California Department of Food and Agriculture

Agricultural Commissioners' Crop Reports

Ventura County

1966-1970

California County Agricultural Commissioners' Reports from the California Department of Food and Agriculture. This collection consists of annual crop and livestock data from each of the 58 California Counties. The collection covers 1915-1981; digitization of the rest of the collection is forthcoming.

This digitization project was funded by the Giannini Foundation of Agricultural Economics,
<http://giannini.ucop.edu/> .

The work was completed by the staff of the Giannini Foundation Library, University of California, Berkeley, <http://are.berkeley.edu/library/> . **Please contact the Library to consult the originals.**

Three vertical black bars of varying widths are positioned on the left side of the page. The bars are solid black and extend from near the top to near the bottom of the page. The middle bar is the widest, flanked by two narrower bars.

ANNUAL REPORT
to
THE BOARD OF SUPERVISORS
and
THE DIRECTOR
STATE DEPARTMENT OF AGRICULTURE

We submit a short resume of the major activities of the Agricultural Commissioner's office for the calendar year 1966,

The office of the Commissioner is charged with enforcement of the provisions of the Agricultural Code and local regulations pertaining to and for the protection of agriculture in general,

The data is presented in a summary-type form. We believe that all the facts necessary to present the statistics are here without the necessity of reading a long description.

We have had fine cooperation with all persons whom we serve, and we wish to offer our sincere thanks for the privilege of serving the public in our work.

QUARANTINE

Quarantine involves the holding of plant materials and appliances for inspection when they are moved from one place to another. Quarantine offers an opportunity to determine the presence of agricultural pests.

During the past year, Ventura County became one of the counties operating under an Inspection and Release program known as the "Pinto Tag" program. This was accomplished because of the requirement of cleanliness based upon inspection at point of origin. Many hours and trips were saved due to this agreement. We are now utilizing this time saved in performing origin inspection of our County's nurseries.

The following is a short summary of the work done on quarantine.

Interstate Quarantine

No. of Shipments Inspected	4,130
No. of Shipments Released	4,105
No. of Shipments Rejected	25
No. of Plants Inspected	2,248,948
No. of Plants Released	1,997,352
No. of Plants Rejected	251,596
No. of Plants Treated & Released	251,501
No. of Shipments of Grain Inspected	982
No. of Tons of Grain Inspected	74,815
No. of Tons of Grain Released	74,815
No. of Tons of Grain Rejected	-

Intrastate Quarantine

No. of Shipments Inspected	1,021
No. of Shipments Rejected	5
No. of Shipments Treated & Released	5
No. of Plants Inspected	1,873,790
No. of Plants Rejected	172
No. of Plants Treated and Released	172
No. of Shipments of Grain Inspected	13
No. of Shipments of Grain Released	13
No. of Tons of Grain Inspected	417

Quarantine - Total Hours Used 7,434

SHIP INSPECTION

No. of Ships Inspected and cleared	150
------------------------------------	-----

Ship Inspection - Total Hours Used 544

Export Certification

No. of Shipments Certified	4,693
No. of Shipments of Fruit Certified	4,350
No. of Packages Certified (Fruit, Vegetable, Seed, & Beans)	3,611,047
No. of Shipments of Seed Certified	343
No. of Packages of Seed Certified	26,532
No. of Pounds of Seed Certified	62,244
Export Certification - Total Hours Used	2,055

STANDARDIZATION

Standardization inspections are made to insure that the preparation and sale of products conform to minimum State law requirements of quality, packaging, and labeling.

During the year 1966, the following work was done on Standardization inspections:

Fruits, Nuts and Vegetables

No. of Inspections	19,676
No. of Containers Inspected	5,220,708
No. of Containers Rejected	15,626
No. of Shipments Certified	9,777
No. of Premises Visited	4,096
No. of Noncompliance Notices Issued	107

Eggs

No. of Lots Inspected	1,131
No. of Dozens Inspected	716,847
No. of Dozens Rejected	79,589
No. of Premises Visited	339
No. of Noncompliance Notices Issued	138

Poultry Meat

No. of Lots Inspected	996
No. of Packages Inspected	46,122
No. of Packages Rejected	720
No. of Premises Visited	292
No. of Noncompliance Notices Issued	11

STANDARDIZATION (contd.)

Honey

No. of Pounds of Honey Inspected	4,322
No. of Lots Inspected	155
No. of Premises Visited	49

Standardization - Total Hours Used	6,928
------------------------------------	-------

SEED INSPECTION

The following is a summary of Seed inspection work in Ventura County for the year 1966:

No. of Lots of Seed Inspected	1,746
No. of Lots of Seed in Violation	77
No. of Lots of Seed Seized or Destroyed	52
No. of Stop-Sale Orders Issued	21
No. of Official Samples Drawn	34
No. of Certifications Samples Drawn	9
No. of Custom (Federal) Samples Drawn	2
No. of Grade Samples Drawn	17

California Crop Improvement Program

Threshers & Warehouse Inspections	6
-----------------------------------	---

Seed Inspection - Total Hours Used	542
------------------------------------	-----

APIARY INSPECTION

Inspections are made in apiaries to detect the presence of serious diseases detrimental to bees. American Foulbrood is such a disease.

The following is a summary of the work done in Apiary Inspection:

	<u>No. of Apiaries</u>	<u>No. of Colonies</u>
Registered	279	18,345
Inspected	298	11,834
Infected (American Foulbrood)	74	360
Infected (European Foulbrood)	8	20
Burned (American Foulbrood)	51	171
Wax Salvage (American Foulbrood)	22	188

Percentage of American Foulbrood Infection - 3.5%

Apiary Inspection - Total Hours Used	1,849
--------------------------------------	-------

FIELD INSPECTION OF SEED CROPS
FOR SEED-BORNE DISEASES

A self-supporting function of the Agricultural Commissioner's office, for the purposes of certification. This program operates under the authority granted by the Director of Agriculture and is in collaboration with the Bureaus of Plant Quarantine and Plant Pathology of the State Department of Agriculture.

Section 9113.31 - 9113.32 of the Ventura County Ordinance Code establishes the schedule of fees to cover the cost of the program.

The following is a summary of the work carried out in 1966:

Tomatoes -	441 acres (46 varieties) inspected
Peppers -	401 acres (28 varieties) inspected
Beans -	448 acres (5 varieties) inspected
Squash -	92 acres (8 varieties) inspected
Cucumbers -	49½ acres (9 varieties) inspected
Cantaloupes -	5 acres (2 varieties) inspected

19 specimens of plants were submitted to the Pathology Laboratory for analysis.

No seed-borne diseases were found and all varieties were declared eligible for certification.

Field Inspection - Total Hours Used	1,561
-------------------------------------	-------

PLANT DISEASE INSPECTION

The following is a summary of plant disease inspections made in Ventura County for the year 1966.

This summary does not include the inspection of vegetable crops reported elsewhere in this report and listed under Field Inspection for Seed-Borne Disease.

PLANT DISEASE INSPECTION (contd.)

<u>Host Plants</u>	<u>No. of Inspections</u>
Avocados	61
Citrus	176
Deciduous Fruits & Nuts	207
Grapes & Caneberries	12
Vegetable Crops	22
Field Crops	31
Melons, Cucumbers & Squash	4
Flower Crops & Bulb Crops	46
Ornamental Shrubs & Trees	549
Lawns	96
Alfalfa	3
Strawberries	12
Miscellaneous Plants	16
Total Number of Inspections	1,235

NOTE: Phytophthora cinnamoni - This is a serious disease of avocados. Two new infections, involving a fraction of an acre, were discovered in 1966. This brings the total infected acreage to 25, and the number of infections to 32.

Plant Pathologists of the State Department of Agriculture spent 85 hours on a number of the plant disease problems listed.

Plant Disease Inspection - Total Hours Used 1,034

NURSERY INSPECTION

All nurseries are inspected at least two times each year, others receive a quarterly inspection. All nurseries must maintain a high degree of pest cleanliness.

NURSERY INSPECTION (contd.)

The following is a summary of Nursery Inspection in Ventura County for the year 1966:

No. of Inspections of Nurseries for Plant Pests	669
No. of Partial or Reinspections to Determine Results of Treatments	164
No. of Inspections for Grades and Standards	25
No. of Nurseries found with 'A' Pests	0
No. of Nurseries found with 'B' Pests	13
No. of Nurseries found with 'C' Pests	22
No. of Noncompliance Notices Issued	35

The "A" and "B" pests are considered serious agricultural pests and eradication is required in Ventura County.

The following surveys were conducted in County nurseries during 1966:

<u>Nematodes</u> (Root Knot and Citrus)	10 Nurseries - 148 acres
<u>Celery Free Period</u> (Certification for Celery Mosaic)	
<u>Red Band Needle Blight</u>	14 Nurseries - 28,141 hosts
<u>Woolly White Fly</u>	2 Nurseries - 3 acres
<u>Primary Noxious Weeds</u>	

A total of 80,145 avocado seeds and $211\frac{1}{2}$ quarts of citrus seed were heat-treated by the Commissioner's office to insure freedom of serious seed-borne disease in nursery seed beds.

Nursery Inspection - Total Hours Used	4,004
---------------------------------------	-------

PEST CONTROL SUPERVISION

The urbanization of Ventura County continues to complicate the safe application and storage of insecticides and herbicides. Keeping users aware of the dangers involved with the application of the very large number of newly developed chemicals presents a never-ending challenge.

Many of these materials may be purchased and used only under permit from the Agricultural Commissioner. Frequently, it is necessary to make an inspection before issuing a permit.

No. of Inspections - 3,816	No. of Hours Expended - 2,771
----------------------------	-------------------------------

ORCHARD INSPECTION

The Commissioner's office is charged with the responsibility of keeping aware of the pest conditions within the County. Personal inspections are made to determine pest status and what control measures, if any, should be taken.

Some of the more important pests revealed by inspection this past year include:

<u>Citrus:</u>	Black Scale, Citrus Aphis, Citrus Mites, Mealybugs, Orange Tortrix, Citrus Thrips, Red Scale, Yellow Scale, Soft Brown Scale, and Brown Rot.
<u>Avocados:</u>	Brown Mite, Omnivorous Looper.
<u>Walnuts:</u>	Husk Fly, Codling Moth, and European Red Mite.
<u>Field Crops & Vegetables:</u>	Spider Mite, Aphis, Loopers, Corn Earworm, Lygus Bugs, Mildew, and Smog Injury.

Orchard Inspection - Total Hours Used 649

BIOLOGICAL CONTROL OF INSECTS

The production of beneficial insects in Ventura County continues to be of great importance. Four citrus association insectaries and one privately-owned insectary produced the following parasites and predators in 1966:

<u>Parasite</u>	<u>Host</u>	<u>Number</u>
<u>Trichogramma sp.</u>	Lepidoptera sp.	1,248,370,000
<u>Aphytis melinus</u>	Red Scale	148,880,830
<u>Cryptolaemus sp.</u>	Mealybug	38,878,550
<u>Pauridia sp.</u>	Mealybug	7,600,000
<u>Metaphycus sp.</u>	Black Scale	7,311,500
<u>Leptomastix sp.</u>	Mealybug	55,000
<u>Stethorus sp.</u>	Mites	5,000
<u>Vedalia</u>	Cottony-Cushion Scale	600
		<u>1,451,101,480</u>

GRAND TOTAL 271,114

RODENT CONTROL

All of Ventura County, with the exception of one area, is designated a Plague area. Ground squirrels and rats are known carriers of this disease and control measures are taken to preclude any increase in population of these rodents in Ventura County. These control measures also help in keeping the economic damage created by these pests to a minimum.

The materials used during 1966 for Plague Control are listed below:

<u>Material</u>	<u>Amount</u>
Strychnine-treated grain	247 lbs.
Warfarin-treated grain	3,261 lbs.
Zinc Phosphide-treated bait	7,223 lbs.
"1080"-treated bait	9,196 lbs.
Methyl Bromide	3,147 lbs.
Total Number of Acres Treated -	436,059
Rodent Control - Total Hours Used	10,368

Miscellaneous Rodent Control:

Control of gophers is performed under contract with the California State Division of Highways and also in certain areas where gophers are a menace to County road maintenance.

Bird control, when excessive damage to agricultural crops is encountered, is conducted by authorized personnel of this department.

The following is a summary of the materials used and the acreages treated during 1966 in miscellaneous rodent control work performed by the Agricultural Commissioner's staff:

Gophers:

<u>Material</u>	<u>Amount</u>
"1080"-treated bait	600 lbs.
Strychnine-treated grain	2,833 lbs.
3% Strychnine-treated grain	1,065 lbs.
Straight Strychnine	116 ozs.
Zinc Phosphide-treated bait	5 lbs.
Warfarin-treated grain	306 lbs.
Total Number of Acres Treated -	13,021

Miscellaneous Rodent Control (contd.)

Jackrabbits:

Strychnine-treated bait totaling 1,656 lbs. was used in treating 3,120 acres in an effort to prevent crop damage by jackrabbits.

Birds:

Blackbirds, Horned Larks, Linnets, Crowned Sparrows, English Sparrows and Starlings were the bird species causing the most extensive damage to crops. Prebait in the amount of 544 lbs. and 1,130 lbs. of strychnine-treated bait were used to treat 63 properties.

Miscellaneous Rodent Control - Total Hours Used 3,202

WEED CONTROL

The following is a summarization of the weed control work done by the Agricultural Commissioner's office during 1966.

<u>Type of Weed</u>	<u>Area of Infestation</u>
Blueweed	10,890 sq. ft.
Gaura	10,890 sq. ft.
Hoary Cress	827,540 sq. ft.
Italian Thistle	348,480 sq. ft.
Johnsongrass	348,480 sq. ft.
Russian Knapweed	239,580 sq. ft.
Whitehorse Nettle	130,680 sq. ft.
Yellowstar Thistle	174,240 sq. ft.

A program was carried out along all County roads and streets to assist in reducing the cost of roadside maintenance by mechanical means. A total of 1,595 acres were treated by employees of this department.

WEED CONTROL (contd.)

The following listed materials were used in Weed Control work in 1966:

<u>Material</u>	<u>Amount Used</u>
Amatrol-T	38.0 gals.
Amino Triazole	2,601.0 lbs.
Atrazine	2,965.0 lbs.
Dowpon	2,667.0 lbs.
Fenac	9.0 gals.
Hyvar-X	2,025.0 lbs.
Karmex	150.0 lbs.
Oil	9,312.50 gals.
Paraquat	9.0 gals.
Simazine	5,398.0 lbs.
Surfactant	140.0 gals.
Telvar	2,629.0 lbs.
Trysben-200	11.0 gals.
2,4,5-T	4.50 gals.
Weedone - #648	13.0 gals.
Weedone - #64	24.0 gals.

VENTURA COUNTY
DEPARTMENT OF AGRICULTURE
Agricultural Building
Santa Barbara and Eighth Streets
Santa Paula, California

TO THE DIRECTOR OF THE STATE DEPARTMENT OF AGRICULTURE:

Pursuant to Section 65.5 of the Agricultural Code, we submit the estimated Production, Crop Values and Acreages for the calendar year 1966.

The totals shown for the year 1966 are the highest on record for Ventura County. The increase can be attributed to Lemons, Strawberries, and Vegetable acreage, and to Eggs. Nursery stock also showed an increase, both in acreage and production.

Lima bean acreage, beet acreage and other field crops showed a decrease in acreage.

The values given in this report are F.O.B. and include all costs pertaining to growing, harvesting and selling, and in no way can they be construed as net profit. Many crops suffered from climatic conditions, smog, and low prices.

The Labor situation was somewhat easier than 1965 - workers stayed on the job for a longer period of time - and were more eager to harvest the crops.

The costs of cultural practices, harvesting and packaging continued to rise.

As in the past, we continued to lose acreage to subdivisions - schools - industry, etc., yet the production level remained high.

Canning tomatoes again were harvested mainly by mechanical harvesters.

We wish to extend our sincere appreciation and thanks to the many persons who gave of their time in furnishing us with data to compile this report.

C. J. BARRETT
Agricultural Commissioner

VENTURA COUNTY
DEPARTMENT OF AGRICULTURE

Agricultural Building
Santa Barbara and Eighth Streets
Santa Paula, California

TO THE DIRECTOR OF THE STATE DEPARTMENT OF AGRICULTURE:

Pursuant to Section 2279 of the Agricultural Code, we submit the estimated Production, Crop Values and Acreages for the calendar year 1967.

The totals shown for the year 1967 are somewhat below the record year of 1966. This can be attributed to lower prices for oranges and for lower prices in some of the vegetable crops.

The total harvested acreage does not reveal the planted acreage, for extensive acreages were not harvested due to smog, insects and disease.

The values given in this report are F.O.B. figures and include all costs pertaining to growing, harvesting and selling; and in no way can they be considered as net returns to growers. In many cases, the cost of production exceeded the returns from the sale of the crops.

There was an increase in mechanical harvesting of certain crops, especially celery and canning tomatoes.

Sufficient labor was available for the growers to harvest their crops.

We wish to extend our sincere appreciation and thanks to the many persons who gave of their time in furnishing us with data to compile this report.

C. J. BARRETT
Agricultural Commissioner

1967

AGRICULTURAL CROP ACREAGES

The following are the acres devoted to major agricultural crops in Ventura County for the year 1967. A re-survey of the acreages conducted during the year has resulted in last year's figures being replaced. The changes are the result of tree removals or additional plantings.

Non-bearing acreages are those on which the trees or plants are five years of age or less.

CROP	BEARING ACRES	NON-BEARING ACRES	TOTAL ACRES
Almonds	11		11
Apples	53		53
Apricots	203		203

and

RICHARD LYNG, DIRECTOR OF AGRICULTURE
STATE OF CALIFORNIA

VENTURA COUNTY
DEPARTMENT OF AGRICULTURE

Agricultural Building
Santa Barbara and Eighth Streets
Santa Paula, California

TO THE DIRECTOR OF THE STATE DEPARTMENT OF AGRICULTURE:

Pursuant to Section 2279 of the Agricultural Code, we submit the estimated Production, Values and Acreages of Ventura County for the calendar year 1968.

The total estimated value of \$160,845,600 for 1968 is the highest on record for Ventura County and the increase over 1967 can be attributed to increased prices per carton of citrus, increased acreage and production of strawberries, increased prices for poultry products, and increased price for tomatoes.

It should be remembered that these values quoted are only the estimated values of the agricultural crops and in no way can they construed as profits to the growers.

Cultural costs have risen and in many cases very little profit was realized on certain crops.

However, this total value does reflect the boon to the economy of Ventura County.

C. J. BARRETT
Agricultural Commissioner

CJB:es

DEPARTMENT PERSONNEL

Commissioner

C. J. Barrett

Deputy Commissioners

John C. Allee (Quarantine, Surveys)
Clyde W. May (Pest Control)
John L. Schall (Weed and Vertebrate Control)

Supervising Inspectors

Verner E. Holmer (Nursery, Seed and Plant Disease)
W. Mark Jones (Camarillo-Oxnard Districts)
Paul B. Travis (Standardization)

Senior Inspectors

Donald Anderson (Ventura District Inspector)
Gerald Ashton (Ojai District Inspector)
Murl Boren (Santa Paula-Fumigation and Nursery Inspection)
Richard Chase (Oxnard-Quarantine)
I. L. Clements (Moorpark-Simi-District Inspector)
Harold R. Hawkins (Fillmore-Bardsdale District Inspector)
George D. Peters (Oxnard-Pest Control)
Edward R. Urban (Santa Paula District Inspector)
Richard Watts (Camarillo-Somis-Thousand Oaks District Inspector)
Kenneth G. Weiss (County-wide Egg Standardization, Poultry Meat
Standardization)

Agricultural Inspectors

Bruce Burns (Moorpark-Simi - Weed & Rodent Control)
Gene Fidel (Oxnard-Standardization)
Donald Hare (Oxnard-Standardization)
Dewey Runkle (Camarillo-Somis-Thousand Oaks - Weed and Rodent
Control)
Larry Stocker (County-wide - Apiary Inspector)
Floyd Ward (Santa Paula - Weed and Rodent Control)

Senior Agricultural Field Assistant

Glen Hackworth (Weed and Rodent Control)
Gayland Hagy (Weed and Rodent Control)
Carroll Hannah (Weed and Rodent Control)
James Hillis (Weed and Rodent Control)

Senior Account Clerk

Shirley Carter

Intermediate Clerk-Typists

Elizabeth Smith
Ramona Chavez (Part-time)

1968

The following are the acres devoted to major agricultural crops in Ventura County for the year 1968. The changes are the result of tree removals or additional plantings.

Non-bearing acreages are those on which the trees or plants are five years of age or less.

Calif. Ventura Co. Agricultural Commissioner

VENTURA COUNTY

ANNUAL REPORT

AND
CROP STATISTICS

1969

AGRICULTURAL
COMMISSIONER

DEC 1 5 1971

VENTURA COUNTY
DEPARTMENT OF AGRICULTURE

Agricultural Building
Santa Barbara and Eighth Streets
Santa Paula, California

TO THE DIRECTOR OF THE STATE DEPARTMENT OF AGRICULTURE:

Pursuant to Section 2279 of the Agricultural Code, we submit the estimated Production, Values and Acreages of Ventura County for the calendar year 1969.

Floods and extremely cold temperatures raised havoc with the agricultural industry of the County. Recovery was general, however, and production resulted in the highest F.O.B. values ever recorded in County history.

A decrease of some eight million dollars for the valencia orange crop was due to the cold temperatures, resulting in poor quality, plus the extremely low price for the crop.

Higher prices received for lemons, tomatoes, strawberries, celery and chicken eggs accounted for the over-all increase.

It should be realized that these figures are based on F.O.B. values, and in no way tend to present the net profit for agriculture. As the F.O.B. prices increased, so did the cultural and harvest costs increase. Several of the major crops showed little or no profit to the growers.

Total acreage continues downward as subdivisions, schools, industries, and roads bite in to the farm land.

We wish to acknowledge the help of many persons in presenting these figures, and to thank them for their assistance.

C. J. BARRETT
Agricultural Commissioner

CJB:es

DEPARTMENT PERSONNEL

Commissioner

C. J. Barrett

Deputy Commissioners

John C. Allee (Quarantine, Surveys, Apiary)
Clyde W. May (Pest Control)
John L. Schall (Weed & Vertebrate Pest Control)

Supervising Inspectors

Verner E. Holmer (Nursery, Seed & Plant Disease)
W. Mark Jones (Camarillo-Oxnard Districts)
Paul B. Travis (Standardization) (Deceased August 4, 1969)

Senior Inspectors

Donald Anderson (Ventura District Inspector)
Gerald Ashton (Ojai District Inspector)
Murl Boren (Santa Paula-Fumigation & Nursery Inspection)
(Retired July 31, 1969)
Richard Chase (Oxnard-Quarantine)
I. L. Clements (Moorpark-Simi-District Inspector)
(Retired June 30, 1969)
Harold R. Hawkins (Fillmore-Bardsdale--Moorpark-Simi District
Inspector)
George D. Peters (Oxnard-Pest Control)
Edward R. Urban (Santa Paula District Inspector)
Richard Watts (Camarillo-Somis-Thousand Oaks District Inspector)
Kenneth C. Weiss (County-Wide Egg Standardization, Poultry Meat
Standardization)

Agricultural Inspectors

Bruce Burns (Moorpark-Simi - Weed & Rodent Control)
Gene Fidel (Oxnard-Standardization)
Donald Hare (Oxnard-Standardization)
Dewey Runkle (Camarillo-Somis-Thousand Oaks-Weed & Rodent Control)
Larry Stocker (County-wide--Apiary Inspector)
Floyd Ward (Santa Paula-Weed & Rodent Control)

Senior Agricultural Field Assistant

Carl Whittaker, Jr. (County-wide-Weed Control)

Agricultural Field Assistants

Harvey Carpenter (Weed & Rodent Control)
Glen Hackworth (Weed & Rodent Control)
Gayland Hagy (Weed & Rodent Control)
Carroll Hannah (Weed & Rodent Control)
James Hillis (Weed & Rodent Control)

Senior Account Clerks

Shirley Carter (Retired June 30, 1969)
Vicky Corona

Senior Clerk Typists

Elizabeth Smith
Ramona Chavez (Part-time) (Terminated June 30, 1969)

1969

The following are the acres devoted to major agricultural crops in Ventura County for the year 1969. The changes are the result of tree removals or additional plantings.

Non-bearing acreages are those on which the tree or plants are five years of age or less.

1970

VENTURA COUNTY

ANNUAL REPORT AND CROP STATISTICS

1970

AGRICULTURAL
COMMISSIONER

1970

VENTURA. COUNTY
DEPARTMENT OF AGRICULTURE

Agricultural Building
Santa Barbara & Eighth Streets
Santa Paula, California

HONORABLE BOARD OF
SUPERVISORS, COUNTY OF
VENTURA, CALIFORNIA

Gentlemen:

Pursuant to Section 2279 of the Agricultural Code, we submit the estimated Production, Values and Acreages of Ventura County for the calendar year 1970.

The gross value increase of \$13,489,500 shown in 1970 over 1969 is not entirely due to increased prices and increased production. By consolidating related crops under general headings we were able to protect the interest of the producer and include several single grower specialty crops not previously reported. The satisfactory returns received for a large crop and increased acreage of avocados, cabbage, celery and peppers accounted for a major portion of the increase in gross value return.

The values in this report represent Agriculture's contribution of new money to the economy of Ventura County. The values in this report are gross values and in no way reflect net income to the grower. Production costs continue to rise, in most instances at a faster rate than do the price increases to the grower.

I wish to extend my sincere appreciation to the many growers, individuals and agencies for their valuable contributions and for their willing cooperation. Their cooperative assistance made this report possible. The compilation of this report was under the direction of Supervising Inspector W. Mark Jones.

L. D. Haworth

L. D. Haworth
Agricultural Commissioner
