# California Department of Food and Agriculture

# Agricultural Commissioners' Crop Reports

# San Mateo County

1964-1967

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics, <a href="http://giannini.ucop.edu/">http://giannini.ucop.edu/</a>.

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <a href="http://are.berkeley.edu/library/">http://are.berkeley.edu/library/</a>. Please contact the Library to consult the originals.

SAN MATEO COUNTY

AGRICULTURAL COMMISSIONER

We dedicate this report to the memory of

# MAX J. LEONARD

who passed away on June 2, 1964 at the age of 71. He served as Agricultural Commissioner of San Mateo County from February 2, 1932 until his retirement on June 30, 1960.

Honorable Board of Supervisors County of San Mateo and Charles Paul, Director State Department of Agriculture

#### Gentlemen:

As required by Section 65.5 of the Agricultural Code, a report is hereby submitted showing the acreage, production and value of all agricultural commodities, including livestock, in San Mateo County for the year 1964. Not taken into consideration is the cost of producing, harvesting and packaging.

The total value of \$18,204,486 represents an increase of \$456,616 over the previous year. Carnations led with a value of \$2,335,000 and Brussels Sprouts were second at \$1,675,000.

Floral crops were \$285,900 Greet the 1963 figure. Besides Carnations, Roses, Marguerites, Potted Plants and Strawflowers showed substantial gains. Declining in value were Acacia, calla Lilies, Gladiolus, Narcissus and Stock.

Vegetable crops showed a not increase of \$64,286, primarily because of gains by Cabbage, Celery, Lettuce, Peas and Radishes. Showing a decline in value were Artichokes, Beans, Brussels Sprouts and New Zealand Spinach.

Field crops indicated an increase of \$112,000, with Barley, Fava Beans and Oats moving up. Flaxseed and Hay showed a considerable decline in value.

Fruit and Nut crops showed a net gain of \$169,150, with Strawberries accounting for this increase. Apples, Pears and Prunes showed a definite decline.

Livestock and Poultry indicated a loss of \$152,340. All items in this category sustained severe losses due not only to unfavorable marketing conditions, but also to the continued loss to urbanization of good agricultural land.

Seed crops reported a gain of \$19,650. This was made possible by the Vetch seed production.

As we have previously predicted, the construction of additional glasshouse ranges in the Half Moon Bay-Pescadero area will undoubtedly help to maintain our agricultural production at the present level or will even be reflected in an increase in total value.

To all those who cooperated with the Department by furnishing the necessary information I express my sincere appreciation.

Respectfully submitted,

Canellest Victor A. Canavese, Commissioner Department of Agriculture

County of San Mateo

#### FUNCTIONS AND ACTIVITIES

# SAN MATEO COUNTY DEPARTMENT OF AGRICULTURE

Year - 1964

The general purposes and responsibilities of this department include the following:

To promote and protect the agricultural industry.

To protect and benefit both the grower and the consumer by enforcing certain provisions of the Agricultural, Administrative and other State Codes.

Within the authority delegated to us, to further and protect the health and welfare of our citizens.

Additional regulatory duties may be assigned by the County Board of Supervisors.

The following summary lists objectives and statistical information regarding various departmental activities:

#### APIARY

Owners of bees must register with the Agricultural Commissioner each year. Each spring, all bee colonies in the County are inspected to determine the presence of serious bee diseases. Any colonies found to be infected with American Foulbrood, an incurable disease, are required to be destroyed.

	<u>Apiaries</u>	Colonies
Inspections Diseased	94 2	781 6
Destroyed	2. 1 - C	6

#### CERTIFICATION

In compliance with requirements of other counties, states and foreign countries, regulating the movement of plants and plant products, the following certificates were issued:

Intrastate				64,974
Interstate	and	Foreign		54,220

#### CIVILIAN DEFENSE

Representing the Food Administration Division of the California Disaster Office, we keep a current inventory of the wholesale foods available in the event of a serious emergency.

### FAIRS

The San Mateo County Exhibit at the California State Fair and Exposition is designed, constructed and manned by our Department. Flowers and ornamental plants are supplied by over one hundred growers in the County.

In competition with other California Counties, San Mateo consistently wins first prize sweepstakes in the cut flower division and in the floricultural feature exhibit. In 1964 a total of \$2,080 in prize money was deposited in the County Treasury.

The Department also participates in the organization of the San Mateo County Fair.

Calls

824

# FIELD, HOME AND ORCHARD

Farmers, home owners, nurserymen, park departments, schools and other jurisdictions are advised concerning many horticultural problems, including the control of plant pests such as diseases, insects and weeds. Information is also available regarding the care, culture and identification of agricultural and ornamental plants.

Calls

957

### LABORATORY

Samples of well water are tested, on request, to determine if the saline content could cause injury to plants.

Tests Made

16

We prepare plant root and foliage specimens in our laboratory for determination, by the State Bureau of Plant Pathology, of the presence of plant parasitic nematodes. This work is primarily in conjunction with a Statewide survey being made to detect Burrowing Nematodes, a serious pest of citrus trees.

Tests Made 293
Times Burrowing Nematode Found 9
Times Other Plant Parasitic Nematodes Found 71

#### NURSERY INSPECTION

In San Mateo County there are 268 locations where plants are grown and/or sold. Their annual business is in excess of \$2,750,000. Plants are inspected at these locations, not less than once a year, to determine the presence of insect pests, diseases and weeds. Plants must be free of any new or serious pests, must be reasonably clean of any common pests and are required to be correctly labeled.

Calls	1,816
Nurseries Inspected	342
Notices of Noncompliance	119
Intercounty Nursery Stock Certificates Issued	64,800
Nurseries Qualified to Use Inter- county Nursery Stock Certificates	76

### PEST CONTROL

Pest Control Operators are licensed by the State and registered annually by the Agricultural Commissioner in whose County they conduct their business. This Department enforces County and State rules and regulations governing agricultural pest control. Furthermore, if they, or the growers, plan to purchase and/or use certain pesticides which have been designated by the State as injurious materials or herbicides, they are required to obtain a permit from the County concerned.

> Permits Issued 78 Pest Control Operators Registered

# PLANT QUARANTINE

Plant material is inspected at 197 locations of entry, such as Post Offices, Express Offices, Railroad and Truck Depots, Air Terminals and Nurseries, to prevent the introduction into or spread within the State of serious agricultural pests. During 1964 we intercepted 24 plant shipments infested with serious agricultural pests.

Calls	10,988	
	RELEASED	REJECTED
Shipments Plants	12,967 9,448,102	281 37,668

# PREDATORY ANIMAL CONTROL

Predatory animal control is primarily for the protection of livestock. Many of the small predators, however, are potential rabies carriers.

This control is accomplished through a cooperative agreement among the Federal Bureau of Sport Fisheries & Wildlife, the California State Department of Agriculture and San Mateo County.

During 1964 one hunter worked full time in the County and a second hunter worked five months in the Southwest portion of the County.

Losses from predatory animals included 112 head of livestock and 1,113 fowl. Products damaged by raccoons included sweet corn, strawberries, cherries and other fruits and vegetables.

Calls	1,062
Bobcats Taken	109
Coyotes Taken	106
Foxes Taken	231
Others Taken (Badgers, Raccoons, etc.)	235

# RODENT AND PEST ANIMAL CONTROL

A Countywide program of eradication of ground squirrels is conducted which is entirely financed with County funds. Ground squirrels are known carriers of human diseases such as Bubonic Plague and Tularemia, as well as being serious pests of agricultural crops.

For control of field mice, gophers and rats, poison baits are sold to commercial growers. We also cooperate with the County Health Department in the control of

rodents in urban areas.

Calls	787
	13,457
Acres Inspected	252
Acres Treated	2)2

# SEED INSPECTION

The California Seed Law provides that agricultural and vegetable seed by properly labeled and that it meet the specifications stated on the label.

Calls	337
Dealers	251
Lots inspected	2,469 90
Lots in Violation	90
Official Samples Taken	כו

# STANDARD I ZATION

A major activity of our Department is the inspection of vegetables, eggs, fruits, honey, nuts and poultry meat for the purpose of protecting both the producers and consumers of these products.

In 1964 inspections were made in the field, in packing houses, and in both whole-sale and retail markets.

Calls		19,511	
COMMODIT	IFS	INSPECTIONS	VIOLATIONS
Produce Eggs Poultry Honey	(containers) (dozens ) (packages ) (containers)	8,527,820 3,061,754 197,924 77,490	82,251 57,758 2 164

19,311

Golden Gate Produce Terminal is one of the foremost wholesale outlets for fruits and vegetables in Northern California. Produce is received and sold throughout California, many neighboring states and several foreign countries. The gross business for 1964 was reported to be over 92 million dollars.

# STATISTICS

In compliance with the State Agricultural Code, this office compiles and publishes an annual report showing acreage and value of crops grown in San Mateo County. Information is furnished by over 700 growers. Copies of the Agricultural Report are sent, on request, to other agricultural agencies, educational institutions, allied industries, and to interested parties.

Calls 9C3

# SURVEY AND PEST DETECTION

Survey and trapping programs are periodically conducted throughout the County for the detection of Brown Tail Moth, Citrus White Fly, Gypsy Moth, Japanese Beetle, Khapra Beetle, and various Fruit Flies. These are all serious agricultural pests which we hope to keep out of California.

Calls 2,753 Traps Used 299

#### WEED CONTROL

Surveys and eradication programs are conducted to detect and control primary and secondary noxious weeds in the agricultural areas of the County. Under a service agreement with the State Division of Highways, control work is done along certain designated State Highways for which the County is reimbursed.

Calls			518
Acres	Inspected		5,392
Acres	Treated		201

# OTHER ACTIVITIES

- 1. Service calls, from the public regarding plant pest control and other home garden and agricultural problems, numbered 12,047.
- Members of the Department attended 320 meetings which were sponsored by the State Department of Agriculture, University of California, scientific groups and agricultural organizations.
- 3. Identification was made of plant material, diseases, insects and weed pests.
- 4. Staff members, in cooperation with the United States Department of Commerce, operated and maintained two weather stations.
- 5. Or unimproved properties in two residential districts, weed abatement was contracted out and the proportioned cost figured for assessment purposes.
- 6. Educational talks on various phases of agriculture were given to farm, garden, and service organizations, as well as to school children and other youth groups.
- 7. Annual and monthly reports were prepared and sent to the State Director of Agriculture. A narrative and statistical report was sent monthly to the San Mateo County Board of Supervisors.
- 8. The harvesting and handling of crops and livestock, and the effects of weather upon them, were reported weekly to the California State Crop and Livestock Reporting Service.
- 9. Growing grounds for foreign plant shipments were given periodic post-entry quarantine inspections.
- 10. Along county roads, elm trees were sprayed to control the Elm Leaf Beetle.
- 11. In cooperation with the Farm Advisor's Office we distributed publications and other information of the University of California Agricultural Extension Service, of the United States Department of Agriculture and other agencies.
- 12. With the State Department of Agriculture we cooperated on problems involving injurious spray residues on crops.

- 13. Through Marketing Orders, certain agricultural commodities are controlled. These Orders, requested by industry, lead to superior quality for the consumer and greater return for the producer.
- 14. In cooperation with this office, the State Department of Agriculture maintained a seed potato disease test plot on the Coastside.
- 15. We cooperated with the Air Pollution Control Board in matters related to agriculture.

AGRICULTURAL REPORT

Our 1965 State Fair Exhibit

# SAN MATEO COUNTY

AGRICULTURAL COMMISSIONER

UNIVERSITY OF CALIFORNIA

APR 18 1966

LIBRARY

Honorable Board of Supervisors
County of San Mateo
and
Charles Paul, Director
State Department of Agriculture

#### Gentlemen:

In compliance with the requirements of Section 65.5 of the California Agricultural Code, I hereby submit the annual report showing the acreage, production and gross value of all agricultural commodities grown in San Mateo County for the year 1965. The cost of harvesting, producing and packaging was not taken into consideration.

Following the trend established about 10 years ago the open field acreage and production is steadily declining, while the intensive growing of Carnations, Roses and Potted Plants in glasshouses is increasing sufficiently to offset the losses sustained by the outdoor-grown crops.

The total value of \$18,638,488 shows an increase of \$635,202 over the revised 1964 report. Carnations set a new record for a single crop, with a value of \$2,785,000. Brussels Sprouts were second at \$1,474,000, down \$201,000 from the previous season. The decrease in acreage was caused by the uncertainty of labor supply, and loss of tonnage in the first picking was due to insufficient labor.

<u>Floral</u> production value increased \$1,119,150 over last year. In addition to Carnations, Chrysanthemums, Potted Plants, Strawflowers, Marguerites, Snapdragons and Iris showed substantial gains, while Acacia, Heather, Roses, Calla Lilies, Ferns, Violets and Bulbs were lower.

<u>Vegetable</u> production showed a net increase of \$30,742 due to gain in Artichokes, Peas, Potatoes, Corn, etc., however Brussels Sprouts, Celery and Lettuce lost ground.

Field crops lost \$108,360 and <u>Seed</u> crops lost \$28,760.

Fruit and Nut harvest showed a loss of \$191,340, with Strawberries, Apples, Pears and Prunes all declining.

<u>Livestock and Poultry</u> indicated a loss of \$137,390, with all categories showing lower values.

I wish to express my appreciation to all persons and agencies who have furnished the information necessary to compile this report.

espectfully submitted,

Victor A. Canavese, Commissioner Department of Agriculture County of San Mateo

VAC:mw 600 - 3/66

#### FUNCTIONS AND ACTIVITIES

#### SAN MATEO COUNTY DEPARTMENT OF AGRICULTURE

Year - 1965

The primary functions and responsibilities of this department consist of:

To promote and protect the agricultural industry.

To protect and benefit both the grower and the consumer by enforcing certain provisions of the Agricultural, Administrative and other California State Codes.

Within the authority delegated to us, to further and protect the health and safety of our citizens.

Additional duties may be assigned by the Board of Supervisors.

The following is a summary outlining objectives and giving statistical information concerning the various activities of the Department:

#### **APIARY**

All owners of bees must register with the Agricultural Commissioner each year. This requirement must be met so that all apiaries can be inspected to determine if American Foul Brood, or other serious bee diseases, are present. If American Foul Brood, an incurable bee disease, is present the bees are required to be destroyed.

	<u>Apiaries</u>	<u>Colonie</u> s
Inspections	97	727
Diseased	14	33
Destroyed	. 1	33

#### CERTIFICATION

Other counties, states and foreign countries regulate the movement of plants and plant products into their area by requiring that shipments be certified free from serious pests as a condition for admittance. The following certificates were issued:

Intrastate			51,222
Interstate	and	Foreign	42,342

#### CIVILIAN DEFENSE

The Department of Agriculture is San Mateo County's representative of the Food Administration Division of the California Disaster Office. We maintain a current inventory of the food available at the wholesale level in San Mateo County. This supply would be used in the event of a serious emergency.

#### FAIRS

We design, construct and maintain the County's exhibit at the California State

Fair Exposition in Sacramento. The flowers and ornamental plants displayed are supplied by over one hundred of the County's growers. We also select, sort and arrange these flowers and plants for the daily competition with the entries of several other counties. San Mateo is a consistent feature exhibit and sweepstakes winner. Prize money in 1965, deposited in the County's treasury, amounted to a new record of \$2,185.

The Department also participates in the organization of the County Fair and Floral Fiesta.

Calls

626

# FIELD, HOME AND ORCHARD

We advise nurserymen, growers, farmers, park departments, home owners, schools and other jurisdictions on numerous horticultural problems concerning the identification and control of insects, diseases and weed pests, and cultural care of agricultural and ornamental plants.

Calls

1,131

# LABORATORY

Upon request we analyze submitted water samples to determine if the saline content could cause plant injury.

Tests Made

22

In cooperation with the State Bureau of Plant Pathology we also prepare and process plant root and foliage specimens in our laboratory. These specimens are then forwarded to Plant Pathology for the determination of serious plant parasitic nematode pests.

Tests Made	389
Times Burrowing Nematode Found	5
Times Other Plant Parasitic	•
Nema todes Found	81

# NURSERY INSPECTION

We have 268 nurseries doing an annual business exceeding \$2,800,000. These locations are inspected once or twice every year to determine the freedom from new or serious insect, disease and weed pests. Plants offered for sale must meet the required standard of cleanliness.

Calls	1,865
Nurseries Inspected	306
Notices of Noncompliance	126
Intercounty Nursery Stock	
Certificates Issued	51,190
Nurseries Qualified to Use Inter-	
county Nursery Stock Certificates	72

#### PEST CONTROL

Agricultural Pest Control Operators must be licensed by the State annually and register with the Agricultural Commissioner in each county where they conduct their businesses. They must conform with all county and state rules

and regulations governing their business. All users are required to obtain permits from our Department to buy or apply injurious or restricted chemicals, which could be dangerous to human, animal or plant life.

Permits Issued		293
		0.0
Pest Control Operators	Registered	80

# PLANT QUARANTINE

In the enforcement of plant quarantines our purpose is to prevent the introduction and spread of harmful agricultural pests within the County and State. The inspection of plant products and plant material is performed at 197 air, rail and truck terminals, post offices, express agencies and other points of entry within the County. During 1965 we intercepted and rejected 97 shipments infested with serious agricultural pests.

Calls	10,320	
	RELEASED	REJECTED
Shipments Plants	12,374 8,658,780	97 14,053

# PREDATORY ANIMAL CONTROL

For the protection of livestock and because many small predator animals are potential rabies carriers, we cooperated with the Bureau of Sport Fisheries and Wildlife, United States Department of the Interior, and the California Department of Agriculture, in the control of these animals. The damage in 1965 included loss of 46 head of livestock, 483 domestic fowls and 795 wild game.

Calls	1,115
Bobcats Taken	62
Coyotes Taken	88
Foxes Taken	64
Others Taken (Badgers, Raccoons, etc.)	182

# RODENT AND PEST ANIMAL CONTROL

We conduct a countywide program of ground squirrel eradication. These squirrels are serious agricultural pests and are also known carriers of such dangerous human diseases as Tularemia and Bubonic Plague. Poison baits are sold at cost by the Department to commercial growers for the control of rats, field mice and gophers. We cooperate with the County Health Department in urban area rodent control.

Calls		565
Acres	Inspected	10,975
	Treated	219

# SEED INSPECTION

In compliance with the California Seed Law, agricultural and vegetable seed is inspected to insure that it meets the required quality standards.

Calls	399
Dealers	263
Lots Inspected	2,882
Lots in Violation	163
Official Samples Taken	24

#### STANDARDIZATION

One of our major activities is the inspection of fresh fruits, vegetables, eggs, honey, nuts and poultry meat. The purpose of this is to protect both producers and consumers of these products. In 1965 the following field, packing house, wholesale and retail market inspections were made:

Calls

16,546

COMMODITIES	INSPECTIONS	VIOLATIONS
Produce (containers) Eggs (dozens ) Poultry (packages ) Honey (containers)	9,505,672 2,919,558 207,648 192,230	87,812 70,561 - -

The Golden Gate Produce Terminal in South San Francisco is one of the largest wholesale fruit and vegetable outlets in Northern California. It receives and sells produce throughout California, many other states and foreign countries. The 1965 gross was reported to be over 92 million dollars.

### STATISTICS

The State Agricultural Code requires the publication of an annual report, showing the acreage and production value of crops grown in our County. Copies are available, upon request, to other governmental, agricultural and educational agencies; allied industries, and interested parties.

Calls

651

# SURVEY AND PEST DETECTION

In order to prevent the possible introduction and spread of such serious agricultural pests as Gypsy and Brown Tail Moth, Citrus White Fly, Khapra Beetle, Japanese Beetle and various Fruit Flies, we conduct annual surveys and insect trapping programs throughout the County.

Calls	
Traps	Used

2,452 276

# WEED CONTROL

We continually survey the County's agricultural and suburban areas in order to detect primary or secondary noxious weeds. These weeds, which by their growth and reproduction habits, are extremely difficult to eradicate. Control work, under a service agreement with the State Division of Highways, is done along designated State highways. The County is reimbursed for this work.

Calls	
Acres	Inspected
Acres	Treated

518 12,744 228.82

# OTHER ACTIVITIES

- A total of 11,902 service calls were received from the public this year.
   They dealt with plant insect and disease control, weed control and various other agricultural and home garden problems.
- Attended a total of 366 meetings dealing with problems related to our work and sponsored by the State Department, the University of California,

scientific groups and other agricultural organizations. During the year we examined and identified submitted samples of insects,

- diseases, weed pests and plant material.
- 4. Acting as representatives of the United States Department of Commerce we operated and maintained two weather stations.
- 5. Weed abatement on unimproved properties in two residential districts was contracted out. The proportioned cost was figured for assessment on these properties.
- During the year we provided speakers for garden, farm and service organizations and school groups.
- Monthly and annual reports were compiled and forwarded to the State Director of Agriculture and a monthly narrative and statistical report was sent to the County Board of Supervisors.
- 8. Prepared weekly reports dealing with the harvesting and handling of crops and livestock, and the weather's effect upon them. These reports are sent to the California Crop and Livestock Report Service.
- Growing grounds for foreign plant shipments were given post-entry quarantine inspections.
- Elm trees were sprayed along county roads. The spray was applied to 10. control a serious pest of elm trees, Elm Leaf Beetle.
- We assisted the Agricultural Extension Service in disseminating information and publicutions supplied by the University of California, the United States Department of Agriculture and various other agencies.
- 12. We cooperated with the State Department on problems pertaining to poison residue on edible crops.
- Through the use of Marketing Orders, control of certain agricultural commodities is achieved. These orders are requested by the producers and lead to a superior quality product for the consumer and a greater return for the producer. We assisted the Artichoke and Brussels Sprouts Advisory Boards.
- Cooperated with the State Department of Agriculture in maintaining a seed potato disease test plot on the Coastside.
- In matters relating to agriculture we assisted the Air Pollution Control 15.
- Cooperated with the County Health & Welfare Department and the Industrial Safety Division in matters involving possible injury to agricultural workers from improper handling of pesticides.

Calif. San Mateo County. Agr. Commissioner. Report (annual). 1966.

# AGRICULTURAL REPORT 1966

**OUR 1966 STATE FAIR EXHIBIT** 

# SAN MATEO COUNTY

AGRICULTURAL COMMISSIONER

Honorable Board of Supervisors
County of San Mateo
and
Earl Coke, Director
State Department of Agriculture

#### Gentlemen:

Under the provision of Section 65.5 of the California Agricultural Code, I submit the annual report showing the acreage, production and value of all the agricultural commodities, including livestock, grown in San Mateo County during 1966. Not taken into consideration is the cost of producing, harvesting and packaging.

The total value of \$19,808,137 represents an increase of \$1,169,649. Once again, Carnations set a new record for a single crop with a value of \$3,109,000. In second place we had Brussels Sprouts valued at \$1,726,000.

Floral and Ornamental Plant production value increased \$311,000 over last year. Besides Carnations, with a gain of \$324,000, substantial increases were recorded by Flowering Pot Plants, Chrysanthemums, Roses, Iris, Shasta Daisies, etc., while Ornamental Nursery Stock, Strawflowers, Gardenias, Orchids, etc., sustained losses.

<u>Vegetables</u> showed a net gain of \$526,000, with Brussels Sprouts leading with a \$252,000 increase, followed by Winter Squash, Lettuce, Potatoes, Peas, etc. On the losing side we had Artichokes, Cabbages, Chard, etc.

Field Crops gained \$12,000 with Hay and Dry Beans leading the way.

Fruit and Nut returns were down \$11,400 due to a decrease in Strawberry acreage, and loss of early crops caused by late spring rains.

<u>Livestock and Poultry</u> up \$353,000 with more beef stock and milkers sold at good prices.

I gratefully acknowledge the assistance I have received from many agencies and persons who made available the information contained in this report.

I also wish to extend my sincere appreciation to Ian J. Campbell, Chief Deputy Commissioner, who will retire on May 31, 1967 after 31 years of dedicated service to our department.

Respectfully submitted,

Victor A. Canavese, Commissioner Department of Agriculture

County of San Mateo

VAC:mw 600 - 3/67

# FUNCTIONS AND ACTIVITIES

# SAN MATEO COUNTY DEPARTMENT OF AGRICULTURE

Year - 1966

The principal functions and responsibilities of this department include:

To promote and protect the agricultural industry.

To protect and benefit both grower and consumer by enforcing certain provisions of the Agricultural, Administrative and other California State Codes.

Within the authority delegated to us, to further protect the health and safety of man and animal.

This work is performed under the general direction of the State Director of Agriculture.

Additional responsibilities may be assigned by the County Board of Supervisors.

Information outlining the activities of this department follow:

#### APIARY

Each year all owners of bees must register with the Agricultural Commissioner. The primary purpose of this regulation is to prevent the spread of American Foul Brood disease and other serious and highly contagious bee diseases. If inspection indicates American Foul Brood, which is incurable, the bees are required to be destroyed.

	<u>Apiaries</u>	Colonies

Destroyed	3	9

#### CERTIFICATION

Foreign countries, other states and counties regulate the movement of plants and plant products into their jurisdictions by requiring that all incoming shipments are certified free from serious pests. To comply with these regulations the following certificates were issued:

			53,247
Intrastate			54,873
Interstate	and	Foreign	54,075

#### CIVILIAN DEFENSE

As County Representative of the Food Administration Division of the California Disaster Office, we keep a current inventory of the wholesale foods in the County, for use in the event of a serious emergency.

Calls

#### FAIRS

San Mateo County's exhibit at the California State Fair in Sacramento is designed, constructed and maintained by this department. By the careful selection, sorting and arranging of flowers and ornamental plants, supplied by more than 60 county growers, the department has consistently won first prize on the feature exhibit and sweepstakes in the cut flower competition against other counties. In 1966 a record \$2,255 was won and deposited in the County treasury.

The department is also involved in the organization of the County Fair and Floral Fiesta and the Agricultural Commissioner is a member of its Board of Directors.

Calls

701

#### FIELD, HOME AND ORCHARD

Advice is furnished to farmers, orchardists, nurserymen, park departments, schools, pest control firms, home owners and other jurisdictions on numerous horticultural problems. Their problems involve the identification and control of insects, diseases and genetic defects, weed pests, and the cultural care of agricultural and ornamental plants.

Calls

1,816

#### LABORATORY

Upon request, submitted water samples are analyzed to determine if the saline content could cause plant injury.

Tests Made

13

To determine the presence of Burrowing Nematode and other serious parasitic nematode pests, we prepare and process plant root and foliage specimens in our laboratory. Specimens are then forwarded to the Bureau of Plant Pathology for determination.

Tests Made 232
Times Plant Parasitic Nematodes Found 37

#### NURSERY INSPECTION

A total of 237 plant nurseries, doing an annual business in excess of \$2,900,000 are located in San Mateo County. Each location is inspected not less than once annually in order that required degrees of cleanliness, provided for by Nursery Inspection Regulations, are maintained.

Calls	1,574
Nurseries Inspected	299
Notices of Noncompliance	111
Intercounty Nursery Stock Certificates Issued	53,160
Nurseries Qualified to Use	
Intercounty Certificates	70

#### PEST CONTROL

Agricultural Pest Control Operators must conform with all County and State rules and regulations governing the conduct of their business. They must annually secure a state license and register with the Agricultural Commissioner. The department regulates the use of all chemicals designated as injurious or restricted. Users, in order to buy or apply these chemicals, must secure a permit from this department. These products could be dangerous to human, animal and plant life.

Permits Issue	ed		229
Pest Control	Operators	Registered	78

#### PLANT QUARANTINE

The purpose of Plant Quarantine is to prevent the introduction and spread of harmful plant pests within the County and State. All incoming plants and plant products are required to be held for agricultural inspection. This work is performed at 191 air, rail and truck terminals, post offices, express agencies and other points of entry within the County. In 1966, 90 shipments, found to contain serious agricultural pests, were intercepted and rejected.

00113	,0,0,	
	RELEASED	REJECTED
Shipments	10,632	90
Plants	8,043,701	28,777

#### PREDATORY ANIMAL CONTROL

Calls

To protect livestock and because many small predatory animals are potential rabies carriers, the department, in cooperation with the United States Department of Interior and the California Department of Agriculture, controls these animals. During 1966 damage included loss of 93 head of livestock, 306 domestic fowls and 442 wild game.

Calls	1,266
Bobcats Taken	34
Coyotes Taken	105
Foxes Taken	81
Others Taken (Raccoons, Skunks, etc.)	265

#### RODENT AND PEST ANIMAL CONTROL

Ground squirrels are serious agricultural pests and are known carriers of human diseases, such as Tularemia and Bubonic Plague. Because of this, the department conducts a countywide ground squirrel eradication program. Poison baits to control rats, gophers and field mice are sold to commercial growers on a cost basis. Our cooperation is also extended to the County Health Department in urban area rodent control.

Calls		557
Acres	Inspected	11,163
Acres	Treated	178

#### SEED INSPECTION

For the purpose of insuring compliance with the California Seed Law's quality standards, agricultural and vegetable seed is inspected.

Calls	360
Dealers	223
Lots inspected	1,477
Lots in Violation	76
Official Samples Taken	17

#### **STANDARDIZATION**

In order to protect both producers and consumers, a major activity of our department is the inspection of fresh fruits, vegetables, eggs, honey, nuts and poultry meat. During 1966 the following field, packing house, wholesale and retail market inspections were made:

C-11-	16 2	257
Calls	16,2	-24

COMMODITIES	INSPECTIONS	VIOLATIONS
Produce (containers)	9,434,124	74,372
Eggs (dozens )	2,927,792	82,947
Poultry (packages )	295,630	120
Honey (containers)	336,075	-

The Golden Gate Produce Terminal in South San Francisco continues to be one of the largest wholesale fruit and vegetable outlets in the West. Produce at the terminal is received and sold throughout California, the United States and many foreign countries. The 1966 gross was reported to be over 94 million dollars.

#### STATISTICS

As required by the State Agricultural Code, the department publishes an annual report showing San Mateo County's acreage and production value of crops grown. Upon request, copies are furnished to other agricultural, educational and governmental agencies; allied industries, and interested parties. Statistical data regarding specific crops is furnished upon request.

#### SURVEY AND PEST DETECTION

To detect and prevent the introduction and spread of such serious agricultural pests as Japanese Beetle, Gypsy and Brown Tail Moths, Citrus White Fly, Khapra Beetle and various Fruit Flies, annual surveys and insect trapping programs are conducted throughout the county.

Calls	2,156
Traps Used	326

#### WEED CONTROL

Certain weeds, which by their growth and reproductive habits, are extremely difficult to eradicate have been designated by the State Department of Agriculture as primary and secondary noxious weeds. Surveys of the county's agricultural and suburban areas are continually conducted to determine their

presence; control work, under a service agreement with the State Division of Highways, is performed along designated state highways. The county receives reimbursement for this work.

Calls 380
Acres Inspected 5,543.25
Acres Treated 169.95

#### OTHER ACTIVITIES

- 1. During 1966 a total of 12,129 public service calls were received.

  Problems of concern included plant insect and disease control, weed control and agricultural and home garden cultural procedures.
- 2. At the request of the State Department, the University of California, scientific groups and various agricultural organizations, staff members attended 335 meetings involving professional problems.
- 3. As United States Department of Commerce representatives, this department was responsible for the operation and maintenance of two Coastside weather stations.
- 4. Supervised the abatement of weeds on unimproved properties in two residential districts and computed proportional costs for property assessments.
- 5. Staff members spoke before garden, farm and service organizations and school groups.
- 6. Prepared and issued monthly and annual reports to the State Director of Agriculture and, in addition, a narrative and statistical report was compiled monthly for the County Board of Supervisors.
- 7. Reported weekly to the California Crop and Livestock Report Service on the harvesting and handling of crops and livestock, and the weather's effect upon them.
- 8. Post-entry quarantine inspections were performed at the growing grounds of foreign plant importers.
- 9. Applications of insecticides were applied to elm trees along county roads to control the serious elm pest, Elm Leaf Beetle.
- 10. In cooperation with the Agricultural Extension Service, information furnished by the University of California, the United States Department of Agriculture and various other agencies was distributed.
- 11. Collaborated with the State Department of Agriculture on problems related to poison residue on both edible crops and animals.
- 12. To achieve a superior quality product for the benefit of the consumer and to promote a more equitable return to the growers, Marketing Orders, requested by the industry, control certain agricultural commodities.

  Our assistance was extended to the Artichoke and Brussels Sprouts Advisory Boards.

- 13. Assisted the State Department of Agriculture in the maintenance of a seed potato disease test plot on the Coastside.
- 14. We cooperated with the Air Pollution Control Board in matters relating to agriculture.
- 15. Extended assistance to the County Health and Welfare Department and the State Division of Industrial Safety in cases involving possible injury to agricultural workers from the improper handling of pesticides.

# AGRICULTURAL REPORT 1967

**OUR 1967 STATE FAIR EXHIBIT** 

UNIVERSITY CF CALIFORNIA DAVIS

MAR 29 1968

GOV'T. DOCS. - LIBRARY

# SAN MATEO COUNTY

AGRICULTURAL COMMISSIONER

Honorable Board of Supervisors County of San Mateo and Earl Coke, Director State Department of Agriculture

Gentlemen:

With great pleasure I submit to you the Annual Crop Report, indicating the value, acreage, and production of all the agricultural commodities, including livestock, grown in San Mateo County during 1967. This report is required by Section 65.5 of the California Agricultural Code and represents the gross value received by the growers.

A new all-time record of \$26,032,152, shows a gain of \$5,906,035 over last year. Carnations once again set a new single crop record of \$4,153,000, an increase of \$1,044,000, and Flowering Potted Plants were second with a value of \$3,243,000.

This substantial increase was made possible by the several glasshouses built on the Coastside the last few years, which have reached full production capacity, by favorable weather and marketing conditions and by the continuously developing efficiency of our growers.

Floriculture and Ornamental Crops increased \$4,393,570 to \$16,759,550. Besides Carnations and Flowering Plants, substantial gains were shown by Chrysanthemums and Roses, while Callas, Iris and Stocks sustained losses.

<u>Vegetables</u> gained \$1,117,305 to \$5,978,520. Healthy gains were recorded by Mushrooms, Pumpkins, Chard and Lettuce, however Peas, Potatoes, Celery and Artichokes were on the losing side.

 $\underline{\text{Livestock}}$  was up \$330,268 to \$2,465,122 with Pigs and Hogs showing a gain and Cattle and Calves losing.

Field and Seed Crops increased \$49,350 to \$566,640 with Hay, Pasture, Brussels Sprouts and Fava Bean seed leading, while Oats, Barley and Dry Beans were losing.

Fruit and Nut Crops gained \$15,542 to \$262,320 with Strawberries and Walnuts on the plus side, while Apples, Pears and Prunes declined severely.

I wish to express our appreciation to the many individuals, firms and agencies who have made available the information contained in this report.

Respectfully submitted,

Victor A. Canavese, Commissioner Department of Agriculture County of San Mateo

VAC:mw 600 - 3/68

#### FUNCTIONS AND ACTIVITIES

#### SAN MATEO COUNTY DEPARTMENT OF AGRICULTURE

Year - 1967

The functions and responsibilities of this department are authorized and under the direction of the State Department of Agriculture. These include the enforcement of applicable provisions of the Agricultural, Administrative and other California State Codes and Federal Regulations; advancement of the agricultural industry; protection of both growers and consumers and, within the authority delegated, to protect the health and safety of man and animal.

Additional responsibilities and activities may be assigned by the County Board of Supervisors.

Following is detailed information covering our activities:

#### APIARY

Registration and inspection of apiaries in the county are made every year, as required by the State Agricultural Code. This helps to prevent the spread of American Foul Brood, and other serious and highly contagious bee diseases. Apiaries or colonies infected with American Foul Brood are required to be destroyed.

	<u>APIARIES</u>	COLONIES
Inspections Diseased	79 12	804 12
Destroyed	10	10

#### CERTIFICATION

Shipments of plants and plant products exported into foreign countries, other states and counties must be inspected and certified as being pest free. In compliance with these regulations the following certificates were issued:

Intrastate			58,173
Interstate	and	Foreign.	53,390

#### CIVILIAN DEFENSE

A current inventory of the wholesale food stocks in the county is maintained, for use by the California Disaster Office, in the event of a serious emergency.

#### FAIRS

Design, construction and maintenance of San Mateo County's floral exhibit at the California Exposition, in Sacramento, is one of the major projects. Flowers and ornamental plants were supplied by 62 county growers. San Mateo County has been a consistent winner and in 1967 a record \$2,300 was won and deposited in the County Treasury.

Assistance in the judging and organization of the San Mateo County Fair & Fiesta is given and the Agricultural Commissioner is an ex officio member of the Board of Directors.

702

#### LABORATORY

Samples of irrigation water may be submitted for salinity analysis. High saline content may cause plant injury.

Tests Made

7

Poison grains for the control of pest animals is mixed. 1,100 pounds were prepared in 1967.

Specimens of plant roots and foliage are prepared, processed and forwarded to the Bureau of Plant Pathology, Sacramento, for laboratory analysis to determine the presence of Burrowing Nematode and other serious parasitic nematode pests.

Samples Taken and Tests Made	365	;
Times Plant Parasitic Nematodes	Found 72	•

#### NURSERY INSPECTION

San Mateo County has 233 plant nurseries with an annual business in excess of \$3,050,000. State Nursery regulations provide that each location be inspected not less than once each year for compliance with cleanliness and grading standards.

Calls	1,569
Nurseries Inspected	263
Notices of Noncompliance	81
Intercounty Nursery Stock Certificates Issued	58,076
Nurseries Qualified to Use Intercounty Certificates	73

#### PEST CONTROL ENFORCEMENT

State regulations provide that all agricultural Pest Control Operators must secure a state license annually and register with the Agricultural Commissioner in those counties where they perform work.

Permits to buy or apply injurious or restricted chemicals are required. Issuance of these permits more effectively controls their use, as these chemicals could prove dangerous to human, animal and plant life.

Calls	89
Permits Issued	238
Pest Control Operators Registered	83

#### PEST CONTROL INFORMATION

Assistance and advice to growers, nurserymen, park departments, schools, pest control firms and home owners is given on horticultural and pest control problems. Identification of insects, plants, diseases and weeds, as well as information on the cultural care of agricultural and ornamental plants, is also available.

Calls

2,084

#### PLANT QUARANTINE

Quarantine regulations require that all incoming plants and plant products be held for agricultural inspection to prevent the introduction and dissemination of pests and diseases within the county and state. Inspections are made at 191 air, rail and truck terminals, post offices, express agencies and other points of entry within the county.

Calls		10,145
	RELEASED	REJECTED
Shipments Plants	14,049 6,857,807	91 10,004

#### PREDATORY ANIMAL CONTROL

In cooperation with the United States Department of the Interior and the California Department of Agriculture, San Mateo County has the services of a full time predatory animal hunter, to maintain control of small predators in the area which are potential rabies carriers. During 1967 losses from these animals included 45 head of livestock and 180 domestic fowl.

Calls	1,129
Bobcats Taken	29
Coyotes Taken	163
Foxes Taken	45
Others Taken (Raccoons, Skunks, etc.)	147

#### RODENT AND PEST ANIMAL CONTROL

A countywide program for the eradication of ground squirrels, known carriers of Tularemia and Bubonic Plague, is constantly maintained. Poison baits for control of rats, gophers and field mice are sold to commercial growers on a cost basis. Cooperation is given to the County Health Department in their urban area rodent control work.

Calls		697
Acres	Inspected	11, h00
Acres	Treated	166

#### SEED INSPECTION

Inspection is made of agricultural and vegetable seed to insure compliance with quality standards of the California Seed Law.

Calls	348
Dealers	210
Lots Inspected	1,716
Lots in Violation	62
Official Samples Taken	35

#### STANDARD I ZATION

Inspections of fresh fruits, vegetables, eggs, honey, nuts and poultry meat, for conformity to state standards, are made which affords protection to

#### STANDARDIZATION - CON'T.

producers and consumers. During 1967 the following field, packing house, whole-sale and retail market inspections were made:

Calls

14,733

COMMODITIES	INSPECTIONS	VIOLATIONS
Produce (containers)	9,617,275	75,850
Eggs (dozens )	1,599,672	64,039
Poultry (packages )	171,390	16
Honey (containers)	180,775	48

The Golden Gate Produce Terminal in South San Francisco is recognized as one of the largest wholesale fruit and vegetable outlets in the West. Over 8,707,000 containers of produce were received and inspected during 1967, with a reported sales gross of over 97 million dollars.

#### STATISTICS

In compliance with the State Agricultural Code an annual report is prepared showing the acreage and production value of crops grown in San Mateo County. This publication is available to agricultural, educational and governmental agencies; allied industries and interested parties. Statistical data for specific crops is furnished upon request.

Calls

736

#### SURVEY AND PEST DETECTION

Countywide annual surveys and insect trapping programs are undertaken for detecting and preventing establishment of serious agricultural pests, such as Japanese Beetle, Gypsy and Brown Tail Moths, Citrus White Fly, Khapra Beetle and various Fruit Flies.

Cal	l	s	
-	Γι	raps	Used

2,448 334

#### WEED CONTROL

The State Department of Agriculture has classified as primary and secondary noxious weeds many plants which, because of their growth and reproduction habits, are extremely difficult to eradicate. Surveillance of the county's agricultural and suburban areas, and Southern Pacific's right-of-way, is maintained and assistance in control is given. However, the control of noxious weeds on roads leading to the agricultural area is performed by our department. Under a service agreement with the State Division of Highways weed eradication work is performed along designated state highways. The county is reimbursed for this work.

### OTHER ACTIVITIES

- 1. Public service calls during 1967 totaled 11,930. Problems presented were varied and included plant insect and disease control, weed control, agriculture and home garden culture practices.
- 2. A total of 348 meetings were attended by various staff members. These were held by the State Department of Agriculture, the University of California, scientific panels and numerous agricultural organizations.
- 3. Operated and maintained two Coastside weather stations as representatives for the United States Commerce Department.
- 4. Supervised the abatement of weeds on unimproved properties in two residential districts and computed proportional costs for property assessments.
- 5. Speakers for garden, farm, school and service organizations were provided.
- Compiled and forwarded monthly and annual reports to the State Director
  of Agriculture. Also, a narrative and statistical report was prepared
  monthly for the County Board of Supervisors.
- 7. Completed a weekly report form for California Crop and Livestock Service on crops harvested, weather effects and livestock conditions.
- 8. Growing grounds of foreign plant importers were given post-entry quarantine inspections.
- 9. Insecticide sprays were applied to elm trees along county roads for control of the serious elm pest, Elm Leaf Beetle.
- Maintained two libraries for pertinent information furnished by the University of California, the U. S. Department of Agriculture and various other agencies.
- 11. Collaborated with the State Department of Agriculture on problems related to poison residue on edible crops for human or animal consumption.
- 12. At the request of the Industry Marketing Orders, control certain agricultural commodities. These insure a superior product for the consumer and a more equitable return to the grower. Assistance was given to the Artichoke, Brussels Sprout and Peach and Plum Advisory Boards.
- 13. Cooperated with the State Department of Agriculture in maintaining a seed potato disease test plot on the Coastside.
- 14. On agricultural problems assistance was given the Air Pollution Control Board.
- 15. Assisted the County Health and Welfare Department and the State Division of Industrial Safety in the investigation of cases involving possible injury to agricultural workers from the improper application or handling of injurious pesticides.
