Political Reservation and Women's Empowerment: Evidence from Local Governments in Rural India

Songging Jin¹, Fang Xia¹, Klaus Deininger², Hari Nagarajan³

1 Department of Agricultural, Food, and Resource Economics, Michigan State University 2 World Bank 3 National Council of Applied Economics Research

Introduction

- Women are under-represented in most political systems with estimates putting their share in the world's parliamentarians at 16% (Dahlerup and Francisco, 2005) and only few countries where women account for 30% or more of political positions (Roberts and Seawright, 2008).
- . In rural India, a reservation policy ensures that, in one-third of randomly chosen local governments (panchayats), the position of village leader (pradhan) is reserved for a female.
- · However, evidence is contradictory: some find significant increases in the quality of public goods provided by females, others note that the impact is rather limited or insignificant.

Objective

- · The paper reconciles the seemingly contradictory findings by testing two propositions.
- · Even though women's lower qualification may lead to a reduction in quality of governance, negative effects may be offset by the fact that having a female leader may prompt others, especially women, to participate more actively in political processes and the provision of local public goods.
- . If effects on participation are permanent, they could outweigh losses that may be incurred as a result of reserving political positions for less qualified women.

Method

- The randomized control experiment (RCT) nature of the reservation policy make our identification strategy straightforward.
- . In a large sample setting (250 villages, more than 10,000 households), a simple comparison of mean outcomes between the control and treatment villages gives us an average treatment effect.
- · Panel data from 3 election cycles makes panel fixed-effect regressions possible.

Empirical models and results

■ Impact on Gram Sabha Meetings

$$Y_{int}^{j} = \beta_{v}^{j} + \beta_{1}^{j} R_{vt} + \alpha_{1}^{j} R_{vt-1} + \beta_{2}^{j} X_{int} + \beta_{3}^{j} D_{t} + \varepsilon_{int}^{j}$$

$$R_{vt} \text{ is the variatore of internal order}$$

$$R_{vt} \text{ is the reservation dummy, } R_{vt-1} \text{ is the lagge}$$

$$R_{vt} \text{ is the reservation dummy, } R_{vt-1} \text{ is the lagge}$$

$$R_{vt} \text{ is the female dummy, } R_{vt-1} \text{ is the lagge}$$

$$R_{vt} \text{ is the reservation dummy, } R_{vt-1} \text{ is the lagge}$$

$$R_{vt} \text{ is the termale dummy, } R_{vt-1} \text{ is the lagge}$$

$$R_{vt} \text{ is the variatore of internal order}$$

$$R_{vt} \text{ is the termale dummy, } R_{vt-1} \text{ is the lagge}$$

$$R_{vt} \text{ is the variatore of internal order}$$

$$R_{vt}$$

Y... is the variable of meeting participation. R_{vt} is the reservation dummy, R_{vt-1} is the lagged reservation dummy, F_i is the female dummy, X_{ivt} is household characteristics,

Held GP positions before	11.67	24.24	***
candidates before	6.67	20.92	***
No. of observation	180	459	

Discussion

- The reservation of Pradhan positions to women in the current Panchayat term significantly increases the number of meetings attended. The reservation of Pradhan positions to women in the previous Panchayat term significantly increases the share of villagers to speak up in the GS
- · The coefficients on the interaction terms in general support the argument that women are more empowered than men.
- The positive and significant coefficient on reservation dummy for the previous Panchayat suggests strong persistence effect of the reservation
- The sign and significance of the coefficient on the interaction term suggests the reservation has impact on women's willingness to contribute to improve issues that are mainly of concern for female.

Conclusions

- The qualification of leaders who occupy reserved seats is much lower than in unreserved ones.
- The reservation of Pradhan position to women has strong and consistent effect in mobilizing villagers in participating in Gram Sabha meetings and in contributing to improve local public goods.
- The effect of the reservation of Pradhan position on villagers' political empowerment is highly persistent over time.
