ERRATA: FORMULATION OF PROPORTIONALITY RESTRAINTS IN LINEAR PROGRAMMING

S. J. Filan*

The inequality sign in equation (5) of Filan [2] should be reversed. The correct expression is—

\[ \sum_{j=1}^{n} (a_{ij} - b_{4a_{ij}}) X_j < 0 \]  \hspace{1cm} (5)

Correspondents [1, 3] have pointed out that equations (6) and (7) of Filan [2] are not correct as restatements of equations (4) and (5). However, the sets of restraints (1, 2, 4, 5) and (10, 11, 13, 14) remain valid.
