INTRODUCTORY NOTE

The following list of publications represents the research activities of the Agricultural economics group in the California Agricultural Experiment Station and the California Cooperative Extension Service. The California Agricultural Experiment Station includes the members of the Giannini Foundation of Agricultural Economics in the Department of Agricultural and Resource Economics, University of California, Berkeley; in the Department of Agricultural Economics, University of California, Davis; and in the Department of Resource Economics, University of California, Riverside. The California Cooperative Extension Service includes the Extension Specialists who are members of the Giannini Foundation and who are located on the campuses of Berkeley, Davis, and Riverside. Although not every publication has been included, it is sufficiently comprehensive to present the research work accomplished during the period covered. All titles included in this issue have been received by the Giannini Foundation Library and housed there. A few titles received after the publication of the 1988-90 list have been included here. The list serves not only as a record of published and unpublished materials but also as a reference guide to source materials in the area of agricultural and resource economics research.

This list is in two parts. Part I, *Economic Classification*, includes all of the publications classified into various economic categories. Part II, *Commodity Classification*, includes only those items which pertain explicitly to particular farm products, with the titles on a single group of products brought together under each subheading. These titles are also included in Part I. The arrangement in each section is alphabetical by title.

At the end is the author index of only the Giannini Foundation members for the period covered by this list. The numbers following each name refer to the pages on which his/her works appear in Part I.

Grateful acknowledgment is made to Susan Casement, Librarian, and her assistants for sending us the Davis Giannini Foundation members' publications; to the Giannini Foundation Library staff--Eileen Smith, Library Assistant, for entering the bibliographic citations into the Macintosh computer, for assisting with the use of the Endnote Plus program, and for overseeing the distribution of the publication, to Maureen Donahoe, Library Assistant, for proof-reading assistance, and to Jacob Kim, Student Assistant, for distribution assistance; and to Dana Keil, Department of Agricultural and Resource Economics, Computer Resource Specialist, for patiently explaining and suggesting the use of the various options of the Microsoft Word program. Any omissions or errors in this list are the responsibility of the compiler and editor.
