscal year 1987, FmHA loans and grants for \$2 billion funded more than 59,000 living units.

Individual home ownership (Section 502) insured loans go to families of very low, low, and moderate income, including senior citizens, who need adequate housing. Maximum term for repayment is 38 years. Interest rates vary according to the cost of Government borrowing. Interest credit, which may reduce the effective interest rate to as low as 1 percent, may be available to qualified low-income borrowers.

FmHA housing credit is available to eligible applicants in rural communities with populations of less than 10,000. This credit may be available in communities between 10,000 and 20,000 if they are not within a Metropolitan Statistical Area (MSA), and the Secretaries of the Departments of Agriculture and Housing and Urban Development have determined that there is a serious lack of credit for low- and moderate-income households in that location.

Very-low-income homeowners may be eligible for low-interest (Section 504) loans for repairs of up to \$7,500 needed to remove health and safety hazards. Very-low-income elderly homeowners may be eligible for a maximum loan of \$7,500, a maximum grant of \$5,000, or maximum loan-grant combination of \$7,500 to make necessary repairs to their homes. In order to qualify for assistance, applicants must be 62 years of age or older and have an income so low they cannot repay all or part of a Section 504 loan.

Rental housing (Section 515) insured loans provide modernized rental or cooperative housing for persons with low and moderate incomes and for those age 62 and older in communities of not more than 10,000 population. Such loans may also be available in communities between 10,000 and 20,000 population if the facility is not within an MSA. The loans are repayable in not more than 50 years. Provisions are made for interest reductions under certain circumstances, so that lowincome tenants may pay a rent within their means. Rent paid by lowincome tenants also can be supplemented through a rental assistance program administered by FmHA or HUD's section 8 rent subsidy program.

Mutual self-help housing grants are made to eligible nonprofit or public organizations to assist lowincome families who wish to work together to build their own homes with financial assistance under the 502 rural housing program. The grant is used to pay for technical assistance the families may need in constructing the home with their own resources.

Specialized housing programs include loans and grants for development of adequate farm labor housing, grants to qualified organizations to help low-income families accomplish "self-help" home-building projects, 2-year loans to nonprofit organizations to develop rural homesites, and housing rehabilitation assistance through local public and nonprofit groups for rural homeowners.

COMMUNITY PROGRAMS

Water and waste disposal program -- FmHA and its predecessor agencies have financed approximately 13,680 water and waste disposal systems in rural areas and towns of up to 10,000 people. Public bodies, corporations operated on a nonprofit basis, and Indian tribes that are unable to obtain credit from other sources at reasonable rates and terms are eligible for assistance. Loan repayment can be scheduled for up to 40 years of the useful life of the facility. Interest rates are based on the current market yield of municipal obligations. Certain loans may be made at a lower rate. Applicants can have the option of the interest rate in effect at the time of loan approval or closing. In some cases, grants can be made to reduce user rates to a reasonable level for farmers, ranchers, and rural residents.

Community facilities -- The Rural Development Act of 1972 extended FmHA's lending authority to include loans to public bodies or nonprofit organizations for community facilities that provide essential services to rural residents. Fire protection, community halls, hospitals, nursing homes, medical clinics, libraries, and schools are among more than 30 categories of community facilities eligible for financing.

Facilities may be in the rural countryside or towns of up to 20,000 population. Loan repayment can be scheduled for up to 40 years or the useful life of the facility. Interest rates are fixed for the life of the loan and are based on the current market yield for municipal obligations. Certain loans may be made at a lower rate. Additional interest charges may apply to projects located on prime or unique farmland.

Loan applications for public safety such as rescue or fire protection facilities and equipment receive priority status for funding. Joint funding of projects with other lending sources is emphasized in order to receive maximum benefit from program sources.

Other programs -- Local costs of projects developed under the small watershed and resource conservation and development programs also may be financed through loans by FmHA to sponsoring local organizations.

BUSINESS AND INDUSTRY PROGRAMS

The business and industry (B&I) loan program was legislated in 1972 under Section 310B of the Consolidated Farm and Rural Development Act in order to encourage business and industrial development in rural areas and to create or preserve employment opportunities in these areas. The program has been administered primarily as a guaranteed loan program in communities under 50,000 population, with emphasis on communities of less than 25,000.

When the program began in 1974, there was little rural business credit available. Most industries had not yet recognized the benefits of locating in rural areas and, at that time, national migration was toward larger cities. Both tendencies have since moderated. During the life of the program, FmHA has obligated for guarantee 7,175 business and industry loans totaling \$5.8 billion. In fiscal year 1987, 67 of these loans were obligated for guarantee for \$95.7 million.

Under the business and industry program, commercial loans, guaranteed up to 90 percent against loss of principal and interest, are made by lenders to individuals and corporations. The interest rate is negotiated between the borrower and the lender. Loans may be made for improving, developing, or financing business, industry, and employment.

With renewed interest in Rural Development, Farmers Home was a strong participant in efforts to help rural America rebound from recent economic hardships. While ongoing programs of farms, housing, and community facility loans continued to support rural areas, the B&I program guaranteed \$95.7 billion in loans -- 43 percent higher than the preceding year -which generated more than 6,000 jobs.

Farmers Home also provided \$20 million in loans and \$14 million in grants to the Nonprofit National Corporations Programs. Three NNC's have been established to assist local businesses establish rural development projects. The projects are intended to create new businesses or expand existing ones, to help diversify the local economy, and to provide income to displaced farm families.

1987 OBLIGATIONS FOR ALL PROGRAMS
