COMPLIMENTS OF FRIDAY HOUSE, CGLOMA CA

## 1978 CROP REPORT

March 29, 1979

Mr. Richard E, Rominger, Director
California Department of Food and Agriculture
and
The El Dorado County Board of Supervisors
w. P. "Dub" Walker, Chairman

Thomas L. Stewart
William V. D. Johnson
Arliene Todd
Joseph Flynn

## Dear Madam and Gentlemen:

In accordance with provisions of Section 2279 of the California Agricultural Code, I hereby submit the 1978 El Dorado County Crop Report.
The gross agricultural value has increased approximately $\$ 4$ million. The increase is primarily due to better prices of raw agricultural products plus an increase in production. The County's grape industry is rapidly developing and gaining statewide recognition for the fine quality varietal grapes produced.
Timber stumpage value is again included in this report. The value shown in this report is from timber harvest on both private and public lands in the county. The reason timber products are shoun in this report is to present a more complete picture of the contribution the County's agricultural industry makes to the general economy of the County.
The County's ranch marketing program continues to expand and draws many thousands of visitiors to the County. The proximity of El Dorado County to large metropolitan areas promises a very bright future of this type of merchandising. Particularly now with the increase in fuel costs many people will be forced to make one or two day trips in lieu of a long vacation in a distant area.

This report was compiled by Carl Locher, Ir., Deputy Agricultural Commissioner with the El Dorado County Department of Agriculture. Mr. Locher spent many hours collecting and reviewing data so this report would be accurate and meaningful.

I wish to express my appreciation to the many individuals and organizations that contributed information to make this report possible.

Sincerely,

EPD:mlb

Dear Director and Board Members:
In accordance with provisions of Section 2279 of the Catifornia Agricultural Code, I hereby submit the 1979 EL Dorado County Crop Report.

Ihe gross agrioulturat value has increased approximately \$8 million. The increase is primarily due to better prices of raw agricultural. products plus an increase in production. The County's grape industry continues to develop and is gaining statewide recognition for the fine quulity of varietal grapes produceä.

I'inber stumpayr value is again included in this report. The value shown $i s$ from imber turvest on both private and public lands in the Counly. The reason timber products are shown is to present a more complex picture of the contribution the County's agricultural incustry makes to the general economy of the County.

Ihe County's ranch marketing program continues to expand and draws many people to the County. The proximity of El Dorado County to large metropolitan areas promises a very bright future of this type of merchandising. Farticularly with the increase of fuel costs, many people will be forced to make one ,r bo-idny trips in lieu of a long vacation in a distant area.

This roport was compiled by Carl Locher. Jr., Deputy Agricultural Commissioner, El Dorado County Department of Agriculture.

1 wish to express my appreciation to the many individuals and organizations that contributed information to make this report possible.

## Sincerely,

Eidcollífan F-l

COMPLIMENTS OF FRIDAY HOUSE COLOMA, CA

> 1980
> Agricultural CROP REPORT

#  <br> placerville, California 95667 

Narch 16, 1981

Mr. Richard E. Rominger, Director
Californial Department of: Food and Agriculture and the
E1 Dorado County Board of Supervisors
Joseph V. Flynn, Chairman
W. P. "Dub" Walker

Thomas L. Stewart
Patricia Lowe
Robert E. Dorr
Dear Director and Board Members:
In accordance with provisions of Section 2279 of the California Agricultural Code, I hereby submit the 1980 El Dorado Counicy Ctop Report.

The gross agricultural value has decreased approximately $\$ 2 \mathrm{i}$ million from the high gross income reported in 1979 of $\$ 48 \frac{1}{2}$ million. The primary reasun for this decrease is that the timber industry, because of a depressed economy, elected not to harvest as much timber. The Eldorado National Forest indicates that timber sales continue at a brisk rate with high prices being paid for the standing timber. Purchasers of national forest timber are allowed five years from time of purchase to when the timber must be harvested.
The County's grape industry continues to expand and has gained statewide recognition for high quality varietal grapes. Five wineries are presently in operation in the County with an additional three to be completed in 1981. This industry is blending well with other recreational and agricultural industries in the County.
With the addition of wineries selling fine varietal wines, the County's ranch marketing program continues to expand and attract recreational visitors to our area. The proximity of El Dorado County to large metropolitan areas promises a very bright future for this type of merchandising. The cherry and plum crops are expanding, but not as rapidly as vineyard plantings. With increased transportation costs, these two crops should have a competitive advantage with out-of-state products in our markets.

This report was compiled by Carl Locher, Jr., Deputy Agricultural Commissioner, El Dorado County Department of Agriculture. We would iike to express our appreciation to the many individuals and organizations that contributed information to make this report possible.

 CROP REPORT}

# Sippartmpat of Antinulture 

March 25, 1982

Mr. Richard E. Rominger, Director
California Department of Food and Agriculture
and the
E1 Dorado County Board of Supervisors
W. P. "Dub" Walker, Chairman
.Joseph V. Flymn
Thomas L. Stewart
Patricia Lowe
Robert E. Dorr
Dear Director and Board Members:
In accordance with provisions of Section 2279 of the California Agricultural Code, I hereby submit the 1981 E1 Dorado County Crop Report.

The gross agricultural value is approximately $\$ 34$ million, a decrease of $\$ 14$ million from the high gross income repowted in 1979. The primary reason for this decrease is that the timber industry has elected not to harvest as much timber because of a depressed econony. Purchasers of national forest timber are allowed five years from time of purchase to harvest their timber.

The County's grape industry is expanding at an increasing rate. El Dorado County, and her sister Sierra foothill counties, are rapidly becoming known 's premium wine grape growing areas. Eight wineries are presently in operation in the County -- an increase of three from that reported in 1980. These wineries and their tasting rooms are extremely complementary to the County's ranch marketing program, and are blending extremely well with other recreational and agricultural industries in the County.

Cherries and late season plums are beginning to attract more attention in Eil Dorado County. Both of these crops will be planted more extensively within the next five years. Specialty crops such as blueberries, boysenberries and peaches will be expending on a limited basis in order for growers to extend their ranch marketing programs into the late spring and early summer season. Again, all of these crops will be complementary to the agricultural industrios presently in the ranch marketing program.

This report was compiled by Carl Locher, Jr., Deputy Agricultural Commissioner, E1 Dorado County Department of Agriculture. We would like to express our appreciation to the many individuals and organizations that contributed information to make this rejort possible.

Sincerely,

Agricultural Commissioner
