PREFACE

11M-246

The papers presented in this book record the invited papers presented at the 8th International Farm Management Congress held in Palmerston North and Christchurch, New Zealand from 4-9 February 1991.

The theme of this Congress is communication. The format of the Congress has enabled more speakers than ever before to present papers. We have speakers from 20 countries covering a wide variety of topics. It is hoped that the papers will generate debate and discussion throughout the period of the Congress and that all participants will find the Congress a valuable and rewarding experience.

Finally it should be noted that some papers are presented by speakers whose native tongue is not English and some problems have arisen when the papers have been translated into English. In the view of the Organising Committee, these problems do not detract in any way the contribution these papers make to the Congress Proceedings.

Organising Committee  
8th International Farm Management Congress.
